- Ablowitz, Kaup, Newell, and Segur (AKNS)
 systems, 191, 194, 198
 adapted bump function, 17, 35
 admissible tuples, 311
 Airy function, 6, 26
 area distortion, 19

 Bernstein inequality, 12
 Bessel-type inequality, 226
 bi-Carleson case, 195
 bi-Carleson maximal operator, 195
 bi-disk, 80
 bi-tiles, 248
 bilinear Hilbert transform, 139, 189,
 208
 on polydisks, 240
 bounded mean oscillation space (BMO)
 classical, 51
 dyadic, 51
 on the bi-disk, 87
 rectangular, 92

 Calderón algebra, 130
 Calderón commutators, 126
 polynomial bounds, 157
 Calderón–Zygmund decomposition, 40
 Calderón–Zygmund operators, 136
 Carleson case, 192
 Carleson–Hunt case, 194
 Carleson maximal operator, 187, 192,
 247
 Carleson’s counterexample, 91
 Cauchy integral on Lipschitz curves, 130
 circular commutators, 156, 184
 Coifman–Meyer theorem
 classical, 30, 67
 on polydisks, 114
 complex interpolation, 8

 Dirac delta distribution, 133, 140
 Dirichlet problem, 133
 discrete minimal models, 166
 discrete model, 214
 div curl lemma, 77
 divergence of double Fourier series, 271
 double-layer potential operator, 134
 duality lemma, 45
 Duhamel formula, 14
 dyadic intervals, 35, 55, 141
 dyadic quasi-cubes, 212

 energy, 222, 223
 $L^{1,\infty}$, 55
 L^2 , 219
 essentially supported function, 17
 exceptional set, 48, 62, 97, 145, 225
 extension by duality, 159

 Fefferman–Stein inequality, 85, 116
 first Calderón commutator, 135
 Fourier integral representation, 19
 Fourier series
 L^p convergence, 244
 almost everywhere convergence, 244
 frequency intervals, 18
 fundamental solution of the Laplacian, 133

 Green’s formula, 133

 Haar system, 44, 51
 Hardy–Littlewood maximal operator, 34, 48,
 62, 149
 Hausdorff–Young inequality, 192, 196
 Heisenberg box, 17, 214
 Heisenberg uncertainty principle, 21
 Hilbert transform, 15, 128
 holomorphic function, 130
 hybrid square and maximal functions, 83
