TABLES

2.1 Ancient Fayyum land and population estimates	<i>page</i> 39
2.2 Population extrapolations from the Fayyum	40
2.3 Population density in Egypt, 1895–1910	43
2.4 Marginal land in Egypt, 1895–1910	51

MAP

Map of Egypt, from the <i>Cambridge Ancient History</i> , 2nd edn., vol. VII.1, pp. 120–1	xviii
--	-------

FIGURES

2.1 Fayyum wheat rents <i>Source:</i> Drexhage (1991: 159–63) supplemented with geographical information from the texts; the “vicinity of Tebtunis” includes all villages in the Polemon district that are near the mouth of the Gharaq basin. For problems with Drexhage’s dataset, see Bagnall (2002: 119); cf. Scheidel (forthcoming b: at note 88).	57
2.2 Nile Valley wheat rents <i>Source:</i> Drexhage (1991: 169–70, 175–6).	57
3.1 Land classification in the Apollonopolite nome 119/118 BCE <i>Source:</i> P. Haun. inv. 407, lines 31–2, 246–7, 334, 338, 369, 374; brushwood land has been counted as private land and ownerless land as derelict land even though they are listed separately in the text.	82

<i>List of tables and figures</i>		ix
3.2	Land classification in Tanis, 240/239 BCE <i>Source:</i> P. Cair. II 31073 A, recto, col. 2, lines 1–19, and 31073 B, recto, col. 2, lines 5 and 15; cf. Monson (2007a: 6–7).	91
3.3	Land classification in Kerkeosiris, 119/118 BCE <i>Source:</i> P. Tebt. I, 60, lines 4–47, and 61(a), lines 157–8, simplified according to the editors' comments, pp. 538–42.	92
3.4	Proportion of public and private land in Roman Egypt <i>Source:</i> details of interpretation are discussed below; P. Lond. III 604 A (47 CE; Krokodilopolis, Panopolite?); P. Giss. I 60 (118 CE; Naboo, Apollonopolite Heptakomias); P. Berl. Leihg. I 5 (158/159; Theadelphia, Arsinoite); P. Bour. 42 (166/167 CE; Hieria Nesos, Arsinoite); SB XIV 12208 (c. 300–350 CE); P. Oxy. XLIV 3205 (c. 297–308 CE; Phernouphite toparchy, Mendesian); P. Cair. Isid. 9–11 (309–312 CE; Karanis, Arsinoite); P. Ryl. IV 655 (c. 300–350 CE).	97
3.5	Land classification in Krokodilopolis, 47 CE <i>Source:</i> P. Lond. 604 A (47 CE; Krokodilopolis, Panopolite?); the 3,975 arouras represented here omit the 39 arouras of non-royal land charged at rates other than 1 or $\frac{3}{4}$ artabas per aroura.	98
3.6	Land classification in Naboo, 118 CE <i>Source:</i> P. Giss. I 60 (118 CE; Naboo, Apollonopolite Heptakomias).	100
3.7	Land classification in Hieria Nesos and nearby villages, 166/167 CE <i>Source:</i> P. Bour. 42 (166/167 CE; Hieria Nesos, Arsinoite) with the editor's tables, pp. 138–153. The aggregate 12,456 arouras represented here break down as follows, with revenue land added to royal land: village of Hieria Nesos, 2,220 arouras (55%) royal land, 524 arouras (13%) imperial estates, 1,317 arouras (32%) private land; village of Ptolemais Nea, 1,511 arouras (39%) royal land, 948 arouras (24%) imperial estates, 1,465 arouras (37%) private land; hamlet of Perkeesis, 2,161 arouras (100%) imperial estates; marsh of Hieria Nesos, 92 arouras (5%) royal land, 1,040 arouras (59%) imperial estates, 622 arouras (35%) private land; marsh of Kerkeesis, 289 arouras (52%) royal land, 267 arouras (48%) private land.	103

x	<i>List of tables and figures</i>	
3.8	Land classification in Theadelphia, 158/159 CE <i>Source:</i> P. Berl. Leihg. I 5 (158/159 CE; Theadelphia). Revenue land (<i>prosodika edaphê</i>) has again been added to royal land, while the small amounts of royal land assigned to private landowners has been added to royal land. Temple land combines both private and public.	104
4.1	Parties to conveyances, temple land <i>Source:</i> Texts listed by Manning (2003: 267–76); cf. excluding the Hauswaldt dossier: 36% non-temple status, 39% women, and 25% temple status (temple land).	116
4.2	Parties to conveyances, non-temple land <i>Source:</i> Texts listed by Manning (2003: 267–76); cf. excluding the Hauswaldt dossier: 61% non-temple status, 21% women, and only 18% temple status (non-temple land).	117
5.1	Ptolemaic land prices Median = 50 dr. \approx 5 art. of wheat <i>Source:</i> Maresch (1996: 182, 206–7) and Drexhage (1991: 13–7); the eighteen land prices dating to 123–89 BCE, whose median is 6,000 Ptolemaic bronze dr./ar., are converted into wheat according to wheat's median price of 1200 dr./art. in 118–93 BCE and then into Roman silver dr. based on wheat's median price of 10 dr./art. in 40–200 CE. Using mean instead of median prices generates an average 7,622 Ptolemaic bronze dr. \approx 5.7 art. (1,335 Ptol. dr./art.) \approx 63 Roman silver dr./ar. (11 Rom. dr./art.).	194
5.2	Roman land prices Median = 295 dr. \approx 29.5 art. of wheat <i>Source:</i> Drexhage (1991: 13–7, 123–34); cf. Maresch (1996: 208–9); using mean prices, the Roman average is 316 dr./ar. \approx 28.7 art./ar. (11 Rom. dr./art.).	195
