

Index

- π -system, 269
- σ -algebra, 5

- absorbing set, 34
- adapted random process, 6, 62
- admissible martingale solution, 261
- Alexandrov theorem, 274
- augmented filtration, 277

- balance relations, 215
- Bogolyubov–Krylov argument, 87
- Borel σ -algebra, 6

- Calderón–Zygmund theorem, 217
- canonical process, 138, 305
- canonical space, 305
- central limit theorem, xii, 181
- characteristic scales, 57
- closed random set, 183
- co-area form of balance relations, 216
- compact random set, 183
- complete σ -algebra, 6
- complete probability space, 6
- completion of a σ -algebra, 6
- compound Poisson process, 59
- conditional law, 18
- countably generated σ -algebra, 270
- coupling, 16
- coupling operators, 118

- Da Prato–Debussche–Odasso theorem, 257
- Dirac measure 306
- disintegration, 32
- distribution function, 15, 20, 272
- distribution of a random variable, 6
- Dobrushin lemma, 17

- Doob convergence theorem, 189, 288
- Doob moment inequality, 59, 61, 72, 287, 301, 302
- Doob optional sampling theorem, 77, 78, 135, 287
- Doob–Kolmogorov inequality, 84, 277, 279, 287
- dual-Lipschitz distance, 9

- energy, 57
- energy balance, 47, 76
- energy inequality, 261
- energy spectrum of turbulence, 242
- enstrophy, 57
- exponential mixing, 102, 105, 110, 147
- exponential supermartingale, 287
- extension of a Markov process, 107

- Fatou lemma, 7
- Feller property, 25
- filtered probability space, 6
- first hitting time, 305
- Flandoli–Romito theorem, 260
- Foiaş–Prodi inequality, 54
- function of bounded variation, 124

- Gelfand triple, 48, 275

- image of a measure, 5
- interpolation, 3
- Itô formula, 277

- Kantorovich density, 21
- Kantorovich distance, 9
- Kantorovich functional, 21
- Kantorovich–Rubinstein theorem, 21

- Khas'minskii relation, 154
 Kolmogorov inequality, 84
 Kolmogorov–Chapman relation, 23, 31
 Krylov estimate, 230, 233, 283
- Ladyzhenskaya inequality, 4
 law of a random variable, 6
 law of the iterated logarithm, 178
 law of large numbers, 173
 Lebesgue spaces, 1
 Lebesgue theorem on dominated convergence, 7
 Ledrappier–Le Jan–Crauel theorem, 187
 Leray decomposition, 37
 Leray projection, 38
 Lindeberg condition, 289
 Lipschitz domain, 1
 local time, 282, 283
 Lyapunov–Schmidt reduction, 156
- Markov chain, 22
 Markov invariant measures, 187
 Markov process, 22
 Markov property, 22, 30
 Markov RDS, 29
 Markov selection, 261
 Markov semigroups, 23
 martingale, 286
 martingale approximation, 174, 289
 martingale solution, 258
 maximal coupling, 17, 102
 measurable map, 5, 6
 measurable Polish space, 6
 measurable space, 5
 measure-preserving group, 27
 metric of uniform convergence on bounded intervals, 5
 minimum of two measures, 18
 mixing, 108
 mixing extension, 111
 modified Skorokhod metric, 59
 monotone class, 269
 monotone convergence theorem, 7
 mutually singular measures, 12
- Navier–Stokes process, 51–53
- Polish space, 4, 6
 portmanteau theorem, 15
 probability space, 6
 product of measurable spaces, 5
 progressively measurable random process, 6
 projection theorem, 271
 Prokhorov theorem, 13, 14, 87, 109, 203, 218, 220, 237, 275
 quadratic variation, 286
 random dynamical system, 28
 random kick force, 58
 random point attractor, 183
 random probability measure, 19, 32
 random process, 6
 random variable, 6
 rate of dissipation of energy, 57, 90
 rate of dissipation of enstrophy, 57, 92
 Reynolds number, 57
 rigged Hilbert space, 275
 Ruelle–Perron–Frobenius theorem, 157
- smoothing property, 49
 Sobolev embedding, 3
 Sobolev space, 1, 2
 spatially regular white noise, 58
 squeezing property, 117
 stationary measure, 24, 33, 64, 76
 stationary solution, 24, 64, 76
 Stokes operator, 39, 55
 stopping time, 24
 stream function, 48
 strong Markov property, 24, 25, 27
 submartingale, 287
 supermartingale, 287
- tight family of measures, 13
 Tikhonov topology, 5
 total variation distance, 8, 11
 transition function, 22, 30
 trigonometric basis, 45
- Ulam theorem, 6, 12, 89, 233
 uniformly mixing Markov process, 289
 universality of white noise, 59, 83, 207
 universally measurable subset, 271
 usual hypotheses, 6, 69
- velocity correlation tensors, 150
 vorticity, 57
- weak convergence of measures, 13
 weight functions, 128
 Yosida approximation, 275
