Preface *page* ix

	PART I MOTIVATION	1
1	Fusion in finite groups	3
	1.1 Control of fusion	4
	1.2 Normal p -complements	8
	1.3 Alperin's fusion theorem	12
	1.4 The focal subgroup theorem	16
	1.5 Fusion systems	20
	Exercises	24
2	Fusion in representation theory	26
	2.1 Blocks of finite groups	27
	2.2 The Brauer morphism and relative traces	34
	2.3 Brauer pairs	38
	2.4 Defect groups and the first main theorem	41
	2.5 Fusion systems of blocks	47
	Exercises	54
3	Fusion in topology	55
	3.1 Simplicial sets	56
	3.2 Classifying spaces	66
	3.3 Simplicial and cosimplicial objects	74
	3.4 Bousfield–Kan completions	78
	3.5 The centric linking systems of groups	83
	3.6 Constrained fusion systems	86
	Exercises	89

	PART II THE THEORY	91
4	Fusion systems	93
	4.1 Saturated fusion systems	94
	4.2 Normalizing and centralizing	101
	4.3 The equivalent definitions	105
	4.4 Local subsystems	108
	4.5 Centric and radical subgroups	117
	4.6 Alperin's fusion theorem	121
	4.7 Weak and strong closure	127
	Exercises	131
5	Weakly normal subsystems, quotients, and morphisms	134
	5.1 Morphisms of fusion systems	135
	5.2 The isomorphism theorems	141
	5.3 Normal subgroups	148
	5.4 Weakly normal subsystems	150
	5.5 Correspondences for quotients	160
	5.6 Simple fusion systems	171
	5.7 Soluble fusion systems	181
	Exercises	186
6	Proving saturation	188
	6.1 The surjectivity property	189
	6.2 Reduction to centric subgroups	193
	6.3 Invariant maps	201
	6.4 Weakly normal maps	205
	Exercises	212
7	Control in fusion systems	215
	7.1 Resistance	216
	7.2 Glauberman functors	221
	7.3 The ZJ -theorems	227
	7.4 Normal p -complement theorems	232
	7.5 The hyperfocal and residual subsystems	236
	7.6 Bisets	252
	7.7 The transfer	260
	Exercises	267
8	Local theory of fusion systems	270
	8.1 Normal subsystems	271
	8.2 Weakly normal and normal subsystems	275

Cambridge University Press

David A. Craven

Table of Contents

[More information](#)

<i>Contents</i>		vii
8.3	Intersections of subsystems	280
8.4	Constraint and normal subsystems	287
8.5	Central products	295
8.6	The generalized Fitting subsystem	299
8.7	L -balance	308
	Exercises	314
9	Exotic fusion systems	317
9.1	Extraspecial p -groups	318
9.2	The Solomon fusion system	326
9.3	Blocks of finite groups	330
9.4	Block exotic fusion systems	335
9.5	Abstract centric linking systems	343
9.6	Higher limits and centric linking systems	349
	Exercises	356
	<i>References</i>	358
	<i>Index of notation</i>	364
	<i>Index</i>	366
