

Index

- acquisition 144, 173, 195, 271
- AGPS *see* assisted GPS
- Akos, D. 169
- almanac 16, 22, 33, 226
- ambiguity number 110, 123
- analog-to-digital converter (ADC) 201
- antenna 192, 220
- application-specific integrated circuits (ASIC) 146, 171, 175, 190, 279, 298
- argument of latitude 20
- assisted GPS 207, 219, 226, 232, 238, 267, 281, 284–285, 289, 302
- autocorrelation function 155
- Bancroft method 101
- bandwidth 195
- Barker code 73
- BGPS 207, 238, 241, 277, 284, 289
- binary offset carrier (BOC) 46, 51, 56
- bit synchronization 163
- Black and Eisner model, 60
- Borre, K. 171
- bitwise processing 184
- circular error probable (CEP) 136
- clock errors 11, 86, 95, 106, 112, 225, 253, 267
- Cobb, S. 229
- code division multiple access (CDMA) 39, 84, 167, 275
- coherent acquisition 270
- coherent integration 149
- coherent tracking 159, 161, 165
- Coordinated Universal Time (UTC) 10, 75, 82, 105, 226
- correlators 144, 148, 173, 210, 279
- Costas loop 152
- delay-locked loop (DLL) 152
- Diggelen, F. van 149, 208
- digitized intermediate frequency (DIF) 144, 195, 202, 217, 268, 293
- dilution of precision (DOP) 8, 95, 107, 133, 150
- discriminator 154, 156, 181
- Doppler aiding 161
- Doppler assistance 210, 214
- double difference 114
- E911 150, 281
- Earth geopotential 20, 265
- Earth orientation parameters (EOP) 6, 261
- Earth-centered, Earth-fixed (ECEF) frame 6, 13, 35
- Earth-centered inertial (ECI) frame 5, 13, 19, 35–36
- Earth-centered orbital (ECO) frame 19
- Earth’s gravitational constant 17
- eccentric anomaly 18, 24, 34
- ephemeris 32, 225, 263
- European Geostationary Navigation Overlay Service (EGNOS) 30, 68, 137
- fast Fourier transform 173, 190, 278
- field-programmable gate array (FPGA) 146, 171, 175, 190, 241, 278, 298
- frequency division multiple access (FDMA) 42, 53, 167, 185, 275, 305
- frequency-locked loop (FLL) 156
- genetic algorithm 254
- Geographical Survey Institute (GSI) (Japan) 123, 283
- geostationary Earth orbit (GEO) 29, 41, 68
- Gold codes 49, 53
- graphic processing unit (GPU) 183, 191, 203
- highly elliptical orbit (HEO) 29, 68
- indoor messaging system (IMES) 228
- inertial navigation system (INS) 187
- inter-frequency bias 116
- interleaving 75
- International GNSS Service (IGS) 6, 9, 94, 123, 252, 258–259, 266, 270, 283, 285
- International Telecommunication Union (ITU) 277
- International Terrestrial Reference Frame (ITRF) 8, 36
- ionosphere 59, 186
- ionosphere exchange format (IONEX) 64
- ionospheric error 65, 67, 110, 113–114, 226, 266, 301
- ionospheric grid point 69

- Kalman filter 102
- Kepler's laws 14, 28
- Keplerian parameters 13, 17, 22, 33, 35
- Klobuchar model 65, 67, 72, 75, 226, 304
- Knuth, D. 184
- LAMBDA method, 122
- Lamport, L. 184
- Ledvina, B. M. 185
- lock detectors, 162
- Luch, 30, 68, 137
- mean anomaly 17, 24, 34
- mean motion 17, 34
- meander code 55
- medium Earth orbit (MEO) 13, 26, 41, 72, 123
- Mitola, J. 169, 278
- mixer 200
- Molniya orbits 30
- Multi-functional Satellite Augmentation System (MSAS) 30, 68, 137
- multipath 108, 126, 194, 220
- NeQuick 67, 304
- Neuman–Hoffman code 57
- Niell mapping function 61
- NMEA format 96, 140
- Nyquist criterion, 182
- original equipment manufacturer (OEM) 135, 142, 299
- oven-controlled crystal oscillator (OCXO) 196
- Petrovski, I. 39, 123, 126, 141, 143, 177, 186, 278, 284, 293
- phase-locked loop (PLL) 152, 196
- pilot channel 49, 270
- PLL-aided DLL 157
- precise ephemeris 94, 267, 283
- precise point positioning (PPP) 265, 289
- predicted ephemeris 252, 259
- PZ-90 36
- Quasi-Zenith Satellite System (QZSS) 31, 51, 69, 161, 227
- Radio Technical Commission for Maritime Services (RTCM) 111, 140, 227
- real-time kinematic (RTK) 111, 126, 208, 220, 229, 239, 258, 277, 284–285, 287, 289
- Receiver Independent Exchange Format (RINEX) 94, 96, 140, 261
- root mean square (RMS) 135
- RTK network 221
- Saastamoinen model 61
- sampling frequency 197
- satellite visibility 29
- secondary code 48, 55, 57
- sensitivity 137, 141, 149, 207, 232, 239, 242, 270, 276
- sidereal period 28
- single difference 113
- Sirola, N. 243, 247
- software-defined radio (SDR) 169, 174, 190, 278, 286, 305
- space-based augmentation system (SBAS) 29, 138
- SP3 format 262–263, 267
- strange attractor codes 45
- synodic period 28
- Syrjärinne, J. 243, 247
- tabular orbits 35, 37, 79, 225, 263, 270
- temperature-compensated crystal oscillator (TCXO) 195, 300
- tiered code 48
- time to alert (TTA) 30
- time to first fix (TTFF) 138, 141, 207, 217, 276–277, 282, 287
- total electron content (TEC) 63, 65, 113
- tracking 151, 157, 195
- triple difference 116
- troposphere 58
- tropospheric error 60, 110, 113, 221, 226, 301
- true anomaly 19, 34
- Tsui, J. 169
- Tsujii, T. 39, 141, 143, 177, 278, 293
- UTC *see* Coordinated Universal Time
- virtual reference station (VRS) 124, 143, 221, 227, 284–285, 287
- voltage-controlled crystal oscillator (VCXO) 196
- WGS-84 8, 36
- Wide Area Satellite Augmentation System (WAAS) 30, 68, 137
- World Geodetic System 1984 *see* WGS-84
- Wu, S. C. 169, 242, 267
- YUMA format 16, 227
