

Index

- Albert, D., 3, 73, 78, 150, 221, 272
 GRW approach, 301–307
 Approach to Equilibrium,
 Law of, 22–25, 58, 160–162
 Boltzmann's approach, 171–175
 asymmetry in time, 16–17, 25, 74
 asymmetry of time, 74
 atomistic hypothesis, 42
- Bennett, C., 263, 273
 Birkhoff, G., 63
 Boltzmann, L., 2
 Boltzmann's equation.
See H-theorem, Lanford's theorem
 Brown, H., 17
- Carnot's cycle, 26–33, 37
 Conservation of Energy,
 Law of, 18–22
 constraints, 48
 cycle of operation, 280–281
- decoherence, 286, 307, 310, 311
 determinism, 8, 50, 54, 63, 131, 248, 268
 Dürr, D., 188, 308
 dynamical blob, 55, 106–108
- Eddington, A., 180, 286
 Einstein, A., 1, 2, 7, 180, 190
- entropy, 35–37, 57, 154–158
 and probability, 158–159
 von Neumann, 312, 317
 equilibrium, 23, 58, 159–160
 thermal, 24
 erasure, 246
 and entropy, 254–255
 and Liouville's theorem, 251
 blending, 251
 in quantum mechanics, 318
 logical irreversibility, 246, 255–257
 macroscopic, 248–251
 microscopic, 248, 268
 necessary and sufficient conditions, 251–254
 ergodic approach, 63–66, 70–71
 ergodic theorem, 66–69
- Feynman, R., 42, 216, 229, 260, 263
 fluctuations, 13, 38, 39, 40, 48, 57, 235, 240–241, 311
- Ghirardi, G. C., 304
 Gibbs, J. W., 2, 12, 234
 Gibbsian approach, 234
 Goldstein, S., 182, 308
 GRW theory, 304–305
- Hawking, S., 224, 232
 heat, 21, 122
- heat bath, 33, 299
 heat engine, 26–33
H-theorem, 164–167
- ideal gas, 27
 information, 246
- Joule's experiment, 19–21
- KAM theorem, 70
 Kripke, S., 121
- Landauer, R., 247
 Landauer's thesis, 247, 254
 Lanford, O. E., 175
 Lanford's theorem, 175–178
 Liberal Stance, 95, 284–286.
See also macrostates
 Liouville's theorem, 55, 60
 Loschmidt reversal, 61
 Loschmidt's reversibility objection, 61, 167–170
- macrostates, 52, 94, 234
 Boltzmann's, 111–115
 explanatory role of, 95–97
 Maxwell–Boltzmann distribution, 115–119
 physical origin, 94, 96, 103, 108–111
 the combinatorial argument, 171–175
 thermodynamic, 108–111
 Maxwell, J. C., 2, 3, 270
 Maxwell's Demon, 2

- Maxwell–Boltzmann distribution, 97, 114, 115, 118, 166, 173, 174
the combinatorial argument, 171–175
Maxwell's Demon, 270
and free will, 277
and Liouville's theorem, 276
erasure, 280–284
in quantum mechanics, 318
Maxwell's thought experiment, 270
Szilard's engine, 299
measure
Lebesgue, 55, 57, 67, 69–70.
measure-1 theorems, 189–191
of macrostate, 136–137
probability.
 See probability
measurement, 192–211
and entropy, 207–209, 273–277
and retrodiction, 217
classical collapse, 140, 200–202
macroscopic, 195–200
microscopic, 194
preparation, 202–207
memory
of the future, 224–226
physics of, 225, 230–232
Reliability Hypothesis, 213, 221
retrodiction of, 213
microstates, 43–49, 52, 76
minimum problem, 215
natural selection, 8, 139, 233
observer, 119–123, 201–202, 209
experience of, 120
mental states, 120
multi-realizability, 121
parity of reasoning.
 See minimum problem
Past Hypothesis, 216–219, 222–224
dynamical hypothesis, 229
generalized, 222
local, global, 229–230
phase space. *See* state space
physicalism, 120–123, 211
Pitowsky, I., 135, 182, 189
Poincaré's recurrence theorem, 60, 170–171, 225
Price, H., 79, 195, 224
Principle of Indifference, 134, 174
probability, 125
 measure, choice of, 132–136
 moral certainty, 65
 objective ignorance, 131
 of macrostate, 136–137
 over initial conditions, 149–152, 226–228
 Probability Rule, 131
 transition probability, 130–131
Reichenbach, H., 63
retrodiction, 84, 213–216
 and measurement, 217
Rimini, A., 304
Russell, B., 77, 219, 226, 230
Second Law of Thermodynamics, 25–26, 34–38, 59, 162–164
Sklar, L., 30
spin echo experiments, 143–149
state space, 44
 μ -space, 47
 accessible region, 44–47
Stosszahlansatz, 167
Szilárd, L., 192, 273, 288
time asymmetry.
 See asymmetry in time,
 asymmetry of time
time reversal, 86
time-reversal invariance, 88, 90
time, arrow of.
 See asymmetry of time,
 asymmetry in time
time-slices, 74, 78
trajectories, 50
 historical, 221
typicality, 182
 a posteriori, 149–152, 185–186
 a priori, 184, 186–187, 188–189
 Bohmian mechanics, 307–309
Uffink, J., 17
velocity reversal, 80.
 See also Loschmidt reversal
von Neumann, J., 63, 210
Weber, T., 304
work, 28
Zanghi, N., 308
Zermelo's recurrence objection.
 See Poincaré's recurrence theorem
