

## **The Cambridge Handbook of Parental Monitoring and Information Management during Adolescence**

Delve into the ideal resource for theory and research on parental monitoring and adolescents' disclosure to and concealment from parents. This handbook presents ground-breaking research exploring how adolescents respond to parents' attempts to control and manage their activities and feelings. The chapters highlight how adolescents' responses are as important for their mental health and behavior as parents' attempts to regulate them. Examining responsive, intrusive, and invasive parenting behaviors, the volume addresses modern challenges like monitoring in the digital age and medical decision-making. It covers cutting-edge research on diverse cultures and groups including Latinx, Turkish, Chinese, LGBTQ+, and chronically ill youth. The internationally recognized contributors offer insights from different theoretical perspectives and describe novel methodological approaches, focusing on variations across different developmental stages, contexts, and cultures.

JUDITH G. SMETANA is Professor of Psychology at the University of Rochester, Rochester, New York. She served as Associate Editor of *Child Development* and as Editor-in-Chief of *Child Development Perspectives*. In 2018, she received the Career Award from the Society for Research on Adolescence.

NICOLE CAMPIONE-BARR serves as Director of Undergraduate Research and Professor of (Developmental) Psychological Sciences at the University of Missouri, Columbia. She also serves as Director of the Family and Relationships Research Network of Missouri.

LAUREE C. TILTON-WEAVER is a professor and a lifespan developmental psychologist at Örebro University, Sweden. She is an assistant editor for the *Journal of Adolescence* and former series editor for Psychology Press' Studies in Adolescent Development.

## Acknowledgments

We would like to acknowledge Victoria Aceves-Power for her careful and cheerful editorial assistance on this volume, which kept us and our authors in line. We also wish to thank the authors of the chapters in this volume for their responsiveness to our deadlines and comments. We gratefully acknowledge the researchers whose work is represented in these pages, as their work has contributed so much to the field, as well as the participants whose willingness to provide information about their family relationships and interactions informed the body of work discussed in this volume. We also wish to thank the many funding agencies who have funded our and others’ research (for Nicole Campione-Barr, the National Science Foundation; for Judith Smetana, the National Science Foundation, the Fetzer Institute, and the William T. Grant Foundation; and for Lauree Tilton-Weaver, the Swedish Research Council for Health, Working Life, and Welfare). Finally, this volume arose out of many conversations about this topic at national and international meetings, where we have had the opportunity to reflect together on the different ways the research discussed here has evolved over the past two decades and on the many exciting directions for future research. We hope that this book contributes to that effort.
