

European Union Health Law

A contextual analysis of the internal logics of EU health law through four themes: consumerism; (human) rights; interactions between equality, solidarity and competition; and risk. Leading authors in the emergent field explain the interactions and implications of EU health law through thematic reinterpretation of the law in context in key substantive areas, such as the regulation of health research, access of patients to high-quality care, health care professional regulation, organization and funding of health care services and public health. This book offers a fresh perspective and thorough understanding of EU health law through individual and collective or systemic perspectives, and covers health law both within the EU and globally. Essential reading for anyone interested in health law in any EU Member State, or in global health law.

Tamara K. Hervey is Jean Monnet Professor of EU Law and Head of School, School of Law, University of Sheffield.

Jean V. McHale is Professor of Health Care Law and Director of the Centre for Health Law, Science and Policy, University of Birmingham.

The Law in Context Series

Editors: William Twining (University College London),
 Christopher McCrudden (Queen's University Belfast) and
 Bronwen Morgan (University of Bristol).

Since 1970 the Law in Context series has been at the forefront of the movement to broaden the study of law. It has been a vehicle for the publication of innovative scholarly books that treat law and legal phenomena critically in their social, political and economic contexts from a variety of perspectives. The series particularly aims to publish scholarly legal writing that brings fresh perspectives to bear on new and existing areas of law taught in universities. A contextual approach involves treating legal subjects broadly, using materials from other social sciences, and from any other discipline that helps to explain the operation in practice of the subject under discussion. It is hoped that this orientation is at once more stimulating and more realistic than the bare exposition of legal rules. The series includes original books that have a different emphasis from traditional legal textbooks, while maintaining the same high standards of scholarship. They are written primarily for undergraduate and graduate students of law and of other disciplines, but will also appeal to a wider readership. In the past, most books in the series have focused on English law, but recent publications include books on European law, globalization, transnational legal processes and comparative law.

Books in the Series

Anderson, Schum & Twining: *Analysis of Evidence*
 Ashworth: *Sentencing and Criminal Justice*
 Barton & Douglas: *Law and Parenthood*
 Beecher-Monas: *Evaluating Scientific Evidence: An Interdisciplinary Framework for Intellectual Due Process*
