Contents

<i>List of figures</i>	<i>page</i> xi
<i>List of tables</i>	xiv
<i>Foreword by Partha Dasgupta and Georgina Mace</i>	xvii
<i>Preface</i>	xxvii
<i>List of acronyms</i>	xxxvii
1 Biodiversity change	1
1.1 Biodiversity	1
1.2 The Holocene extinction	8
1.3 The challenge for biodiversity science	12
1.4 Science and policy at the crossroads	19
1.5 The challenge for conservation	22
1.6 A roadmap	23
Part I Diagnosing the biodiversity change problem	37
2 Biodiversity in the modern world	39
2.1 Widening horizons	39
2.2 Agriculture and biodiversity	40
2.3 Biodiversity and disease	52
2.4 Wildlife conservation	59
2.5 Finding the balance	68
3 Biodiversity and ecosystem services	78
3.1 Biodiversity, ecosystem services, and the market	78
3.2 Origins of ecosystem services	80
3.3 Ecosystem services in the Millennium Ecosystem Assessment	84
3.4 Ecosystem services and biodiversity	92
3.5 Changing environmental conditions: a digression on climate	95
	vii

Table of Contents

[More information](#)

viii	<i>Contents</i>
3.6 The valuation of ecosystem services	98
3.7 Scratching the surface	109
4 Biodiversity loss, sustainability, and stability	119
4.1 Sustainability and stability	119
4.2 Measures and models of biodiversity	122
4.3 The portfolio effect	126
4.4 The portfolio effect and sustainability	132
4.5 The biodiversity portfolio	139
5 Biodiversity externalities and public goods	148
5.1 Market failures and biodiversity externalities	148
5.2 Identifying the social cost of externalities and public goods	151
5.3 Biodiversity as a “layered” public good	157
5.4 Strategic behavior and the provision of international environmental public goods	163
5.5 Biodiversity-related international public goods	171
5.6 Externalities and public goods in context	177
6 Poverty alleviation and biodiversity change	184
6.1 Stating the problem	184
6.2 Poverty and environmental change	186
6.3 Modeling the relation between income growth and biodiversity change	191
6.4 Biodiversity and poverty alleviation	198
6.5 Conclusions	206
7 Globalization: trade, aid, and the dispersal of species	214
7.1 Globalization and biodiversity	214
7.2 Globalization and the cost of biological invasions	218
7.3 The invasive species risks of trade	227
7.4 The regulation of trade-related biological invasions	231
7.5 System-level effects of species dispersal	234
7.6 Conclusions	238
Part II The search for solutions	249
8 Getting the prognosis right	251
8.1 Understanding the “anthropogenic” in anthropogenic biodiversity change	251

<i>Contents</i>	ix
8.2 Biodiversity scenarios	254
8.3 Current prognoses	262
8.4 The International Science-Policy Platform on Biodiversity and Ecosystem Services	264
8.5 Social indicators of biodiversity change	269
8.6 Biodiversity change and social wellbeing	273
9 Understanding what is lost	280
9.1 Indicators of the importance of biodiversity change for human wellbeing	280
9.2 The value of environmental assets	282
9.3 Adjusted net savings and wealth estimates	287
9.4 Assets in the system of national accounts	294
9.5 Satellite accounts and the capital accounts in the system of national accounts	296
9.6 Towards the construction of inclusive wealth accounts	301
10 Managing risk, uncertainty, and irreversibility in biodiversity change	309
10.1 The unknowns in the problem of biodiversity change	309
10.2 Decision-making under risk	313
10.3 Decision-making under uncertainty	316
10.4 The precautionary principle and decision-making under uncertainty	321
10.5 Learning	325
10.6 Decision-making under uncertainty and biodiversity change	328
11 Conservation incentives and payments for ecosystem services	337
11.1 Externalities and public goods revisited	337
11.2 Internalizing biodiversity externalities	340
11.3 Markets for habitat conservation	344
11.4 Designing payments for ecosystem services	357
11.5 The incentive effects of international payments for ecosystem services	362
12 Paying for international environmental public goods	370
12.1 International environmental public goods	370

x	<i>Contents</i>
12.2 The Global Environment Facility	373
12.3 The national provision of biodiversity-related international public goods	381
12.4 The private provision of international environmental public goods	386
12.5 Coordination	391
13 Strengthening the biodiversity-related multilateral agreements	398
13.1 Identifying the biodiversity-related multilateral agreements	398
13.2 The Convention on Biological Diversity's Aichi targets	402
13.3 Negotiating the relationship between trade and biodiversity change	408
13.4 The problem of resources beyond national jurisdiction	416
13.5 The problem of scale revisited	428
14 Genetic resources and the poor	436
14.1 Biodiversity loss and poverty revisited	436
14.2 Rights to the genetic resources of wild-living species	442
14.3 Rights to the genetic resources in domesticated species	446
14.4 Rights, and the conservation of genetic resources in poor regions	452
14.5 Private affluence, public poverty	457
15 Redirecting biodiversity change	464
15.1 Assembling the pieces of the problem	464
15.2 Refocusing conservation	466
15.3 Knowing what is happening	468
15.4 Enhancing the efficiency of biodiversity markets	471
15.5 Reducing the biodiversity costs of poverty alleviation	475
15.6 The abrogation of common heritage rights	479
15.7 The uncommon heritage of humankind	481
