Introduction	1
1 Toward a scientific-realistic theory on the origin of human behavior	11
<i>Manuel Domínguez-Rodrigo</i>	
PART I. ON THE USE OF ANALOGY I: THE EARLIEST MEAT EATERS	
2 Conceptual premises in experimental design and their bearing on the use of analogy: A critical example from experiments on cut marks	47
<i>Manuel Domínguez-Rodrigo</i>	
3 The use of bone surface modifications to model hominid lifeways during the Oldowan	80
<i>Charles P. Egeland</i>	
4 On early hominin meat eating and carcass acquisition strategies: Still relevant after all these years?	115
<i>Karen D. Lufo</i>	
5 Meat foraging by Pleistocene African hominins: Tracking behavioral evolution beyond baseline inferences of early access to carcasses	152
<i>Travis Rayne Pickering and Henry T. Bunn</i>

viii

Contents

- 6 Can we use chimpanzee behavior to model early hominin hunting? 174
Travis Rayne Pickering and Manuel Domínguez-Rodrigo

PART II. ON THE USE OF ANALOGY II: THE EARLIEST STONE TOOLMAKERS

- 7 The origins of the Oldowan: Why chimpanzees (*Pan troglodytes*) still are good models for technological evolution in Africa 201
Susana Carvalho and William McGrew
- 8 What does Oldowan technology represent in terms of hominin behavior? 222
David R. Braun
- 9 Testing cognitive skills in Early Pleistocene hominins: An analysis of the concepts of hierarchization and predetermination in the lithic assemblages of Type Section (Peninj, Tanzania). 245
Fernando Diez-Martín, Felipe Cuartero, Policarpo Sánchez Yustos, Javier Baena, Daniel Rubio, and Manuel Domínguez-Rodrigo
- 10 The Early Acheulean in Africa: Past paradigms, current ideas, and future directions 310
Fernando Diez-Martín and Metin I. Eren

- Index* 359

Tables

1.1. Principal elements for a definition of human behavior	<i>page</i> 15
1.2. A proposed theory for the origin of human behavior	17
1.3. Hypotheses and their testing premises composing the theory of the emergence of human behavior	18
1.4. Refined description of concepts contained in factual hypotheses	30
2.1. Interpretations of the methodological utility of cut marks and of the data on these bone surface modifications from east African Plio-Pleistocene sites	52
9.1. Description of several variables used for the analysis of the Peninj lithic material	250
9.2. List and brief description of the replicated experiments for the study of the Peninj materials	254
9.3. List of hammerstones used for the experimental replication in the Peninj study	255
9.4. Variables used in the Peninj experimental program	256
9.5. Schematic reconstruction of the various reduction models of cores in the Peninj experimental research	257
9.6. Mean values of the three lithic samples in the Peninj study	267
9.7. Coefficients of discriminants in the Peninj archaeological and experimental collections	272
