Real Social Science

Real Social Science presents a new, hands-on approach to social inquiry. The theoretical and methodological ideas behind the book, inspired by Aristotelian phronesis, represent an original perspective within the social sciences, and for the first time this volume gives readers a set of studies exemplifying what applied phronesis looks like in practice. The reflexive analysis of values and power gives new meaning to the impact of research on policy and practice. *Real Social Science* is a major step forward in a novel and thriving field of research. This book will benefit scholars, researchers, and students who want to make a difference in practice, not just in the academy. Its message will make it essential reading for students and academics across the social sciences.

PROFESSOR BENT FLYVBJERG is Founding Chair of Major Programme Management at Oxford University's Saïd Business School and Director of the Oxford Centre for Major Programme Management. He works for better planning and management of megaprojects and cities, plus he writes about phronetic social science and case study research. Bent Flyvbjerg has served as adviser to the United Nations, the EU Commission, and government and companies in many countries.

PROFESSOR TODD LANDMAN is Director of the Institute for Democracy and Conflict Resolution at the University of Essex. He is a political scientist and has carried out numerous projects on the analysis and synthesis of data and complex governmental information, as well as being the author of several books and articles.

Visiting Professor SANFORD SCHRAM has taught social theory and social policy at the Graduate School of Social Work and Social Research, Bryn Mawr College since 1997. He is an affiliate to the National Poverty Center at the University of Michigan, Ann Arbor. As well as being the author of ten books he sits on the editorial boards of a number of journals, including the *Social Service Review*.

Acknowledgements

This volume represents the efforts of a good many people. The editors first want to acknowledge our contributors; without their excellent contributions there would be no *Real Social Science*. All our contributors took the project seriously, responded to our numerous requests punctually and never at any time posed any challenges to our project. We thank them all for their fine work. We would also like to acknowledge the support of the Political Science Department at Bryn Mawr College. We also want to acknowledge the excellent work of the folks at Cambridge University Press, not just for their meticulousness but also their cordiality. John Haslam, our editor, took a keen interest in our project and advised us effectively throughout. Gillian Dadd helped make sure our final manuscript was as good as it could be. Last, the editors want to thank each other. We learned that we make a good team.
