

Index

- Π theorem, 255
- acceleration
 angular, 38
 centripetal, 37
 convective, 32
 local, 30
- acoustics, 106
- activity, 218
- activity coefficient, 218
- advective acceleration, *see* convective acceleration
- advective derivative, *see* convective derivative
- aerofoil
 lift, 156
- angular frequency, *see* angular velocity
- angular momentum, 88
- angular velocity, 14, 36, 72
- Arnold diffusion cell, *see* Stefan tube
- Arrhenius equation, 214, 267
- atmosphere, 12
- austenite, 214
- Avogadro constant, 214, 226
- backflow, *see* boundary layer
- bar, 12
- barometric formula, 12
- Bernoulli's equation, 59, 64, 142, 262
- Bessel function, 198
- binary alloy, 219
- Biot number, 242, 245, 248
- Blasius's formula, 111
- body, 27
- body force, 8, 9, 49
- Boltzmann constant, 214, 225, 267
- boundary layer, 60, 61, 129, 158
 backflow, 133
 heat transfer, 245
 Prandtl's equations, 130
 separation, 125, 126, 133, 160
- brazing model, 205
- bulk modulus, 50, 57, 105
- bulk viscosity, *see* viscosity, bulk
- Cahn–Hilliard theory, 179
- carburising, 210
- Carman–Kozeny equation, 128
- Carnot cycle, 12
- case hardening, 213
- Cauchy stress, 48
- Cauchy's equations of motion, 71, 100–102, 137, 177
- Cauchy–Green tensor, 40
- Cauchy–Riemann equations, 162
- centrifugal force, 8, 17, 19, 20, 37, 55, 73
- centripetal acceleration, 37
- chemical diffusion coefficient, *see* interdiffusion coefficient
- chemical potential, 217
- circulation, 16, 149
 conservation of, 149
- complementary error function, 204
- complex potential, 161
- compressibility, 57
- conduction, 95, 240
- constitutive relation, 12
- contact force, 8
- continuity
 equation of, 79, 175, 199, 240
- control volume, 29, 71, 87, 88, 91, 94, 175
- convection, 95, 172, 241
 forced, 172, 241
 natural, 172
- convective acceleration, *see* acceleration, convective
- convective derivative, 33, 79, 87
- Coriolis force, 8, 37, 40, 55, 73
- Couette flow, 60, 117, 160, 248
- crowdion, 225
- d'Alembert's paradox, 61, 129, 158
- d'Alembert's principle, 8, 37, 55
- d'Alembert's solution, 161
- Darcy law, 126, 264

- Darken's thermodynamic relation, 223
- deformation, 40
- derivative following the motion, *see* total derivative
- diffusion bonding, 208
- diffusion coefficient
 - interdiffusion, 222
 - intrinsic, 172, 199, 219
 - self, 214, 223, 230
 - tracer, 222
- diffusion equation, 200
- diffusiophoresis, 186
- diffusivity, *see* diffusion coefficient
- dilatation, 3, 50, 57, 105
- dimensionless group, 202
- Dirichlet boundary condition, *see* first-type boundary condition
- discharge rate, 68, 75, 126, 143, 255
- displacement, 41
- displacement gradient, 41
- doping
 - of wafers, 210
- drag, 7, 121, 122, 257
- drag coefficient, 123
- dynamic viscosity, *see* viscosity, laminar
- dynamical pressure, *see* kinetic pressure
- dynamical similarity, 6, 109, 264
- dynamics, 8, 55
- emissivity, 244
- energy balance equation, 71, 97, 102, 137, 178
- enthalpy, 91, 171, 214, 232
 - activation, 214
 - stagnation, 92
- equation of continuity, *see* continuity, equation of
- equation of motion, 8
- equilibrium pressure, *see* pressure, equilibrium
- error function, 204
- Euler's equations, 32, 53, 64, 106, 110, 129, 151
- Eulerian coordinates, *see* spatial coordinates
- Fanning equation, 111, 136
- ferrite, 214
- Fick's first law, 171, 184, 185, 199, 217
- Fick's rate equation, 184
- Fick's second law, 178, 199
- fictitious force, *see* force, fictitious
- finite strain tensor, 41
- first law of thermodynamics, 73, 268
- first-type boundary condition, 189, 196, 240
- flux, 6, 92, 170, 176, 242
 - heat, 241, 243, 244, 246
 - mass, 199
 - momentum, 173, 246
 - radiative, 244
- force
 - fictitious, 8, 35, 37, 39, 55
 - impressed, 55
 - inertial, 8, 55
 - force coefficient, 257
- Fourier analysis, 211
- Fourier's law, 95, 171, 193, 240
- frame
 - inertial, 34
 - non-inertial, 34, 36, 72
- frictional pressure, *see* pressure, frictional
- Froude number, 6, 255, 266
- gas constant, 12, 214, 218
- gauge pressure, 18
- Gibbs–Duhem equation, 183, 219
- gravity, 8, 98, 102, 121, 138
 - acceleration, 11, 72, 92
 - potential, 10, 90
- gravity head, *see* head, static
- Hagen–Poiseuille flow, 60, 66, 111, 115, 126, 260, 261
- Hagen–Poiseuille formula, 102, 259, 263
- head, 142
 - pressure, 65, 92, 142
 - static, 65, 92
 - velocity, 19, 65, 92, 142
- heat capacity, *see* specific heat
- heat equation, 200, 240
- heat exchanger, 268
- heat of transport, 192
- heat transfer coefficient, 242
- Helmholtz's theorem, 159
- Henry's law, 218
- heterogeneous reaction, 183
- homogeneous reaction, 183
- Hooke's law, 3, 50
- hurricane, 20, 24
- hydraulic diameter, 127, 261
- hydrodynamic pressure, *see* equilibrium pressure
- hydrostatic balance equation, 11
- hydrostatics, 8
- impressed force, *see* force, impressed
- inertial force, *see* force, inertial
- inertial frame, *see* frame, inertial
- infinitesimal rotation vector, 45
- infinitesimal strain tensor, 42
- interdiffusion coefficient, *see* diffusion coefficient, interdiffusion
- internal energy, 73
- interstitial, 220
- inviscid, 52, 64, 106
- irrotational, 4, 23, 64
- Kelvin's Theorem, 151
- kinematic viscosity, *see* viscosity, kinematic
- kinematics, 8, 52, 55
- kinetic pressure, *see* pressure, kinetic
- Kirkendall effect, 221, 224
- Kronecker delta, 41

- Lagrangian coordinates, *see* material coordinates
 Lamé's constants, 26, 50, 105
 Laplace operator, 199
 Laplace transform, 212
 Leibnitz's formula, 203
 Lewis number, 175
 lost forces, 55
- Mach number, 60, 105, 143
 Magnus effect, 154
 mass average velocity, 180
 mass transfer coefficient, 249
 master curves, 212
 material coordinates, 28, 88
 material derivative, *see* total derivative
 mechanical pressure, *see* frictional pressure
 mobility, 217
 molar average velocity, 182
 molar mass, 12
 mole, 12
 mole fraction, 185
 molecular weight, 12, 105
 moment, *see* torque
 momentum integral relation, 134
 momentum thickness, 133, 135
- Navier length, *see* slip length
 Navier–Stokes equations, 1, 26, 32, 35, 38, 57, 58, 71, 101–104, 109, 110, 117, 129, 200, 262
 examples, 113
 in dimensionless variables, 112
 net energy flux, 192
 net mass flux, 180
 net molar flux, 182
 Neumann boundary condition, *see* second-type boundary condition
 Newton's first law, 26, 37, 55, 72
 Newton's law of cooling, 239, 243
 Newton's law of viscosity, 52, 71, 107, 109, 120, 135, 172
 Newton's pail, 17, 53
 Newton's second law, 11, 32, 55, 72, 73, 81, 82, 88, 98, 100, 109
 Newton's third law, 47, 83
 Newtonian fluid, 52, 107
 nitriding, 210
 no slip rule, *see* stick-to-the-wall rule
 non-inertial frame, *see* frame, non-inertial
 Nusselt number, 242, 248, 268
- open channel flow, 264
- Péclet number, 268
 partial molar enthalpy, 192
 partial pressure, *see* pressure, partial
 pascal, 12
 permeability, 127, 264
