<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>The syntax of displacing and non-displacing predicates</b>	<b>14</b>
2.1	Raising-to-subject and subject control: <i>seem</i> vs. <i>claim</i>	16
2.1.1	The structure of raising	19
2.1.2	The structure of control	25
2.1.3	Raising-to-object and object control: <i>expect</i> vs. <i>persuade</i>	28
2.2	<i>Tough</i> -constructions: <i>easy</i> vs. <i>eager</i>	30
2.2.1	Structure of <i>tough</i> -constructions	32
2.2.2	Related constructions	36
2.2.3	Structure of control adjective constructions	39
2.3	Unaccusatives and unergatives: <i>arrive</i> vs. <i>dance</i>	39
2.3.1	A semantically-driven syntactic distinction	40
2.3.2	Formal representations of unaccusativity	42
2.4	Passive	45
2.4.1	Structure of passive	46
2.4.2	A different displacing predicate	49
2.5	The learning problem	52
<b>3</b>	<b>Argument hierarchies</b>	<b>61</b>
3.1	The Animacy Hierarchy	63
3.1.1	Linguistic effects of animacy: morphosyntax and argument structure	64
3.1.2	Animacy, agency, degree of control, and teleological capability	69
3.2	The Thematic Hierarchy	75
3.2.1	A brief history of thematic roles	76
		vii

viii *Contents*

3.2.2	Formal accounts of thematic role assignment	79
3.3	Animacy and thematic roles in opaque constructions	84
3.3.1	Raising constructions across languages	86
3.3.2	<i>Tough</i> -constructions across languages	103
3.4	Properties of derived subjects	109
3.4.1	Argument structure universals, and the “problem” of ergativity	114
3.5	A learning procedure	119
3.6	Summary	124
<b>4</b>	<b>Animacy and adult sentence processing</b>	<b>126</b>
4.1	Relative clauses	129
4.1.1	Reduced relative clauses	129
4.1.2	Subject vs. object relative clauses	136
4.2	Processing of raising and control	139
4.2.1	Sentence completion	140
4.2.2	Novel verb learning	147
4.3	Psycholinguistic effects of animacy on production of the passive	153
4.4	Summary	155
<b>5</b>	<b>Animacy and children’s language</b>	<b>156</b>
5.1	Development of the animacy concept	157
5.1.1	Featural properties of animates	158
5.1.2	Behavioral properties of animates	159
5.1.3	Intentional properties of animates	166
5.1.4	Further conceptual change	169
5.1.5	Agency	172
5.1.6	Summary	173
5.2	Children’s use of animacy in learning argument structure	174
5.2.1	The power and limitations of Semantic Bootstrapping	179
5.2.2	The power and limitations of Syntactic Bootstrapping	186
5.3	Children’s acquisition of displacing predicates	190
5.3.1	Acquisition of raising and control	192
5.3.2	Acquisition of <i>tough</i> -constructions	208
5.3.3	Acquisition of unaccusatives	227
5.3.4	Animacy and the acquisition of the passive	235
5.4	Summary	242
<b>6</b>	<b>Modeling the acquisition of displacing predicates</b>	<b>245</b>
6.1	Displacing predicates in the input to children	250
6.2	Computational modeling of language acquisition	256

Cambridge University Press

Table of Contents

[More information](#)

		<i>Contents</i>	ix
6.2.1	Learning as generalization	258	
6.2.2	Restricting the hypothesis space	261	
6.3	Hierarchical Bayesian Models	265	
6.3.1	A model of learning raising and control	267	
6.3.2	A model of learning <i>tough</i> -constructions	276	
6.3.3	A model of learning unaccusatives and unergatives	279	
6.4	Summary of modeling results	281	
<b>7</b>	<b>Conclusions and origins</b>	<b>283</b>	
7.1	Origins of knowledge of the animacy distinction	286	
7.2	Origins of knowledge of linguistic animacy and displacing predicates	289	
7.3	Further questions	296	
	<i>Appendix</i>	298	
	<i>Bibliography</i>	300	
	<i>Index</i>	322
