CONTENTS

List of Figures *page* xi
List of Tables xv
List of Boxes xvii
Acknowledgments xix

1 Introduction 1
1.1 Organization of the Book 6

PART I R AND BASIC STATISTICS 9

2 Introduction to R 11
2.1 First Steps Using R 11
2.2 Next Steps Using R 22
2.3 Getting Your Data Into R 26
2.4 Starting and Stopping R 28
2.5 R Functions 28
2.6 Getting Help 30
2.7 Other Ways to Use R 31
2.8 Archaeological Data for Learning R 33

3 Looking at Data – Numerical Summaries 36
3.1 Arithmetic with R 38
3.2 Four Common Distributions 42
3.3 Descriptive Statistics – Numeric 49
3.4 Descriptive Statistics Using R 51

4 Looking at Data – Tables 65
4.1 Factors in R 65
4.2 Producing Simple Tables in R 68
4.3 More Than Two Variables 72
4.4 Binning Numeric Variables 77
4.5 Saving and Exporting Tables 78

Table of Contents
More Information

5 Looking at Data – Graphs 85
5.1 True and False in R 86
5.2 Plotting One or Two Categorical Variables 88
5.3 One Numerical Variable 95
5.4 One Numerical Variable and One Categorical Variable 99
5.5 Two Numerical Variables 103
5.6 More Than Two Numerical Variables 109
5.7 Printing Graphs 116

6 Transformations 126
6.1 The Apply Family of Functions in R 127
6.2 Transforming Variables (Columns) 129
6.3 Transforming Observations (Rows) 136

7 Missing Values 144
7.1 Missing Values and Other Special Values in R 145
7.2 Eliminating Cases or Variables with Missing Values 147
7.3 Imputing Missing Values 150

8 Confidence Intervals and Hypothesis Testing 159
8.1 Programming R – Writing Functions 160
8.2 Confidence Intervals 162
8.3 Hypothesis Testing 169
8.4 Comparing Two Samples 171
8.5 Comparing More Than Two Samples 178

9 Relating Variables 190
9.1 Categorical Data 190
9.2 Numeric Data – Association 198
9.3 Numeric Data – Regression 204

PART II MULTIVARIATE METHODS 217

10 Multiple Regression and Generalized Linear Models 219
10.1 Multiple Regression 219
10.2 Regression with Dummy Variables 232
10.3 Generalized Linear Models – Logistic Regression 235

11 MANOVA and Discriminant Analysis 244
11.1 Hotelling's *T* and MANOVA 245
11.2 Descriptive (Canonical) Discriminant Analysis 249
11.3 Predictive Discriminant Analysis 255

12 Principal Components Analysis 265

13 Correspondence Analysis 279

14 Distances and Scaling 296
14.1 Distance, Dissimilarity, and Similarity 297
14.2 Multidimensional Scaling 303
14.3 Comparing Distance Matrices – Mantel Tests 311

Table of Contents
More Information

15 Cluster Analysis 318
15.1 *K*-Means Partitioning 321
15.2 Hierarchical Clustering 334
15.3 Other Methods 342

PART III ARCHAEOLOGICAL APPROACHES TO DATA 347

16 Spatial Analysis 349
16.1 Circular or Directional Statistics 349
16.2 Mapping Quadrat-Based Data 358
16.3 Mapping Piece Plot Data 367
16.4 Simple Spatial Statistics 372
17 Seriation 379
17.1 Distance Matrix Ordering 381
17.2 Ordering the Data Matrix Directly 384
17.3 Detrended Correspondence Analysis 388
17.4 Principal Curves 390
18 Assemblage Diversity 397
18.1 Diversity, Ubiquity, and Evenness 399
18.2 Sample Size and Richness 403
18.3 Rarefaction Curves 408
19 Conclusions 412
