|          | <i>Preface</i>  | page xiii |
|          | <i>Acknowledgments</i>  | xv        |
|          | <i>Abbreviations</i>  | xvii      |
|          | <i>Notation</i>   | xxiii     |
| <b>1</b> | <b>Introduction</b>   | <b>1</b>  |
|          | 1.1 Multiantenna wireless channels  | 2         |
|          | 1.2 MIMO system model   | 4         |
|          | 1.3 MIMO communication with CSIR-only   | 5         |
|          | 1.3.1 Slow fading channels  | 5         |
|          | 1.3.2 Fast fading channels  | 6         |
|          | 1.4 MIMO communication with CSIT and CSIR   | 7         |
|          | 1.5 Increasing spectral efficiency: quadrature amplitude modulation (QAM) vs MIMO | 9         |
|          | 1.6 Multiuser MIMO communication  | 11        |
|          | 1.7 Organization of the book  | 12        |
|          | References  | 14        |
| <b>2</b> | <b>Large MIMO systems</b>   | <b>16</b> |
|          | 2.1 Opportunities in large MIMO systems   | 16        |
|          | 2.2 Channel hardening in large dimensions   | 17        |
|          | 2.3 Technological challenges and solution approaches                              | 19        |
|          | 2.3.1 Availability of independent spatial dimensions                              | 20        |
|          | 2.3.2 Placement of a large number of antennas and RF chains                       | 20        |
|          | 2.3.3 Low complexity large MIMO signal processing                                 | 21        |
|          | 2.3.4 Multicell operation   | 23        |
|          | References  | 24        |
| <b>3</b> | <b>MIMO encoding</b>  | <b>25</b> |
|          | 3.1 Spatial multiplexing  | 25        |
|          | 3.2 Space-time coding   | 27        |
|          | 3.2.1 Space-time block codes  | 28        |
|          | 3.2.2 High-rate NO-STBCs  | 29        |
|          | 3.2.3 NO-STBCs from CDAs  | 30        |
