- almost analytic extension, 101
- analytic dilation, 202
- Ascoli's theorem, 43

- Banach space, 11
- Banach–Steinhaus theorem, 42, 106
- Banach's theorem, 51, 54
- Berezin–Li–Yau inequalities, 151, 153
- biorthogonal basis, 167
- Borel measure, 106
- Borelian function, 106

- canonical form (of a compact operator), 61
- closable operator, 14, 18, 169
- closed extension, 19
- closed graph theorem, 15
- closed operator, 12
- closed range, 50
- closure (of an operator), 14
- coercivity, 27
- Combes–Thomas argument, 202, 214
- compact injection, 43, 88
- compact operator, 42
- compact resolvent, 83, 88, 217, 229
- compact self-adjoint operator, 60
- complex Airy operator, 198, 206, 213, 214
- complex harmonic oscillator, 201, 214, 246
- constant magnetic field, 134, 136
- continuous spectrum, 133
- contraction semigroup, 172, 199, 208
- convolution operator, 46
- Coulomb Schrödinger operator, 38, 140
- Courant's nodal theorem, 149
- creation operator, 3, 247

- Cwickel–Lieb–Rozenbljum theorem, 149

- Davies operator, 201
- differential quotients, 40
- Dirac measure, 99, 101
- Dirac operator, 41
- Dirichlet and Neumann realizations,
 - comparison of, 148
- Dirichlet operator, 44
- Dirichlet problem, 7
- Dirichlet realization, 36, 83, 120, 149, 238, 241, 242
- discrete Laplacian, 117
- discrete spectrum, 132
- dissipative operator, 186
- domain (of an operator), 11
- $D(T)$, 11
- Dynkin–Helffer–Sjöstrand formula, 117

- eigenpair, 1, 7, 214
- eigenvalue, 55
- ϵ -spectrum, 164
- essential spectrum, 133, 136, 150
- essentially self-adjoint, 122, 125, 128

- \mathcal{F} , 12
- Floquet theory, 73
- Fokker–Planck operator, 217, 229, 230
- form domain, 88, 147
- Fourier transform, 12
- $\mathcal{F}red(E, F)$, 51
- Fredholm operator, 50
- Fredholm's alternative, 48
- Friedrichs extension, 34, 125, 147
- functional calculus, 100, 164
- fundamental level, 3

- gauge transformation, 134
- Gearhart–Prüss theorem, 175, 186, 209
- generalized spectrum, 158

- graph (of an operator), 12
graph Laplacian, 117
Green–Riemann formula, 39, 101
 $G(T)$, 12
- Hardy inequality, 30
harmonic oscillator, 2, 37, 120, 228, 241
Harper operator, 73
Hermite functions, 228
Hilbert–Schmidt operator, 68, 70
Hilbert space, 11, 22
Hilbertian adjoint, 16, 45
Hilbertian norm, 11, 13
Hille–Yosida theorem, 172, 183
Hofstadter butterfly, 73
Hörmander operator, 218
 $H^s(\mathbb{R}^m)$, 12
hypoellipticity, 214, 218
- index (of a Fredholm operator), 50
 $\text{Ind}(T)$, 50
infinitesimal generator, 172
instability index, 168, 186
interaction potential, 80
- Japanese bracket, 162
- Kato–Rellich theorem, 122
Kato’s inequality, 30, 128
Kato’s magnetic inequality, 128
Kato’s theorem, 128
 $\mathcal{K}(E)$, 42
 $\mathcal{K}(E, F)$, 42
Klein–Gordon operator, 33, 140
Kramers–Fokker–Planck operator, 216, 246
Krein–Rutman theorem, 71, 83, 85, 149
- $L^2(\mathbb{R}^m)$, 2
 $\ell^2(\mathbb{N})$, 46
 $L^2(X, d\mu)$, 70
Laplace–Beltrami operator, 88, 92, 95, 120
Laplace method, 200
Laplace transform, 179
Laplacian, 2, 14, 36
Laplacian on the sphere, 93
Lax–Milgram theorem, 23, 25, 27
Lebesgue measure, 2
 $\mathcal{L}(E, F)$, 51
 $\mathcal{L}(\mathcal{H})$, 12
Lidski theorem, 73
Lieb–Thirring inequalities, 151
linear continuous operator, 12
- magnetic bottle, 91
magnetic Laplacian, 134, 240, 242
magnetic Schrödinger operator, 90, 139
max–min principle, 141, 147
maximal inequality, 224
maximally accretive, 187, 199, 202, 217
monotonicity with respect to the domain, 148
- multiplication operator, 46, 74, 75, 138, 139
- NBV, 106
Neumann problem, 7
Neumann realization, 36, 38, 120, 152
nilpotent Lie groups, 214
nonnegative operator, 141
normal operator, 109
 $N(T)$, 50
- Orr–Sommerfeld problem, 214
orthonormal basis, 1, 11
- partial isometry, 64
Payne–Polya–Weinberger inequality, 143
Persson’s theorem, 150
perturbation theory, 163
Plancherel formula, 13, 179
point spectrum, 55
polar decomposition, 64
positive kernel, 71
positivity-preserving operator, 85
precompactness, 43
precompactness criterion, 88
pseudospectra, 164
 PT -symmetry, 214
- quantitative Gearhart–Prüss theorem, 178
- Rayleigh–Taylor instability, 154
resolution of the identity, 103
resolvent set, 54, 102
Riesz’s representation theorem, 22, 48, 112
Roch–Silbermann theorem, 165, 185
 $R(T)$, 11
- scalar product, 11
Schrödinger operator, 29, 30, 38, 88
Schur’s lemma, 77, 191
self-adjoint extension, 34
self-adjoint operator, 20
self-adjointness criterion, 121
semi-Fredholm operator, 50
semibounded, 29
semiclassical analysis, 157, 214, 238, 241
semiclassical parameter, 79
semigroup theory, 171
separable space, 11
shift operator, 55
Sibuya’s theory, 163, 209
singular value, 62, 66, 68
singularly continuous spectrum, 116
Sobolev injection theorem, 6, 124
Sobolev space, 6, 12
spectral family, 103
spectral projector, 168
spectral theorem, 109, 112
spectrum, 55, 102, 227
spherical coordinates, 93
 $S(\mathbb{R}^m)$, 2
