Preface ix

1 Introduction 1

1.1 The Aim of the Book 5

1.2 The Outline of the Book 8

2 Individual Well-Being: Theory and Measurement 13

2.1 Theoretical Foundations 13

2.1.1 Utility and Well-Being in Economics 14

2.1.2 Hedonic versus Eudamonic Well-Being 18

2.2 The Measurement 20

2.2.1 The Data: Notions and Measures 20

2.2.2 Survey Data: Strengths and Weaknesses 24

2.3 Policy Advocacy 27

2.3.1 On the Political Neutrality of Measuring Individual Well-Being 33

2.4 Summary and Concluding Remarks 37

3 Autonomy Freedom and Individual Well-Being 39

3.1 The Theoretical Foundations 40

3.2 The Measurement 44

3.2.1 The Theoretical (Axiomatic) Measure 44

3.2.2 The Empirical Measure 47

3.3 Autonomy Freedom and Well-Being: The Results 54

3.3.1 The Evidence 54

3.3.2 The Interpretation in the Literature 58

3.4 Summary and Evaluation 59
### Contents

4 Capability and Individual Well-Being  61

4.1 Capability and Happiness: Origins, Similarities, and Differences  62

4.2 Capability as a Concept and a Measure of Freedom  66

4.3 The Measurement of Capability  68

4.4 Capabilities and Well-Being: The Results  70

4.4.1 The Evidence  72

4.4.2 The Interpretation in the Literature  72

4.5 Summary and Conclusions  79

5 Economic Freedom, Political Freedom, and Individual Well-Being  80

5.1 The Theoretical Foundations  80

5.1.1 Economic Freedom: The Theory  80

5.1.2 Political Freedom: The Theory  83

5.2 The Measurement  84

5.2.1 The Measure of Economic Freedom  85

5.2.2 The Measure of Political Freedom  90

5.3 Economic Freedom and Well-Being: The Results  94

5.3.1 The Evidence  94

5.3.2 The Interpretation in the Literature  98

5.4 Political Freedom and Well-Being: The Results  98

5.4.1 The Evidence  99

5.4.2 The Interpretation in the Literature  99

5.5 Summary and Evaluations  103

6 Autonomy and Negative Freedom  105

6.1 Theory and Testable Hypotheses  106

6.1.1 The Theory  106

6.1.2 Testable Hypotheses  109

6.2 Data and Empirical Methodology  112

6.2.1 The Data  112

6.2.2 The Linear Probability Model  113

6.2.3 The Multilevel Analysis  116

6.3 Autonomy and Economic Freedom: Estimation and Results  120

6.3.1 The Linear Probability Model  120

6.3.2 The Multilevel Analysis  122

6.3.3 Interpretation of the Results  127
Contents

6.4 Autonomy and Political Freedom: Estimation and Results 129
  6.4.1 The Multilevel Analysis 129
  6.4.2 Sensitivity Analysis 134
6.5 Summary and Concluding Remarks 136

7 Autonomy and Capability 138
  7.1 Theory and Testable Hypotheses 138
    7.1.1 Theory 138
    7.1.2 Theoretical Hypotheses 141
  7.2 Autonomy and HDI 142
    7.2.1 The Data 142
    7.2.2 The Empirical Methodology 145
    7.2.3 Estimation and Results 148
  7.3 Autonomy and Self-Reported HDI 152
    7.3.1 The Data 152
    7.3.2 Methodology, Estimation, and Results 155
  7.4 Autonomy and Self-Reported Capability 157
    7.4.1 Data 160
    7.4.2 Estimation and Results 165
  7.5 Summary and Concluding Remarks 167

8 Autonomy, Limited Government, Capability, and Happiness 170
  8.1 The Three Freedoms: Competing for the Pursuit of Happiness 171
    8.1.1 Empirical Methodology 174
    8.1.2 Estimation and Results 176
  8.2 Policy Implications 180
    8.2.1 Which Freedom, Where, and When: Autonomy, Capability, and Economic Freedom 180
    8.2.2 Which Freedom, Where, and When: Autonomy, Capability, and Political Freedom 188
  8.3 Summary and Concluding Remarks 195

9 Normative Consequences of the Pursuit of Happiness 197
  9.1 Objection to the Relation between Choice and Happiness 199
    9.1.1 The Deliberative Process: Schwartz 199
    9.1.2 Happiness and the Costs of Deliberation 200
### Contents

9.2 The Role of Choice 202
   9.2.1 Friedman and Sen 204
   9.2.2 Choice and Freedom 205
9.3 Conclusion 207
