<i>Commonly used notation</i>	<i>page</i> ix
<i>Preface</i>	xi
1 Introduction	1
2 Examples	8
2.1 Data example on S^1 : wind and ozone	8
2.2 Data examples on S^2 : paleomagnetism	8
2.3 Data example on Σ_2^k : shapes of gorilla skulls	12
2.4 Data example on Σ_2^k : brain scan shapes of schizophrenic and normal patients	15
2.5 Data example on affine shape space $A\Sigma_2^k$: application to handwritten digit recognition	17
2.6 Data example on reflection similarity shape space $R\Sigma_3^k$: glaucoma detection	18
2.7 References	20
3 Location and spread on metric spaces	21
3.1 Introduction	21
3.2 Location on metric spaces	22
3.3 Variation on metric spaces	27
3.4 Asymptotic distribution of the sample mean	28
3.5 Asymptotic distribution of the sample variation	30
3.6 An example: the unit circle	31
3.7 Data example on S^1	34
3.8 References	35
4 Extrinsic analysis on manifolds	36
4.1 Extrinsic mean and variation	36
4.2 Asymptotic distribution of the sample extrinsic mean	37
4.3 Asymptotic distribution of the sample extrinsic variation	39
4.4 Asymptotic joint distribution of the sample extrinsic mean and variation	41

vi	<i>Contents</i>	
4.5	Two-sample extrinsic tests	42
4.6	Hypothesis testing using extrinsic mean and variation	46
4.7	Equivariant embedding	48
4.8	Extrinsic analysis on the unit sphere S^d	49
4.9	Applications on the sphere	51
4.10	References	55
5	Intrinsic analysis on manifolds	57
5.1	Intrinsic mean and variation	57
5.2	Asymptotic distribution of the sample intrinsic mean	59
5.3	Intrinsic analysis on S^d	64
5.4	Two-sample intrinsic tests	65
5.5	Data example on S^2	69
5.6	Some remarks	71
5.7	References	75
6	Landmark-based shape spaces	77
6.1	Introduction	77
6.2	Geometry of shape manifolds	78
6.3	References	80
7	Kendall's similarity shape spaces Σ_m^k	82
7.1	Introduction	82
7.2	Geometry of similarity shape spaces	83
7.3	References	86
8	The planar shape space Σ_2^k	87
8.1	Introduction	87
8.2	Geometry of the planar shape space	88
8.3	Examples	89
8.4	Intrinsic analysis on the planar shape space	90
8.5	Other Fréchet functions	96
8.6	Extrinsic analysis on the planar shape space	97
8.7	Extrinsic mean and variation	98
8.8	Asymptotic distribution of the sample extrinsic mean	99
8.9	Two-sample extrinsic tests on the planar shape space	101
8.10	Planar size-and-shape manifold	103
8.11	Applications	105
8.12	References	109
9	Reflection similarity shape spaces $R\Sigma_m^k$	110
9.1	Introduction	110
9.2	Extrinsic analysis on the reflection shape space	111
9.3	Asymptotic distribution of the sample extrinsic mean	117

<i>Contents</i>		vii
9.4	Two-sample tests on the reflection shape spaces	122
9.5	Other distances on the reflection shape spaces	123
9.6	Application: glaucoma detection	125
9.7	References	128
10	Stiefel manifolds $V_{k,m}$	130
10.1	Introduction	130
10.2	Extrinsic analysis on $V_{k,m}$	130
10.3	References	134
11	Affine shape spaces $A\Sigma_m^k$	135
11.1	Introduction	135
11.2	Geometry of affine shape spaces	137
11.3	Extrinsic analysis on affine shape spaces	139
11.4	Asymptotic distribution of the sample extrinsic mean	141
11.5	Application to handwritten digit recognition	144
11.6	References	146
12	Real projective spaces and projective shape spaces	147
12.1	Introduction	147
12.2	Geometry of the real projective space $\mathbb{R}P^m$	148
12.3	Geometry of the projective shape space $P_0\Sigma_m^k$	149
12.4	Intrinsic analysis on $\mathbb{R}P^m$	150
12.5	Extrinsic analysis on $\mathbb{R}P^m$	151
12.6	Asymptotic distribution of the sample extrinsic mean	153
12.7	References	155
13	Nonparametric Bayes inference on manifolds	156
13.1	Introduction	156
13.2	Density estimation on metric spaces	157
13.3	Full support and posterior consistency	158
13.4	Posterior computations	163
13.5	Application to unit sphere S^d	165
13.6	Application to the planar shape space Σ_2^k	166
13.7	Application to morphometrics: classification of gorilla skulls	168
13.8	Proofs of theorems	170
13.9	References	181
14	Nonparametric Bayes regression, classification and hypothesis testing on manifolds	182
14.1	Introduction	182
14.2	Regression using mixtures of product kernels	183
14.3	Classification	185

viii	<i>Contents</i>	
14.4	Nonparametric Bayes testing	192
14.5	Examples	196
14.6	Proofs	202
Appendix A	Differentiable manifolds	209
Appendix B	Riemannian manifolds	214
Appendix C	Dirichlet processes	218
Appendix D	Parametric models on S^d and Σ_2^k	225
