

## Index

- Acheulian industry, 273, 288  
 handaxe, 289, 294, 301  
 Mousterian, 296
- anthropology  
 archaeology, 49, 215, 232, 242, 286  
 paleoanthropology, 242, 278  
 tool use and human origins, 48, 226, 243, 278
- anthropomorphism, 23, 81
- archer fish. *See* *Toxotes* spp.
- associative-cybernetic model, 84
- Australopithecus* spp., 265, 270, 274, 291
- behavioral flexibility, 150, 153
- bone tools  
 used as digging implements, 250  
 used by hominins, 243, 250, 255, 261, 267, 274  
 used in termite nest perforation, 258, 259, 276
- bonobo. *See* *Pan paniscus*
- Bossou, Guinea, 39, 227, 233
- brain size  
 relationship with intelligence, 180  
 relationship with social learning, 111  
 relationship with tool use, 67, 111, 194  
 relative brain size, 68, 96  
 Stephan data set on primate brains, 68
- Broca's area, 260
- Cactospiza pallida*, 10, 98, 108, 135  
 ecology, 135, 137  
 extracting prey, tool use, 138  
 ontogeny of tool use, 139, 140  
 tool modification, 136
- Cactospiza parvulus*, 10
- Camarhynchus parvulus*, 135, 146
- camera trap, 34, 166
- canonical neurons, 258, 259
- capuchin monkey. *See* *Cebus* spp.
- causal reasoning, 22, 24, 84, 140, 143, 249, 250
- Cave of Hearth, South Africa, 299
- Cebus* spp., 22, 35, 73, 203
- bearded capuchin. *See* *Sapajus libidinosus*
- Cebus apella*, 6, 204
- Cebus xanthosternos*, 216  
 nut-cracking tool use, 27
- chaîne opératoire*, 25, 235, 287
- chimpanzee. *See* *Pan troglodytes*
- Chlorocebus* spp., 70
- climate change, 172
- cognitive archaeology, 286, 287
- cognitive psychology, 4, 48, 52, 286
- Columba livia*  
 problem solving, 8
- comparative psychology, 4, 84
- complexity of tool use, 165, 177, 184, 204, 236, 271  
 combined tool use, 27, 28  
 definition of, 177  
 problem–solution distance, 104  
 sequential tool use, 28, 36, 74
- convergence in primate tool use, 218
- cooperation, 273
- Corvus frugilegus*, 3, 10, 67, 82, 106, 144  
 insightful behavior, 80, 108  
 nest-building behavior, 71, 83  
 platform-releasing task, 71  
 sequential tool use, 74  
 tool modification, 76  
 understanding of physical concepts, 70
- Corvus kubaryi*, 99
- Corvus moneduloides*, 3, 6, 36, 69, 95, 134  
 Betty, 75  
 brain size, 105  
 grub extracting tool use, 98  
 juvenile dependence, 112  
 ontogeny of tool use, 139  
 precision tool use, 107  
 sociality and tool use, 111
- cotton-top tamarin. *See* *Saguinus oedipus*
- cross-modal matching, 35
- cultural transmission. *See* social learning
- cumulative cultural evolution, 40, 198

- developmental window, 140  
 diffusion-chain experiments, 248  
 digger wasp. *See Sphex* spp.  
 Dikika, Ethiopia, 292, 293  
 dissemination of tool use, 111  
   bird model, 111  
   primate model, 111  
 Drimolen, South Africa, 243, 252
- Early Stone Age  
 Ebo Forest, Cameroon, 38  
 ecological niche, 22, 24, 152, 161, 250, 271  
 ecological utility  
   influencing tool use, 96  
 Egyptian vulture. *See Neophron percnopterus*  
 Epstein, Robert, 8  
 extractive foraging, 179, 181, 194, 197
- Fazenda Boa Vista, Brazil, 205  
 final artifact fallacy, 300  
 fission-fusion society, 164, 172  
 functional fixedness, 14, 125, 129
- Galápagos Archipelago, Ecuador, 136  
 gestures, 10, 278  
 global workspace theory, 84  
 Gombe National Park, Tanzania, 39, 262  
 Gona, Ethiopia, 263, 267, 269, 289, 292  
 Goodall, Jane, 48, 89, 119, 204  
*Gorilla gorilla*, 203  
 Goulougo Triangle, Republic of Congo, 23, 30, 54,  
   60, 165
- Hadar, Ethiopia, 289  
 Holocene, 288  
 hominin lineage, 226, 252  
   animal butchering tool use, 268, 273, 276, 292, 293  
   bone-tool use, 243, 263, 274  
   cognitive abilities, 243, 250, 260, 265, 274,  
     286, 290, 294, 297  
   digging tool use, 250  
   raw material transport, 226, 287, 291  
   scavenging, 276  
   sex differences in tool use, 262, 297, 298  
   social learning, 261, 263, 265, 268, 270, 275,  
     277, 278, 292  
   stone knapping, 226, 231, 263, 265, 267, 273,  
     276, 291  
   termite-nest perforating tool use, 243, 253, 254, 273  
*Homo erectus*, 273  
*Homo sapiens*, 225  
   ability to imitate, 248, 250
- imagination, 67, 84  
 information recombination, 13
