Cooperation in the Law of Transboundary Water Resources

Climate change, population growth and the increasing demand for water are all capable of leading to disputes over transboundary water systems. Addressing these challenges will require enhancement of adaptive capacity, improvement of the quality of water resources management and reduction in the risk of conflict among riparian states. Such changes can be brought about only through significant international cooperation.

Christina Leb's analysis of the duty to cooperate, as well as the related rights and obligations, highlights the interlinkages between this duty and the principles of equitable and reasonable utilisation and the prevention of transboundary harm. In her analysis, she considers the law to be applicable to both international watercourses and transboundary aquifers. She explores the complementarities and interaction between the rules of international water law and the related obligations of climate change and human rights law.

CHRISTINA LEB is an associate member of the Platform for International Water Law at the University of Geneva and a consultant for the World Bank. Her primary focus is on transboundary water resources management and cooperation.

CAMBRIDGE STUDIES IN INTERNATIONAL AND COMPARATIVE LAW

Established in 1946, this series produces high quality scholarship in the fields of public and private international law and comparative law. Although these are distinct legal sub-disciplines, developments since 1946 confirm their interrelations.

Comparative law is increasingly used as a tool in the making of law at national, regional and international levels. Private international law is now often affected by international conventions, and the issues faced by classical conflicts rules are frequently dealt with by substantive harmonisation of law under international auspices. Mixed international arbitrations, especially those involving state economic activity, raise mixed questions of public and private international law, while in many fields (such as the protection of human rights and democratic standards, investment guarantees and international criminal law) international and national systems interact. National constitutional arrangements relating to 'foreign affairs', and to the implementation of international norms, are a focus of attention.

The Series welcomes works of a theoretical or interdisciplinary character, and those focusing on the new approaches to international or comparative law or conflicts of law. Studies of particular institutions or problems are equally welcome, as are translations of the best work published in other languages.

This book is the result of a long journey that started at the School of Advanced International Studies of Johns Hopkins University, where I was introduced to the complexities related to the management of transboundary resources by Professor Ariel Dinar. It was Professor Enzo Grilli's advice to first work in the field of interest before choosing a topic for doctoral research that eventually led to this book. I am immensely grateful to him for this advice. This book benefits from the experience I was privileged to gain when working for many years with the Nile Team at the World Bank. It is based on my doctorate thesis written at the University of Geneva under the skillful guidance of my thesis advisor, Professor Laurence Boisson de Chazournes.

Many other people directly or indirectly contributed to this book by providing guidance and advice, sharing their knowledge, reviewing and commenting on earlier drafts, making incidental comments or simply by offering encouragement as colleagues, friends and parents. Special thanks go to Undala Alam, Don Blackmore, Christian Bovet, Stefano Burchi, Lindsey Cameron, Marwa Daoudy, Edouard Fromageau, Jakob Granit, David Grey, Julia Grignon, Birgit Kainz-Labbé, Elizabeth Kistin, Anne-Marie Leb, Georg Leb, Gerhard Loibl, Andrew Macoun, Stephen McCaffrey, Owen McIntyre, Barbara Miller, Franz Xaver Perrez, Anne Petitpiere, Claudia Sadoff, Salman M.
