	<i>Preface</i>	<i>page ix</i>
1	Preliminaries	1
	1.1 Function spaces	1
	1.2 Basic facts from measure theory	5
	1.3 Markov processes and random dynamical systems	22
	Notes and comments	35
2	Two-dimensional Navier–Stokes equations	36
	2.1 Cauchy problem for the deterministic system	36
	2.2 Stochastic Navier–Stokes equations	58
	2.3 Navier–Stokes equations perturbed by a random kick force	62
	2.4 Navier–Stokes equations perturbed by spatially regular white noise	69
	2.5 Existence of a stationary distribution	87
	2.6 Appendix: some technical proofs	93
	Notes and comments	99
3	Uniqueness of stationary measure and mixing	101
	3.1 Three results on uniqueness and mixing	104
	3.2 Dissipative RDS with bounded kicks	115
	3.3 Navier–Stokes system perturbed by white noise	126
	3.4 Navier–Stokes system with unbounded kicks	141
	3.5 Further results and generalisations	145
	3.6 Appendix: some technical proofs	159
	3.7 Relevance of the results for physics	168
	Notes and comments	169

viii	<i>Contents</i>	
4	Ergodicity and limiting theorems	173
4.1	Ergodic theorems	173
4.2	Random attractors and stationary distributions	182
4.3	Dependence of a stationary measure on the random force	202
4.4	Relevance of the results for physics	209
	Notes and comments	210
5	Inviscid limit	211
5.1	Balance relations	211
5.2	Limiting measures	218
5.3	Relevance of the results for physics	241
	Notes and comments	244
6	Miscellanies	245
6.1	3D Navier–Stokes system in thin domains	245
6.2	Ergodicity and Markov selection	251
6.3	Navier–Stokes equations with very degenerate noise	264
	Appendix	269
A.1	Monotone class theorem	269
A.2	Standard measurable spaces	270
A.3	Projection theorem	271
A.4	Gaussian random variables	271
A.5	Weak convergence of random measures	274
A.6	The Gelfand triple and Yosida approximation	275
A.7	Itô formula in Hilbert spaces	277
A.8	Local time for continuous Itô processes	282
A.9	Krylov’s estimate	283
A.10	Girsanov’s theorem	285
A.11	Martingales, submartingales, and supermartingales	286
A.12	Limit theorems for discrete-time martingales	288
A.13	Martingale approximation for Markov processes	289
A.14	Generalised Poincaré inequality	291
A.15	Functions in Sobolev spaces with a discrete essential range	292
	Solutions to selected exercises	293
	<i>Notation and conventions</i>	304
	<i>References</i>	307
	<i>Index</i>	319
