

## INDEX

- \*-inner, 58
- \*-outer, 58
  
- accelerant, 22, 320–323, 404, 429, 430, 444–448
- accelerant extension problem, 320
- Agranovich, Z.S., 54, 448
- Alpay, D., 371, 408
- antisymplectic, 277, 281
- A-regular J-inner mvf, 140
- Aronszajn, N., 3, 18, 127
- Arov, D.Z., 105
- associated pairs, 10, 19, 91, 103, 107
- associated pairs of the first kind, 11, 19, 92
- associated pairs of the second kind, 19, 102, 103
- asymptotic equivalence matrix, 438
- asymptotic scattering matrices, 24, 25, 440, 447
- Atkinson, F.V., 237, 238
  
- Bellman, R., 390, 406
- Bessel equation, 305
- Bessel functions, 305, 397
- Beurling-Lax theorem, 62, 308
- bitangential direct input impedance problem, 19, 21, 394, 395
- bitangential direct input scattering problem, 11, 181
- bitangential direct input impedance problem, 374, 394
- bitangential inverse input scattering problem, 12, 355, 357
- bitangential inverse monodromy problem, 12, 247–257, 273, 279, 285–304
- bitangential inverse spectral problem, 19, 372, 393, 394
- Blaschke-Potapov factor, 93, 95
- boundary condition, 238, 439
- B-regular J-inner mvf., 140
- B-resolvent matrix, 315, 324–328, 430
- Brodskii class, 262, 276
- Brodskii, M.S., 5, 246
- Brodskii-Kisilevskii condition, 241, 243, 245, 270, 272, 302
- canonical differential system, 1, 24, 30, 48, 256, 273, 279, 357, 374, 409, 421, 431–433
- canonical integral system, 5, 27, 30, 219–224, 230–237, 254, 264, 278, 356, 373
- Carathéodory class, 15
- Cartwright condition, 76, 79, 134, 403
- Cauchy formula, 60
- Cayley transform, 16, 68
- center, 67, 68, 101, 185, 187, 207
- chain, 158, 262
- chain of invariant subspaces, 262, 265
- chain of pairs, 9, 158
- characteristic function, 53, 238, 257
- characteristic mvf, 131, 258, 262, 265
- colligation, 131, 408
- completely indeterminate, 13, 20, 108, 109, 114, 115, 120, 122, 283–285, 312, 313, 320, 323, 324, 333, 373, 405
- continuous chains, 9, 158
- contractive inclusion, 163, 276
- convex, 189
  
- de Branges condition, 140, 276
- de Branges identity, 128, 129, 156
- de Branges matrix, 17, 143, 239, 397, 446
- de Branges space  $\mathcal{B}(\mathcal{E})$ , 18, 143–148, 399
- de Branges, L., xiii, xiv, 5, 108, 135, 136, 155, 156, 243, 299, 308, 309
- Denisov, S.A., 448
- description of  $\mathcal{H}(A)$ , 152
- description of  $\mathcal{H}(U)$ , 135
- description of  $\mathcal{H}(W)$ , 137
- determinate, 108, 109, 124, 312, 315, 320, 324
- Dirac system, 7, 22, 49, 51, 54, 55, 239, 447–449
- Dirac-Krein system, 23–26, 49, 409–449
- direct input impedance problem, 204
- direct input scattering problem, 179

- direct spectral problem, 220  
 DK-system, 23–26, 409–449  
 Douglas, R., 78  
 dual string, 308  
 Dym, H., 54
- entire mvf, 74  
 entire inner function, 81  
 entire symmetric operators, 53  
 exponential type, 74  
 extremal solution, 291, 297  
 extremal type-chain, 249, 296
- factoring Hamiltonians, 410–416  
 factorization, 138, 439, 440  
 Fatou's theorem, 58  
 Feller, W., 54  
 Feller-Krein string, 26, 44–47, 220  
 formulas for the solution, 357–361, 376  
 Fourier transforms, 79, 189–191  
 full rank, 12, 207, 211  
 functional model, 269
- GCIP, 119  
 Gelfand-Levitan, 406, 407, 448  
 generalized backwards shift, 63  
 generalized Carathéodory interpolation problem, 19, 119  
 generalized Fourier transform, 17, 46, 219, 221, 260, 264  
 generalized helical extension problem, 317–320  
 generalized Krein system, 392  
 generalized Sarason problem, 113  
 generalized Schur interpolation problem, 13, 112–117, 334, 347–354  
 Gesztesy, F., 449  
 Ginzburg, Yu.P., 105, 308  
 Gohberg, I., 308, 371, 408  
 greatest common left divisor, 63  
 Grossman, L.Z., 239  
 GSIP, 112
- Hamiltonian, 1, 30, 308, 409, 427, 428  
 Hankel operator, 108, 109, 114, 437, 443  
 Hardy class, 57  
 helical, 21, 311  
 helical extension problem, 311–317  
 Hoffman, K., 156  
 homogeneous, 243, 281, 285, 296  
 homogeneous  $J$ -inner functions, 281
- indeterminate, 108, 312, 320  
 inner-outer factorization, 61  
 input impedance matrices, 16, 203, 205, 444–447  
 input scattering matrices, 9, 12, 178–182, 424, 443, 447  
 integral representations, 330, 416, 421  
 invariant, 127  
 inverse asymptotic scattering problem, 443
- inverse monodromy problem, 4, 41, 241, 247–257, 273–279, 285–304, 423
- Jacobi matrix, 25, 55  
 $J$ -inner, 4
- Kaashoek, M.A., 408  
 Kac, I., 308  
 Kiselev, A., 449  
 Kisilevskii, G.E., 5  
 Krein system, 49, 449  
 Krein, M.G., xiii, 21–26, 47, 53–55, 76, 79, 106, 121, 134, 156, 308–311, 371, 403, 406, 433, 448  
 Krein-Sobolev identity, 390, 406, 448
- Langer, H., 26  
 Lax-Phillips, 155, 200  
 LB  $J$ -node, 258  
 least common right multiple, 63  
 left divisor, 86  
 left gamma generating matrices, 111  
 left linear fractional transformation, 65, 435  
 left regular, 94  
 left semiradius, 67, 101, 187, 199  
 left strongly regular, 118  
 Lesch, M., 406, 449  
 Levitan, B.M., 54  
 limit ball, 186, 192, 193, 206–211  
 limit point, 12, 193, 195, 207, 215, 219  
 linear fractional transformation, 8, 66  
 Livsic triangular model, 258, 264  
 Livsic, M.S., 53  
 Livsic-Brodskii  $J$ -node, 131, 258  
 $L$ -spectral functions, 239  
 locally absolutely continuous component, 70  
 Lyapunov-Stein equation, 156
- Makarov, K.A., 449  
 Malamud, M.M., 308, 309, 406, 449  
 Marchenko, V.A., 54, 448  
 mass function, 27  
 matrix ball, 67, 101, 184, 187, 189  
 matrizant, 2, 6, 33, 162, 173–176, 378, 416–422  
 maximal chain, 262, 265, 269  
 McKean, H.P., 54  
 Melik-Adamyam, F.E., 26, 121, 156, 448  
 monodromy matrix, 4, 6, 37, 230–232, 166, 247–257, 265, 420  
 monotone sequence, 139  
 Muckenhoupt (A2) condition, 156, 398  
 multiplicative integrals, 38  
 multiplicative semigroup, 86
- Nehari problem, 24, 338  
 Nehari, Z., 155  
 Nevanlinna class, 57, 105  
 nondecreasing, 3, 9, 158  
 normalized, 9, 34, 158  
 normalized Hamiltonian, 5

- Orlov, S.A., 11, 188, 193, 201, 207, 219, 238  
orthogonal spectral function, 239–240
- Page, L.A., 155  
Paley, R.E.A.C., 80  
Paley-Wiener space, 399  
Paley-Wiener theorems, 80  
partial isometry, 148  
Pekarev, E.L., 309  
Peller, V.V., 155  
perfect, 146–148, 154  
PG transform, 84, 86–89  
Plancherel formula, 79  
Poisson formula, 60  
polar decomposition, 90  
positive kernel, 3, 21, 33, 128  
Potapov, V.P., xiii, 5, 40, 41, 81, 84, 105, 241, 243, 246  
Potapov class, 84, 238  
Potapov-Ginzburg transform, 84, 86–89  
potential, 422–429, 432–434, 447  
principal spectral function, 47  
product of nodes, 261, 262  
projection of a node, 261, 262, 265  
pseudocontinuation, 77  
pseudospectral function, 17, 220, 224, 230, 233
- Ramanujan, S., 404  
rank, 61  
ranks of the semiradii, 192, 195, 211  
rational, 125–127  
real, 243, 277, 397, 400  
Redheffer transform, 66, 106, 182  
Redheffer, R., 105, 106  
reflection coefficient, 200  
regular canonical differential system, 4, 36  
regular canonical integral system, 6, 36, 183, 221, 237  
regular de Branges matrix, 145–148  
regular de Branges space, 145  
regular DK-system, 410  
regular string, 46  
reproducing kernel, 127  
reproducing kernel Hilbert space, 127  
resolvent identity, 129  
resolvent kernel, 387, 389  
resolvent matrix, 13–15, 20, 111, 122, 149, 151, 254, 283–285, 341, 349, 350, 356, 357, 374, 426, 444, 445  
Riccati equation, 51, 156  
Riemann surface, 309  
Riesz-Herglotz-Nevanlinna representation, 17, 69  
Riesz, F. and M. theorem, 71  
right divisor, 86  
right gamma generating matrices, 109  
right linear fractional transformation, 66, 435  
right regular, 6, 94, 107, 115  
right regular gamma generating matrices, 110  
right semiradius, 67, 101, 187  
right strongly regular, 6, 108, 118  
right strongly regular gamma generating matrices, 110  
RK, 3, 127, 128  
RKHS, 3, 127, 128  
Rovnyak, J., 156
