

THE CAMBRIDGE HANDBOOK OF HYDROGEN AND THE LAW

The Cambridge Handbook of Hydrogen and the Law is the first comprehensive reference work on the regulation of this key area. It is global in scope, featuring chapters that explain the legal situation on hydrogen in Europe, the USA, Latin America, Oceania, the Middle East/North Africa and Southeast Asia. It includes chapters covering all relevant legal aspects of the hydrogen value chain from production to end use, making it the first in-depth work on the interplay of hydrogen and the law. Leading scholars and practitioners discuss the creation of hydrogen markets, the role of local authorities, sustainability and public participation in hydrogen regulation, offshore hydrogen, the regulation of hydrogen transportation and storage, indigenous perspectives on hydrogen, the regulation of hydrogen in the heating sector and the regulation of electricity storage in the form of hydrogen. This title is also available as Open Access on Cambridge Core.

Ruven Fleming is Assistant Professor of Energy Law and Scientific Coordinator of the Groningen Center of Energy Law and Sustainability at the University of Groningen, the Netherlands. He is working as Legal Project Manager on hydrogen projects at the DBI Gastechology Institute, Technical University Freiberg, Germany. His research interest is energy law, with a particular focus on hydrogen, ‘unconventional’ forms of energy production, renewable energy and energy investment and trade law.

Fleming has published widely on hydrogen regulation in various outlets. He is an editor of the standard reference work *Encyclopedia of Energy Law, Climate Change and the Environment* (2021) and a number of other energy law books. He also authored the monograph *Shale Gas, the Environment and Energy Security* (2017) and has written numerous book chapters as well as articles in international law journals. Fleming is a member of the editorial board of the Elgar *European Energy & Climate Journal*. He regularly advises governments and national parliaments on energy law-related issues and has received grants from the European Commission and the Dutch Science Organization (NWO) as well as other European and national organisations for various research and educational projects.

He undertook undergraduate law studies in Germany at the University of Marburg and went on to study Russian at Moscow State University Lomonossow/Russia as well as gaining work experience at a Russian/German law firm in Moscow. Prior to the commencement of his research in Groningen, he received a master’s degree in oil and gas law (LLM) as well as a PhD in law from the University of Aberdeen, UK.

Fleming is Scientific Coordinator of the Groningen Center of Energy Law and Sustainability (GCELS), Secretary of the North Sea Energy Law Partnership, Member of the IUCN World Commission on Environmental Law, Member of the Operating Committee of the International Association of Energy Law, a frequent speaker at events of the Dutch Association for Energy Law and a reviewer for public funding bodies and international publications. He may be contacted in English, Russian, German or Dutch.

NAMES: Fleming, Ruven, editor.
TITLE: The Cambridge handbook of hydrogen and the law / edited by Ruven Fleming, Rijksuniversiteit Groningen, The Netherlands.
DESCRIPTION: First edition. | Cambridge, United Kingdom ; New York, NY : Cambridge University Press, 2024. | Series: Cambridge law handbooks | Includes bibliographical references and index.
IDENTIFIERS: LCCN 2024023237 (print) | LCCN 2024023238 (ebook) | ISBN 9781009459235 (hardback) | ISBN 9781009459266 (paperback) | ISBN 9781009459259 (epub)
SUBJECTS: LCSH: Natural gas—Law and legislation. | Hydrogen as fuel—Research—Law and legislation. | Hydrogen as fuel—Transportation—Government policy . | Renewable energy sources—Law and legislation. | Clean energy. | Energy policy.
CLASSIFICATION: LCC K3983 .C36 2024 (print) | LCC K3983 (ebook) | DDC 343.07/866581—dc23/eng/20240527
LC record available at <https://lcn.loc.gov/2024023237>

1 Introduction	1
Ruven Fleming	
PART I CURRENT HYDROGEN REGULATION ON THE CONTINENTS	
2 Hydrogen Regulation in Europe: The EU’s ‘Hydrogen and Decarbonised Gas Market’ – Best Practice or Missed Opportunity?	13
Leigh Hancher and Simina Suciu	
3 Hydrogen Regulation in the United States: Will Government Financial Incentives Outweigh Regulatory Hurdles?	30
Donna M. Attanasio and Meghan Briggs	
4 Hydrogen Regulation in Latin America: From Promise to Production	46
Howard James Foy	
5 Hydrogen Regulation in Oceania: Enabling Renewable Hydrogen Licensing on Complex Land Uses	65
Madeline Taylor	
6 Hydrogen Regulation in the Middle East and North Africa Region: Trends, Limitations, and Ways Forward	84
Damilola S. Olawuyi and Mehrmoosh Aryanpour	
7 Hydrogen Regulation in Southeast Asia: Steam Reforming from Biofuels as an Alternative to Electrolysis?	98
Piti Eiamchamroonlarp	

PART II REGULATING HYDROGEN MARKETS		
8	Economics of Regulating Hydrogen Markets Machiel Mulder	115
9	The Role of Regional and Local Authorities in Developing a Regional Hydrogen Economy Ceciel Nieuwenhout	129
10	Sustainability Criteria for Renewable Hydrogen Romain Mauger, Paola Villavicencio-Calzadilla and Ruven Fleming	142
11	Public Participation in the Hydrogen Economy: Lessons Learned from the Northern Netherland Hydrogen Valley Lorenzo Squintani and Stan Schouten	158
PART III REGULATING HYDROGEN PRODUCTION		
12	Offshore Production and Transport of Green Hydrogen: A Case Study on Denmark and the Netherlands Liv Malin Andreasson	173
13	How to Build Your Own Electrolyser: Pitfalls and Challenges of the Permitting Procedures in Finland Elena Tissari	189
14	Giving Hydrogen the Green Light and Putting It on the Fast-Track? Consenting Hydrogen Developments in Aotearoa New Zealand Jennifer Campion	201
PART IV REGULATING HYDROGEN TRANSPORT		
15	Accelerating Permission: Hydrogen Transport and Storage Regulation – A German Case Study Cathérine Jansen	217
16	Goal-Setting Approaches to the Regulation of Hydrogen Transport: A Case Study from France Kleopatra-Eirini Zerde	233
17	The Development of Hydrogen Infrastructure in the Netherlands and Third-Party Access Maaïke Broersma, Philipp Jäger and Marijn Holwerda	245
PART V END USE OF HYDROGEN		
18	The Regulation of Hydrogen in the Transport Sector: Focus on Refuelling Stations Endrius Coccio	263

	<i>Contents</i>	ix
19	The Regulation of Hydrogen Storage as End Use Kaisa Huhta and Markus Sairanen	277
20	The Regulation of Hydrogen in the Heating Markets Pim Jansen and Leonie Reins	291
21	Conclusion Ruven Fleming	306
	<i>Index</i>	313

Figures

2.1 The coloured H2 types	<i>page</i> 17
8.1 Supply chain of hydrogen	121
17.1 HyWay 27: Realisation of a national hydrogen network	248
17.2 Three-stage approach towards a full regulatory network	254
18.1 Global emissions from transport	264

Tables

3.1 Applicable clean hydrogen production tax credit by emissions level	<i>page</i> 37
3.2 Applicable clean hydrogen investment tax credit by emissions level	37
3.3 Summary of hub proposals selected for further negotiation, 2023	39
4.1 Chile’s hydrogen regulatory agenda	53
4.2 Colombia’s hydrogen regulatory agenda	56
4.3 Brazil’s hydrogen regulatory agenda	58

Contributors

Liv Malin Andreasson is an expert on the legal framework for green hydrogen production in the North Sea and has published comprehensively on that topic. She is currently pursuing a PhD in Energy Law at the Groningen Centre of Energy Law and Sustainability. In her current research, she focuses on the legal aspects of large-scale offshore wind energy development and the deployment of new energy storage and transport alternatives in the North Sea. This research is funded by NWO under the PhD@Sea Programme (Developing Offshore Storage and Transport Alternatives (DOSTA)).

Mehrnoosh Aryanpour, an energy and regulatory attorney, has held significant positions in major law firms in the USA and established the first international law firm branches in Afghanistan in 2010 and Iran in 2017, following the Joint Comprehensive Plan of Action (JCPOA). She is pursuing an SJD (doctorate in law) at the University of Pennsylvania's Carey Law School, focusing on the impact of US economic sanctions on global climate change efforts. She received the Jacobson Global Venture Awards for founding Project Green Swan, which aims to facilitate energy transitions in fragile states through a dynamic platform focused on engineering, procurement, construction, and financing solutions, with an initial focus on methane flaring reduction. Aryanpour holds an LLB from the University of Tehran and an LLM from Georgetown University. Her academic achievements include securing first place in Iran's National Entrance Exam of over 500,000 students and receiving the Presidential Award as the top humanities student, as well as winning numerous Olympiads in Iran.

Donna M. Attanasio is Director of the Energy Law Program at George Washington University Law School (GW Law), a professorial lecturer in law and head of the Law School's Sustainable Energy Initiative. Attanasio's thirty-five years of experience in the energy sector include over twenty-four years as a lawyer in private practice. Prior to joining GW Law in 2013, she was a partner at White & Case LLP. Her primary areas of research, writing and teaching concern the electric utility industry and its transition to a sustainable fuel mix, with an emphasis on consumer protection and issues related to the deployment of microgrids, electric vehicles and other emerging technologies. She is a former president of the Energy Bar Association and fellow of the National Regulatory Research Institute. Attanasio received her JD from Harvard Law School and an AB in Economics from Smith College.

Meghan Briggs is a recent graduate of the George Washington University Law School. As a JD student, she focused her research and advocacy work on clean energy and environmental justice,

completing an internship at the US Federal Energy Regulatory Commission and engaging in regulatory advocacy as a member of the Jacob Burns Environmental Justice Community Legal Clinic. Prior to law school, Briggs received a Fulbright grant to teach English in Belgium and earned an MS in European Politics and Policies from the University of Leuven.

Maaïke Broersma is a business developer at Gasunie in Groningen, the Netherlands. She studied international relations and international organisations as well as American studies at the University of Groningen (RuG), the Netherlands. Broersma started her career at Gasunie in contract management for several of Gasunie's subsidiaries. She has multiple years of experience in the development of hydrogen infrastructure projects, with a focus on the development of the Gasunie onshore hydrogen infrastructure in the past few years.

Jennifer Campion is a lecturer and member of the Centre for Environmental, Resources and Energy Law at the University of Waikato, Hamilton, New Zealand. Campion's research interests are in energy and natural resources law, environmental law and property law, and she has recently authored publications on climate change mitigation and energy justice.

Endrius Coccio is Associate Professor of Administrative and Energy Law at Universitat Rovira i Virgili (URV), Tarragona, Spain. He is the Academic Director of the Interuniversity Master of Law of Public Administration, URV – Universidad de Zaragoza. Coccio is a researcher at the Tarragona Centre for Environmental Law Studies (CEDAT) and the University Institute for Research in Sustainability, Climate Change and Energy Transition (IU-Rescat). He also co-chaired the Research Committee at the International Union for Conservation of Nature – Academy of Environmental Law (IUCN-AEL) and currently a member of the Managing Board of the European Environmental Law Forum (EELF). He is currently the coordinator of a Horizon MSCA Doctoral Network project on hydrogen regulation and the PI of a project of the Spanish Ministry of Innovation on Energy Communities.

Piti Eiamchamroonlarp is Director of the LLM in Business Law (International Program) at Chulalongkorn University (Thailand) and also a special lecturer at Thammasat University (Thailand). Eiamchamroonlarp has served as a member of the Education Advisory Board of the Association of International Petroleum Negotiators (AIPN). He has been appointed a member of the sub-committee on energy businesses laws examination and development (Energy Regulatory Commission) and an arbitrator of Thailand Arbitration Center (THAC) for energy and investment disputes. His current research project explores potential roles of the Department of Energy Business of Thailand in promoting and regulating utilisation of green and low-carbon hydrogen in the transport sector in Thailand.

Ruven Fleming is Assistant Professor of Energy Law at the University of Groningen and works as Legal Project Manager on hydrogen projects at the German Fuel Institute (DBI), TU Freiberg, Germany. His research interest is energy law, with a particular focus on hydrogen, 'unconventional' forms of energy production, renewable energy and energy investment and trade law. He has published widely on hydrogen regulation in various publishing outlets. He may be contacted in English, Russian, German or Dutch.

Howard James Foy is an international energy lawyer with a background in international arbitration. He holds a law degree (Abogado) from the Universidad Torcuato Di Tella, where he graduated with honours, and an LLM in Energy and Climate Law from the University of Groningen. Foy currently serves as counsel at Óptima Energía in Argentina, where he focuses on the legal project management of large-scale renewable energy solutions. Prior to his current

position, he represented sovereign states and state-owned entities before the International Centre for Settlement of Investment Disputes (ICSID), the Permanent Court of Arbitration (PCA), and the International Criminal Court (ICC) on numerous high-profile investment and commercial arbitration cases. His areas of interest include the hydrogen economy, renewable energies and international energy disputes and contracts. Foy is currently pursuing a second LLM in International Commercial Law, also at the University of Groningen.

Leigh Hancher graduated from the University of Glasgow and obtained her PhD at the University of Leiden. She is Professor of European Law at the University of Tilburg, Professor of EU Energy Law at the Florence School of Regulation – at the European University Institute, Florence and Professor of Energy Markets Law at the University of Bergen.

Marijn Holwerda is an in-house counsel at Gasunie in Groningen, the Netherlands. He currently advises on several Gasunie hydrogen projects related to onshore hydrogen transport. Holwerda is a guest lecturer at both the University of Groningen (RUG) and the Vrije Universiteit Amsterdam (VU), Netherlands, a fellow of the Groningen Centre of Energy Law and Sustainability and a member of the board of advisors for the VU International Business Law Master on Climate Change and Corporations.

Kaisa Huhta is an associate professor of European law, especially energy law, at the University of Eastern Finland (UEF) Law School and the Centre for Climate Change, Energy and Environmental Law, a part-time professor at the European University Institute's Florence School of Regulation and an expert member of the Finnish Market Court.

Philipp Jäger is an in-house counsel at Gasunie in Groningen, the Netherlands. He is a German-qualified lawyer with more than fifteen years' experience in the natural gas sector in the Netherlands. Jäger currently advises on several Gasunie hydrogen projects in the Netherlands and Germany, such as hydrogen underground storage near Groningen and offshore hydrogen infrastructure. He is also serving as guest lecturer at the University of Groningen, Netherlands.

Cathérine Jansen is a qualified lawyer at NOW GmbH, a federally owned company in Berlin, Germany, tasked with implementing climate-neutral mobility strategies on behalf of the federal government. She was previously an associate lawyer at the law firm Freshfields Bruckhaus Deringer, where she worked for five years. In 2023 she successfully completed the LLM programme Energy and Climate Law at the University of Groningen, where she focused her research on Germany's hydrogen infrastructure. She attended law school at the University of Bremen and undertook her legal traineeship at the German Higher Regional Courts of Oldenburg and Berlin.

Pim Jansen is Full Professor of Economic Administrative Law at the Erasmus University Rotterdam and a senior associate lawyer at Van Doorne, both in the Netherlands. Before joining the Erasmus School of Law he worked as a senior associate lawyer at De Brauw Blackstone Westbroek. Subsequently he pursued a PhD at the Consumer, Competition & Market Institute at KU Leuven.

Romain Mauger is head of the Legal Research Unit at the Iberian Centre for Research in Energy Storage (CIIAE), located in Cáceres, Spain. A former assistant professor of Energy Law at the Groningen Centre of Energy Law and Sustainability (GCELS) – University of Groningen, Netherlands, he has over ten years of experience in the energy sector. Mauger's research tackles energy law for the transition to renewable energy sources in a broad sense,

encompassing technology-related aspects to issues of energy democracy and fairness. Among other aspects, his research covers the new regulation of hydrogen produced from renewable energy sources in the EU and related issues of justice in and with Global South countries (especially Africa and South America).

Machiel Mulder is Professor of Energy Economics at the University of Groningen and head of the Centre for Energy Business and Economics Research. His research and teaching are directed at the economic analysis of energy markets and energy policy. Previously he was, among others, Chief Economic Adviser to the Dutch energy regulator (ACM) and head of the Energy Department of the Netherlands Bureau for Economic Policy Analysis (CPB). He has published numerous articles on the economics of energy markets and he is also author of the textbook *Regulation of Energy Markets*, which is published by Springer.

Ceciel Nieuwenhout works as an assistant professor at the Groningen Centre for Energy Law and Sustainability. She specialises in the regulation of the energy sector. Current research projects include the legal framework for ‘Positive Energy Districts’ (including the integration of supply, demand, storage and mobility within a district); as well as the regulation of an (offshore) HVDC electricity grid, a subject on which she also wrote her PhD dissertation. Alongside her work for academia, Nieuwenhout is an elected representative for the city council of Groningen (for ‘GroenLinks’).

Damilola S. Olawuyi is a professor of law and holder of the UNESCO Chair in Environmental Law and Sustainable Development at Hamad Bin Khalifa University (HBKU) College of Law, Doha, Qatar. He is also Chancellor’s Fellow and Director of the Institute for Oil, Gas, Energy, Environment and Sustainable Development (OGEES Institute), Afe Babalola University, Ado Ekiti, Nigeria. He is an independent expert of the Working Group on Extractive Industries, Environment, and Human Rights Violations in Africa, formed by the African Commission on Human and Peoples’ Rights.

Leonie Reins is Professor of Public Law and Sustainability at the Erasmus University Rotterdam in the Netherlands. Prior to that, she was an assistant professor at Tilburg University and a post-doctoral research fellow at KU Leuven, Belgium, where she also obtained her PhD. Her doctoral thesis dealt with the issue of the coherent regulation of energy and the environment in the EU. In addition, she has worked for Milieu Ltd, a Brussels-based environmental law consultancy.

Markus Sairanen is a doctoral researcher at the University of Eastern Finland’s Centre for Climate Change, Energy and Environmental Law. His doctoral research focuses on the interaction between EU law and EU policies for accelerating the energy transition. He holds an LLM in Environmental and Climate Change Law and a BA in History from the University of Eastern Finland. Outside academia, he has advised companies in the energy sector on cross-border projects and transactions.

Stan Schouten holds an LLB in Global Law and an LLM in Energy and Climate Law. His contribution to this book was part of his student assistant job during his LLM. His research is dedicated to critically analysing the sustainability of energy and climate law and policy, reflecting his commitment to advancing environmental justice and legal frameworks.

Lorenzo Squintani is Professor of Energy Law at the University of Groningen, Netherlands, and director of the Wubbo Ockels School for Energy and Climate. He is also founder and member of the managing board of the Like!Me Living Lab, which studies how to improve the

effectiveness of public participation practices in the field of energy and environmental matters. Squintani is also founder and member of the managing boards of the European Environmental Law Forum (EELF.info) and the U4 Environmental Law Network. He is chief editor of the *Journal for European Environmental and Planning Law* (JEEPL) and series editor of the EELF Book Series. His research and teaching interests include EU substantive law and EU environmental, energy and climate law. Squintani has authored several publications in the areas of European environmental, energy and climate law. He regularly advises Dutch, EU and/or international institutions on (EU) environmental, energy and climate issues.

Simina Suci is a European lawyer specialising in energy and competition law. Her experience was gathered in private practice in Brussels and Bucharest, as well as in-house in Switzerland. She is currently leading the compliance activities of a large European company in the energy sector. She has an LLM in competition law from Queen Mary University of London and annual energy training from Florence School of Regulation.

Madeline Taylor is a senior lecturer at Macquarie University, Australia, deputy director of the Centre for Energy and Natural Resources Innovation and Transformation (CENRIT) at Macquarie University and honorary associate at the Sydney Environment Institute. Taylor specialises in issues at the intersection of energy and natural resources law, as well as property and commercial law. Her research advances the novel examination of transitioning energy regulation and energy policy from comparative and socio-legal perspectives, including the strategic governance of energy and the fragmentation of ownership rights, and the regulation of energy conflicts offshore and onshore. Her current research focuses on the law concerning renewable energy and hydrogen development, landholder rights and community responses, and the protection of sensitive land uses.

Elena Tissari is a European lawyer specialising in energy and technology law. She has an LLM in Energy and Climate Law and an LLB in International and European Law with a specialisation in technology law from the University of Groningen.

Paola Villavicencio-Calzadilla is a legal consultant and researcher specialising in climate change law. Her main areas of interest include climate change law, climate and energy justice, environmental law and sustainability, and rights of nature. She has authored and co-authored several academic publications on these topics and presented her work at numerous conferences in Europe, Africa, Asia and Latin America. Currently, she is a legal consultant at INSTA-Dret Ambiental, Diàleg i Sostenibilitat, associate researcher at the Tarragona Centre for Environmental Law Studies (CEDAT) of the Universitat Rovira i Virgili (Spain) and extraordinary research fellow at the Faculty of Law of the North-West University (South Africa).

Kleopatra-Eirini Zerde is a legal officer at the Directorate-General for Energy (DG ENER) of the European Commission. She is involved with the Renewable Energy Directive (RED) II Revision and Transposition and is responsible for dealing with citizens' infringement complaints, tenders, and contracts. Zerde is an EU-qualified lawyer with a specialisation in energy and climate law. After graduating from Athens Law School in 2017, parallel to her minor degree in Environmental Studies from the American College of Greece, she completed an LLM in Energy and Climate Law at the Groningen University in the Netherlands. Her thesis was a case study of the legal and regulatory system in France and its ability to facilitate the deployment of hydrogen and power-to-gas.

Acknowledgements

Academics are not immune to arrogance. The world of academia can be quite self-referential. It is important to never forget who actually makes our work possible. There are so many heroes out there who fix the cars, trains or buses that we use, grow our food and take care of our children while we are all busy doing our research. Among these people who made this book possible, I would like to thank: Tobias Baumann, Deike Diekmann, Corinna Lubitz, Tanja and Viktor Nazarenus, Miriam Sobzcak, and the entire farming family Freese. You are the real heroes!

Furthermore, I would like to acknowledge the extraordinary work of the stellar authors who dedicated time and effort to this book project. These brilliant minds created the first comprehensive overview of hydrogen and the law. Nobody said ‘this is too tricky’, and everybody stayed calm and just continued with the task, even when yet another review of their chapter arrived on their desk. Without the continued encouragement and support of all colleagues participating in this book, it would not have seen the light of day.

Finally, I would like to acknowledge the support of other people and institutions, as this book would not exist without them. First, I would like to thank Stan Schouten, who helped me during the final steps of the manuscript. Moreover, I am indebted to Kelsey Pailman for the hydrogen discussions we had and her help with the introduction. I would also like to thank the people at Cambridge University Press, in particular Toby Ginsberg and Gemma Smith, who supported the book along the way. In addition, this book would not have been published open access without the wonderful financial support from the Open Access Book Fund of the University of Groningen as well as the Energy Law Section at the Faculty of Law, University of Groningen. A big thank you in this context goes to Lorenzo Squintani, Sander Sprik, and Irene Ravenhorst. Thank you all very much for your respective contributions to this project.
