

## INDEX

- abrasion  
 degree of, 33, 65, 226, 230, 269  
 resistance to, 252–3, 255
- ADS, *see* Archaeology Data Service
- Agost (Spain), 244–5
- agricultural waste  
 as fuel, 124–5  
 as temper, 123–4
- Aitchison, J., 181
- Akrotiri (Cycladic bronze age pottery),  
 184
- Albinus, P., 5
- ale marks, 223–4
- Alice Holt Forest (England), 141, 153
- Algeria, 127, 137
- alternative materials  
 glass, 31  
 leather, 31, 32  
 metal, 31–2, 33  
 wood, 31, 32, 149
- amphorae, 187–8, 224, 237, 240, 244, 254, 258,  
 269, 290
- Andokides (Greek potter), 27
- Antwerp, 153
- ARC, *see* York
- Archaeology Data Service (UK), 111, 287
- archaeometry 4, 18–20, 160–85, 286  
 formulating projects, 160–2  
*see also* individual techniques
- archive, pottery, 36–7, 104–112
- archive report, 43
- art, representation of pottery in, 15, 248
- ash, 124, 135, 136
- assemblages, pottery  
 archaeologically homogeneous, 205  
 comparison of, 204, 205–6, 210–2  
 composition of, 204  
 ‘death’, 13, 14, 203–4  
 ‘life’, 13, 14, 203  
 size of, 203, 212–3
- assessment, 42, 46
- atomic absorption spectroscopy (AAS), 20,  
 169–70
- Baif, L., 20
- bar codes, 64
- Baringo (Kenya), 194
- Barton-on-Humber (England), 141
- basketwork, 249
- Bath, Somerset (England), 271
- beer, 253, 258
- bias  
 in recovery, 48–50, 65, 216  
 statistical, 206–8
- binocular microscope, use of, 11, 13, 28, 71–2,  
 154, 159, 162, 188, 275, 278
- biomolecules, 256
- bitumen, 255
- bootstrapping, 213–4
- Braudel, F., 34
- bread, 254, 255
- breakage  
 by animals, 263  
 degree of, 33, 206–7, 215–8, 226

## 330 INDEX

- breakage (*cont.*)  
 deliberate, 254  
 rates of, 14  
*see also* life-spans  
 British Museum, 287, 289  
 Broken K Pueblo (USA), 35–6  
 brokenness statistic, 62, 206–7, 215–8, 230, 271  
 Brongniart, M.A., 14, 16  
 building materials, ceramic, 16  
*see also* floor tiles  
 Buko, A., 13  
 bulk records, 55  
 Bureau of American Ethnology, 7  
 burial urns, 5  
 burnishing (surface treatment), 90, 133–4, 251
- <sup>14</sup>C dating, *see* radiocarbon  
 calcareous marl, 76, 77  
 calcium phosphate, 54, 258, 271  
 carbon (in clay), 152  
 Carver, M.O.H., 230  
*cassoulet*, 258  
 catalogue, pottery, 36–7, 60–5  
 Catastrophe Theory, 26  
 cauldrons, 31, 33, 86  
 bronze, 31–3  
 cemeteries, pottery from, 5, 10, 229  
*see also* burial urns, funerary vessels, grave groups  
 ceramic census data, *see* life-spans  
 ceramic ecology, 4  
 ceramic ethnoarchaeology, *see* ethnoarchaeology, ethnography  
 ceramic traditions, 12  
 cereals, 253  
 certified reference materials (CRM) for analysis quality control, 174, 287
- charts  
 colour, 154–8  
 percentage inclusion, 159, 282  
 rim, 210–11  
 sorting of inclusions, 159, 284  
 sphericity, 160, 283  
 Chelmsford, Essex (England), 241–3
- chemical analysis, *see* compositional analysis  
 Chichester, Sussex (England), 146  
 Childe, V.G., 8  
 CIE colour recording system, 157–8  
 classification, 7–8, 14  
 analytic, 11  
 of fabric, 77–80, 150–89  
 of shape, 12, 82–6, 190–202  
 taxonomic, 11
- clay,  
 geochemistry, 186–8  
 matrix, 76–7  
 preparation of, 125  
 primary, 123  
 secondary, 123  
 selection of, 16  
 sourcing of, 28, 153
- CODA (statistical technique), 181  
 coefficient of variation, 147–8  
 coffee drinking, as evidence of status, 82  
 coins, as evidence of date, 26, 222–3, 225–6  
 collectors, 5  
 colour chart, 154–8  
 colour, of pottery, 73–4, 152–3, 154–8  
 affecting collection rates, 268  
 differences caused by drying, 134  
 differences caused by firing, 73–4, 152, 253  
 factors affecting, 152–3  
 interpretation of, 158  
 recording of, 156, 277  
 scientific recording of, 157–8  
 use of as descriptor, 11, 157
- combing (decorative technique), 89  
 common name codes, 80  
 completeness statistic, 62, 167, 204–5, 215–8  
 compositional analysis, 19–20, 168–85  
 comparison between techniques, 188–9  
 comparison with petrological analysis, 188  
 effects of post-depositional environment, 172–3  
 electron micro-probe, 183  
 statistical analysis of data, 175–82  
 techniques of, 169–70, 286–8

- use of commercial laboratories, 171, 174, 176
- compositional data, statistical analysis of (CODA), 181
- computers, 65–9, 100, 110–1, 116–7, 229
  - bar codes, 64
  - database packages, 65–9
  - floppy disks, 116
  - indexing on, 103, 110–1
  - long-term storage of data, 111, 117
  - organisation of records, 66–8
  - query language, 68
  - recording of shape on, 66, 85, 197, 198–200
- Concentration Principle, Petrie's, 227
- conference
  - Burg Wartenstein (Austria), 13
  - Lhee (Holland), 13
- constructional features
  - form classification by, 86, 201–3
  - illustration of, 98
  - weak points in, 253–4
- containers, pottery, 237, 247, 254–8, 258, 263
  - contents of, 21, 27–8, 224
  - identification of contents of, 254–8
- context
  - primary, 230, 254, 271
  - secondary, 230
  - stratified, 58, 60
- Conyers, J., 15
- cooking vessels, 214–5, 247–50, 252, 253, 258, 260
  - cracks in, 250
  - life-span of, 263
- Cornwall (England), 78
- Costin, C.L., 144–5
- craft pottery, 79, 122, 142
- cremation urns, 53
- cross-dating, 8
- cross-joins, *see* sherd-links
- Cultural Olympiad, 2012, 142
- cultures, definition of, 8
- data
  - foundational, 24, 25–33
  - integrated, 24, 33–4
- databases, 65–9, 275
  - compositional analysis, 150, 286–8
  - thin sections, 150, 286, 287, 289–90
- dates
  - absolute, 8, 26
  - definition of, 220–2
  - inscribed, 222–4
  - precision of, 27
  - relative, 26
  - terminus post quem, 223, 225
- dating, 18, 46, 57–8, 219–34
