

Index

- !=, 91
- absorbing Markov chain, 191
- accuracy of an estimator, 170
- advocacy, 10
- Amelanchier arborea*, 23, 36
- Analysis of Variance, 158
- AR1 series, 188
- at random, definition, 77
- auto-regressive series, 187
- balanced design, 166
- bar graph of distribution, 82
- binomial coefficients, 92
- binomial distributions, 123
- binomial expansion, 91
- bivariate data, 171
- burrowing animals, 123
- California Condor, 195
- Catalpa speciosa*, 186
- Chi Square, 136
- Chi Square derived, 177
- Chickadee two groups problem, 54
- computer memory, places in, 22
- computer program, two parts, 22
- consistent estimator, 171
- continental drift, 58
- continuous distributions, 78
- covariance, 98
- data structure, service berry example, 39
- decimal places, 155
- degrees of freedom, 136
- demography, Portuguese, 13, 17
- density function, 79
- design matrix, 147
- Dim at the Module level, 204
- $e = 2.71828$, 126
- efficient design matrix, 172
- equiprobable, 78
- ergodic, 189
- Estabrook and Jespersen, 194
- explain % of squared error, 152
- exponential function, 129
- exponential growth, 206
- extinction of marine families, 59
- family of distributions, 122
- flag value, 69
- Forams, 213
- frequentists, 77
- function Log(), 134
- hostile hypotheses, 186
- identically distributed, 188
- increment random variable, 198
- indentation, 29
- instructions, five purposes, 25
 - call procedures, 30
 - change contents of a place, 25
 - change order of execution, 26
 - computation, 26
 - read/write spreadsheets, 29
- linear model macro procedure, 152
- linear operators, 97
- logarithmic transformation, 206
- macro, EXCEL, comment line, 36
- macro, EXCEL, how to open
 - editor, 32
- macro, EXCEL, using the editor, 53
- macros, EXCEL, run, 34
- main effects, 163
- marker frequency drifted, 130
- Markov process, 189
- matrix inverse procedure, how to call, 167
- matrix inversion procedure, 166
- maximum likelihood, 61
- maximum likelihood estimator, 173
- memory, computer, place name Vs place
 - content, 49
- Mertz, 195
- method, 110
- mitochondrial DNA, 129
- module level declarations, 112
- Mus domesticus*, 213

-
- name a place in computer memory, 24
 - negative binomial, 135
 - negative result, 161
 - non-periodic random process, 60
 - one-way analysis of variance, 161
 - parameter, 122
 - partial dependence, 238
 - partial dependency, 224
 - Pascal's triangle, 92
 - permutation, 65
 - permute, program statements, 45
 - $\pi = 3.14159$, 132
 - power of an estimator, 170
 - prediction, 12
 - probability distribution displayed, 12
 - probability distribution simulated, 12
 - programming errors, three kinds, 31
 - promises made to saints, 224
 - pseudo-random number generator, 87
 - random walk, 187
 - randomize, 87
 - Raup and Sepkoski, 59, 63
 - realized significance, 71
 - regression, 151
 - regression, macro design, 159
 - regular Markov process, 189
 - SAD = sum of the absolute deviations, 142
 - sample, 80
 - sample a normal distribution, 134
 - savanna, 125
 - sexual dimorphism, 202
 - significance counter, 69
 - sort procedure, 113
 - SSE = sum of squared errors, 143
 - SSE formula, 152
 - SSE0, 152
 - standardization, 131
 - stationary, 188
 - statistic, 12
 - statistical argument, basic ingredients, 14
 - stone tool, 94
 - stop execution of macro, 57
 - style, programming, 107
 - Sub CALLINMO, 154
 - Sub UNIFORM(), 83
 - support function, 173
 - teeth in Chinese cave, 109
 - test by writing, 68
 - test statistic, hypothesis distinguished, 16
 - trade-off, 179
 - Tragopogon dubius*, 214
 - transformed data, 203
 - transition matrix, 189
 - two-way ANOVA interaction, 162
 - unbiased estimator, 170
 - variance-covariance matrix, 148
 - variation, causes, 11
