Every effort has been made in preparing this Element to provide accurate and
up-to-date information which is in accord with accepted standards and practice at the
time of publication. Although case histories are drawn from actual cases, every effort
has been made to disguise the identities of the individuals involved. Nevertheless,
the authors, editors and publishers can make no warranties that the information
contained herein is totally free from error, not least because clinical standards are
constantly changing through research and regulation. The authors, editors and
publishers therefore disclaim all liability for direct or consequential damages resulting
from the use of material contained in this Element. Readers are strongly advised to pay
careful attention to information provided by the manufacturer of any drugs or
equipment that they plan to use.
