388

dual predictable projection, 124  
 dyadic rationals, 49

empirical process, 275  
 entry time, 115  
 equivalent martingale measure, 223  
 events, 348  
 excessive, 184  
 excessive majorant, 186  
 exercise time, 219  
 expected value, 348  
 exponential, 349, 371  
   martingale, 89  
   semimartingale, 144  
 exponential random variables, 33

Feller process, 161  
 Feynman–Kac formula, 323  
 filtration, 1, 2  
 finite-dimensional distributions, 3  
 Fourier series, 36

gamma, 350, 371  
 gauge, 323  
 Gaussian, 7, 374  
 Gaussian field, 255  
 Girsanov theorem, 89, 93, 144  
 Glivenko–Cantelli theorem, 366  
 good- $\lambda$  inequality, 86  
 Green’s function, 175  
 Gronwall’s lemma, 201

Hölder continuous, 43, 47  
 harmonic, 173, 321  
 Hausdorff dimension, 48, 99  
 Hausdorff measure, 48  
 heat equation, 322  
 Helly’s theorem, 369  
 Hille–Yosida theorem, 292  
 hitting time, 115  
 Hunt process, 165  
 Hurst index, 254

i.i.d., 364  
 increasing process, 54, 121  
 independent, 353  
 independent increments, 6, 339  
 indicator, 348  
 indistinguishable, 2  
 infinite particle systems, 295  
 infinitesimal generator, 288  
 innovation process, 230  
 innovations approach, 229  
 integration by parts formula, 74  
 invariance principle, 108  
 invariant, 178  
 Itô’s formula, 71  
   multivariate, 74

*Index*

Jensen’s inequality, 352, 358  
 John–Nirenberg inequality, 129  
 joint characteristic function, 372  
 jointly normal, 7, 375

Kalman–Bucy filter, 234  
 Karhunen–Loève expansion, 253  
 kernel, 154  
 killed process, 177  
 Kolmogorov backward equation, 291  
 Kolmogorov continuity criterion, 49  
 Kolmogorov extension theorem, 382  
 Kolmogorov forward equation, 292  
 Kunita–Watanabe inequality, 70

Lévy measure, 342  
 Lévy process, 32, 297, 339  
 Lévy system formula, 347  
 Lévy’s theorem, 77  
 Lévy–Khintchine formula, 342  
 last exit, 181  
 law, 3, 10, 348  
 law of the iterated logarithm, 44  
 least excessive majorant, 186  
 left continuous process, 2  
 lifetime, 156, 177  
 LIL, 44  
 linear equations, 199  
 linear model, 234  
 Lipschitz function, 100, 193  
 local time, 94, 209  
   joint continuity, 96  
 locally bounded, 141  
 lower semicontinuous, 186

Markov property, 25  
 Markov transition probabilities, 154  
 Markovian, 303  
 martingale, 13, 359  
   continuous, 54  
   convergence theorem, 363  
   local, 54, 139  
   locally square integrable, 139  
   problem, 316  
   representation theorem, 80, 81  
   uniformly integrable, 54, 364  
 maximum principle, 176  
 mean, 350  
 mean rate of return, 218  
 measure-valued branching diffusion  
   process, 317  
 metric entropy, 51  
 minimal augmented filtration, 2,  
   160  
 modulus of continuity, 247, 260  
 moment, 350  
 monotone class theorem, 378  
 multiplication theorem, 354

- natural scale, 326  
 Neumann boundary condition, 290  
 Newtonian potential density, 175  
 NFLVR condition, 223  
 no free lunch, 223  
 nondivergence form, 296, 315  
 non-negative definite, 254  
 normal, 349, 371  
 nowhere differentiable, 46  
 null set, 1, 111
- observation process, 229  
 occupation time density, 175  
 occupation times, 97  
 one-dimensional diffusion, 326  
 optimal reward, 187  
 optimal stopping problem, 184  
 optional  $\sigma$ -field, 111  
 optional projection, 119  
 optional stopping theorem, 17, 360  
 optional time, 15  
 Ornstein–Uhlenbeck process, 159, 198  
 orthogonality lemma, 131  
 outer probability, 111
- p*-variation, 30, 48  
 partial sums, 364  
 paths, 2  
 paths locally of bounded variation, 54  
 Picard iteration, 101  
 Poincaré cone condition, 174  
 Poisson, 349, 371  
   point process, 147  
   process, 32, 171  
 Poisson's equation, 319  
 portmanteau theorem, 237  
 potential, 155, 323  
 prévisible, 111  
 predict, 112  
 predictable, 64, 130  
 predictable  $\sigma$ -field, 64, 111  
 predictable projection, 120  
 probability, 348  
 process, 1  
 product formula, 74, 85  
 progressively measurable, 4  
 Prohorov metric, 241  
 Prohorov theorem, 239  
 purely discontinuous, 143
- quadratic variation, 57, 79  
 quasi-left continuous, 165
- random variables, 348  
 Ray–Knight theorem, 209  
 recurrence, 167  
 reduce, 139  
 reflection principle, 27
- regular, 173, 326  
 regular conditional probability, 312, 380  
 regular Dirichlet form, 307  
 reproducing property, 252  
 resolvent, 155, 286  
 reward function, 184  
 right continuous filtration, 1  
 right continuous process, 2  
 right continuous with left limits, 2
- scale function, 327  
 scaling, 7  
 Schrödinger operator, 323  
 Schwartz class, 379  
 section theorem  
   optional, 117  
   predictable, 117  
 self-financing, 219  
 semigroup, 155  
 semigroup property, 155  
 semimartingale, 54, 141  
 set-indexed process, 255  
 shift operators, 158  
 signal process, 229  
 simple symmetric random walk, 109, 248  
 Skorokhod embedding, 100  
 Skorokhod representation, 245  
 Slutsky's theorem, 242, 369  
 space-time process, 182  
 spectral theorem, 309  
 speed measure, 329  
 square integrable martingale, 55  
 stable subordinator, 347  
 stationary increments, 6, 339  
 stochastic integral, 64, 134, 150
