

## Index

- case, 148
  - See also* case studies; qualitative research
- case control strategies. *See* case selection for pathway analysis
- case selection for pathway analysis
  - case control strategies and, 44–45, 48, 66, 148
  - compared to variable-based approaches, 53
  - horizontal comparisons and, 44, 62, 84, 101
  - N*-stretching strategies and, 54
  - random sampling and, 45–46
  - residual-based approach and, 57, 151
  - use of distributional plots and, 38, 60, 80, 92, 98
  - use of scatterplots and, 41, 42, 53, 62, 96, 110
  - variable-based approach and, 49–52, 151
  - variation in case characteristics, 52, 151
  - vertical comparisons and, 43, 62, 85, 101
  - visualizing variation in the data and, 40, 62, 80–83, 92, 142
  - within-case comparisons and, 48, 53, 84, 95, 100
  - See also* expected relationship between X1 and Y; variation in case characteristics
- case studies
  - definition of, 4, 148
  - limitations of, 5
  - strengths of, 4
  - the search for mechanisms and, 4–5
  - See also* qualitative research
- causal effect, 148
- causal inference, 148
- causal mechanisms. *See* mechanisms
- causal process observations, 5, 148
  - See also* process tracing
- comparative pathway analysis
  - See* pathway analysis
- control cases, 52
  - See also* variation in case characteristics
- control variable, 149
- direct and indirect pathways scenario, 26, 151
- effect cases, 52
  - See also* variation in case characteristics
- equifinality
  - definition of, 16, 149
  - problem of, 16, 123
- expected relationship between X1 and Y
  - compared to average treatment effect, 38
  - definition of, 6, 33, 61, 149

- illustration of, 62, 65, 80, 82, 93, 96, 109–10
- marginal effect approach and, 39
- matching and, 95, 102
- non-linearity and, 50
- predicted probabilities and, 38, 80, 110
- versus observed relationship between X1 and Y, 21–22, 34–35, 36
- versus pathway value, 59
- front-door criterion, 125, 126, 143, 149
- horizontal comparisons. *See* case selection for pathway analysis
- intervening variable, 150
- Mahalanobis distance, 40, 94, 95, 150
- matching, 40–41, 89, 95, 150
- measurement, 30–31, 76–77, 86
- mechanisms
- ability to manipulate, 15
  - case studies and the search for, 4–5
  - contested nature of, 11
  - continuing search for, 7, 145–47
  - definition of, 11–15, 150
  - direct and indirect pathways scenario and, 26
  - multiple exclusive pathways scenario and, 27
  - multiple non-exclusive pathways scenario and, 27
  - observability of, 12
  - single pathway scenario and, 24–26
- mixed-method research, 10, 140, 150
- appeal of in searching for mechanisms, 3, 5–6
- multi-method research. *See* mixed-method research
- multiple causal pathways. *See* equifinality
- multiple exclusive pathways scenario, 27, 151
- multiple non-exclusive pathways scenario, 27, 123, 151
- non-outcome cases, 53  
*See also* variation in case characteristics
- non-treatment cases, 53  
*See also* variation in case characteristics
- pathway analysis
- analytic requisites of, 22–23, 60, 74, 90
  - criteria for “good,” 145
  - definition of, 6, 149, 150
  - definition of mechanisms and, 9, 14
  - distinguished from effects-of-causes and causes-of-effect research, 19–21
  - distinguished from pathway cases, 16
  - distinguished from process tracing, 15–16
  - functional form and, 69
  - future quantitative studies of mechanisms and, 118, 137
  - mechanism-centered research agendas and, 8
  - need for, 8, 37, 42, 53, 54, 67, 114
  - non-linearity and, 100, 110, 112
  - policy-oriented case studies and, 132–33, 143
  - purposes of, 8, 19, 33, 94
  - reading the literature for, 23–27, 28–30, 60, 74, 91, 142
  - uncertainty about mechanisms and, 27–29, 32, 53, 75, 142
- pathway cases, 16
- pathway value, 57, 61
- process tracing
- definition of, 15, 150
  - distinguished from pathway analysis, 15–16

- qualitative research  
  definition of, 4  
  limitations of, 5  
  strengths of, 4  
  *See also* case studies
- quantitative comparative analysis  
  (QCA), 51
- quantitative research  
  limitations of, 4  
  strengths of, 3
- random sampling, 45–46, 86  
  *See also* measurement
- residual-based approach to case selection  
  definition of, 57  
  illustration of, 59  
  *See also* case selection for pathway  
  analysis
- sensitivity analysis, 128, 130, 151
- sequential ignorability, 75, 127, 129, 143,  
  151
- single pathway scenario, 24–26, 124, 136,  
  151
- stratified random sampling. *See*  
  measurement, random sampling
- variable-based approach to case  
  selection  
  definition of, 49–52  
  illustration of, 51, 55  
  *See also* case selection for pathway  
  analysis
- variation in case characteristics  
  definition of, 6, 34  
  illustration of, 41, 52, 62, 99, 100
- vertical comparisons. *See* case  
  selection for pathway  
  analysis
- within-case comparison  
  definition of, 151  
  *See also* case selection for pathway  
  analysis
