Ab-initio molecular dynamics, 162
Acoustic wave speed, 468
Adiabatic condition, 116
Amorphous solid, 453
Andersen Lagrangian, 241
Andersen thermostat, 204, 206
Andersen–Parrinello–Rahman molecular dynamics, 225, 487
Angle interaction, 281
Angular momentum operator, 19
Aperiodicity, 328
Atomistic potential, 169
Autocorrelation function, 374, 480

Backward Euler method, 190
Balance of linear momentum, 423, 483
Basis atom, 261
Berendsen thermostat, 204, 206
Biased potential, 323
Binning algorithm, 274
Biological membrane, 366
Bivariate Gaussian distribution, 341
Bloch solution, 466
Bloch's theorem, 47, 55, 466, 557
Block diagonal matrix, 465
Body-centered cubic lattice, 260
Boltzmann constant, 170
Boltzmann distribution, 140
Boltzmann entropy, 128
Bond interaction, 281
Bond order potential, 170
Bonded interaction, 259
Born–Oppenheimer approximation, 35, 162
Born–Oppenheimer molecular dynamics, 162
Bosons, 30, 469
Bra–ket notation, 19
Bravais lattice, 262, 435
Brenner potential, 170
Brownian motion, 353
Brownian particle, 350
Buffer zone, 186

Calculus, 190
Canonical ensemble, 138, 210, 314, 345, 462
Canonical transformation, 114
Car–Parrinello molecular dynamics, 165
Cauchy relation, 442
Cauchy stress, 58, 409, 436
Cauchy–Born rule, 52, 60, 433, 463
Cauchy–Schwartz inequality, 23
Cell list, 186
Cell shape tensor, 454
Center of mass (COM), 472
Central limit theorem, 143, 150, 314
Centrosymmetruc parameter (CSP), 284
Charge equilibrium condition, 63
CHARMM (Chemistry at Harvard Macromolecular Mechanics), 177
CHARMM force field, 292
Chemical equilibrium, 117
Clausius virial theorem, 412
Coarse-grained model, 345, 358
Coarse-grained molecular dynamics (CGMD), 462
Coarse-scale deformation gradient, 473
Coarse-scale dynamics, 236
Commutator, 22
COMPASS (class 2) bond, 259
Compton effect, 5
Concurrent multiscale coupling approach, 495
Conditional probability, 325
Conjugate gradient algorithm, 85
Conservation of energy, 115
Conservation of linear momentum, 419
Conservation of mass, 112
Conservation of probability, 112
Conservative force, 167, 359
Convergence criteria, 281
Copenhagen interpretation, 31
Correlation function, 374
Corresponding principle, 29
Cotangent space, 242
Coulombic interaction, 281
Couple stress, 72

Discrete element method (DEM), 174
Discrete gradient operator, 484
Dislocation, 503
Dispersion relation, 466
Dissipative force, 345
Dissipative particle dynamics (DPD), 258, 345, 358
Divergence theorem, 111, 221
Domain decomposition, 472
Double-slit experiment, 6
Drag force, 345, 359
Dynamic loading condition, 275

Effective mass, 208
Ehrenfest molecular dynamics, 162
Eigenvalue problem, 461
Einstein relation, 382
Elastic energy density, 435
Elastic tensor, 436, 444
Electric current, 373
Electric potential, 373
Electrical conductivity, 373
Electromagnetic force, 169
Electron density, 36, 443
Electron localization function (ELF), 102
Electronic band structure, 46, 93
Embedded atom method, 170, 258, 443
Embedding function, 443
Empirical distribution, 316

Energy level, 469
Energy minimization, 281
Enthalpy, 123
Entropy, 116, 470
Equal partition theorem, 145
Equilibrium state, 281, 397
Ergodic hypothesis, 134
Ergodic Markov chain, 327
Euler–Lagrange equation, 106
Evans–Hoover thermostat, 220
Exchange-correction quantum stress, 63
Exchange-correlation energy functional, 45
Exchange-correlation higher-order quantum stress, 72
Exchange-correlation quantum couple stress, 75
Excitation, 462
Excited state, 462

Face-centered cubic lattice, 260
FCC lattice, 445
FENE (finite-extensible nonlinear elastic) bond, 259
Fermions, 30
Ferromagnetism, 337
FFT mesh, 77
Fick's law, 381
Fine-scale velocity, 236
First Brillouin zone (BZ), 48, 92
First law of thermodynamics, 115
First Piola–Kirchhoff stress (PK-I), 58, 435, 470
First-principles Lagrangian, 239
Fixed boundary condition, 257
Fluctuation force, 345
Fluctuation–dissipation theorem, 349, 374, 392
Fokker–Planck equation, 350
Force field, 167
Force state, 499
Forward Euler method, 190
Fourier law, 373
Fourier transform, 55
Fugacity, 154

Gaussian distribution, 143, 330, 350
Gaussian function, 475
Gaussian isokinetic thermostat, 221
Gear's predictor–corrector algorithm, 199
Generalized gradient approximation, 96
Gibbs entropy, 128
Gibbs free energy, 123
Global truncation error, 190
Grand canonical ensemble, 152
Gravitational force, 169
Green–Kubo formula, 378
Green–Kubo relation, 350, 374
Green–Lagrangian strain tensor, 242
Griffith critical fracture stress, 503
Ground state, 17
