
Index

- accrual coupon, 139
- affine term structure model, 48
- Bermudan swaption, 59
- Black's formula, 37, 85, 107
- Black–Derman–Toy model, 43
- Black–Krasinski model, 43
- bond option, 30
- bootstrapping, 19
- cap, 33
- caplet, 33
- constant elasticity of variance (CEV) model, 147
- constant-maturity swap (CMS)
 - cap, 136
 - floor, 136
- convexity adjustment, 130
- convexity correction, 130
- convexity-corrected forward rate, 130
- coupon rate, 10
- Cox–Ingersoll–Ross model, 43
- day-count conventions, 9
- discount bond, 2
- discounted value, 4
- displaced-diffusion model, 150
- Dothan model, 43
- Euro Interbank Offered Rate (EURIBOR), 3
 - fixed-coupon bond, 10
 - flat volatility, 37
 - floating-coupon bond, 10
 - floating-rate note, 10
 - floor, 33
 - floorlet, 33
 - forward bond price, 7
 - forward contract, 27
 - forward curve, 8
 - forward discount factor, 7
 - forward measure, 25
 - forward rate, 6
 - continuously compounded, 7
 - convexity-corrected, 130
 - instantaneous, 8
 - forward rate agreement (FRA), 5
 - forward swap measure, 106
- Heath–Jarrow–Morton (HJM) model, 67
 - Gaussian, 71
 - multi-factor, 78
- Hull–White model, 43, 51
- Hull–White short-rate model
 - bond option formula, 53
 - forward measure, 58
 - two-factor, 62
- hypersphere decomposition, 114
- implied Black volatility
 - for caplets, 37
 - for swaptions, 38
- instantaneous forward rate, 8
- instantaneous short rate, 8
- interest rate swap, 11
 - constant-maturity, 133
 - forward-starting, 12
 - in-arrears, 132
 - length of, 12
 - payer, 12
 - receiver, 12
 - reset dates, 12
 - settlement dates, 12
 - start date, 12
 - trigger, 142
- Jamshidian's trick, 55
- LIBOR market model (LMM), 84
 - calibration, 121
 - discrete money market account, 90
 - instantaneous correlation, 84, 100
 - instantaneous volatility, 84
 - rank reduction, 113
 - terminal measure, 90
- LIBOR-in-arrears, 129
- London Interbank Offered Rate (LIBOR), 1, 3
 - martingale measure, 23
- Mercurio–Moralada model, 76
- Merton model, 43, 44
- model

- affine term structure, 48
- Black–Derman–Toy, 43
- Black–Krasinski, 43
- constant elasticity of variance (CEV), 147
- Cox–Ingersoll–Ross, 43
- displaced-diffusion, 150
- Dothan, 43
- Heath–Jarrow–Morton (HJM), 67
- Hull–White, 43, 51
- LIBOR market model (LMM), 84
- linear swap-rate model, 134
- Mercurio–Moraleda, 76
- Merton, 43
- normal, 146
- Ritchken–Sankarasubramanian, 75
- SABR, 153
- shifted log-normal, 150
- short-rate, 42
- swap market model (SMM), 106
- Vasiček, 43
- money market account, 10
 - discrete, 90
- Monte Carlo simulation, 118
 - Euler scheme, 119
 - predictor–corrector method, 119
- numeraire, 23
- payer swap, 12
- perpetual bond, 4
- present value (PV), 4
- Radon–Nikodym density process, 25
- Radon–Nikodym derivative, 25
- range accrual swap, 139
 - fixed-rate, 140
 - floating-rate, 140
 - portfolio replication, 140
- ratchet floater, 137
- Rebonato’s formula, 111
- receiver swap, 12
- risk-free rate, 8
- risk-neutral measure, 23
- Ritchken–Sankarasubramanian model, 75
- SABR model, 153
- separable volatility, 73
- shifted log-normal model, 150
- short rate, 8
- short-rate model, 42
- spectral decomposition, 113
- spot LIBOR measure, 91
- spot rate
 - continuously compounded, 3
 - simply compounded, 2
- spot volatility, 37
- sticky floater, 137
- swap annuity, 12, 106
- swap market model (SMM), 106
- swap measure, 106
- swap rate, 12
 - co-initial, 13
 - forward, 12
 - spot-starting, 13
- swaption
