

Index

Page numbers in italics indicate where the concept is defined.

- \geq_K , 43, 106, 171, 186
- \leq_B , 16
- μ -ergodic, 8
- ω_1 inaccessible to the reals, 13, 87, 97, 134
- Δ_2^1 on Σ_1^1 , 86, 98, 135
- Π_1^1 on Σ_1^1 , 10, 14, 38, 95, 97, 103, 121, 153, 172, 190, 208, 232, 252
- absoluteness
 - Mostowski, 23
 - Shoenfield, 23, 71, 79, 89, 91, 116, 210
- Axiom of Determinacy, 86
- capacity, 96
- c.c.c., 10
- coding function, 6, 42, 106, 113, 170, 185, 217, 262
- concentration of measure, 42, 108, 138
- continuous reading of names, 35, 100, 177, 208, 218, 225
- countable chain condition, *see* c.c.c.
- cube
 - s*-cube, 152
 - Ellentuck, 196
 - Hamming, 42, 108
 - Matet, 207
 - Milliken, 202
 - pure Matet, 207
 - pure Milliken, 202
 - reverse, 152, 158
 - Silver, 190
- E_0 -box, 223
- equivalence
 - $=_J$, 16, 121, 129, 172, 207, 232
 - E_0 , 16, 217
 - E_1 , 16, 76, 150, 233
 - E_2 , 16, 172, 184
 - E_{K_σ} , 16, 191, 200, 207
 - E_{tail} , 203
 - μ -ergodic, 18, 140
 - classifiable by countable structures, 16, 68, 190, 207, 232
 - countable, 63, 203
 - ergodic, 10, 45, 49
 - essentially countable, 9, 16, 67, 230
 - generically ergodic, 18, 115
 - hypersmooth, 16, 76, 157
 - nontrivially ergodic, 10, 136, 140
 - orbit, 17, 21, 56, 64, 68, 69, 78, 136, 150, 167, 233
 - smooth, 16, 62, 159, 224
 - trim, 71
 - ev, 16
- forcing
 - $< \omega_1$ -proper, 92
 - E_0 , 147
 - E_2 , 172
 - P_I , 33
 - P_I^E , 56, 184, 191, 199, 233
 - Coll(ω, κ), 19, 45, 54
 - bounding, 20, 34, 69, 137, 190
 - Cohen, 115
 - Gandy–Harrington, 15, 174, 180, 183
 - Laver, 134
 - Matet, 208
 - nowhere c.c.c., 20, 64, 68, 92, 102, 135
 - proper, 10, 20, 34, 208

- reduced product, 148, 187
- weakly homogeneous, 18, 64
- fusion sequence, 158, 191, 208, 233
- game
 - Boolean, 125, 219, 249
 - integer, 80
 - refinement, 125
- generic ultrapower, 31, 50, 52
- generically ergodic, 8
- id, 16
- ideal
 - σ -continuity, 96, 123, 133
 - σ -finite Hausdorff mass, 57, 69, 84, 96
 - box product, 218
 - c.c.c., 38
 - calibrated, 103
 - game, 81, 121, 137
 - generated by closed sets, 124
 - Laver, 85, 134
 - meager, 115
 - metric porosity, 123, 133
 - porosity, 120
 - Ramsey null, 40
- interpretation, 24, 28, 32, 50
- Katětov order, 43, 102, 106, 120, 136, 146, 171
- kernel, 58, 195, 239
- large enough structure, 21
- Maharam algebra, 38
- model
 - $V[[x]]_E$, 54, 74, 184, 233
 - $V[x]_E$, 45, 60, 184, 191, 217, 233
- property
 - covering, 103, 106, 218, 219
 - free set, 5, 36, 103, 111, 113, 133
 - Fubini, 35
 - Laver, 20, 122
 - mutual generics, 36, 188
 - rectangular Ramsey, 35, 40, 95, 96, 133, 232
 - selection, 90, 100, 189, 190, 208
 - separation, 74, 235
 - Silver, 4, 97, 103, 110, 111
 - weak Laver, 111
 - weak Sacks, 12, 247
- real
 - dominating, 20, 134
 - independent, 20, 40, 69, 137, 190, 208, 247
 - infinitely equal, 122, 129
- rew, 12
- scrambling tool, 81
- slalom, 247
- spectrum, 6, 184, 217, 233
- total canonization, 3, 64, 68, 74, 91, 95, 97, 102, 103, 121, 129, 134, 137
- V-generic, 13
