Index

accuracy of dike measurements 37–38
accurate measurements of dikes 35–36
action, definition of 493
  minimised for actual dike path 502
active volcano, definition of 1
active volcanoes in the world 380
actual path selected by a dike 493
aerial photographs 35
Almannagja (Iceland) 355
ampholites 43, 44
Anaga (Tenerife) 488
analogue models, definition of 20–21
  of volcano deformation 88–89
analytical models, definition of 21
anisotropic rock body 100
anisotropic stress 95
aperture, definition of 7
  of a volcanic fissure 357, 360
apparent displacement across a dike 45
arrest of dikes 14
  at contact with inclined sheets 448
  examples of 345–348
  arrested sill 245
artificial cooling of magma 526
aseismic creeping 535
aseismic magma transport 71
Askja caldera (Iceland) 305
aspect ratios of dikes 56
aspect ratios of sills 76
asymmetric roses 49
attenuation 301
  attitude 7, 46, 51
  of sills 75
  Augustine Volcano (United States) 3
  Austurhorn fossil magma chamber (Iceland) 306–307
a-value (for earthquakes) 192–194
  axes, principal 93
  of compression (in focal mechanism) 186
  axis of tension (in focal mechanism) 186
background seismicity 206
balloons as magma-chamber models 138
Bardarbunga Volcano (Iceland) 305
Bardarbunga–Holuhraun earthquake swarm 201
basaltic edifices 1, 126, 436
  heights of 260
  slopes of 260
baseline volcanic behaviour 473
Baula fossil magma chamber (Iceland) 305
Baula laccolith 249
beach-ball diagram 185–186
benchmark (for GPS measurements) 16
birefringence 328
  of a volcanic fissure 328
bi-logarithmic (log–log) plot 53
bin (of a histogram) 48
blunt tips of dikes 63
body forces 496
body waves 180–182
  borehole strainmeter 16, 474
  breccia at dike tip
brittle behaviour of rocks 238
brittle–ductile transition of common rocks 570
bulk compressibility 290
bulk modulus (incompressibility) 103
bulk volume of a reservoir 292
buoyancy 240–241, 333
  as part of driving pressure 331
  effects on dike propagation 334, 486–490
b-value (for earthquakes) 192–194
  differences in 202
  calculus of variations 505
  caldera collapse 251–259
    stable 258
    unstable 257
  caldera sizes and magma chamber sizes 287
  caldera-driven explosive eruption 406–407
  carbon dioxide in magma 288
  catastrophic risk and large eruptions 520
cavities in dike rock 72
central volcanoes 424–425
  shift in the location of 283, 285
corner effect 238
  of compression (strain nucleus) 106
caldera–reservoir volume ratio, effects of 428–431
caldera-driven explosive eruption 406–407
carbon dioxide in magma 288
cavities in dike rock 72
central volcanoes 424–425
  shift in the location of 283, 285
centre of compression (strain nucleus) 106
chemical monitoring of volcanoes 475
chemistry of springs for volcano monitoring 16
chilled selvage of dikes 41, 67
clay cones 2
circular histograms 48
Columbia River Basalts (United States) 411
columnar (cooling) joints 450–452
in a dike 42, 43
compliant rocks 64, 99
suppress (reduce) stress 129
composite dikes 40
compressibility 103
of gas 288
of magma 288
compressive stress as positive 94
conceptual models 20
condition for magma-chamber rupture 237
conditions for subsidence 523
conduction of heat 362–366
conduits 382–390
cylindrical 382–385
elliptical 386–387
parallel-plate models of 387–390
configuration of a system 498
conjugate faults 350
conservative forces 279
conservative systems 494, 496
constitutive laws 496
constraints 494
contact as a free surface 341
contact properties 445–446
contacts (between layers) 58, 122
as free surfaces 341
properties of 446–446
welding of 445
continuous (elastic) systems 497–500
continuously erupting volcanoes 396
contours of stress 96
controlling dimensions 12, 56
convection 362
Cook–Gordon delamination 230, 339–341
cooling (columnar) joints 450–452
as paths for dikes 326
cooling of magma to prevent eruption 525–527
coordinates for dike location 35
Coulomb criterion 251
crack–crack interactions 60
crack-displacement modes 190
craters 438
crater cones 438–439
cubic law 257, 361, 438
cumulative (total) thickness of a dike 38
cumulative plots 53
cylindrical conduits 382–385, 439
cylindrical magma chambers 433
damage due to earthquake waves 182
Darcy's law 277–280
physical meaning of 278
data analysis and presentation 46–53
Deccan Traps (India) 411
deep-seated reservoirs 3, 225, 272–324
deflation 87–88, 106
deflection of dikes into sills 229–234
deformation 14
data 88–92
elastic 14
inelastic 14, 88
permanent 88
plastic 14, 88
source 18
degassing 72
degrees of freedom 498
densities of common fluids 571
densities of common rocks 568–569
density difference 333
between magma and host rock 241
density stratified reservoir 275
depth of erosion (of an outcrop) 44
depths of active magma chambers and reservoirs 302–305
depths of deep-seated reservoirs 225
depths of fossil magma chambers 305–308
depths of shallow magma chambers 225, 477
detecting active magma chambers and reservoirs 299–308, 476
deterministic forecasts 23
difference in shape between feeders and non-feeders 71
differential stress 241
dike and a graben 357
dike arrest 14, 338–348
by a graben 232–233
permanent 61, 63, 65, 66
temporary 61, 63, 65, 66
dike arresters 436
dike deflected into a sill 26, 242
dike emplacement, induced earthquakes 146
dike fingers 358
in the Krafla Volcanic System 351
dike following a fault 509
dike fractures, lateral propagation of 358
dike fractures, vertical propagation of 358
dike initiation 325–332
conditions for 331
dike injection 206
dike injection from a magma chamber 234–239
dike intensity 435
dike meeting a fault 510
dike meeting a contact 340–341
dike paths 325–378
common 505
effects of faults on 509–512
forecasting of 328
in heterogeneous, anisotropic rock 507–509
in homogeneous, isotropic rock 505–507
minimum potential energy and 500–501
potential 328
potential number of 492, 502
dike propagation 483–512
buoyancy effects on 486–490
direction of 68–71
earthquakes induced by 70
ing in all directions 69
lateral 68
least action principle and 491–500
quasi-static 500–502
dike swarms 36
dike tips 46
and grabens 349
and normal faults 349
fractures around 67
lateral 61
proportion of 73
rounded 64
vertical 61
as a solidified magma-filled fracture 7
dike-induced deformation 512–520
dike-induced faulting 483–484
dike-induced fractures 67
dike-induced internal displacements 513–520
dike-induced internal stresses 513–520
dike-induced surface displacements 513–520
dike-injection frequency 429–431
dike-injection rate 234
dike-lets 72
dike-path length 345
dike-propagation paths 332–338
dike-rock texture 67
dikes 7
and sheets in a layered crust 146–156
and sheets in elastic half-spaces 141–146
and sills making volcanoes stronger 447
deflected into sills 229–234
dip-dimension of 12
dips of 51
dislocation models of 143–146
drilling into 526–528
fingers of 69
last movement of magma in 69
lateral propagation of 57
length–thickness ratios 55
length of 11
magma front of 198
proportion of feeders versus non-feeders 73–74
rate of injection of 226
regional and local 325
segmented 199–200
stress concentration around 356
strike-dimension of 12
surface effects of 91
thickness variations of 56
tips (ends of) 61–67
dike-segment overlap 62
dike–sill contacts 335–336
dilation (volume strain) 103
dip 7, 51
dip direction 51
dip distribution of sheet intrusions 125
dip of lava piles 284
dip-dimension, definition of 7
dip-slip faults, ring-faults as 253
direction of dike propagation 68–71
directional data 48
directional distinction 49
discharge velocity 277
discontinuities 63
discrete systems 497
dislocation models of dikes 19, 143–146
surface deformation and 91
displacement 97–98
doming as a condition for ring-fault formation 132–138
during caldera collapse 405
of the surface 523
double magma chambers 272–275, 428
dynamics of 294–299
formation of 281–285
double-couple earthquakes 18, 185–186
downrift migration of earthquakes 70
drain-back 69
drilling into a dike 526–528
driving shear stress (stress drop) 189, 251
duration of earthquake swarms 200–201
duration of eruptions 390–400
dynamics of deep-seated reservoirs 290–293
of double magma chambers 294–299
of shallow magma chambers 286–290
of volcanic eruptions 379–423
double-couple earthquakes 18, 185–186
downrift migration of earthquakes 70
drain-back 69
drilling into a dike 526–528
driving shear stress (stress drop) 189, 251
duration of earthquake swarms 200–201
duration of eruptions 390–400
dynamics of deep-seated reservoirs 290–293
of double magma chambers 294–299
of shallow magma chambers 286–290
of volcanic eruptions 379–423
earthquake swarms 15, 70, 179, 197–201, 326,
473, 507
duration of 200–201
earthquakes associated with dike emplacement 146
a-values of 192–194
b-values of 192–194
concentration at boundary faults 523–524
epicentre of 183–187
explosion 203
focal mechanism of 183–187
focus of 18
Gutenberg–Richter relation 191–192
high-frequency (A-type) 195–202
hypocentre of 183–187
low-frequency (B-type) 203
magnitudes of 187–194
migration of (during dike propagation) 70
moment of 187–194
moment-magnitude scale 188
slip surface of 188

palaeo-rift zones 35
paleo-flow directions in a dike 69
parallel-plate models of sheets 387–390
partially molten magma chambers 286, 289
particles (for discrete systems) 500
paths of dikes 19
penny-shaped crack 120
permanent deformation 14, 88
permeability 43
phase transition during solidification 366
phenocrysts 44
photographs in the field 46
physical constants 564
physical properties of lavas 572
physical properties of magmas 572
Pinatubo eruption (Philippines) 381, 400–401
Pinatubo Volcano (Philippines) 404
piston-like caldera roof 406
Piton de la Fournaise Volcano (Reunion, France) 2, 404
plastic deformation 14, 88
plugs 384
plugs and necks 457–458
plutons 282
point pressure source 105–106
Poisson’s ratio
definition of 101–103
effect on volume and shape 103
for common rocks 565–566
values of 102
Poisson’s relation 104
pole plots 52
poles (to dike/fracture planes) 51
polygenetic volcanoes 88
pore compressibility defined 291
pore-fluid pressure 252
porosity of reservoirs 430
potential energy 494
and fluid transport 278–279
total 499, 503
potentiometric surface 276, 280
power-law distribution 46, 53
for earthquakes 191–192
for eruptions 380
precision levelling technique 89
preventing large eruptions 524–536
primary waves (P-waves) 180–181
principal axes 93
principal planes of stress 93
principal stress directions 95
principal stress magnitudes 95
principal stress rotations 60
principal stresses 93
principle of least action and dike propagation paths 491–500
principle of minimum potential energy 493, 499
principle of virtual displacements 494
principle of virtual work 494
probabilistic forecasts 23
probability of eruption 68
process zones 70
profile for dike/fracture studies 35
propagation of dikes 45, 483–512
proportion of dike tips 73–74
proportion of feeders versus non-feeders 73
P-waves (primary waves) 180–181
quantifying eruptions 521–522
quasi-static dike propagation 500–502
radiation 362
radius of curvature
equation for 78
of a dike tip 65
Rainier Volcano (United States) 437
rate of injection of dikes 226
Rayleigh waves 183
real fault-slip plane 186
regional dikes 326
regional stress field 111
regression analyses 18, 47
reinforcing effects of sheets in volcanoes 447
reservoirs (deep-seated) 13, 225, 272–324
bulk volume of 292
density stratified 275
depth of 225
detection of active 299–302
dome-shaped 426
dynamics of 290–293
formation of 272–277
initiation of 273
magma accumulation in 276
magma migration in 277–280
titled contacts in 276
resistance of dike rock to erosion 41, 42
reverse-faulting earthquakes 186
Reydarartindur fossil magma chamber (Iceland) 479
Reykjadalur Volcano (Iceland) 112–113
Reykjanes Peninsula (Iceland) 347
ribs at the surface of a joint 69
Richter scale 188
ripping event 42
right-hand rule for strike measurements 48
rigid-body rotation 97
rigid-body translation 97
ring-dikes 454–456, 509
propagation of 253
ring-faults 251, 454–456
as dip-slip faults 253
as normal faults 133, 139
as reverse faults 133, 139
formation of 132–138
inward-dipping 255, 257–258
outward-dipping 253, 255, 256
ripples 182
rose diagrams 48–50
rounded tips 64
rows in a dike 42
rupture 180
Sakurajima Volcano (Japan) 396–397
Sandfell fossil magma chamber (Iceland) 305
Sandfell laccolith (Iceland) 249
Santorini caldera (Greece) 346, 443
satellites for geodetic measurements 16
scan-lines for dike/fracture studies 35
scoria cones 2
secondary minerals 43
zonation of 44
sections for dike/fracture studies 35, 36
segmented dikes 39, 41, 53, 58–61, 199–200
segments
as a single fracture 58
of a volcanic fissure 68
offset (of dikes) 64
seismic moment 188–194
seismic monitoring of volcanoes 206–208
seismic tomography 301
seismic waves 179–183
seismicity, background 206
seismometers 474
shallow crustal magma chambers
definition of 225
depth of 225, 477
dynamics of 286–290
shape
of a dikes 53–58
of a volcano 436–444
shear fracture 7
shear modulus 103
shear movements along discontinuities 66
shear strain 97
shear strength 251
shear stress 93
sheet intrusions 325
change in dip and thickness 113
dip distribution of 125
swarms of 435
sheeted dike complexes 225
sheets as internal framework of a volcano 447–450
shift in location of central volcano 283, 285
SI units and prefixes 560–562
sills 75–76
arrest of 245
as aquifers 450
as different from dikes and inclined sheets 76
as different from lava flows 75
as fossil magma chambers 308
as oblate spheroidal magma chambers 125
as solidified magma-filled fractures 7
aspect ratios of 76
attitude of 75
emplacement of 242–247
geometries of 76
magma chambers as 120–121
rate of solidification of 226, 228
thermal effects of 76
tunnel-shaped 244
single magma flow 294
Skaftafellur fossil magma chamber (Iceland) 117, 306
slip 180
slip surface of an earthquake rupture 188
slow-spreading ridges 303
small eruption defined 287
soft rocks 99
soft layers 73
soft-linked fractures 58
solidification
definition of 363
of magma in a sheet intrusion 361–366
solid-matrix compressibility defined 290
sound waves 180
source of deformation 18
spatter-and-scoria cones 2
specific heat capacity, definition of 364
specific latent heat, definition of 366
spreading vectors 50
stable caldera collapse 258
Stardalshnjukar fossil magma chamber (Iceland) 305–306
Stardalur Volcano (Iceland) 306
state of stress close to a dike 240
statistical techniques for structural data 18
statistical-probabilistic models 20
steps during dike propagation 500–501
stereograms 48
stereoplots 51–52
stiff layers 73
stiff rocks 63
stiffness, definition of 99
Stromboli Volcano (Italy) 396–397
straight-line fit to data 19
strain 97–98
infiniteesimal 100
normal 98
shear 97
strain energy 503–504, 523
  dissipation during dike propagation 66
  Mogi model and 107, 110
  of a body 498
  of a volcano 121
  per unit volume 503
  total 504
strain rate 97
strainmeters 16, 474
stratigraphic level 35, 36
stratovolcanoes 127
  as strong structures 438
  heights of 260
  slopes of 260
streamlines, trajectories as 432
strength 99
  definition of 99
  of a volcano 446
  of common rocks 568–569
shear 251
stress 92–96
  anisotropic 95
  barrier 230–233, 342, 534
  concentration 60
  concentration and intrusion frequency 431–436
  concentration around a dike 356
  concentration around a hole 432
  concentration around magma chambers 127–137
  contours 96
  contours around a magma chamber 126
  definition of 92
  drop (driving shear stress) 189, 252
  effects of hydro-shearing 534–535
  general 94
  heterogeneous 94
  homogenous 94
  isotropic (hydrostatic) 94
lithostatic 94
magnitudes of 95, 124
monitoring 523
normal 92, 98
principal planes of 93
shear 93
  sources for earthquakes 195–197
  tensor 93
  trajectories 95–96, 123–124, 432
  transfer 205
vector 93
  stresses associated with dikes and sheets 140–156
  stress-homogenisation 533
  stress-intensity factor 330
  strike 6, 48
  strike and dip measurements of a dike 36–37
  strike-dimension 7, 11
  strike-slip-fault earthquakes 186
structural geology 4
  techniques and definitions of 5–12
subsidence, conditions for 523
subvertical flow of magma 69
supervolcanoes 521
surface deformation, causes of 90–91
surface of displacements 122
surface effects of dikes 348–356
surface forces 496
surface stress peaks 133, 349
surface stresses 122
  surface subsidence above dikes 349
  surface uplift peaks 516
surface waves 180, 182–183
swarms of inclined sheets 449
S-wave shadows 181, 301, 476
S-wave velocities and temperature 181
table mountains, heights of 276, 280
Tambora eruption (Indonesia) 381, 400–401
Tambora Volcano (Indonesia) 441
taupo eruption (New Zealand) 381
tectonics 4
Teide Volcano (Tenerife, Spain) 442
temperatures
  definition of 362
  gradient 362
tensile strength 238, 568–569
  of the roof and walls of a chamber 485–486
  tensile stress as negative 94
tension fracture 7, 8, 10, 28
tension fractures
  dike-induced 350
  theoretical stress magnitudes 66
thermal diffusivity 363
thermal effects of sills 76
thermal effects on dike propagation 332
thermal energy, definition of 362
thickness
  of dikes 38, 52
  of an intrusive sheet 7
  of tectonic sections 56
  of volcanic structures 140–156
  Tiangchi eruption (China) 381
  tilted contacts in reservoirs 276
  tilmeters (inclinometers) 16, 90, 474
tips
  blunt 63
  for monitoring 523
  of dikes 61–67
  of volcanic structures 140–156
  radius of curvature of 65
  wedge-like 62
  Toba caldera (Indonesia) 443
  Toba eruption (Indonesia) 381–382, 401
top craters 438–440
Torres del Paine fossil magma chamber (Chile) 248, 308, 478
