Preface	xxv
Introduction	1
0.1 The Broad Road Map of Behavioral Economics	3
0.2 What Constitutes Good Science?	5
0.2.1 The Scientific Method	5
0.2.2 The Scientific Method in the Natural Sciences	6
0.2.3 The Scientific Method in Economics	7
0.3 Data and Methods in Behavioral Economics	10
0.4 Some Misconceptions about Behavioral Economics	18
0.5 About This Book	20
0.6 Designing Courses in Behavioral Economics	21
References	25
Part I Behavioral Decision Theory	29
Introduction to Part I	31
1 The Traditional Approach to Decision Making under Risk and Subjective Uncertainty	33
1.1 Introduction	33
1.2 A Taxonomy of Situations	34
1.2.1 Risk	35
1.2.2 Subjective Uncertainty	35
1.2.3 Ambiguity	36
1.2.4 True Uncertainty	37
1.3 The Neoclassical Approach to Risk	37
1.3.1 Expected Utility Theory	38
1.3.2 Attitudes to Risk under EUT	40
1.3.3 The Allais Paradox	42
1.4 Preference Foundations	44
2 Modern Approaches to Decision Making under Risk and Subjective Uncertainty	50
2.1 Introduction	50
	ix

2.2	Nonlinear Probability Weighting	51
2.3	Rank Dependent Utility	55
2.3.1	Optimism and Pessimism	56
2.3.2	Attitudes to Risk under RDUT	57
2.3.3	An Example Where EUT and RDUT Fail	58
2.4	Prospect Theory	59
2.4.1	Lotteries in Incremental Form	59
2.4.2	Utility Function under Prospect Theory	60
2.4.3	The Prospect Theory Value Function	62
2.4.4	Attitudes to Risk under Prospect Theory	66
2.5	Applications of Prospect Theory	67
2.5.1	The Endowment Effect	67
2.5.2	Why Is It So Hard to Find a Taxi on a Rainy Day in New York?	69
2.5.3	Why Do People Pay Taxes?	70
2.5.4	Evolution and Loss Aversion	71
2.5.5	Is Tiger Woods Loss Averse?	73
2.5.6	Human Behavior for Low Probability Events	74
2.5.7	Prospect Theory and Finance	75
2.5.8	Incentives in Organizations	76
2.5.9	Reference Points, Renegotiation, and the Formation of Firms	79
2.6	A Note on the Ellsberg Paradox	82
	References	84
	Problems for Part I	86
	Part II Other-Regarding Preferences	91
	Introduction to Part II	93
3	The Evidence on Other-Regarding Preferences, Morality, and Ethics	95
3.1	Introduction	95
3.2	Fixing Ideas about Conditional Reciprocity: Ultimatum Game	97
3.3	Wage Determination in Firms: The Gift Exchange Game	100
3.4	Trust and Trustworthiness: The Trust Game	105
3.5	Social Dilemmas and Managing the Commons: The Public Goods Games	111
3.6	A Note on the Distinction between Altruism and Conditional Reciprocity	120
3.7	Social Sanctions in WEIRD and Non-WEIRD Societies	122
3.8	“Out of Africa” and the Evolutionary Origins of Preferences	124
3.9	Social Identity	126
3.10	Human Virtues, Morality, and Ethics	129
3.10.1	A Selection of Results From Empirical Studies on Lying	131
3.10.2	A Note on Markets and Ethicality	135
3.10.3	The Effectiveness of Apologies	136
3.11	External Validity of Lab Experiments	138

	Contents	xi
4 Theoretical Models and Applications of Prosocial Behavior		142
4.1 Introduction		142
4.2 Models of Other-Regarding Preferences		143
4.2.1 Inequity Aversion: The Fehr–Schmidt Model		143
4.2.2 The ERC Model		145
4.2.3 Models of Interdependent Preferences		149
4.2.4 The Charness–Rabin Model		150
4.3 Social Identity and Inequity Aversion in the Ultimatum Game		152
4.4 Political Economy and Other-Regarding Preferences		155
4.5 Optimal Employment Contracts		164
4.5.1 Traditional Approach to Incentives in Economics		165
4.5.2 Trust Contracts and Bonus Contracts under Self-Regarding Preferences		167
4.5.3 Trust and Bonus Contracts under Other-Regarding Preferences		168
4.5.4 Incomplete Contracts and the Theory of the Firm		174
4.5.5 A Note on Observable but Non-Verifiable Information		175
4.5.6 Evidence on the Choice of Incomplete Contracts		177
4.6 Are Humans Motivated Only by Economic Incentives?		181
References		186
Problems for Part II		193
Part III Behavioral Time Discounting		197
Introduction to Part III		199
5 The Traditional Approach to Time Preferences		201
5.1 Introduction		201
5.2 Fixing Basic Ideas in Temporal Choice		202
5.2.1 Preferences over Outcome–Time Pairs		202
5.2.2 The Utility Representation of Preferences		204
5.3 The Traditional Approach: Exponential Discounted Utility Model		205
5.3.1 A Refresher on Simple and Compound Interest Rates		205
5.3.2 The Exponential Discounted Utility Model		207
5.3.3 The Class of Discounted Utility Models		210
5.3.4 Time Preferences and the EDU Model		211
5.4 Empirical Evidence on the Exponential Discounted Utility Model		213
5.4.1 Magnitude Effect		213
5.4.2 Gain–Loss Asymmetry		213
5.4.3 Violation of Stationarity and Taste for Immediate Gratification		214
5.4.4 Choices over Consumption Profiles		214
5.4.5 Subadditive Discounting		218
5.5 Summary		219

6 Behavioral Approaches to Time Preferences	220
6.1 Introduction	220
6.2 Hyperbolic Discounting	221
6.3 Estimating Discount Rates	225
6.4 Multiple Selves and Awareness of Future Self-Control	229
6.4.1 Degrees of Awareness of Future Self-Control Problems	230
6.4.2 Empirical Evidence on the Degree of Self-Awareness	231
6.5 Life Cycle Models and Hyperbolic Discounting	232
6.5.1 The Benchmark Case of Time Consistent Preferences	235
6.5.2 Naïf Individuals	235
6.5.3 Sophisticated Individuals	236
6.5.4 Illiquid Assets and Retirement Decisions	237
6.6 Procrastination and Preproperation	237
6.6.1 Immediate Costs and Future Benefits	238
6.6.2 Immediate Benefit and Future Costs	241
6.6.3 Empirical Evidence on Procrastination	244
6.7 Dynamically Consistent Temptation Preferences	245
6.8 Commitment Devices	246
6.9 A Note on Risk and Time Preferences	250
6.10 A More General Psychological Approach	250
References	254
Problems for Part III	258
 Part IV Behavioral Game Theory	 261
Introduction to Part IV	263
 7 Introduction to Behavioral Game Theory	 266
7.1 Introduction	266
7.2 Static Games of Complete Information	268
7.2.1 The Prisoner's Dilemma Game and Basic Terminology	268
7.2.2 Pure Strategy Nash Equilibrium	270
7.2.3 Iterated Deletion of Dominated Strategies When There Are More than Two Strategies	271
7.2.4 Mixed Strategies	272
7.3 Dynamic Games of Complete Information	277
7.3.1 An Introduction to the Basic Concepts	277
7.3.2 An Analysis of the Centipede Game	281
7.4 Human Cooperation in Repeated Games	283
7.5 Cooperation as a Historical Accident	285
7.6 A Brief Note on Incomplete Information	288
7.7 Coordination Failures	290

	Contents	xiii
7.8 Models in Behavioral Game Theory		294
7.8.1 The Level-k Model		295
7.8.2 The Cognitive Hierarchy Model		303
7.8.3 Quantal Response Equilibrium (QRE)		307
7.8.4 Cursed Equilibrium		314
7.9 Social Rationality, Norms, and Cooperation		317
7.9.1 Social Rationality		318
7.9.2 Correlated Equilibrium		321
7.10 Using Simple Heuristics to Solve Games		328
8 Topics in Behavioral Game Theory		330
8.1 Introduction		330
8.2 Winner’s Curse in Auctions		331
8.3 Bargaining and Conflict		334
8.3.1 The Nash Bargaining Solution		334
8.3.2 Alternating Offers Bargaining		337
8.3.3 Testing the Predictions of Alternating Offers Bargaining with Mouselab Software		339
8.3.4 Bargaining Impasse and Negotiation Models		341
8.4 Evolutionary Game Theory		343
8.4.1 Evolutionary Stable Strategies (ESS)		343
8.4.2 Replicator Dynamics		347
8.4.3 Further Topics in Evolutionary Game Theory		352
8.4.4 Advanced Topic 1: Non-Existence of an Asymptotically Stable Equilibrium		353
8.4.5 Advanced Topic 2: Evolutionary Stable Strategies in Mixed Strategies		356
8.5 A Note on Stochastic Social Dynamics		357
8.6 Psychological Game Theory		359
References		371
Problems for Part IV		377
Part V Bounded Rationality		383
Introduction to Part V		385
9 Bounded Rationality I		389
9.1 Introduction		389
9.2 Some Violations of the Neoclassical Rationality Assumptions		390
9.2.1 Completeness and Transitivity of Preferences		390
9.2.2 Limited Attention		392
9.2.3 Overconfidence		394
9.2.4 Can Humans Successfully Construct the Full Sampling Distributions?		397
9.2.5 Difficulty in Distinguishing between Necessary and Sufficient Conditions		400

xiv Contents

9.3	Procedural Rationality and Dynamic Programming	400
9.4	The Kahneman–Tversky Heuristics Research Program	404
9.4.1	The Representativeness Heuristic	404
9.4.2	Representativeness: The Gambler’s Fallacy	405
9.4.3	Representativeness: The Hot Hand Fallacy	406
9.4.4	How Can Representativeness Explain Event A and the Negation of Event A?	408
9.4.5	Anchoring	409
9.4.6	Availability	410
9.4.7	Hindsight-Bias	411
9.4.8	Conjunction Fallacy	415
9.4.9	Do People Conform to Bayes’ Law?	417
9.4.10	Reconciling Conservatism and Base Rate Neglect	419
9.4.11	Other Heuristics in the Heuristics Program	422
9.4.12	Attribute Substitution	426
9.5	Do Incentives Eliminate Biases?	426
9.6	The Gigerenzer Fast and Frugal Heuristics Program	430
10	Bounded Rationality II	435
10.1	Introduction	435
10.2	Mental Models	436
10.3	Narrow Bracketing and Broad Bracketing	440
10.4	The Diversification Heuristic	441
10.5	Transaction Utility and Acquisition Utility	442
10.6	Mental Accounting	443
10.6.1	Mental Accounting and Consumption Choices	446
10.6.2	Prospect Theory and Mental Accounting	448
10.6.3	Prepaying for Vacations and Postpaying for Consumer Durables	450
10.6.4	Sunk Costs and Opportunity Costs	453
10.6.5	Mental Account and the Source of Earnings	456
10.6.6	A Note on the Behavioral Economics of Retirement Savings	458
10.7	Projection-Bias	460
10.8	Aspiration Adaptation	464
10.9	Bounded Rationality in Financial Markets	467
10.9.1	The Basic Assumptions on Human Behavior	467
10.9.2	The Basics of Arbitrage and Risk in Financial Markets	468
10.9.3	Efficient Markets Hypothesis	470
10.9.4	Evaluating the Theoretical Case for Efficient Markets	472
10.9.5	Evaluating the Empirical Case for Efficient Markets	475
10.9.6	A Brief Note on Behavioral Corporate Finance	482
	References	485
	Problems for Part V	501

	Contents	xv
Part VI Further Topics in Behavioral Economics		507
Introduction to Part VI		509
11 A Smorgasbord of Topics in Behavioral Economics		513
11.1 Introduction		513
11.2 Happiness Economics		515
11.2.1 The Issue of Appropriate Foundations		518
11.2.2 Relation between Income and Well-Being: The Easterlin Paradox		527
11.2.3 Other Correlates of Subjective Well-Being		537
11.3 Behavioral Industrial Organization		545
11.3.1 Phishing for Phools		546
11.3.2 The Effects of Limited Attention		550
11.4 Salience		558
11.5 Modelling Limited Attention		569
11.6 Complexity Economics		573
11.6.1 An Introduction to Complexity Economics		573
11.6.2 The El Farol Problem		578
11.6.3 Increasing Returns and Technological Choice		580
11.6.4 Chaos and Sensitivity to Initial Conditions		584
11.6.5 Agent-Based models		586
11.7 Learning Models		587
11.7.1 Reinforcement Learning		587
11.7.2 Belief-Based Models of Learning		590
11.8 Competitive Equilibrium Experiments		592
11.8.1 The Market Experiments by Chamberlin (1948)		594
11.8.2 Double Auction Experiments		596
11.8.3 Other Approaches		598
11.8.4 What Do We Learn from this Evidence?		599
References		601
12 Behavioral Welfare Economics		611
12.1 Introduction		611
12.2 The Basics of Neoclassical Welfare Economics		612
12.3 Behavioral Evidence and the Implications for Welfare Economics		614
12.4 Alternative Forms of Paternalism		616
12.5 Libertarian Paternalism		619
12.5.1 The Informed Desire Criterion		620
12.5.2 Choice Architects		623
12.5.3 Two Misconceptions in Neoclassical Welfare Economics		623
12.5.4 Some Empirical Evidence for the Effectiveness of Nudges		625
12.6 Asymmetric Paternalism		627
12.7 A Pragmatic Approach		627

xvi	Contents	
	12.8 Evaluating the Criticisms of Soft Paternalism	628
	12.9 Optimal Sin Taxes	633
	12.10 Behavioral Public Economics	636
	12.10.1 Limited Attention and Deadweight Losses from Taxation	636
	12.10.2 Tax Incidence and Limited Attention	643
	12.10.3 Optimal Sugar Taxes	647
	References	653
	Problems for Part VI	657

	13 Neuroeconomics	
	This chapter is online only and can be found at http://cambridge.org/dhami	
	13.1 Introduction	1
	13.2 The Anatomy of the Human Brain	2
	13.2.1 The Brain Lobes and Brain Orientation	2
	13.2.2 The Thalamus and the Limbic System	5
	13.2.3 The Neuron	3
	13.3 Techniques to Measure Brain Activity	9
	13.3.1 Positron Emission Tomography (PET)	10
	13.3.2 Functional Magnetic Resonance Imaging (fMRI)	11
	13.3.3 Brain Manipulation Techniques	11
	13.3.4 Brain Lesion Studies	12
	13.4 Subjective Value Representation in the Brain	12
	13.4.1 Reinforcement Learning and Prediction Errors	12
	13.4.2 Which Brain Regions Encode Subjective Values?	15
	13.5 Sequential Sampling: The Drift-Diffusion Process	16
	13.5.1 The Basic Model	16
	13.5.2 An Application to Limited Attention and Response Times	19
	13.6 Establishing Causality in Neuroeconomics	23
	13.7 The Neural Foundations of Punishment	25
	13.8 Neuroeconomic Foundations of Human Behavior	27
	13.8.1 Behavioral Decision Theory	27
	13.8.2 Other-Regarding Preferences	29
	13.8.3 Time Preferences and Neuroeconomics	31
	13.8.4 Game Theory and Neuroeconomics	32
	13.8.5 Social Identity and Neuroeconomics	34
	13.9 Using Neuroeconomic Insights to Explain Economic Behaviors	38
	References	43
