## Phase Theory

Phase Theory is the latest empirical and conceptual innovation in syntactic theory within the Chomskyan generative tradition. Adopting a crosslinguistic perspective, this book provides an introduction to Phase Theory, tracing the development of phases in minimalist syntax. It reviews both empirical and theoretical arguments in favor of phases, and examines the role phases play at the interface with semantics and phonology. Analyzing current phasehood diagnostics, it applies them in a systematic fashion to a broad range of syntactic categories, both phases and non-phases. It concludes with a discussion of some of the more contentious issues in Phase Theory, involving crosslinguistic variation with respect to phasehood and the dynamic versus static nature of phases.

**Barbara Citko** is Associate Professor of Linguistics at the University of Washington.

### Research Surveys in Linguistics

In large domains of theoretical and empirical linguistics, the needs of scholarly communication are directly comparable to those in analytical and natural sciences. Conspicuously lacking in the inventory of publications for linguists, compared to those in the sciences, are concise, single-authored, non-textbook reviews of rapidly evolving areas of inquiry. The series **Research Surveys in Linguistics** is intended to fill this gap. It consists of well-indexed volumes that survey topics of significant theoretical interest on which there has been a proliferation of research in the last two decades. The goal is to provide an efficient overview of, and entry into, the primary literature for linguists – both advanced students and researchers – who wish to move into, or stay literate in, the areas covered. Series authors are recognized authorities on the subject matter, as well as clear, highly organized writers. Each book offers the reader relatively tight structuring in sections and subsections, and a detailed index for ease of orientation.

Previously published in this series

*A Thematic Guide to Optimality Theory*, John J. McCarthy

*The Phonology of Tone and Intonation*, Carlos Gussenhoven

*Argument Realization*, Beth Levin and Malka Rappaport Hovav

*Lexicalization and Language Change*, Laurel J. Brinton and Elizabeth Closs Traugott

*Defining Pragmatics*, Mira Ariel

*Quantification*, Anna Szabolcsi

*Word Order*, Jae Jung Song

## Acknowledgments

First, I would like to thank the many cohorts of students who took my graduate syntax classes at the University of Washington. The idea for this book came from you and all the questions you asked (that I may or may not have had answers to at the time). I hope next time I will! I also want to thank all my colleagues in the Department of Linguistics for creating an intellectually stimulating work environment, and especially my fellow syntacticians, Edith Aldridge, Karen Zagana and Julia Herschensohn, for encouragement and support, especially in the final stages of the project; and Toshi Ogihara for very kindly answering all my last-minute semantic questions.

Portions of this book were written at the Whiteley Writing Center, a wonderful writing oasis (on an island!), which I thank for the good writing vibes. Some parts were written when I was a visiting scholar at the Department of Linguistics and Philosophy at MIT in the Fall of 2011. I thank the department for the welcoming atmosphere it creates for all its visitors, and for all the inspiring classes, talks and conversations I had while I was there. In particular, I would like to thank David Pesetsky, Sabine Iatridou and Shigeru Miyagawa for their openness and interest in my research. I also want to thank Andrew Winnard and the whole editorial team at Cambridge University Press for their patience and guidance throughout the project, Alexander Sugar for help proofing the manuscript and Brent Woo for help with the index.

Given that the literature on phases in syntactic theory is vast and ever-growing, it is impossible to do justice here to all the phenomena that bear on all the issues surrounding phases, to all the literature on phases and to all the researchers working on phases. I alone remain responsible for any omissions or misinterpretations.

Last but not least, I thank my husband Randy for his support and perspective. I dedicate this book to the memory of Icarus.

# Abbreviations

The following list includes not only abbreviations used in this book but also the abbreviations often used in the primary literature on phases.

φ	Phi-features
Φ	Phonological component
Σ	Semantic Component
ACC	Accusative
ACD	Antecedent Contained Deletion
ATB	Across the Board
AUGB	Approaching UG from Below
AUX	Auxiliary
BPS	Bare Phrase Structure
C	Case
C <sub>HL</sub>	Computation of Human Language
CAUS	Causative
C-I	Conceptual–Intentional
CP	Complementizer Phrase
DNS	Derivation of Narrow Syntax
DP	Determiner Phrase
ECM	Exceptional Case Marking
EM	External Merge
EPP	Extended Projection Principle
ERG	Ergative
FEM	Feminine
FI	Feature Inheritance
FIFA	Feature Inheritance from Above
FIFB	Feature Inheritance from Below
FL	Language Faculty
FP	Functional Projection
G	Goal
H	Head

**List of abbreviations**

ix

IC	Interface Condition(s) <i>or</i> the Inclusiveness Condition
iF	Interpretable Feature
IM	Internal Merge
INDEF	Indefinite
INTER	Interrogative
iwh	Interpretable wh-feature
LA	Lexical Array
LBE	Left Branch Extraction
LCA	Linear Correspondence Axiom
LDA	Long-Distance Agree
Lex	Lexicon
LF	Logical Form
LI	Lexical Item
MASC	Masculine
MOM	Merge over Move
MSO	Multiple Spell-Out
N	Numeration
NEUT	Neuter
NMLZ	Nominalizer
NOM	Nominative
NPI	Negative Polarity Item
NS	Narrow Syntax
NSL	Null Subject Language
NSR	Nuclear Stress Rule
NUM	Number
P	Probe
PART	Participle
PF	Phonological Form
P-feature	Periphery Feature
PH	Phase
PIC	Phase Impenetrability Condition
PL	Pair List <i>or</i> Plural
PLA	Properly Local Agreement
PP	Prepositional Phrase
PrP	Predication Phrase
PST	Past
Q	Question <i>or</i> Interrogative
QP	Quantified Phrase
QR	Quantifier Raising
RNR	Right Node Raising
RP	Relator Phrase
SA	Single Answer
SG	Singular

x	List of abbreviations
SM	Sensorimotor
SMT	Strong Minimalist Thesis
S-O	Spell-Out
SOR	Subject to Object Raising
SOT	Sequence of Tense
T	Tense
TNP	Traditional Noun Phrase
TP	Tense Phrase
uF	uninterpretable <i>or</i> unvalued feature
uQ	uninterpretable Q feature
val	Feature Value
VIR	Virile
vP	verb Phrase
VPE	VP Ellipsis
