Preface *page* xi
Introduction xiii

PART I INVERSE PROBLEMS 1

1 Bayesian Inverse Problems and Well-Posedness 3
1.1 Formulation of Bayesian Inverse Problems 3
1.2 Formula for Posterior pdf: Bayes' Theorem 4
1.3 Well-Posedness of Bayesian Inverse Problems 8
1.4 Discussion and Bibliography 18

2 The Linear-Gaussian Setting 21
2.1 Derivation of the Posterior Distribution 22
2.2 Small Noise Limit of the Posterior Distribution 24
2.3 Discussion and Bibliography 30

3 Optimization Perspective 32
3.1 The Setting 32
3.2 Theory 34
3.3 Examples 36
3.4 Gradient-Based Optimization Algorithms 39
3.5 Discussion and Bibliography 47

4 Gaussian Approximation 49
4.1 The Kullback–Leibler Divergence 50
4.2 Best Gaussian Fit by Minimizing $d_{\mathrm{KL}}(p\|\pi)$ 51
4.3 Best Gaussian Fit by Minimizing $d_{\mathrm{KL}}(\pi\|p)$ 54
4.4 Comparison Between $d_{\mathrm{KL}}(\pi\|p)$ and $d_{\mathrm{KL}}(p\|\pi)$ 55
4.5 Variational Formulation of Bayes' Theorem 56
4.6 Discussion and Bibliography 57

Table of Contents
More Information

5 Monte Carlo Sampling and Importance Sampling 59
5.1 Monte Carlo Sampling 61
5.2 Importance Sampling 63
5.3 Discussion and Bibliography 70

6 Markov Chain Monte Carlo 73
6.1 Markov Chains in $\mathbb{R}^d$ 74
6.2 Markov Chain Sampling 75
6.3 Metropolis–Hastings Sampling 78
6.4 Invariance of the Target Distribution π 80
6.5 Convergence to the Target Distribution 82
6.6 Discussion and Bibliography 89

Exercises for Part I 91

PART II DATA ASSIMILATION 99

7 Filtering and Smoothing Problems and Well-Posedness 101
7.1 Formulation of Filtering and Smoothing Problems 101
7.2 The Smoothing Problem 103
7.3 The Filtering Problem 106
7.4 Discussion and Bibliography 109

8 The Kalman Filter and Smoother 112
8.1 Kalman Filter 113
8.2 Kalman Smoother 119
8.3 Discussion and Bibliography 123

9 Optimization for Filtering and Smoothing: 3DVAR and 4DVAR 125
9.1 The Setting 126
9.2 3DVAR 126
9.3 4DVAR 129
9.4 Discussion and Bibliography 131

10 The Extended and Ensemble Kalman Filters 133
10.1 The Setting 133
10.2 The Extended Kalman Filter 134
10.3 The Ensemble Kalman Filter 137
10.4 Discussion and Bibliography 142

11 Particle Filter 144
11.1 The Setting 145
11.2 The Bootstrap Particle Filter 146
11.3 Bootstrap Particle Filter Convergence 147

Table of Contents
More Information

11.4 Random Dynamical System Formulation 151
11.5 Discussion and Bibliography 152

12 Optimal Particle Filter 153
12.1 The Bootstrap and Optimal Particle Filters Compared 153
12.2 Implementation: Linear Observation Setting 157
12.3 "Optimality" of the Optimal Particle Filter 160
12.4 Discussion and Bibliography 163

Exercises for Part II 164

PART III KALMAN INVERSION 171

13 Blending Inverse Problems and Data Assimilation 173
13.1 The Setting 173
13.2 Nonlinear Least-Squares Optimization 174
13.3 Extended Kalman Methods 177
13.4 Ensemble Kalman Methods 183
13.5 Discussion and Bibliography 188
