Cambridge University Press & Assessment has no responsibility for the persistence
or accuracy of URLs for external or third-party internet websites referred to in this
publication and does not guarantee that any content on such websites is, or will
remain, accurate or appropriate.

Every effort has been made in preparing this book to provide accurate and up-to-date
information that is in accord with accepted standards and practice at the time of publication.
Although case histories are drawn from actual cases, the author has changed names of some
patients and altered potentially identifying details about them. The author has also
reconstructed scenes and created composite stories from thirty years of patient care
experiences. Nevertheless, the authors, editors, and publishers can make no warranties that the
information contained herein is totally free from error, not least because clinical standards are
constantly changing through research and regulation. The authors and publishers therefore
disclaim all liability for direct or consequential damages resulting from the use of material
contained in this book. Readers are strongly advised to pay careful attention to information
provided by the manufacturer of any drugs or equipment that they plan to use.
