Introduction: Understanding Genocide as a Means to Prevention . . .	1
The Role of Neuroscience	5
Neuroscientists Almost Never Meet Non-WEIRD Populations	8
Conducting Interviews as a Research Methodology	12
Conducting the Interviews	16
The Present Book	20
A Single Life Matters	26
1. Listening to the Perpetrators of Genocide	27
The Challenge of Conducting Interviews in Rwanda and Cambodia	30
Interpreting the Interviews	39
Conclusion	56
2. A Brief History of the Experimental Research on Obedience . .	57
The Birth of Obedience Research: Insights from Early	
Experimental Studies	58
The Milgram’s Experiment on Obedience	62
Other Studies Using a Milgram-like Approach	65
Flaws in Milgram-like Studies	69
Studying Obedience in the Aftermath of Milgram’s Studies	72
A Novel Experimental Approach to Studying Obedience	74
Exploring Obedience: Why Participants Administer Painful Shocks	81
Conclusion	86
3. How Do We Take Ownership over and Responsibility for	
Our Own Actions?	87
The Sense of Agency and the Human Brain	90
Taking Responsibility for One’s Own Actions	94
Diffusion of Responsibility between Individuals	97

CONTENTS

The Neural Roots of Diminished Agency and Responsibility in Obedience Situations	102
The Impact of Highly Hierarchical Social Structures	108
Conclusion	112
4. Moral Emotions under Obedience	113
Our Brains Are Wired to Feel Empathy	114
Increased Aggression, Reduced Empathy, and Empathy Regulation	123
“Us” versus “Them”	131
Dehumanization Impacts Human Behavior	138
Obeying Orders Impacts the Neural Bases Associated with the Feeling of Guilt	142
Conclusion	146
5. Just Giving Orders? In the Brains of Those Who Command . .	147
On the Complexity of Hierarchical Chains	151
How Often Do Leaders Take Responsibility for Atrocities Conducted under Their Command?	152
Moral Decision-Making in Leadership	157
In the Brains of Commanders and Intermediaries	160
Commanding the Machine: New Challenges for Hierarchical Chains?	165
6. Desolation Is Everywhere	168
Understanding Post-Traumatic Stress Disorder	170
Stressful Events Change the Brain	173
The Unspoken Struggle of Combatants	177
The Moral Consequences of War	179
PTSD in War-Trauma Victims	183
The Concept of Resilience	187
Can the Sequelae of Trauma Be Passed Down the Generations?	190
War, Trauma, Conflict, War, Trauma, Conflict: an Endless Cycle	194
7. Conclusion: How Ordinary People Stand Up against Immorality	195
Identifying Rescuers across History	199
Who Risks Everything to Help Others?	203
The Neuroscience of Costly Helping Behaviors	207
How to Make People Disobey in a Lab Context	210
The Neuroscience of Resistance to Immoral Orders	214
Conclusion	219
Epilogue: A Hopeful Horizon	220
