1 Pure Premium Modeling Using Generalized Linear Models	1
Ernesto Schirmacher	
1.1 Introduction	1
1.2 Data Characteristics	3
1.3 Exploratory Data Analysis	6
1.4 Frequency Modeling	12
1.5 Severity Modeling	23
1.6 Pure Premium	30
1.7 Validation	34
1.8 Conclusions	37
References	38
2 Applying Generalized Linear Models to Insurance Data: Frequency/Severity versus Pure Premium Modeling	39
Dan Tevet	
2.1 Introduction	39
2.2 Comparing Model Forms	40
2.3 The Dataset and Model Forms	44
2.4 Results	47
Appendix 2.A Proof of Equivalence between Pure Premium Model Forms	55
Conclusion	57
Appendix 2.B The Gini Index	57
References	58

3	Generalized Linear Models as Predictive Claim Models	60
	Greg Taylor and James Sullivan	
3.1	Review of Loss Reserving	60
3.2	Additional Notation	63
3.3	GLM Background	64
3.4	Advantages of GLMs	66
3.5	Diagnostics	68
3.6	Example	73
3.7	Conclusion	97
	References	98
4	Frameworks for General Insurance Ratemaking: Beyond the Generalized Linear Model	100
	Peng Shi and James Guszczka	
4.1	Introduction	100
4.2	Data	102
4.3	Univariate Ratemaking Framework	104
4.4	Multivariate Ratemaking Frameworks	113
4.5	Model Comparisons	122
4.6	Conclusion	123
	References	124
5	Using Multilevel Modeling for Group Health Insurance Ratemaking: A Case Study from the Egyptian Market	126
	Mona S. A. Hammad and Galal A. H. Harby	
5.1	Motivation and Background	126
5.2	Data	130
5.3	Methods and Models	141
5.4	Results	144
5.5	Conclusions	146
	Acknowledgments	147
	Appendix	147
	References	157
6	Clustering in General Insurance Pricing	159
	Ji Yao	
6.1	Introduction	159
6.2	Overview of Clustering	160
6.3	Dataset for Case Study	161
6.4	Clustering Methods	163
6.5	Exposure-Adjusted Hybrid (EAH) Clustering Method	168

<i>Contents</i>		ix
6.6	Results of Case Study	171
6.7	Other Considerations	177
6.8	Conclusions	178
