actualism, *see* chance, actualism regarding
Albert, David, 206, 208–13
anti-realism, *see also* realism
  regarding chance, 123–45, 158, 191, 243–5
  regarding morals, 226, 244
Ayer, A. J., 22

Bayesian epistemology, 137, 140–1, 182–7, 232–7, *see also* degrees of belief, updating by conditionalisation
  evolution and, 190
Bernoulli process, 138
best-system account of laws and chance, 110–13, 143, 157
  fit in, 114–16, 119, 120
  simplicity in, 111–12, 118–19, 121
  strength in, 112–13, 121
Bigelow, John, 78, *see also* chance, possibilism regarding
Blackburn, Simon, 143
Bohmian mechanics, 146, 155–8
branching worlds, 159–62, 174, *see also* Everettian quantum mechanics
Briggs, Rachael, 143

causation, 104, 199
chance, *see also* anti-realism regarding chance; contextual variability of chance ascriptions
  actualism regarding, 31, 104–22, 229, *see also* chance, frequentist accounts of
  anthropocentrism regarding, 121–2
  as a subspecies of probability, 127
  as an advice function, 16–22, 71, 89, 95, 216
  conditional on measure zero propositions, 79–81
  frequentist accounts of, 106–9, 119, 121
  in scientific explanations, 3, 88, 95, 101, 118, 126, 130, 158, 187
  normative role of, 4, 22–3, 88, 89, 92–5, 103, 120–1, 127, 187, 227–31, 241–3
  objectivity of, 26–8, 88, 101, 106, 123, 131, 158, 228, 235
  of past events, 7–8, 29, *see also* temporal asymmetry, of chances
  physicality of, 2–4, 85–6, 229, 241
  possibilism regarding, 31, 78–103
  primitivism regarding, 32
  propensity accounts of, 96
  subjectivist accounts of, 123, 127–31, 142
classical physics, 34–46, *see also* determinism; statistical mechanics
  gases in, 69–70
  particles in, 35–6, 41
  velocity in, 39, 44, 59
conditionalisation, *see* Bayesian epistemology
contextual variability of chance ascriptions, 24, 123, 216–17
counterfactuals, 67–8, 117
credences, *see* degrees of belief
Curie, Marie, 26

de Finetti, Bruno, 129, 234, *see also* degrees of belief, exchangeable
decision theory, 132–4
  Dominance axiom of, 180
degrees of belief, 2, 8–14
  as a species of probability, 12–14, 127
  characterised by way of betting dispositions, 9–11, 132, 135–6, 177, 184–6
  distinct from ordinary belief, 9
  exchangeable, 137–40, 184, 233–5, 239
  rational constraints upon, 101, 130, 177–82, 187, 189, *see also* chance, normative role of
  regarding initial conditions, 83, 96–8, 103, 158
  scientific evidence for, 11
  updating by conditionalisation, 130, 137, 233, *see also* Bayesian epistemology
determinism, 39, 42, 61, 68, 97, 103
  and quantum mechanics, 158, *see also* Bohmian mechanics
  compatibility of chance and, 29, 30, 73, 83–5, 172
Deutsch, David, 160, 176, 183
