<i>Acknowledgments</i>	<i>page</i> vii
1 Introduction	1
1.1 Structure of the Book	8
2 A Brief History of Causality	11
2.1 Philosophical Foundations of Causality	11
2.2 Modern Philosophical Approaches to Causality	13
2.3 Probabilistic Causality	18
2.4 Causal Inference Algorithms	32
3 Probability, Logic, and Probabilistic Temporal Logic	43
3.1 Probability	43
3.2 Logic	49
3.3 Probabilistic Temporal Logic	58
4 Defining Causality	65
4.1 Preliminaries	65
4.2 Types of Causes and Their Representation	76
4.3 Difficult Cases	96
5 Inferring Causality	111
5.1 Testing Prima Facie Causality	111
5.2 Testing for Causal Significance	120
5.3 Inference with Unknown Times	127
5.4 Correctness and Complexity	133
6 Token Causality	142
6.1 Introduction to Token Causality	142
6.2 From Types to Tokens	150

vi	<i>Contents</i>	
6.3	Whodunit? (Examples of Token Causality)	161
6.4	Difficult Cases	170
7	Case Studies	183
7.1	Simulated Neural Spike Trains	183
7.2	Finance	195
8	Conclusion	206
8.1	Broader Connections	211
8.2	Looking Forward	213
A	A Little Bit of Statistics	217
A.1	Preliminaries	217
A.2	Multiple Hypothesis Testing	218
B	Proofs	224
B.1	Probability Raising	224
B.2	Equivalence to Probabilistic Theory of Causality	224
B.3	Leads-to with Both Lower and Upper Time Bounds	230
	<i>Glossary</i>	237
	<i>Bibliography</i>	241
	<i>Index</i>	251
