1 Plasticity in Se	nsory Systems	1
Jennifer K. E. Stee	ves and Laurence R. Harris	
I VISUAL AND VIS	SUOMOTOR PLASTICITY	
2 The Distribute	d Nature of Visual Object Learning	9
Hans P. Op de Bee	pck	
Introduction		9
Human Imaging: H	Partially Distributed Learning Effects	11
Learning at the Sir	ngle-Cell Level	19
Conclusion		27
3 Motor Adaptat	ion and Proprioceptive Recalibration	33
Danielle Salomono	czyk, Erin K. Cressman, and Denise Y. P. Henriques	
Introduction		33
Sensory Recalibra	tion with Prism Displacement	34
Sensory Recalibrat	tion with Virtual Reality	35
Recalibrating Han	d Path	36
Recalibrating Han	d Position	37
Relationship Betw	een Recalibration and Adaptation	44
4 Deficits and Ad	laptation of Eve-Hand Coordination	
During Visuall	y Guided Reaching Movements in People	
with Amblyopi	a	49
Ewa Niechwiej-Sz	wedo, Herbert C. Goltz, and Agnes M. F. Wong	
Introduction		49

vi	Contents	
	Overview of Our Study Design	51
	Effects of Amblyopia on Saccades	52
	Effects of Amblyopia on Visually Guided Reaching	55
	Effects of Amblyopia on Temporal Eye-Hand Coordination During	
	Reaching	62
	Future Directions	66
II	PLASTICITY IN CHILDHOOD	
5	Human Visual Plasticity: Lessons from Children Treated	
	for Congenital Cataracts	75
	Daphne Maurer and Terri Lewis	
	Acuity	76
	Higher-Level Vision	78
	Summary of Experimental Findings on Human Binocular	
	Deprivation	82
	Implications for Critical Periods	82
	Unanswered Questions	86
	Summary	88
6	Living with One Eye: Plasticity in Visual and	
	Auditory Systems	94
	Krista R. Kelly, Stefania S. Moro, and Jennifer K. E. Steeves	
	Seeing with One Eye: Objects and the World Around Us	96
	Seeing with One Eye: Motion in the World Around Us	99
	Brain's Response to Losing One Eye	100
	Effect of Loss of One Eye on Nonvisual Tasks	104
	Living with One Eye: Locating where Sounds Originate	105
	Living with One Eye: Adaptive Strategies for Everyday Life	100
	Living with One Eye. Adaptive Strategies for Everyday Life	108
7	Building the Brain in the Dark: Functional and Specific	
	Crossmodal Reorganization in the Occipital Cortex of	
	Blind Individuals	114
	Olivier Collignon, Giulia Dormal, and Franco Lepore	
	Introduction	114
	Crossmodal Reorganization in Occipital Cortex of Early Blind	115
	Functional Specificity in Crossmodal Reorganization	116
	Critical Periods for Crossmodal Reorganization	121
	Putative Mechanisms for Crossmodal Reorganization	122
	Outcomes of visual restoration and renabilitation	124

	Contents	vii
8	Crossmodal Plasticity in Early Blindness Josef P. Rauschecker	138
	Introduction	138
	Expansion of Whisker-Barrel System in Early-Blind Animals	138
	Sound Localization in the Blind	139
	Neural Basis of Improved Sound Localization in Blind Animals	141
	Neuroimaging of Auditory Spatial Functions in Blind Humans	143
	Conclusions	148
III	PLASTICITY IN ADULTHOOD AND VISION	
RE	HABILITATION	
9	Visual Plasticity of the Adult Brain	155
	Robert F. Hess and Benjamin Thompson	
	Historical Preamble	155
	Monocular Visual Function	157
	Binocular Visual Function	165
	Mechanisms of Visual Plasticity	167
	Conclusions	171
10	Beyond the Critical Period: Acquiring Stereopsis	
	in Adulthood	175
	Susan R. Barry	
11	Plasticity and Restoration after Visual System Damage: Clinical Applications of the "Residual Vision Activation	
	Theory"	196
	Carolin Gall and Bernhard A. Sabel	
	Spontaneous Recovery of Visual Fields after Central Visual System Lesions	197
	Residual Vision at the Visual Field Border and Its Importance for	
	Recovery Prospects Following Visual Field Training	199
	Activating Residual Vision by Training	204
	Activating Residual Vision by Transorbital Alternating Current	211
		211
	Network Plasticity and "Within-Systems" Plasticity: Mechanisms of	010
	vision Restoration	218
	Conclusion	220
	Conclusion	221

CAMBRIDGE
