## Contents

<i>List of Abbreviations</i>	<i>page</i> xv
<i>Notation</i>	xvii
<i>Preface</i>	xxi
1 A Brief Overview of Time Series and Stochastic Processes	1
2 Basics of Long-Range Dependence and Self-Similarity	15
3 Physical Models for Long-Range Dependence and Self-Similarity	113
4 Hermite Processes	229
5 Non-Central and Central Limit Theorems	282
6 Fractional Calculus and Integration of Deterministic Functions with Respect to FBM	345
7 Stochastic Integration with Respect to Fractional Brownian Motion	397
8 Series Representations of Fractional Brownian Motion	437
9 Multidimensional Models	466
10 Maximum Likelihood Estimation Methods	539
A Auxiliary Notions and Results	575
B Integrals with Respect to Random Measures	588
C Basics of Malliavin Calculus	602
D Other Notes and Topics	610
<i>Bibliography</i>	613
<i>Index</i>	660
