The Cambridge Companion to the
Nazi-Soviet War

The Nazi-Soviet War was the largest and most brutal theatre of the Second World War, fought between two of the most ruthless states ever to exist. Bringing together twenty-four of the most accomplished authors in both German and Soviet history, this Cambridge Companion provides the most authoritative and yet highly accessible guide to the conflict. Each chapter examines a key aspect of the war, from war planning, the opposing forces, and the campaigns, to criminality and occupation, alliances, the home fronts, and post-war legacies and myth-making. The authors demonstrate that the Nazi-Soviet War was not only a conventional clash of arms in which millions of soldiers fought in titanic battles, but also an unconventional war in which soldiers and security forces murdered countless non-combatants. It was a war of resources, industry, mobilisation, administration, and popular support, with implications that still drive European security debates today.

DAVID STAHEL is Associate Professor of History at the University of New South Wales. He has authored or edited ten previous works about aspects of the Nazi-Soviet War, including *Operation Barbarossa and Germany's Defeat in the East* (2009), *Joining Hitler's Crusade* (2016), *Retreat from Moscow* (2019), and *Hitler's Panzer Generals* (2023).

Cambridge Companions to History

Cambridge Companions to History provide accessible and thought-provoking introductions to key topics, eras, places, and figures, invaluable to both the student and scholar. Edited by leading academics, each volume contains specially commissioned essays by a team of expert contributors from around the world, presenting cutting-edge research and suggesting new paths of inquiry for the reader. Companions are designed not only to offer a comprehensive overview of their chosen topic, but also to provoke debate and discussion. Like the highly successful Cambridge Companions to Literature and Cambridge Companions to Philosophy series, these volumes are ideal for use by students and will be of interest also to the curious general reader.
