Preface **xiii**

I The category of polynomial functors **1**

1 Representable functors from the category of sets **3**
1.1 Representable functors and the Yoneda lemma 3
1.2 Sums and products of sets 7
1.3 Expanding products of sums 14
1.4 Sums and products of functors **Set** → **Set** 18
1.5 Summary and further reading 22
1.6 Exercise solutions 22

2 Polynomial functors **29**
2.1 Introducing polynomial functors 29
2.2 Special classes of polynomial functors 33
2.3 Interpreting positions and directions 35
2.4 Corolla forests 37
2.5 Polyboxes 41
2.6 Summary and further reading 44
2.7 Exercise solutions 47

3 The category of polynomial functors **51**
3.1 Dependent lenses between polynomial functors 51
3.2 Dependent lenses as interaction protocols 55
3.3 Corolla forest pictures of dependent lenses 57
3.4 Polybox pictures of dependent lenses 59
3.5 Computations with dependent lenses 61
3.6 Dependent lenses between special polynomials 66
3.7 Translating between natural transformations and lenses 73
3.8 Identity lenses and lens composition 76

Table of Contents
More Information

3.9 Polybox pictures of lens composition 79
3.10 Symmetric monoidal products of polynomial functors 82
3.11 Summary and further reading 90
3.12 Exercise solutions 91

4 Dynamical systems as dependent lenses 105
4.1 Moore machines 105
4.2 Dependent dynamical systems 114
4.3 New dynamical systems from old 122
4.4 General interaction 136
4.5 Closure of $\otimes$ 160
4.6 Summary and further reading 165
4.7 Exercise solutions 166

5 More categorical properties of polynomials 185
5.1 Special polynomials and adjunctions 185
5.2 Epi-mono factorization of lenses 189
5.3 Cartesian closure 194
5.4 Limits and colimits of polynomials 196
5.5 Vertical-cartesian factorization of lenses 203
5.6 $*$-Bifibration over **Set** 209
5.7 Cartesian lenses are exponentiable 214
5.8 Summary and further reading 219
5.9 Exercise solutions 219

II A different category of categories 231

6 The composition product 233
6.1 Interpreting the composition product 233
6.2 Lenses to composites 252
6.3 Categorical properties of the composition product 265
6.4 Summary and further reading 280
6.5 Exercise solutions 281

7 Polynomial comonoids and retrofunctors 295
7.1 State systems, categorically 295
7.2 Polynomial comonoids are categories 314

Table of Contents
More Information

7.3 Morphisms of polynomial comonoids are retrofunctors 331
7.4 Summary and further reading 360
7.5 Exercise solutions 361

8 Categorical properties of polynomial comonoids 377
8.1 Cofree comonoids 377
8.2 More categorical properties of $\mathbf{Cat}^\sharp$ 418
8.3 Comodules over polynomial comonoids 426
8.4 Summary and further reading 439
8.5 Exercise solutions 440
