<i>Preface to the Fourth Edition</i>	<i>page</i> xiii
<i>Preface to the Third Edition</i>	xv
<i>Preface to the Second Edition</i>	xvii
<i>Preface to the First Edition</i>	xix
1 Advice on Answering Clinical Science Oral Questions	1
Structured Oral Examination (SOE) (Formerly the Clinical Science Viva)	1
The Marking System	2
Why Do They Have to Ask These Kinds of Questions?	2
A Brief History of Anaesthesia’s Inferiority Complex	3
Oral Questions	4
And Finally, Information, Understanding and ‘Buzzwords’	5
2 Anatomy and Its Applications	8
The Cerebral Circulation	8
Diagnosis of Death Using Neurological Criteria (Brainstem Death Testing)	11
The Internal Jugular Vein	15
Ocular Anatomy	19
The Pituitary Gland	24
The Autonomic Nervous System	28
The Trigeminal Nerve	31
The Nose	33
The Sensory Nerve Supply to the Face	36
The Sensory Nerve Supply to the Scalp	38
The Cervical Plexus	40
The Thyroid Gland	42
The Larynx	43
The Innervation of the Larynx	48
The Difficult (Obstetric) Airway	50
The Anatomy of the Trachea and Bronchi	54
The Surface Anatomy of the Neck (Percutaneous Tracheostomy and Cricothyroidotomy)	57
The Stellate Ganglion	60
The Paravertebral Space	62
The Pleura	65
The Mediastinum	68
Myocardial Blood Supply	69
Myocardial Innervation	73
The Intercostal Nerves	75

Contents

The Diaphragm	77
The Liver	79
The Spleen	83
The Pancreas	85
The Blood Supply to the Abdominal Viscera (the Splanchnic Circulation)	87
The Coeliac Plexus	89
The Blood Supply to the Spinal Cord	91
The Lumbar Sympathetic Chain	93
The Anterior Abdominal Wall	95
The Innervation of the Inguinal Region	99
The Brachial Plexus	100
The Ulnar Nerve	104
The Radial Nerve	106
The Median Nerve	108
The Antecubital Fossa	109
The Arterial Supply of the Hand	111
Anatomy Relevant to Subarachnoid (Spinal) Anaesthesia	113
The Extradural (Epidural) Space	119
The Sacrum	124
The Blood Supply to the Lower Limb	127
The Femoral Triangle	130
The Femoral Nerve	131
The Sciatic Nerve	135
The Sensory Innervation of the Foot	137
3 Physiology	139
Pneumothorax	139
Control of Breathing	142
Apnoea and Hypoventilation	146
Compliance	148
The Failing Lung	151
Bronchomotor Tone (Asthma)	154
Smoking, Vaping and Anaesthesia	157
Non-respiratory Functions of the Lung	159
One-Lung Ventilation (Single-Lung Anaesthesia)	161
Pulmonary Oedema	164
Pulmonary Hypertension	166
Hypoxic Pulmonary Vasoconstriction (HPV)	169
The Oxygen–Haemoglobin Dissociation Curve	170
Hyperbaric Oxygen	172
Oxygen Toxicity	175
Oxygen Delivery	177
Pre-operative Assessment of Cardiac Function	178
Mitral Valve Disease	181
Aortic Valve Disease	184
Pulmonary Valve Disease	187

Contents

Tricuspid Valve Disease	188
The Physiology of Gastric Emptying	190
Sepsis	193
Central Venous Pressure (CVP) and Cannulation	197
Fluid Therapy	200
Massive Haemorrhage: Compensatory Responses and Management	203
Blood Groups	206
Complications of Blood Transfusion	209
Anaemia	212
Platelets	214
Postpartum and Massive Obstetric Haemorrhage	218
Physiological Changes of Late Pregnancy Relevant to General Anaesthesia	222
Non-obstetric Surgery in Pregnancy	226
Pre-eclampsia	228
Circulatory Changes at Birth and Congenital Heart Disease	230
The Physiology and Clinical Anatomy of the Infant and Neonate	233
Laparoscopy	237
The Prone Position in Anaesthesia	239
Intracranial Pressure	242
Cerebral Blood Flow (CBF)	246
Post-operative Cognitive Dysfunction and Delirium	249
Intraocular Pressure (IOP)	252
The Neuromuscular Junction	255
Post-operative Nausea and Vomiting	258
Obesity	260
The Physiology of Ageing	264
The 'Stress Response' to Surgery	266
The Glucocorticoid Response to Surgery	268
Adrenaline (Epinephrine)	270
5-Hydroxytryptamine (5-HT, Serotonin)	272
Cytochrome(s) P450	275
Nitric Oxide	277
Plasma Proteins	279
Thyroid Function	281
Nutrition	283
Electroconvulsive Therapy (ECT)	287
Pain Pathways	289
Complex Regional Pain Syndrome (CRPS)	291
Diabetic Ketoacidosis (DKA and HHNK)	293
Spinal Cord Injury	297
Immunology (and Drug Reactions)	300
Latex Allergy	303
Jaundice	305
The Arterial Tourniquet	307
Arterial Cross-Clamping	310

Contents

4 Pharmacology	313
Mechanisms of Action of General Anaesthetics	313
Chirality	316
Bioavailability	318
Biological Sex and Anaesthetic Agents	320
Propofol	322
Target-Controlled Infusion (TCI)	326
Ketamine	332
Thiopental and Etomidate	335
Sevoflurane	337
Isoflurane, Desflurane and Methoxyflurane	340
Xenon	343
Nitrous Oxide	344
Neuromuscular Blocking Drugs (NMBDs)	348
Anticholinesterases	352
Sugammadex	354
Suxamethonium	356
Opiates/Opioids	359
Cyclo-oxygenase (COX) Enzyme Inhibitors	365
Paracetamol	368
Drugs to Treat Nausea and Vomiting	370
Corticosteroids	373
Clonidine and Dexmedetomidine	376
Local Anaesthetics: Actions	379
Local Anaesthetics: Toxicity	385
Local Anaesthetics: Influences on Onset and Duration	389
Bupivacaine, Ropivacaine, Lidocaine and Prilocaine	392
Adjuncts to Subarachnoid and Epidural (Neuraxial) Anaesthesia	395
Anti-hypertensive Drugs and Anaesthesia	399
β -Adrenoceptor Blockers	402
Hypotension and Its Pharmacological Management	405
Induced Hypotension	409
Inotropes	412
Drugs Used to Treat Asthma	415
Anti-arrhythmic Drugs	418
Insulin	423
Drug Treatment of Type 2 Diabetes Mellitus	425
Drugs Affecting Coagulation	429
Tranexamic Acid (TXA)	437
Magnesium Sulphate	439
Drug Overdose: Prescribed and Therapeutic Drugs	442
Recreational Drugs and Drugs of Abuse	445
Drugs Affecting Mood	448
Drugs Used for the Treatment of Epilepsy	452
Antibiotics	455
Therapeutic Monoclonal Antibodies	459

Contents

Chemotherapeutic (Cytotoxic) Drugs	461
Tocolytics (Uterine Relaxants)	464
Uterotonics (Uterine Stimulants)	465
Drugs Used to Treat Parkinson's Disease	468
Conscious Sedation	472
Pharmacogenomics	474
5 Physics, Clinical Measurement, Equipment and Statistics	477
Depth of Anaesthesia Monitoring	477
Accidental Awareness under General Anaesthesia (AAGA)	481
Evoked Potentials	484
Pulse Oximetry	486
Measurement of CO ₂	488
The Fuel Cell (and Methods of Measuring Oxygen)	491
The Supply of Medical Gases	492
The Anaesthetic Machine	494
Flowmeters	496
Laminar and Turbulent Flow	498
Vaporisers	499
Anaesthetic Breathing Systems	502
Soda Lime	507
Scavenging	509
The Gas Laws	511
Gases and Vapours	514
Pressure	515
Intraarterial Blood Pressure Measurement	517
The Measurement of Organ Blood Flow	520
The Measurement of Cardiac Output	522
Jugular Venous Bulb Oxygen Saturation (SjVO ₂)	524
The Measurement of Cerebral Oxygenation (Near Infrared Spectroscopy)	526
Renal Replacement Therapy (RRT)	528
Cell Salvage	531
Extracorporeal Membrane Oxygenation (ECMO)	533
Temperature and Its Measurement	535
Heat Loss	538
Scoring Systems	541
Humidification (of Inspired Gases)	546
Filters	548
Lasers	550
Magnetic Resonance Imaging	551
Ultrasound	553
Videolaryngoscopy	556
Peripheral Nerve Stimulators	558
Electromyography	562
Electrical Safety	564
Defibrillation	566

Contents

Surgical Diathermy	568
Cardiac Pacemakers	570
Spinal Cord Stimulation	573
Point of Care Tests (and Thromboelastometry)	576
Biological Potentials	580
Osmosis	581
Parametric and Non-parametric Data	584
Systematic Review and Meta-analysis	586
Design of a Clinical Trial for a New Drug	589
Clinical Trials: Errors in Interpretation of Data	591
<i>Index</i>	595
