<i>Preface</i>	<i>page xi</i>
<b>1 Group Cohomology</b>	<b>1</b>
1.1 Definition of group cohomology	1
1.2 Equivariant cohomology and basic calculations	3
1.3 Algebraic definition of group cohomology	6
<b>2 The Chow Ring of a Classifying Space</b>	<b>8</b>
2.1 The Chow group of algebraic cycles	8
2.2 The Chow ring of a classifying space	11
2.3 The equivariant Chow ring	16
2.4 Basic computations	18
2.5 Transfer	22
2.6 Becker-Gottlieb transfer for Chow groups	24
2.7 Groups in characteristic $p$	26
2.8 Wreath products and the symmetric groups	28
2.9 General linear groups over finite fields	30
2.10 Questions about the Chow ring of a finite group	31
<b>3 Depth and Regularity</b>	<b>35</b>
3.1 Depth and regularity in terms of local cohomology	35
3.2 Depth and regularity in terms of generators and relations	41
3.3 Dufлот's lower bound for depth	46
<b>4 Regularity of Group Cohomology</b>	<b>49</b>
4.1 Regularity of group cohomology and applications	49
4.2 Proof of Symonds's theorem	50
<b>5 Generators for the Chow Ring</b>	<b>56</b>
5.1 Bounding the generators of the Chow ring	56
5.2 Optimality of the bounds	59

<b>6 Regularity of the Chow Ring</b>	62
6.1 Bounding the regularity of the Chow ring	62
6.2 Motivic cohomology	70
6.3 Steenrod operations on motivic cohomology	72
6.4 Regularity of motivic cohomology	73
<b>7 Bounds for <math>p</math>-Groups</b>	79
7.1 Invariant theory of the group $\mathbf{Z}/p$	80
7.2 Wreath products	82
7.3 Bounds for the Chow ring and cohomology of a $p$ -group	85
<b>8 The Structure of Group Cohomology and the Chow Ring</b>	87
8.1 The norm map	88
8.2 Quillen's theorem and Yagita's theorem	90
8.3 Yagita's theorem over any field	97
8.4 Carlson's theorem on transfer	99
<b>9 Cohomology mod Transfers Is Cohen-Macaulay</b>	104
9.1 The Cohen-Macaulay property	104
9.2 The ring of invariants modulo traces	109
<b>10 Bounds for Group Cohomology and the Chow Ring Modulo Transfers</b>	113
<b>11 Transferred Euler Classes</b>	122
11.1 Basic properties of transferred Euler classes	123
11.2 Generating the Chow ring	126
<b>12 Detection Theorems for Cohomology and Chow Rings</b>	127
12.1 Nilpotence in group cohomology	128
12.2 The detection theorem for Chow rings	131
<b>13 Calculations</b>	140
13.1 The Chow rings of the groups of order 16	141
13.2 The modular $p$ -group	150
13.3 Central extensions by $G_m$	154
13.4 The extraspecial group $E_{p^3}$	156
13.5 Calculations of the topological nilpotence degree	162
<b>14 Groups of Order <math>p^4</math></b>	174
14.1 The wreath product $\mathbf{Z}/3 \wr \mathbf{Z}/3$	174
14.2 Geometric and topological filtrations	176
14.3 Groups of order $p^4$ for $p \geq 5$	178
14.4 Groups of order 81	180
14.5 A 1-dimensional group	182

<i>Contents</i>	ix
<b>15 Geometric and Topological Filtrations</b>	185
15.1 Summary	185
15.2 Positive results	186
15.3 Examples at odd primes	188
15.4 Examples for $p = 2$	195
<b>16 The Eilenberg-Moore Spectral Sequence in Motivic Cohomology</b>	201
16.1 Motivic cohomology of flag bundles	202
16.2 Leray spectral sequence for a divisor with normal crossings	203
16.3 Eilenberg-Moore spectral sequence in motivic cohomology	205
<b>17 The Chow Künneth Conjecture</b>	210
<b>18 Open Problems</b>	214
<b>Appendix: Tables</b>	217
<i>References</i>	219
<i>Index</i>	227
