## INDEX

- Abbot, Francis Ellingwood, 95 n.3, 96 n.5; resignation and reinstatement as editor of *Index*, 145 & 146 n.3
- Abbot, Samuel Leonard, 585
- Abutilon*: fertilisation, 221
- Acacia*: J.D. Hooker identifies species for CD, 470 & 472 n.5, 479, 480 & 481 nn.2 & 12, 486; *A. cultriformis*, CD seeks from Kew, 493 & 494 n.10; *A. farnesiana* (*Vachellia farnesiana*), J.D. Hooker sends CD leaves and plant, 468 & n.4, 469 & n.1, 469 & n.1, 470 & 471 n.2, 471 & 472 n.7, 473 & 475 n.1, 479 & 481 n.3, 485 & 486 n.5
- Académie des sciences, Paris: rejects CD as correspondent, 282 & n.2, 285 & n.2, 567 & n.2
- Académie royale de Belgique: elects J.D. Hooker associate member to express support in Ayrton dispute, 27 & 28 n.7, 29
- Academy*: C.E.C.B. Appleton, editor, 246 & 248 n.2; review of *Expression* (A. Dohrn), 241 & nn.2–3, 246–7 & 248 n.2, 588 & 589 n.14; review of H. Müller, *Befruchtung der Blumen* (A.W. Bennett), 209–10 & 210 n.1, 352 & 353 n.1
- Acasta*: reproduction, 392 & 394 n.8
- Accademia delle Scienze di Torino: elects CD honorary member, 585–6
- Acland, Henry Wentworth: J.V. Carus visits in Oxford, 298 & 299 n.2
- Adam, William Patrick: succeeds A.S. Ayrton as commissioner of works, 328 & n.4, 333
- Agassiz, Alexander: support for CD's theories, 89 & n.4
- Agassiz, Louis: correspondent, Académie des sciences elects as correspondent, 282 n.2, 567 n.2; attempts to refute Darwinism, 90 & 91 nn.1–2, 96 & n.3; CD sends *Nature* squib ridiculing his views, 90 & 91 n.2, 121 & 122 n.2; J. Fiske attacks creationist philosophy, 473 & n.5, 484 & 485 n.5; summer school for natural history, Penikese Island, 145 & 146 n.4
- Airy, George Biddell: president, Royal Society, 20 & 21 n.1; supports W. Cavendish's nomination as next president, 29 & 31 n.18; votes for W. Spottiswoode as president, 50 & n.3
- Airy, Hubert: CD communicates his paper on phylotaxy to Royal Society, 20–1 & 21 nn.1–3, 51 & n.1; CD offers to lend new edition of Sachs's *Lehrbuch der Botanik*, 51 & 52 n.4; CD sends W.J. Beal's paper opposing his views, 538 & n.5; leaf arrangement, further investigations, 126–7 & 127 nn.2–3, 410–14 & 415 nn.3–8; leaf arrangement in *Gasteria*, 537–8 & 538 nn.1–3; medical inspector, Local Government Board, 538 & n.6; Royal Society publishes abstract of revised paper, 51 & n.2, 410 & 415 n.2, 414 & 415 n.11
- Aiton, William Townsend: researched *Hortus Kewensis* from own herbarium and that of J. Banks, 43–4 & 44–5 n.4
- Album der Natur*: engraving of Jewish prisoners in Babylonian bas-relief, 3–4 & 6 n.15
- Alcippe* (*Trypetesa*): complementary males, 391 & 394 n.4
- Allbutt, Thomas Clifford, 550 & n.2
- Allen, Frances, 426 n.2; CD hopes to rent Down Lodge for F. Darwin, 426 & nn.1–2, 438 & 439 n.9; opposes reading room at Down school, 526 n.4
- alligators: inherited instinct, 206 & 207 n.3
- Allman, George James: J.D. Hooker proposes for Royal Medal of Royal Society, 273 & 274 n.8, 274 & n.2; monograph on gymnoblastic hydroids, 273 & 274 n.7; presidential address, biology section, BAAS, 399 & 400 n.15
- Amaranthus* (*Celostia cristata*, cockscomb): effects of formic acid on seed, 305 & 306 n.2
- American Association for the Advancement of Science: A. Gray, presidential address, 122 & n.6
- American Journal of Science*: O.C. Marsh, fossil finds in America, 54–5 & 55 n.1, 220 n.9
- American Naturalist*: W.J. Beal, 'Phylotaxis of cones', 538 & n.5; CD subscribes to, 20 & n.6; O.C. Marsh's fossil finds, 55; M. Treat, 'Controlling sex in butterflies', 20 & n.6; M. Treat, experiments on *Drosera*, 305 n.7
- Anderson, John, 146 n.4
- Andrews, Thomas: proposed as president of BAAS, 399 & 400 n.8

- Annasmasa*: lives in pairs, buried in skin of sharks, 392;  
*A. squalicola*, CD sends specimens to A. Dohrn, 55–6 & 56 n.6; *A. squalicola*, CD's examination of, 247 & 249 n.12; *A. squalicola*, R.A. Kossmann's study of, 248 & 249 n.16
- Angalis arvensis* (pimpernel): whether closing of flowers is analogous to *Cassia*, 536 & n.5
- Angelico, Fra: grief muscle illustrated in 'Descent from the Cross', 72 n.1
- Annales des sciences naturelles*: G. de Saporta, fossil plants of gypsum beds of southern France, 57 & n.8
- Annals and Magazine of Natural History*: T.G. Gentry, fertilisation of *Pedicularis canadensis*, 526 & n.1; J.E. Gray, 'On the guëmul', 64 n.3; E.R. Lankester, 'Primitive cell-layers of the embryo', 443 & n.8, 573–4 & 574 n.8; T. Meehan, fertilisation of *Pedicularis canadensis*, 526 & n.1; A. Voelcker, 'Chemical composition of fluid in ascidia of *Nepenthes*', 459 n.2, 460 & n.2
- Anningson, Bushell: J.B. Dunbar-Brander's views on dogs' instinctive muscular movements, 284 n.7, 284 & nn.2–3
- Anthracotherium*: V.O. Kovalevsky's monograph on, 362 n.2, 568 n.2
- Anthropological Institute: G. Busk, president, 75 n.3; merger with Ethnological Society and financial difficulties, 524 & nn.3–5
- Anthus pratensis* (titlark, meadow-pipit), 265 & 266 n.2
- ants: ability to recognise each other, 159 n.3; T. Belt observes in Nicaragua, 312 & 313 nn.3–4; CD sends J.D. Hague's letters to *Nature*, 158 & 159 n.3, 186 & n.2, 300 & 301 n.2, 313 n.3; deterred by corpses of some of their number (J.D. Hague), 91 & n.1, 155–7 & 157 n.3, 268–9 & 269 n.2; deterred by interruption of trail, not by fear (T. Belt), 312 & 313 n.3; effect of formic acid on germination of seeds, 82 & 83 n.2, 119 & 120 n.1, 176, 178 & n.3, 299 & 300 n.3, 301 & n.1, 343–6 & 347–8 nn.1–3, 346, 347, 355 & nn.1–2, 305–6 & 306 nn.1–3, 489–90 & 490 nn.2–5; relationship of *Formica pubescens* to Tettigometridae (F. Delpino), 181 & n.3, 562 & n.3; sterile workers, 152 & 155 n.3; symbiotic relationship with plants, 312 & 313 n.1, 315–16
- apes: mental faculties, 88 & n.2
- Apis mellifica* (*A. mellifera*): fertilises *Viola tricolor*, 251 & 252 n.4
- Apocynion*: W.H. Leggett's papers on, 447–8 & 448 n.3
- Appleton, Charles Edward Cutts Birchall: editor, *Academy*, 246 & 248 n.2
- Appleton, William Henry: publishes US editions of *Descent and Expression*, 415 & 417 n.1
- Archiac, Adolphe, vicomte d': maintained there were no worm castings in forests, 279 & 280 n.4
- Argiope* (*Megathiris*): larvae resemble *Sagitta*, 219 & 220 n.6, 225 & nn.5–6
- Argus*: review of *Expression*, 588
- Aristotle: *History of animals*, tunny swim from right to left, 205 & 206 n.4
- Armstrong, William George: offered £50 to Naples Zoological Station, 531 & 532 n.7, 578 & 579 n.4; subscribes to assist T.H. Huxley, 169 & n.4, 170, 189 n.4, 591
- Arnold, Christoph, 258 n.12
- Arnold, Matthew: CD thanks for present of *Literature & dogma*, 66–7 & 67 n.2, 67; G.H. Darwin exposes fallacy of views on prayer, 461 & 462 n.3
- Artemisiaceae: G. Bentham criticises F. Delpino's classification, 258–9 & 260 n.8, 565 & 566 n.8
- Artizans, Labourers, & General Dwellings Co.: CD receives dividend of £5.18s., 86 & nn.4–5; minutes of general meeting, 85–6 & 86 n.1
- Arum maculatum*: fertilisation, 221 & 223 n.7
- Asilus*: trapped by *Drosera*, 303 & 305 n.3
- asparagus: fertilisation, 231 & 232 nn.1 & 5
- Athenæum*: announces CD's forthcoming work on interbreeding, 202 n.2, 209 & n.2; early advertisement of publication of *Expression*, 209 & n.4; natural increase in elephant population, CD's calculations questionable, 174 & n.2; review of *Expression*, 587
- Atropa belladonna*: alkaloid poisons, 147 & n.2
- Atta*: *A. barbata* (*Messor barbarus*), 490 & n.5; *A. structor* (*Messor structor*), 489 & 490 n.4, 490
- Audubon, John James: pinioned goose loses sense of direction, 155 & n.10
- Ayres, Clara Alice, 250 & n.2
- Ayres, Philip Port, 250 n.2
- Ayres, William Port: maggots in hard-boiled egg may result from spontaneous generation, 250 & n.3
- Ayrton, Acton Smee: advocates transfer of Kew herbarium to new National Museum, 43 & 44 n.2; J.D. Hooker's dispute with, 27 & 27–8 nn.6–7, 29 & 30 n.5, 33 n.3; leaves Office of Works, 328 & n.4, 333 & nn.5–6
- BAAS. *See* British Association for the Advancement of Science
- Baer, Karl Ernst von: sends CD his photograph and requests CD's *carte de visite*, 203 & nn.2–3
- Bain, Alexander, 22, 194 n.3; CD recalls stay at Moor Park, 444 & n.7; CD unable to grasp his theory of spontaneity, 444 & n.4; *Review of 'Darwin on expression'*, 444 & nn.1–5

[More information](#)

- Baker, Augustine Fitzgerald: T.H. Huxley's *Physiology* endorses CD's observations on secretion of tears, 229–30 & 230 nn.1–3
- Baldwin, John Denison: doubtful that all races derive from single human stock, 23–4 & nn.1–2, 52 & n.2
- Balfour, Arthur James, 120 & 121 n.3
- Balfour, Francis Maitland, 120 & 121 n.3; financial difficulties of Naples Zoological Station, xx, 495–6 & 496 nn.1 & 3, 503 & 504 n.2, 504, 505 & n.4, 531 & 532 n.9, 535 & n.3, 579 & n.6; seeks to repeat F. Galton's experiments on rabbits, 25 & 26 n.10
- Balfour, John Hutton: CD seeks *Neptunia* plant from, 455 & 456 n.4
- Balzac, Honoré de: mastery of style achieved by many revisions, 215 & n.4
- Banks, Joseph: herbarium, 44–5 n.4
- Baranowska, Maria von: A. Dohrn's fiancée, 505 & n.8, 531 & 532 n.13, 579 & n.10
- Barbier, Edmond: revises French translation of *Descent* for 2d ed., 110 & 111 n.6, 216 & 217 n.4; translated J. Lubbock's *Prehistoric times* into French, 216 & 217 n.4; translated *Journal of researches* into French, 216 & 217 n.6
- barn owl (*Strix flammea*), 212, 218
- Barnes, Thomas, 498 & 499 n.11
- Baroni, Paolo, 258 & 259 n.5, 565 & 566 n.5
- Barrett, William Fletcher: inherited instinct in alligators, 206 & 206–7 nn.1–3
- Barrett, William Garland, 206 & 207 n.2
- Bartlett, Abraham Dee: cited in *Expression* on pigs' drawing back ears when fighting, 106 & 108 n.10; superintendent, Zoological Gardens, Regent's Park, 70 & 71 n.6, 108 n.10
- HMS *Basilisk*: survey of New Guinea, 483 & n.11
- Bassani, Francesco: with G. Canestrini, translates *Expression* into Italian, 65 n.2, 69 n.2, 559 n.2
- Bastian, Henry Charlton: experiments with spontaneous generation, 250 n.3, 262 n.2
- Bates, Henry Walter: approaches A.R. Wallace to help revise *Descent* for 2d ed., 502 & n.1, 505–6 & 506 n.3, 512 & 513 n.4, 514–15 & 515 n.4; appropriate fee for updating *Descent*, 516 & n.3; W. Caruthers offends, 29 & 30 n.9; puts CD's question about sexual differences in butterflies' ocelli to Entomological Society, 135 & 136 n.1; tells W.W. Reade CD is in London, 136 & 137 n.2
- Bates, Thomas, 497 & 498 n.5
- Bateson, Peter H., 146 n.3
- Baudry, Frédéric, 119 n.2, 560 n.2
- Baumgärtner, Karl Heinrich: physiognomy of illness, C.H. Schaible recommends to CD, 75 & 75–6 nn.2–3
- Baxter, William Walmisley: CD orders chemicals for experiments, 366 & n.2, 367 & n.2, 369 & nn.2–5, 394–5 & 395 n.2, 439 n.2, 440 n.3
- Baynes, Ann Maria, 106 & 108 n.12
- Baynes, Donald, 108 n.12
- Baynes, Thomas Spencer: hostile review of *Expression* in *Edinburgh Review*, published anonymously, xvii, 184 n.4, 194 nn.2–3, 195 & n.6, 197 n.2, 242 & 243 n.3, 444 & n.6, 588 & 589 n.10
- Beagle* voyage: B. Bynoe, surgeon, 172 n.2; A.A. Cochrane invites CD to relieve, 244 & 245 n.3; CD acquired J.I. Molina's travel writings while in Valparaiso, 64 n.2; CD found it difficult to classify *Sagitta*, 225 & n.6; CD recalls walking through bed of *Mimosa sensitiva* in Brazil, 378; CD visited Bathurst, 317 & 320 n.3; CD's education really began on board, xx, 234 & 235 n.8; R. FitzRoy, captain, 171 & 172 n.2; Galápagos tortoise brought home by, 171 & 172 n.2; R. McCormick, surgeon, 172 n.2; R. Owen described fossil mammal specimens, 33 n.3; visited Sydney, 478 & 479 n.4
- Beal, William James: disagrees with H. Airy on leaf arrangement, 538 & n.5
- Beale, Lionel Smith: friend of J.V. Carus, 298 & 299 n.2
- Bechstein, Johann Matthäus, 218 & n.3
- Becker, Lydia Ernestine: supports Women's Disabilities (Removal) Bill, 129 n.3
- bees: collect nectar from leaf undersides of laurel, vetch and bean, 316 & n.2; cutting bees in Himalayas, 539 & n.3; drones of hive-bees demonstrate inherited instinct, 152 & 155 n.3; fertilisation of *Coronilla*, 321 & n.2, 323–4 & 324 nn.2–4; *Lathyrus odoratus* sometimes visited by, 264; F. Müller works on Brazilian species, 352–3 & 353 n.2; nectar holes in *Lathyrus* spp., 329–30 & 330 n.3, 334–5 & 335 n.4; New Zealand birds have declined since introduction of, 298 & n.2; *Pisum sativum* often visited by, 264
- Begonia*: J.D. Hooker suggests CD use for experiments on absorption by glandular hairs, 30 & 31 n.25
- Belcher, George Frederick, 208 n.2
- Belfast Naturalists' Field Club: R. Smith prepares paper on Darwinism for, 88–9 & 89 n.2, 96 & n.2
- Bell's Weekly Messenger*: J. Downing, 'Shorthorn breeding and type maintenance', 496 & 498 n.2
- Belt, Thomas: cited in *Cross and self fertilisation*, 316 n.3; hairlessness in tropics, 418 n.14; *Naturalist in Nicaragua*, sends to CD, 312 & 313 n.2, 316 & n.6; *Naturalist in Nicaragua*, A.R. Wallace reviews in *Nature*, 502 & n.2; symbiosis between ants and plants, 312 & 313 n.1, 315–16

- Bence Jones, Henry: subscribes to assist T.H. Huxley, 169 & 170 n.5, 189 n.4, 591
- Bence Jones, Millicent, 189 & n.3
- Bennett, Alfred William: CD commends H. Müller's book, 203 & n.1, 209–10 & 210 n.1; CD seeks return of woodblocks of climbing plants, 121 & n.3, 125 & n.2; fertilisation of *Viola tricolor*, 210 & n.4, 221 & 223 n.4, 223 & n.10, 232 nn.1 & 4, 251 & 252 n.8; hoped Ray Society might fund survey of literature on fertilisation of flowers, 210 & n.3; H. Müller, *Befruchtung der Blumen durch Insekten*, reviews in *Academy*, 209–10 & 210 n.1, 353 n.1; plants' sterility may be due to excess of pollen, 287–8 & 289 nn.1–2; self-fertilisation in *Impatiens fulva*, 289 n.4; suggested that naturalists study fertilisation of plants by insects, 204 & 205 n.2; translates F. Hildebrand's paper on fertilisation of grasses, 125 & n.4; works with W.T. Thiselton-Dyer on translation of J. Sachs's *Lehrbuch der Botanik*, 31 n.22, 36 & n.2, 125 & n.3,
- Bennett, George: first secretary, Australian Museum, 482 & 483 n.6
- Benoît, Justin-Miranda René: joins S. Pozzi in translating *Expression* into French, 211 & 212 n.3, 216 & 217 n.3, 563 & n.3
- Bentham, George, 259; anniversary address to Linnean Society, 264 & n.7, 270 & 271 nn.3–5; W. Carruthers offends, 29 & 30 n.9; CD admires Linnean Society address, 273 & 274 n.5; CD asks to send copy of address to H. Müller, 270; CD differs from on separation of the sexes, 270 & 271 n.5; criticises F. Delpino's classification of Artemisiaceae, 258–9 & 260 n.8, 565 & 566 n.8; fully supports theory of evolution, 264 & n.7; J.D. Hooker encourages to publish volume of addresses, 273 & 274 n.5; *Lathyrus sylvestris*, 336 & 337 n.3; praises H. Müller's *Befruchtung der Blumen*, 271 n.6, 275 n.1; revision of the genus *Cassia*, 536 & n.2; works with J.D. Hooker on *Genera plantarum*, 36 n.6
- Berkeley, George, 242 & 243 n.5
- Berkeley, Miles Joseph: J.D. Hooker will consult on absorption by glandular hairs of plants, 30 & 31 n.23
- Bernard, Claude: 'Cours de physiologie générale au Muséum d'histoire naturelle', *Revue scientifique*, 424 & n.9
- Bert, Paul: movements of *Mimosa*, 37 & n.6
- Bianconi, Giovanni Giuseppe: *La théorie darwinienne et la création indépendante*, 523 & nn.3–4, 576 & nn.3–4
- Bibio marci*: female demonstrates sexual preference, 140–1 & 141 n.4
- Biddulph, Fanny Myddelton (née Mostyn-Owen): watercolour sketch of CD, 226 & n.2
- Biddulph, Robert Myddelton, 226 n.2
- Bignonia*: cross- and self fertilisation, 221
- Binney, Edward William, 552 & 553 n.6
- Biophytum umbraculum*. See *Oxalis sensitiva*
- Birmingham Morning News*: G. Hookham responds to F.M. Müller's lectures on origin of language, 207 & n.3
- Bissell, Edward, 146 n.3
- Bitis arietans*. See puff adder
- Blackie, John Stuart, 242 & 243 n.4
- Blackley, Charles Harrison: CD sends M. Wyman's *Autumnal catarrh*, 280 & n.1; CD suggests experiments with effect of dry heat on pollen, 278 & n.2, 286; *Experimental researches* on causes of hay-fever, 253 & n.2, 278 & 278–9 nn.2, 4 & 6–8, 280 & nn.2 & 4; homeopathic practice in Manchester, 286 & 287 n.3
- Blackwood's Edinburgh Magazine*, 197 n.2
- Bloch, Marcus Elieser: fishes of Germany, 224 n.2
- Blomefield, Leonard: CD thanks for paper on local biology, 177 & n.3; name taken by L. Jenyns to secure bequest, 177 & n.2, 180 n.1
- Blum, Isaac, 584, 585
- Boehm, Edgar Collins, 277 & n.5
- Boehm, Fanny, 277 & n.6
- Boehm, Florence, 277 & n.4
- Boehm, Georgina, 277 & n.3
- Boehm, Joseph Edgar: inherited habits in sleeping, 276–7 & 277 nn.2–9; met H.E. Litchfield at A.V. Dicey's, 276 & 277 n.1
- Boehm, Josephine, 277 & n.4
- Böhm, Josef Daniel, 276 & 277 n.2
- Bois-Reymond, Emil Heinrich: coil to measure effect of electrical currents on the brain, 175 & 176 n.2
- Bombus*: *B. hortorum* and *B. rufellus* (*B. ruderarius*) fertilise *Viola tricolor*, 251 & 252 n.4; *B. lapidarius* gathers nectar from *Lathyrus odoratus*, 334–5 & 335 n.4; *B. lapidarius* visits *Coronilla*, 324 & n.4
- Bombyx mori* (mulberry silk-worm): will not eat lettuce, 7
- Bonham-Carter, Alice: visits Down, 34 n.4
- Booth, John, 497 & 498 n.6
- Booth, Richard, 497 & 499 n.9
- Bopp, Franz, 272 & n.3
- Boston Society of Natural History: CD elected honorary member, 585
- Bothriocyrtum californicum*. See *Ctenzia californica*
- Bouvé, Thomas Tracy, 585
- Bowman, William: *Expression* will aid him in treatment of patients with organic disease, 109 & n.3; hypermetropia, how far hereditary, 521–2 & 522 nn.1–2 & 4, 522; subscribes to assist T.H. Huxley,

- British Association for the Advancement of Science (BAAS): donates publications to A. Dohrn's zoological station at Naples, 55 & 56 n.4; F. Galton plans to send questionnaire about inherited intellectual ability to presidents of sections, 233 & n.4; W. Pengelly, testimonial, 541 n.1; R. Strachey's paper to Geographical section (1872) praised CD and J.D. Hooker, 36 & n.7; D.A. Spalding, faculties of newly hatched chickens (1872), 5 & 7 n.29
- British Association for the Advancement of Science, Bradford meeting, 378 & n.2; G.J. Allman, presidential address, biology section, 399 & 400 n.15; J.S. Burdon Sanderson, electrical phenomena accompanying leaf contractions of *Dionaea muscipula*, 327 n.7, 380 & n.3, 385 & 386 n.5, 399 & 400 n.14; G.H. Darwin, 'On a portable globe', 354 n.3, 356 & n.4, 400 & 401 n.19; D. Ferrier, 'Localization of function in the brain', 399 & 400 n.13; J. Goodman, corpuscles produced by chilled albumen and water, 438 & 439 n.7; J.D. Hooker describes to CD, 382 & 383 n.6, 399–400 & 400–1 nn.7–15 & 19, 419 & n.2; J.D. Hooker, experiments on *Nepenthes*, 459–60 n.2; J.C. Maxwell, address on molecules, 399 & 400 n.12; A.W. Williamson, president, 399 & 400 n.10; W.C. Williamson, coal and coal plants, 399 & 400 n.11
- British Museum: W. Carruthers, keeper, botany department, 29 & 30 n.; Galapagos tortoises given to, 172 n.2; A. Günther, assistant keeper, 253 n.2; R. Owen, superintendent, natural history departments, 30 n.8; zoological department, J.E. Gray formerly keeper, 64 n.4
- Brockhaus, Friedrich Arnold, 122 & 123 n.2, 561 & n.2
- Brodie, Benjamin Collins: Liebig memorial appeal, 227 & n.4
- Brodrick, William: London canary breeder, 160 & n.3
- Brown Animal Sanatory Institution: J.S. Burdon Sanderson, superintendent, 144 n.2, 334 & n.5, 370 n.6
- Brown, John, 242 & 243 n.6
- Brown-Séguard, Charles Edouard: observations on recently dead bodies, 5 & 7 n.27
- Brunton, Thomas Lauder: contributes to E.E. Klein's *Handbook*, xvi, 148 n.4, 537 n.1; CD seeks information on chondrin and chlorophyll, 527 & n.1, 529 & n.3; digestion of chlorophyll by animals, 514 & n.4, 527 n.1; lends CD article on tumbling pigeons, 137 & n.1, 143 & 144 n.3, 153 & 155 n.7; may be able to send CD pure animal substances for experiments, 380 & 381 n.6, 453 & n.4; possible contributor to J. Crichton-Browne's study of general paralysis, 550 & n.2; Ribera's painting shows expressiveness of a squint, 527 & n.2
- Buchenau, Franz, 133 & 133–4 n.2
- Büchner, Ludwig: *Man in the past, present and future*, G. Krefft translates poem not included in Dallas translation, 318–19 & 320 n.6; A. Moschkau admires, 495 & n.2, 575 & 576 n.2
- Buck, Emil: Senckenberg Society elects CD as corresponding member, 193 & n.1, 584, 585
- Buckley, Arabella Burton: C. Lyell's secretary, 187 & n.5, 386 & 389 n.1, 388, 420 & 421 n.2, 426 n.3
- Bulletin of the Torrey Botanical Club*: notices H. Müller's *Befruchtung der Blumen durch Insekten*, 352 & 353 n.1; W.H. Leggett, papers on *Apocynium*, 447–8 & 448 n.3
- Buprestidae: feed on *Eucalyptus*, 482 & 483 n.7
- Burdon Sanderson, Ghetal: visits Down, 279 n.5
- Burdon Sanderson, John Scott: British Medical Association congress, addresses on physiology, 333 & 334 n.2; Brown Animal Sanatory Institution, superintendent, 144 n.2, 334 & n.5, 370 n.6; CD arranges for E. Frankland to send acids for experiments, 502 & 503 n.2; CD consults on experiments on *Drosera*, xvi, 261–2 & 262 n.1, 262–3 & 263 nn.2–8, 267–8 & 268 n.3, 289 & 290 n.4, 301–2 & 302 nn.2–6, 326 & n.6, 453 & nn.2–5; CD meets in London, 143; CD needs small quantities of pure animal substances for experiments, 380 & 381 n.5, 381 & n.3, 397 n.6; CD seeks E.E. Klein's *Handbook*, 143 & 144 n.2; CD sends globuline for experiments with artificial digestion, 513–14 & 514 n.2; CD thanks for analysis of bullock's blood, 463 & 464 n.3; F. Darwin assists with experiments on *Dionaea*, 380 & n.2, 381 & n.4; *Dionaea*, electrical phenomena that accompany contractions of the leaf, 326 & 327 n.7, 327 n.7, 333–4 & 334 nn.4 & 7, 354, 369–70 & 370 nn.2 & 4, 379 & n.2, 399 & 400 n.14,

*Burdon Sanderson, John Scott, cont.*

424, 456 & 457 n.4; *Dionaea*, reports findings to BAAS, 380 & n.3, 385 & 386 n.5, 399 & 400 n.14; *Dionaea*, telegraphs CD with results of tests, 379 & n.2; *Drosera*, electrical charge when leaf is excited, 333 & 334 n.4, 379 & n.4, 424 n.4, 426–7 & 427 n.2; experiments with artificial digestion, 502–3 & 503 n.2, 513–14 & 514 n.2; experiments with spontaneous generation, 262 & n.2; interested in C.H. Blackley's study on pollen and hay fever, 278 & 279 n.8; recommends books on physiology to CD, 424 & 424–5 nn.6–10; refers CD's queries to T.L. Brunton, 527 & n.1, 529 & n.2; temperature at which frogs are killed, 302, 326 & nn.4–6, 333; visits Down, 263 & n.9, 278 & 279 n.5, 290 n.4, 301 & 302 n.2, 385 & 386 n.5, 582 & 583 n.24

Burnouf, Eugène, 272 & n.3

Busk, Ellen: visits CD, 582 & 583 n.13

Busk, George: Anthropological Institute's financial problems, 524 & nn.3 & 5; CD sends G. Krefft's photographs of aboriginal skulls, 74 & 75 n.3; T.H. Huxley, subscription to assist, 167 & 168 n.2, 168, 189 n.4, 582 & 583 n.16, 591; president, Anthropological Institute, 75 n.3; visits CD, 582 & 583 n.13

Butler, Agnes Isabel, 492 n.1

Butler, Arthur Gardiner: butterflies, courtship, 140 & 141 n.3, 141; butterflies, sexual differences in ocelli, 140 & 141 n.2; CD meets in London, 140 & 141 n.1; sexual preferences in *Bibio*, 140–1 & 141 n.4

Butler, Fanny: death of, 173 & n.2

Butler, George, 492 n.1

Butler, Henry Montague: inherited habit when dozing in a chair, 491 & 492 n.1

Butler, Samuel: CD comments on his pseudonymously published *Fair haven*, 148 & 149 nn.2 & 5; death of his mother in Menton, 173 & 173–4 nn.2–3; *Fair haven*, encouraged by response of CD and L. Stephen, 173 & 174 n.3; *Fair haven*, review in *Spectator* [F.J. Wedgwood], 518 & 519 n.9; published *Erewhon* anonymously, 174 n.3; L. Stephen knows he is the author of *Fair haven*, 148

Butler, Thomas: blames S. Butler's *Erewhon* for his mother's death, 174 n.3

butterflies: attracted by bright colours, 47–8 & 48 nn.3–4, 48–9 & 49 n.4, 557–8 & 558 nn.3–4; courtship, 140 & 141 n.3, 141; sexual differences in ocelli, 135–6 n.1, 137 & n.1, 140 & 141 n.2

Butts, Asa K., 146 n.3

Bynoe, Benjamin: surgeon, HMS *Beagle*, 172 n.2

Cailletet, Louis Paul: absorption of water by leaves,

359 & 361 n.10

calabar bean. *See Physostigma venenosum*

*Calaela*: fertilisation, 270

*Calla palustris*: fertilisation, 221 & 223 nn.6–7

*Calopsitta novae hollandiae* (*Nymphicus hollandicus*), 117 & 118 n.5

Campbell, Dudley, 298 n.1

Canby, William Marriott: cited in *Insectivorous plants*, 32 n.2, 61 n.5; observations on *Dionaea*, 31 & 32 n.2, 60–1 & 61 n.2, 77 & n.3; sends CD leaves of *Dionaea*, 182–3 & 183 nn.1–2, 208 & n.1

Candolle, Alphonse de: admires *Expression*, 39–40 & 41 n.3, 555–6 & 557 n.3; applies strict usage of term 'nature', 25 & 26 n.9; CD asked about butterflies being attracted by brightly coloured dresses, 48 n.4, 48–9, 558 n.4; F. Galton exaggerates influence of heredity, 40 & 41 nn.4–5, 556 & 557 nn.4–5; *Histoire des sciences*, CD wonderfully interested by, 26 n.9, 27 & 28 n.9, 39 & 41 n.2, 555 & 557 n.2; *Histoire des sciences*, F. Galton reviews in *Fortnightly Review*, 233 & n.2; *Histoire des sciences*, J.D. Hooker sends to W.E. Gladstone, 29 & 30 n.12; inheritance of intellectual ability, 232 & 233 n.2; inherited ability to contract the scalp, 297 n.2; instinct distinguished from imitation, 477 & n.4; mental state may alter ova before fertilisation, 40–1 & 41 nn.6–8, 49, 556–7 & 557 nn.6–8; *Prodromus* (with A.P. de Candolle), 459 & n.2; shyness may be an inherited characteristic, 39–40, 49, 555–6; support for CD's theories, 89 & n.4, 96 & 97 n.9

Candolle, Augustin Pyramus de: *Prodromus* (with A. de Candolle), 459 & n.2

Canestrini, Giovanni: with F. Bassani, translates *Expression* into Italian, 65 n.2, 69 n.2, 559 n.2

*Canis familiaris pomeranus*, 218

*Canis latrans* (coyote): the only wild dog to bark, 85 n.3

*Cantharus*. *See Telephorus*

*Capreolus capreolus* (roe-deer): A. Reuter sends photograph of abnormal specimen, 161, 163 & n.3

Capron, Edward, 322 & n.3

*Cardium groenlandicum*, 425

Cardwell, Annie: J.D. Hooker visits, 29 & 30 n.10

Cardwell, Edward: J.D. Hooker visits, 29 & 30 n.10

*Cariama cristata*: harsh cry of, 230 & 231 n.2

Carlyle, Thomas, 159 & 160 n.3

Carpenter, William Benjamin, 282 n.2, 567 n.2;

'Dr Carpenter on mental acquisitions and inheritance', discussion in *Spectator*, 35 n.1; 'Hereditary transmission of acquired psychical habits', 35 n.1, 181 & 182 n.2; *Principles of physiology*, 420 & 421 n.3

Carruthers, William: keeper, botany department, British Museum, J.D. Hooker complains of inso-

Lubbock's *Origin of civilisation*, 197 & 198 n.7; prize deer-hound at Edinburgh show, 243 & 244 n.10; sent CD report of J.V. Carus's Edinburgh lectures, 245 & n.3; works on poems and monograph on deer-hounds, 197 & 198 n.10
- Curtis's Botanical Magazine: Lobelia heterophylla*, 359 & 360 n.7
- Curtius, Georg, 272 & n.3
- Cuvier, Georges, 89
- Cynopithecus niger (Macaca nigra)*: expression of pleasure, 3 & 6 n.9
- Cyprinus* spp., 224 & nn.2–3
- Cypripedium*: H. Müller corrects CD's account of fertilisation, 371 & n.3
- Czerny, Vinzenz: lecture on relation of surgery to natural science, 75 & n.1
- Dabney, Virginius: Solanaceae, tobacco worms' preference and hogs' avoidance of proves Darwinian hypotheses, 454–5 & 455 nn.1–4, 484
- Daily News*: Darwins take *The Times* instead of, 582 & 583 n.23; review of *Expression*, 587 & 588 n.1; review of J.S. Mill's *Autobiography*, 462 n.4
- Daily Post*: review of *Expression*, 587 & 588 n.4
- Daily Telegraph*: review of *Expression*, 587 & 588 n.2
- D'Albertis, Luigi Maria: collects and takes photographs in New Guinea, 201 & 202 n.9
- Dalechampia roezliana (D. spathulata)*: colour and nourishment, 103 & n.5
- Dallas, William Sweetland: translated L. Büchner's work on human origins, 318 & 320 n.5; translated F. Müller's *Facts and arguments for Darwin*, 407 n.2
- Dallinger, William Henry: theory of spontaneous generation, 406 n.4, 441 & 443 nn.2 & 4, 572 & 574 nn.2 & 4
- Dalton, John Call: *Treatise on human physiology*, 147 & 148 n.3, 424 & n.7
- Dana, James Dwight, 282 n.2, 567 n.2; *Corals and coral islands*, 553 n.9
- Dapsy, László: translates *Descent* into Hungarian, 240 & nn.1 & 3; translates *Origin* into Hungarian, 240 & n.2, 250–1 & 251 n.2
- Darwin, Charles Robert
- AWARDS AND POSITIONS: 584–6; Académie des sciences elects to botanical section (1878), 282 n.2, 567 n.2; Accademia delle Scienze di Torino, honorary member, 585–6
- Boston Society of Natural History, honorary member, 585; Koninklijke Nederlandse Akademie van Wetenschappen, fellow (1872), 130 n.3; Senckenberg Society for Natural Science, Frankfurt am Main, corresponding member, 193 & n.1, 584–5
- FINANCES: Artizans, Labourers, & General Dwellings Co. pays dividend of £5.18s., 86 & n.4; A. Clark, pays 14 guineas, 365 n.3; F. Darwin, would pay £200 p.a. as secretary with allowance of £500, 390; F. Darwin, pays £5 for loan of his microscope, 267 & n.2; W.E. Darwin estimates that each of CD's sons would have £30,000, 389; donated £5 to *Westminster Review* (1869), 298 n.1; *Expression*, receives payment of £1050 for first 7000 copies, 68 & n.3; Hartnack microscope, purchases for £16.18s., 267 n.9, 446 n.7; Hopkins and Williams, £1.2s. for chemicals, 366 n.1; T.H. Huxley, subscribes £300 to assist, 168; J. von Liebig, donates £5 for statue, 227 n.3; F. Müller, pays profit on *Facts and arguments for Darwin*, 407 & n.2; J. Murie, subscribes £10 to fund for, 134; J. Murray, pays £41.7s.5d. for presentation copies, 401 n.2; Naples Zoological Station, increases subscription to £75, 507 & n.3; Naples Zoological Station, will contribute £50 if subscription is organised, 503; Pengelly testimonial, sends £5.5s., 541 & n.1; Wealden Exploration Fund, donates £10, 140 & n.2
- HEALTH: a good deal out of health and early morning his best time, 494; able to work at regular times but unable to see anyone he does not habitually see, 423; after illness, ordered by doctor to do very little and avoid over-exertion by long conversations, 377 & n.5, 423 & n.3, 457 & 458 n.3; a confirmed invalid but can walk some hours daily, and then is happy, 76; bad for the last 33 years, 234; A. Clark calls on in London, 494 & n.3; A. Clark finds him free of organic disease and prescribes diet for acid indigestion, xxi, 365 & nn.2–4; A. Clark's treatment is doing him good, 486 & n.7; doubts that diet will do much good, 535, 547; fatigued by journey to the City, 164 & 165 n.3; growing old and may not have strength and time to continue former researches, 178; hydropathic cure at Moor Park, 260 & n.2, 444 & n.7; long much out of health, 149; medicates with mixture of essence of ginger and brandy, 53 & n.4; poor health prevents him joining cruise of western Pacific, 249 & n.2; pretty bad and must work very little, 370; prevents from attending Down School Board, 544;

*Darwin, Charles Robert, cont.*

somewhat better of late, 225; takes Fowler's Solution, containing arsenite, 98 & n.3; trips to Kew have exhausted him, 473; unable to undertake visits, 164; very ill with partial memory loss, 354, 355 & n.3, 355 & n.2, 355 & 356 n.2, 363 & n.2, 363–4 & 364 n.3, 364 & n.2, 378 & 379 n.5, 399 & 400 n.3, 402 & n.8, 423 & n.3, 457 & 458 n.3, 582 & 583 n.27

OPponents OF THEORIES: Académie des sciences, 282 & n.2, 567 & n.2; L. Agassiz, 89–90 & 91 n.1, 96 & n.3; G.G. Bianconi, 523 & n.3, 576 & n.3; *Edinburgh Review* [T.S. Baynes], xvii, 193 & 193–4 nn.1–3, 196 & 197 n.2, 197, 211 n.4, 242 & 243 n.3, 246 & 248 n.3; J. Huber, 135 & nn.2 & 4, 561 & 562 nn.2 & 4; R.A. von Kölliker, 96 & n.4; F. McCoy, 291–2 & 294 n.2; St G.J. Mivart, 193 & 194 n.3, 195 & n.7, 246 & 248 n.3; C.W. Nägeli, 96 & n.5; J. O'Malley, 292 & 294 n.3; C. Perry, bishop of Melbourne, 291–2 & 294 n.2; R. Owen, 32 & 33 n.3, 36 & n.8, 535 & n.4; P. Somssich, 240 & 241 nn.4–5; G.C. Swallow, 372 & 373 n.4, 377

## PUBLICATIONS:

— *Climbing plants*; first published by Linnean Society, 121 n.3; *Lathyrus nissolia*, 463–4 n.2; new edition planned, 313 & 314 n.4, 325 & n.4

— *Climbing plants*, 2d ed.; CD expects small sales, 403 & n.5; CD works on, 313 & 314 n.4, 403 & n.5, 581 & 582 n.1; J. Murray publishes, 121 n.3

— *Coral reefs*; CD suggests Smith, Elder reprint, 542–3 & 543 n.5

— *Cross and self fertilisation*, 73 n.1; anemophilous plants, 264 n.8, 278 & 279 n.3; T. Belt cited, 316 n.3; benefits of intercrossing, 394 n.6; *Bombus lapidarius* sucks nectar without depressing flower's keel, 335 n.4; R. Caspary cited, 275 n.2; *Corydalis*, self sterility, 275 n.2, 276 n.5; CD works on, 581 & 582 n.2; F. Delpino cited, 264 n.8; draft ms., 223 n.11; *Eschscholzia californica*, 229 n.3; F. Hildebrand cited, 229 nn.2–3, 275 n.2; *Hypericum grandiflorum*, 229 n.2; *Ipomoea purpurea*, self-fertilisation reduces fertility, 471 & 472 n.14; A. Kerner cited, 264 n.6; *Lathyrus*, 335 n.3; *Lathyrus odoratus*, 258 & 259 nn.2 & 4, 264 n.4, 565 & 566 nn.2 & 4; *Lobelia ramosa* 'Snow Flake', 360 n.6; H. Müller looks forward to, 251 & 252 n.2; H. Müller cited, 205 n.4, 240 n.3; *Phaseolus multiflorus* (*P. coccineus*), 258 & 259 n.6, 360 n.2, 565 & 566 n.6; *Pisum sativum*, 258 & 259 n.7, 264 n.3, 565 & 566 n.7; premature announcement of publication, 202 & n.1, 202 & n.2, 210; prepotency of pollen from same and different species, 402 n.7; publication, 1876, 122 n.3, 202 n.2, 202 n.3, 211 n.2, 314 n.4, 407 n.4; quantity of pollen, effect on fertilisation,

289 n.1; relationship between plants and nectar-feeding insects, 316 n.3; C.V. Riley cited, 252 n.6; separation of the sexes, 271 n.5; W.T. Thiselton-Dyer cited, 360 n.6; *Vicia sativa*, secretion of nectar in stipules, 316 n.4

— *Descent*; African ostriches, males incubate eggs, 117 & 118 n.9; ants' ability to recognise each other, 159 n.3; appendix a rudimentary organ that may become inflamed, 533 & 534 n.1, 540 & n.3; ascidians, homologies with vertebrates, 225 n.6; A. Bain cited, 444 n.2; caged birds attracting others of same species, 117 & 118 n.5; canaries monogamous in the wild, 160 & n.2; climate not a major determinant of colour in human races, 310 n.4; development of horns in domestic sheep variable, 533 & 534 n.4; development of language, 24, 52 n.3; embedded caudal vertebrae of *Macacus inornatus* analogous to human coccyx, 134 n.2; existence of God admitted by highest intellects, xxii–xxiii, 159 & 160 n.4; fighting stallions in Falklands, 118 n.10; growth of hair on human body, 416 & 417 n.10, 417 & 418 n.15; A. Günther cited, 253 n.1; humans cannot move their ears, 77 & 78 n.1; humans' use of speech does not preclude facial movements, 416 & 417 n.9; Hungarian translation (L. Dapsy), 240 & nn.1 & 3; inherited ability to contract the scalp, 297 n.2; F.B. Johnston's observations on, 116–18 & 118 nn.1–10; A. Kennedy cited, 298 n.2; A.O. Kovalevsky cited, 225 n.6; G. Krefft appreciates and offers further help, 74 & 74–5 nn.1 & 5; R.B. Litchfield passes on errata in first printing, 92 & nn.1–4; long eyebrow hairs a family trait, 416 & 417 n.6; luminosity of insects, 117 & 118 n.4; Maori population in decline, 298 n.2; *Megalophrys*, sexual differences, 253 n.1; mental capacity of birds, 117 & 118 nn.6–7; migratory instinct, 477 n.4; J. Murie cited, 134 n.2; new characters which appear late in life are transmitted to same sex alone, 475–6 & 476 n.7; origin of language, 272 n.2; origins of moral sense in humans can be traced to animals, 373 n.4; J. Paget cited, 416 & 417 n.6; J. Peel's comments on, 533 & 534 nn.1–8; pinioned goose loses sense of direction, 155 n.10; platysma myoides, 415 & 417 n.2; Polish translation, 87 & n.7, 213–14 & 214 nn.2 & 4, 563–4 & 564 nn.2 & 4; Polish translation, woodcuts, 214 & n.6, 564 & n.6; protective mechanisms of caterpillars, 208 n.1; *Rhynchocha capensis*, 117 & 118 n.8; B.C. Seemann cited on musical language of the East, 151 & n.4; snipe, breeding in England, 533 & 534 n.3, 540 & n.4; talking parrots, 545 & n.2; throat pouches of male grouse and bustard, 117 & 118 n.3; voluntary movement of the

- ears, 116 & 118 n.1, 373 n.6, 415–16; white-coated quadrupeds of northern climes, 307 & 310 n.3; winter colouring of mammals, 306 & 310 n.1; Woolnerian tip, 139 n.8, 416 & 417 n.3, 544 n.3, 546 n.1
- *Descent*, 2d ed., xxi; T. Belt cited, 418 n.14; corrected spellings, 92 nn.2–3; courtship in butterflies, 141 & n.3; W.D. Crotch cited on usefulness of female reindeer's horns, 502 n.2; CD specifies work needed to produce, 508–9 & 509 nn.1–5; CD works on, 515 n.4, 543 n.5, 535 & 535–6 n.5, 547 & 548 n.5, 581 & 583 n.3; G.H. Darwin to assist with revision, 512 & nn.2–3, 515 & n.3, 519 & n.2, 523 & n.2; F.D. Fenton, report on aboriginal inhabitants of New Zealand, 552 & 553 n.7; hairlessness in tropics, 418 n.14; G. Hookham cited, 207 n.3; J.-C. Houzeau cited, 88 n.4; T.H. Huxley, note on structure of the brain in apes and humans, 535 & 535–6 n.5; Lepidoptera, variability of ocelli, 136 n.1; F. Max Müller referred to, 373 n.9; *Megalophrys*, incorrect description removed, 253 n.1; L. Meyer, Woolnerian tip results from random variability, 546 n.1; J.S. Mill's principle of association, 352 n.5; movement of human ear, passage modified, 78 nn.1–2; origin of language, 272 n.2; platysma myoides, reference omitted, 417 n.2; rattlesnakes can learn to avoid traps, 417 n.8; reindeer, horns unaffected by castration, 534 n.8; *Rhea*, like ostrich, incubates eggs, 118 n.9; sphinx moth attracted to floral wallpaper, 48 n.4, 558 n.4; talking parrots, 545 & n.2; A.R. Wallace willing to help prepare, 502 & n.1, 505–6 & 506 n.3, 508–9 & 509 nn.1–5, 512 & nn.3–4, 514–15 & 515 n.5
- *Descent*, French ed.; E. Barbier revises translation, 110 & 111 n.6, 216 & 217 n.4; sales might have been greater with more literary translation, 216 & n.2; translated by J.J. Moulinié, 110 & 111 nn.6–7
- *Descent*, German ed.; CD advises J.V. Carus he is beginning work on 2d ed., 506 & n.2; reception, 122–3 & 123 n.3, 561 & n.3; sales, 582 & 583 n.35
- *Earthworms*; A. d'Archiac cited, 280 n.4; G. King acknowledged, 77 n.2, 280 nn.2 & 4; G. Krefft acknowledged, 75 n.6, 320 n.4; published 1881, 280 n.3
- *Expression*, 54 & n.4; anger, baring of teeth, 80 & 81 n.8; anger, ruffling of feathers, 9 & 12 n.17; anger, stamping, 8 & 12 n.16; astonishment, 351 & 352 n.4; astonishment, opening of the arms, 38 & 39 n.6; attention, effects on lachrymal and salivary glands, 12 n.28; attention, when attention is concentrated we forget to breathe, 58 & n.2; A. Bain cited, 444 n.2; A. Bain, *Review of 'Darwin on expression'*, 444 & nn.1–5; birds, involuntary muscles may originally have been voluntary, 2 & 6 n.3; blind eye deviates over time, 10 & 12 n.24; blushing, 5 & 7 nn.24–5, 10, 49 & n.6, 84 & 85 n.2, 104 & 107 n.4, 114 & 115 n.3, 145 & 146 n.10, 351, 444 & n.5; W. Bowman welcomes, 109 & n.3; bristling hair associated with mental illness, 180 n.2; calves once suckled difficult to rear by hand, 7 & 11 n.3; A. de Candolle admires, 39–40 & 41 n.3, 555 & 557 n.3; caterpillars' preference for particular trees, 7 & 11 n.4; cats replicate pounding movements during suckling in later life, 38 & 39 n.3, 42; causes of gooseflesh, 309 & 310 n.8; cobras destroyed by ichneumon, 6 n.8; conservation of force, 351 & 352 n.7; contempt, expression of, 10; contraction of the iris, 8 & 11 n.7; coughing, imitation and control, 7 & 11 n.6; J. Crichton-Brown, data and photographs of inmates of West Riding Asylum, 97 n.4; crying, A. Bain approves of CD's account, 444 & n.5; CD hopes to bring out new edition, 61 & n.1; decapitated frog demonstrates reflex, 38 & 39 n.4; dilation of pupils in terror, 10 & 12 n.27; direct action of the nervous system, 444 & n.3; dogs, 'grinning', 3, 15; dogs, instinctive muscular movements, 282–3 & nn.2–3; dogs, turning in sleep, 8 & 11 n.8; Dutch translation (H. Hartogh Heijs van Zouteveen), 2 & 6 n.2; elephants shed tears when suffering, 339–40 & 340 n.1; elevation of eyebrows in surprise, 112–13 & 113 nn.1–2; expression during concentration, 350 & 352 n.2; faculties of newly hatched chickens, 5 & 7 n.28; fear causes hair to stand erect, 308; French translation (S. Pozzi and R. Benoit), 110 & 111 n.8, 211–12 & 212 nn.2–3, 216 & 217 n.3, 218 & nn.1–3, 563 & nn.2–3; frowning when focussing on distant object, 107 & 108 n.18; T. Gomperz's observations, 350–2 & 352 nn.1–7; grief, photograph demonstrating, 18 & 19 n.5; grief muscle illustrated Fra Angelico's 'Descent from the Cross', 72 n.1; A. Günther cited, 6 n.8; habitual but purposeless movement in animals, 120 n.2; habitual movements, 142 & 143 n.1; H. Hartogh Heijs van Zouteveen's notes on, 2–5 & 6–7 nn.3–29; S. Haynes's comments on, 7–11 & 11–12 nn.3–29; head-butting in anger, 4 & 6 n.27, 16–17; T.W. Higginson's notes on, 145–6 & 146 nn.5 & 7–10; C. Hinton's observations, 254–7 & 257–8 nn.1–12; holding the breath when performing delicate action, 107 & 108 n.20; Homer cited on expression of rage, 12 & 13 n.4; horses nibbling each other, 8 & 11 n.9; horses, effects of expectation, 8; T.H. Huxley cited, 230 n.3; influence of the mind on reproductive organs, 41 & n.7,

*Darwin, Charles Robert, cont.*

556 & 557 n.7; inheritance of emotional expression, 11 & 12 n.29; inherited gestures, 63 n.4, 100 n.2, 277 & n.10, 316–17 & 317 n.2, 491 n.1; Italian translation (G. Canestrini and F. Bassani), 65 n.2, 69 n.2, 559 n.2; Italian translation, C.I.F. Major unable to find a publisher, 65 & n.2, 69 & n.2, 558–9 & 559 n.2; H. Jackson comments on, 12–13 & 13 nn.2–7; jumping for joy, 180 n.3; kissing, 16; laughter, 6 n.10, 8 & 12 n.15, 9, 16; laughter predates speech, 24 & n.2; likelihood of descent from single parent-stock, 311 & 312 n.3; J. Lister cited, 321 n.4; S.W. Moore admires, 434–5; motion of man playing billiards, 145 & 146 n.7; movement of the ears, 312 n.5; H. Müller admires, 220–1; J. Murray pays CD £1050 for first 7000 copies, 68 & nn.2–3; J. Murray prepares schedule of expenses, 54 & n.3; nerve-force, liberation of, 8 & 12 n.12; new edition, CD would make heavy corrections, 402–3; new edition, J. Murray as yet unable to begin, 401; oxen stamping, 16 & 17 n.2; J. Paget welcomes, 109 & n.3; pain, cries of, 8 & 12 n.11; perspiration, causes of, 8 & 12 n.14; pigs, may draw back ears when fighting, 106; platysma myoides, 415 & 417 n.2; pouting by children is universal, 107 & 108 n.19; presentations, 21, 39 & 41 n.3, 87–8 & 88 n.1, 97 & n.3, 99 & 100 n.1, 108 & 109 n.2, 118–19 & 119 n.2, 138 & 139 n.6, 341 & 342 n.2, 407 & n.6, 555 & 557 n.3, 560 & n.2; published November 1872, 209 & n.4; raising of hair now useless in humans, 12 n.18; rattlesnake, purpose of rattle, 9 & 12 n.20, 254, 255 & 257 n.2; reception: in great demand in San Francisco, 91 & n.2; H. Reeks's notes on, 104–7 & 107–8 nn.1–20; reflex actions analogous to instincts, 152 & 155 n.4; reflex sneezing by infant taking first breath, 107 & 108 n.15; relation of brain and senses, 181 & 182 n.3; reprint (2000 copies), 68 & n.2, 109 & n.6; resignation, expression of, 10 & 12 n.25; responses to offensive odours, 510 & 511–12 nn.2–3; reversion, 105 & 108 n.9; reviews, 108 & 109 n.3, 587–8 & 588–9 nn.1–15; reviews, *Academy* (A. Dohrn), 241 & nn.2–3, 246 & 248 n.2; reviews, *Edinburgh Review* [T.S. Baynes], 193 & 193–4 nn.1–3, 196 & 197 n.2, 197, 242 & 243 nn.2–3, 245 & n.5, 246 & 248 n.3, 444 & n.6; Russian translation (V.O. Kovalevsky), 220 & n.8; C. St John cited, 283 n.4; sales, xvii, 37 & 38 n.10, 38 & 39 n.7, 68 & n.2, 402–3 & 403 n.3; sales stagnate, 408, 409; savages weep copiously for slight causes, 9 n.22, 145 & 146 n.8; scratching the head when puzzled, 105 & 108 n.8; secretion of tears, 230 & n.3; sense of taste, V. Salzmann thinks CD has underestimated importance of, 509–11

& 511–12 nn.1–6; W. Shakespeare cited, 5 & 7 n.25; sheep may stamp the ground but do not fight with forelegs, 207 & n.4; shelldrakes 'dancing', 14–15 & 15 n.2, 283 n.4; smacking of lips, 107 & 108 n.17; sneezing, 8 & 11 n.6; H. Spencer's theory of correlation of forces, 8 & 12 n.13; J.B. von Spix and K. von Martius cited, 104 & 107 n.4; supplication, 4 & 6nn.12–16; tail-wagging in dogs, 167 n.2; tears may be a sign of happiness, 1 & n.2; toads, European words for express swelling, 2 & 6 nn.5–7, 211 & 212 n.4, 563 & n.4; trembling, 8 & 11 n.10, 107 & 108 n.16, 113 & n.7, 116, 351 & 352 nn.6–7; voluntary movement of the scalp, 9; H. Wedgwood cited, 211 & 212 n.4, 563 & n.4; wild dogs, other than coyote, do not bark, 84 & 85 n.3; young animals push against mothers to stimulate milk flow, 104 & 107 n.2

— *Expression*, 2d ed., 417 n.12; astonishment, 352 n.4 & 7; J.V. Carus cited, 58 n.3; F. Darwin edits, 45 n.1, 61 n.1; J.B. Dunbar-Brander cited, 283 n.6; H.F.H. Elliot cited, 120–1 n.2; W.W. Gull cited, 14 n.2; S. Haynes cited, 11 n.3, 12 n.26; inherited habit when dozing in a chair, 491 n.1; H. Jackson cited, 13 n.2; H.P. Lee, observations of expressions used by Japanese and Chinese, 45 n.1.; C.F. Nasse cited, 58 n.3; pigs draw back ears when fighting, 116 n.5; H. Reeks cited, 108 n.18; toad, word for expresses swelling in several European languages, 218 n.1; *Ursus americanus* shades eyes when focussing on distant object, 108 n.18; voluntary vomiting, 23 n.2; A.R. Wallace's doubts CD's account of reflex action of frogs, 39 n.4

— *Expression*, German ed.; J.V. Carus translated, 298 & 299 n.3; new edition in preparation, 58 & n.1, 61 & n.1; sales, 582 & 583 n.35

— *Fossil Cirripedia*; CD spent nine years preparing, 234 & 235 n.11

— *Insectivorous plants*; absorption by glandular hairs, 27 n.2, 57 n.7, 440 n.4, 468 n.2, 472 n.9; artificial gastric juice prepared by F. Darwin, 429 n.3; T. Brunton's experiments on digestion of chlorophyll by animals, 514 n.4; J.S. Burdon Sanderson cited, 263 n.3, 326 n.6, 503 n.2; W.M. Canby cited, 32 n.2, 61 n.5, 183 n.2; CD expects small sales, 403 & n.5; CD will send to M. Treat, 325 & n.4; CD writes and corrects, 581 & 582 n.1; *Dionaea*, 38 n.9; *Dionaea*, glands both secrete and absorb, 472 n.9; *Dionaea*, size of insects captured by, 183 n.2, 208 n.2; *Drosera*, effect of acids, 369 n.4; *Drosera*, effect of belladonna, 263 n.3; *Drosera*, effect of benzoic acid, 424 n.5; *Drosera*, effect of carbonate of ammonia, 466 n.1; *Drosera*, effect of carbonate of potash, 33 n.9; *Drosera*, effect of chemicals on leaves, 366 n.2; *Drosera*, effect of de-

Weir, presidential address, West Kent Natural History Society, 227 & 228 n.2; *West Riding Lunatic Asylum Medical Reports*, 368 & nn.2–3

SCIENTIFIC VIEWS: children born circumcised may demonstrate inheritance with reversion, 58–9 & 59 nn.2–3; in Cirripedia, fertilisation of two hermaphrodites is possible, 392 & 394 n.7; difficult to distinguish influence of external conditions and natural selection, 34–5 & 35 nn.1–3; doctrine of pangenesis will finally prevail, 241; domestic apples, reversion to crab state is exceptional, 420; embedded caudal vertebrae of *Macacus inornatus* analogous to human coccyx, 134 n.2; F. Galton's proposed register of superior and inferior persons is impractical, 24–5, 27; general law that organisms occasionally intercross, to their benefit, 391; homing instincts of animals, 123–4 & 124 nn.2 & 4; inherited instinct, 69–70 & 71 nn.4–5, 151–5 & 155 nn.2–10; neither mother's temporary injury nor emotion can affect offspring, 49 & n.5; pangenesis may explain inherited characteristics, 49 & n.5; rarity is a precursor of extinction, 471 & 472 n.13; reflex actions analogous to instincts, 152 & 155 n.4; role of elasticity in movement of plants, 37 & n.7; since men are descended from lower animals, their cries are origin of language, 276; unable to accept J. Paget's views on growth of bodily organs through excretion, 241 & 242 n.3

SCIENTIFIC WORK: absorption by plants' glandular hairs, 26–7 & 27 n.2, 27 & 28 n.8, 30 & 31 nn.22–6, 57 & n.7, 440 & n.4, 471 & 472 n.9; *Acacia* and *Eucalyptus*, J.D. Hooker identifies species, 479, 480–1 & 481 nn.2 & 12–13, 486; *Acacia*, bloom of leaves and fruit, 470 & 471 n.3; *Acacia*, structure and movement of leaves, 468 & n.4, 469 & n.1, 470–1 & 471 n.2, 479 & 481 n.3, 485 & 486 n.5, 493 & 494 n.10; angle of flowerheads, 475 & 476 n.2; butterflies, attraction to bright colours, 48 n.4, 48–9 & 49 n.4, 558 n.4; butterflies, sexual differences in ocelli, 135–6 & 136 n.1, 137 & n.1, 140 & 141 n.2; *Cassia*, effect of water on leaflets, 534, 536; *Cassia*, sleep movements, 534 &

535 n.1; Cirripedia, spent nine years preparing works on, 234 & 235 n.11; *Cistus*, irritability of stamens, 445; *Climbing plants*, 2d ed., 121 n.3, 313 & 314 n.4, 403 & n.5, 581 & 582 n.1; collection of nectar from undersides of leaves, 316 & nn.3–4; *Coral reefs*, too busy to correct proofs of reprint, 543 & n.5; *Corydalis*, self sterility, 275 & 276 n.5; cross- and self fertilisation, 73 & 73–4 nn.1–2, 122 & n.3, 217 & n.1, 221 & 223 n.5, 223, 259, 264, 401–2 & 402 n.7, 581 & 582 n.2; *Descent*, 2d ed. ('an awful job'), xxi, 515 n.4, 543 n.5, 535 & 535–6 n.5, 547 & 548 n.5, 581 & 583 n.3; *Descent*, 2d ed., work to be delegated, xxi–xxii, 508–9 & 509 nn.1–5; *Desmodium*, movement of leaves, 445 & 446 nn.8 & 10, 455 & 456 n.2, 462 & 463 nn.2–4, 463 & n.1, 464 & n.5, 467 n.2, 470 & 472 n.4, 474 & 475 n.8, 493; 548 & 549 n.2; *Dionaea*, effect of changes of temperature, 456 & 456–7 nn.2–3; *Dionaea*, size of insects captured, 182 & 183 n.2, 208 & nn.1–2; *Drosera* 'a never-ending job', 315 & n.5; *Drosera*, absorption by glandular hairs, 57 & n.7, 471 & 472 n.9; *Drosera*, acid secreted by, 395–6 & 396–7 nn.1–8, 439–40 & 440 n.2; *Drosera*, asks J.S. Burdon Sanderson to comment on results, 261–2 & 262 n.1, 262–3 & 263 nn.2–8; *Drosera*, awaits new plants, 122 & n.3; *Drosera*, could spend his life researching, 315 & n.5; *Drosera*, digestive processes, 263 & n.8, 267, 289, 294–5 & 295 n.1, 295 & n.2, 296 & n.2, 297 & n.2, 301, 326, 378, 382, 384 & n.2, 385, 439–40 & 440 n.2, 422 & 423 nn.1–2, 449–50 & 450 nn.1–3, 452–3 & 453 n.1, 455 & n.2, 485 & 486 n.2; *Drosera*, discovers digestive system, 325 & n.3, 330 n.4, 354 & 355 n.3, 378, 382, 384 & n.2, 385, 464 & n.4, 473 & 475 n.5; *Drosera*, effects of poisonous plants, 147 & n.2, 147–8; *Drosera*, experiments take precedence over J.D. Hooker's work on *Nepenthes*, 479 & 481 nn.7 & 9; *Drosera*, experiments with albumen, 289, 301 & 302 n.2, 529 & nn.2–4; *Drosera*, experiments with alkalis, 366 & 367 n.1; *Drosera*, experiments with alkaloids, 262 & 263 n.6; *Drosera*, experiments with animal substances, 380 & 381 nn.3 & 5, 397 n.6, 380 & 381 n.6, 381 & n.3, 384 & n.2, 396 & 397 n.5, 398 & n.1, 422 & 423 n.4, 429 & n.2, 435 & n.3, 514 & n.3, 453 & nn.2–5, 529 & nn.3–4; *Drosera*, experiments with atropine, 302 & n.4; *Drosera*, experiments with belladonna, 262 & 263 n.3, 302 & n.4; *Drosera*, experiments with benzoic acid, 424 & n.5; *Drosera*, experiments with bullock's blood, 463 & 464 n.3; *Drosera*, experiments with cabbage leaves, 301; *Drosera*, experiments with carbolic acid, 263; *Drosera*, experiments with carbonate of ammonia, 26–7 & 27 n.2, 289 & n.3,

466 n.1, 485 & 486 n.3; *Drosera*, experiments with carbonate of soda followed by hydrochloric acid, 354 & 355 n.3; *Drosera*, experiments with carbonate of soda, 354 & 355 n.3; *Drosera*, experiments with chloride of gold, 396 & 397 n.7, 397; *Drosera*, experiments with chlorophyll, 440 & 441 n.2, 529 & n.4; *Drosera*, experiments with chondrin, 529 & nn.2–4; *Drosera*, experiments with colchicine, curare and veratrine, 262–3 & 263 n.6; *Drosera*, experiments with decoctions of tea, green peas, cabbage and grass leaves, 429 n.4; *Drosera*, experiments with gelatine, 289, 301 & 302 n.2, 529 & nn.2–4; *Drosera*, experiments with glycerine, 263 & n.7, 268; *Drosera*, experiments with heat, 301–2 & 302 n.5, 326 & n.6; *Drosera*, experiments with hydriodic acid, 395 & n.2; *Drosera*, experiments with hydrochloric acid and albumen, 370; *Drosera*, experiments with phosphate of ammonia, 302 & n.6, 379 & n.5; *Drosera*, experiments with poisons, 262 & 263 n.5, 267–8; *Drosera*, experiments with raw meat, 335 & 336 n.9, 379, 486; *Drosera*, experiments with sodium and potassium, 262 & 263 n.2; *Drosera*, experiments with sodium carbonate, 302 & n.5; *Drosera*, experiments with syntonin, legumin and chlorophyll, 435–6 nn.3–6; *Drosera*, E. Frankland assists in attempts to identify acid secreted by, 289 & 289–90 nn.1–4, 395–6 & 396–7 nn.1–8, 397 & 398 nn.2–3, 422 & 423 nn.1–2; *Drosera*, may have found nerves of, 19–20 & 20 n.5; *Drosera*, physiological properties, 313 & 314 n.4; *Drosera*, resumes work on, 122 & n.3, 273, 274; *Drosera*, size of insects captured by, 303–4 & 305 n.3, 325 & n.1; *Drosera*, tests with litmus paper, 450 & n.3, 452–3 & 453 n.1, 455 & n.2; *Drosera*, transmission of motor impulse, 426–7 & 427 n.3; *Drosophyllum*, finds to be a primordial form that may have given birth to *Drosera* and *Dionaea*, 56–7 & 57 n.4; *Drosophyllum*, glands capable of both secretion and absorption but differ from *Drosera* and *Dionaea*, 468 & n.2, 471 & 472 n.9; *Drosophyllum*, obtains plant from Dublin through J.D. Hooker, 27 & n.3, 28, 32, 35–6, 37, 38 & n.2, 50 & n.1, 56 & 57 n.2; *Drosophyllum*, plans new experiments and seeks to borrow plant from Kew, 471 & 472 n.8; earthworms, asks G. Kreffit for observations in Australia, 74 & 75 n.6, 76, 290; earthworms, information from G. King, 76 & 77 n.1, 279 & 280 n.2; effect of water on leaves, 321 & n.3, 322, 324, 328, 331 & 332 n.6, 332 & 333 n.4, 419 & n.6, 520 & n.2, 547 & 548 n.6, 548 & 549 nn.2–3; effect of water on leaves, angle of leaves a protection against water damage, 449 & n.2, 450–1 & 451 nn.1–3, 451–2 & 452 n.2, 470 &

*Darwin, Charles Robert, cont.*

472 n.6; effects of watering during sunshine, 338 & nn.1–2; *Eschscholzia*, cross- and self-fertilisation, 229, 472 n.14; *Eucalyptus*, 485 & 486 n.5, 493 & n.3, 520 & n.3; *Eucalyptus*, bloom of leaves and fruit, 470 & 471 n.3; *Eucalyptus*, whether dichogamous, 360 & 361 n.13, 363, 488 n.2; evil effects of interbreeding, 202 & n.1, 202 & n.2, 209 n.2, 313 & 314 n.4, 225 n.8, 228 n.6, 581 & 582 n.2; fertilisation of papilionaceous flowers, 198 & 199 n.3, 321 & n.2; fertilisation, experiments on quantity of pollen, 289 n.1; fertility of plants, 225 & n.8; formic acid, effect on frog spawn, 172 & 173 n.3, 176; formic acid, effect on germination of seeds, 82 & 83 n.2, 119 & 120 n.1, 176, 178 & n.3, 299; *Helianthemum*, irritability of stamens, 445; homing instinct, 154–5 & 155 n.10; humble-bees, routes of, 227 & 228 n.4; insectivorous plants, xv–xvi, 313 & 314 n.4, 515 & n.4; insectivorous plants, digestion of gelatine, chondrin and chlorophyll, 527 & n.1, 529 & nn.2–5; insectivorous plants, does not want to interrupt work on to revise *Descent*, 508 & 509 n.2; insectivorous plants, glands both secrete and absorb, 471 & 472 n.9; insectivorous plants, resumes experiments, 20 n.3; intercrossing, benefits of, 391–2 & 394 nn.5–6; *Ipomoea purpurea*, effect of self-fertilisation on fertility, 471 & 472 n.14; *Lathyrus nissolia*, 463 & 463–4 n.2, 464 & 465 n.7, 471 & 472 n.11, 469 & 470 n.8, 485 & 486 n.5, 488, 520 & n.4; Leguminosae, spontaneous movement, 485; *Mahonia*, experiments with, 341 n.3; microscopes, 266 & 266–7 nn.2–9, 267 & n.2, 445 & 445–6 nn.2–7, 448 & 448–9 nn.4–5; *Mimosa*, movement, 335 & 336 n.10, 340 & 341 n.2, 384–5 & 385 n.3, 439 n.1, 457, 490 & 491 n.2, 492, 493 & 494 n.4, 519–20 & nn.1–2; movement in plants, 457, 464 & n.3; *Nepenthes*, chemical composition of fluid, 460 n.2; *Neptunia oleracea*, seeks plant, 455 & 456 n.4, 457, 493 & 494 n.6; notes on microscopy, 448 & 449 n.7; orders chemicals for experiments, 366 & n.2, 367 & n.2, 369 & nn.2–5, 394–5 & 395 n.2, 398 & n.2, 439 n.2, 440 n.3; *Oxalis sensitiva*, movement of leaves, 57 & n.5, 333 & n.7, 339 n.2; phyllotaxy, 21 & n.2; physiology of plants, 406, 407; Queries on expression, L. Felméri replies to, 22 & n.3; Queries on expression, R. Swinhoe sends further observations, 138–9 & 139 nn.1–10; Queries on expression, J.P.M. Weale replies to, 18–19 & 19 nn.3 & 7; *Robinia pseudacacia*, effect of water on leaves, 548 & 549 n.3; *Utricularia*, 491 & n.3; vegetable physiology, 227 & 228 n.6; *Viola*, 289 n.5; wind-blown pollen, 278 & 279 nn.6–7, 280 & n.4; writes *Insec-*

*tivorous plants*, 367 n.1, 403 & n.5, 543 n.5, 581 & 582 n.1

SUPPORT FOR THEORIES: A. Agassiz, 89 & n.4; G. Benthams, 264 & n.7, 270 & 271 nn.3–5; A. de Candolle, 89 & n.4, 96 & 97 n.9; J.V. Carus, 210 & 211 n.4; O. Caspari, 122–3, 561; E. de Claparède, 96 & 97 n.9; C.F. Claus, 89 & n.4, 96 & 97 n.7; F.J. Cohn, 89 & n.4, 96 & 97 n.8; E.D. Cope, 89 & n.4; V. Czerny, 75 & n.1; V. Dabney, 454; L. Dapsy, 240 & 241 nn.4–5; F. Delpino, 180–1, 562; A. Dohrn, 241 & n.3; J. Downing, 457, 466; C.G. Ehrenberg, 551 & n.2; J. Farr, 281 & n.2; L. Felméri, 21–2; J. Fiske, 472–3 & 473 nn.2 & 5; C. Gegenbaur, 89 & n.4, 96 & 97 n.12; T.N. Gill, 377 & n.4; F.B. Goodacre, 65–6; A. Gray, 96; E. Haeckel, 86, 89 & n.4, 96 & n.6, 443, 559, 574; G. Hookham, 207 n.3; V.O. Kovalevsky, 361–2 & 362 n.2, 568 & n.2; G. Krefft, 291–2 & 294 n.4, 293, 317 & 319 n.1; B.T. Lowne, 241–2 & 242 n.2; E. Meitzen, 45–6 & 46 n.1; A. Michelet, 118–19, 560; S.W. Moore, 434–5; E.S. Morse, 377 & n.4; A. Moschkau, 495, 542, 575–6, 580; H. Müller, 220–1; Polish positivists, 214 & n.5, 564 & n.5; A. de Quatrefages, 282 & n.2; W.W. Reade, 269 & n.1; H. Reeks, 104–7 & 107 n.1; C.V. Riley, 89 & n.4; J. Sachs, 89 & n.4; G. de Saporta, 89 & n.4, 96 & 97 n.10; M.J. Schultze, 89 & n.4; R. Smith, 88–9 & 89 n.2; R. Strachey, 36 & n.7, 37 & n.3; Utrecht students, xxv, 129–30 & 130 n.3

TRIPS AND VISITS: London (March–April), xxi, 111 & 112 n.4, 119 & 120 n.1, 122 & n.4, 129 & n.2, 130 & 131 n.3, 132, 136 & 137 n.2, 137, 140 & 141 n.1, 143 & n.1, 144, 148, 149, 158 & n.2, 161 & n.3, 164 n.3, 164 & 165 n.3, 165 & nn.3 & 6, 167, 168, 169, 171, 182 n.4, 215 & nn.3 & 7, 253 & n.2; Isle of Wight (1868), 124 & n.3; London (March 1873), 82–3 & 83 n.3, 582 & 583 n.8; Abinger Hall (T.H. and K.E. Farrer), 313 & n.2, 315 & n.2, 315 & 316 n.5, 321 & n.4, 322 & n.3, 323 & n.5, 331 & 332 n.7, 582 & 583 n.25; Freshwater, Isle of Wight (1868), 335 & n.5; Leith Hill Place, Surrey (J. and C.S. Wedgwood), 245 & n.4, 249, 250, 582 & 583 n.21; London (November), 471 & 472 n.10, 484 & n.4, 490 & 491 n.1, 493 & 494 n.5, 494 & nn.1–2, 494–5 & 495 n.3, 503 & nn.1 & 4, 503, 506, 582 & 583 n.31; Southampton (W.E. Darwin), 313 & n.2, 315 & n.2, 320 & 321 n.3, 321, 328 & n.1, 329, 334, 337, 340 & 341 n.1, 582 & 583 n.25; Torquay (1861), 131 & n.2; Darwin, Elizabeth, 158 & n.5, 583 n.28; V.O. Kovalevsky sends regards to, 220; Darwin, Emma: H. Airy sends compliments to, 21; S. Butler sends regards to, 173; CD very unwell, with memory loss, 355 n.3, 356 n.2, 363 n.2, 364

- n.3; J. Chapman sends respects to, 298; F.S.B.F. de Chaumont sends regards to, 59; M.D. Conway inquires after, 372; A.J. Cupples sends regards to, 197, 243 & 244 n.12; E.A. Darwin informs of death of M.E. Lyell, 184 & n.3; F. Darwin stays at Pantludw, 424 n.1; F. Darwin's proposal to become CD's secretary, 389; G.H. Darwin consults A. Clark, 428 n.2; G.H. Darwin, encourages CD to ask to revise *Descent*, 515; G.H. Darwin forced to give up plans to practise as a barrister, 364 n.5; G.H. Darwin returns home from France, 158 nn.2–3; Darwins go back to taking *The Times* instead of the *Daily News*, 582 & 583 n.23; diary, 34 nn.3–4, 98 nn.1 & 3–4, 165 nn.3 & 6, 168 n.1, 169 n.1, 187 n.9, 274 n.3, 279 n.5, 302 n.2, 311 n.3, 315 n.3, 349 n.7, 355 n.3, 356 n.2, 365 n.4, 377 n.5, 583 nn.4, 6, 8–10, 12–13, 16–20, 24, 26–7, 30 & 33; A. Dohrn sends regards to, 56, 247; Down Lodge, F. Darwin will be able to rent, xvii, 390 n.4, 426 n.1; W.D. Fox inquires after, 342; T.W. Higginson sends regards to, 145; insists on spending a month in London, 82–3 & 83 n.3; V.O. Kovalevsky sends regards to, 220; luxurious journey from Southampton to Orpington, 341 n.1; K.M. Lyell suggests subscription for T.H. Huxley, 161 n.2; Naples Zoological Station, encourages CD to increase his subscription, 507 & n.3; reading room at Down school, dispute with G.S. Ffinden, xxiii, 517 & nn.1–3, 523–4 & 524 n.2, 526 n.1, 549 & nn.1–2; reads T.W. Higginson's *Life with a black regiment* to CD, 95; subscription to assist T.H. Huxley, 590; suffers from influenza, 98 & 99 n.5, 111; translates Italian for CD, 64; trip to London, 131 n.3, 137 n.2; J. Tyndall sends regards to, 182
- Darwin, Erasmus Alvey, 428 & n.5; CD consults on F. Darwin's plans to abandon medicine, 389–90 & 390 n.1, 403 & n.2; F. Darwin lives with in London, 370 & n.6, 403 n.4, 423 & 424 n.3; impressed with G.H. Darwin's article on beneficial restrictions to liberty of marriage, 314 & nn.2–3; stays with T.H. and K.E. Farrer, 403 & n.4; subscribes to assist T.H. Huxley, 168 & n.5, 168 & 169 n.4, 189 n.4, 591; sudden death of M.E. Lyell, 184 & n.3; unwell, 448 & 449 n.6
- Darwin, Francis, 134 n.1; advises CD on dosage of Fowler's Solution, 98 & n.3; advises CD on use of scientific equipment, 1–2 & 2 n.1; assists CD in ordering chemicals, 369 n.5; assists J.S. Burdon Sanderson with experiments on *Dionaea*, 380 & n.2; assists CD with experiments by exposing frog spawn to formic acid, 172 & 173 nn.2–3, 176, 178 & n.3; CD asks to observe whether stamens of *Helianthemum* or *Cistus* are irritable, 445; CD consults on purchase of immersion lens, 475 n.7; CD pays £5 for loan of his microscope, 267 & n.2; CD seeks book on affinity of salts to alkalis, 366 & 367 n.1; CD would pay £200 p.a. as secretary with allowance of £500, 390; *Desmodium*, examines at Kew, 462 & 463 n.1, 463 & n.1, 464 & 465 n.6, 467 & nn.2–8, 468 & n.5, 469 & 470 n.9, 474 & 475 n.10, 479 & 481 n.6; Down Lodge, lease on, xvii, 426 & nn.1–2, 438 & 439 n.9, 526 n.4; *Drosera*, assists CD in trying to identify presence of albumin, 147 & n.2, 147–8; *Drosera*, carries out experiments feeding plants bread and meat, 330 & n.4, 335 & 336 n.9; *Drosera*, observes J.S. Burdon Sanderson's electrical experiments, 423–4 & 424 n.4, 426; *Drosophyllum*, asks J.D. Hooker to conduct experiments for CD, 445 & 446 n.9, 470 n.5; edited 2d edition of *Expression*, 45 n.1, 61 n.1, 108 n.18, 120 n.2; engaged to Amy Ruck, 389 & 390 n.1, 403 & n.3, 428 n.5; estimate of CD's character, 234 & 235 n.9; Hartnack microscope, 267 & n.2, 445 & 445–6 nn.2–7, 448 & n.4; helps CD obtain substances for experiments on *Drosera*, 384 & n.2; J.D. Hooker invites to accompany CD to Kew, 492 & n.2; J.D. Hooker invites to Royal Society dinner, 521 & n.9; E.E. Klein, studies histology with and seeks advice on scientific equipment, 1 & 2 n.1, 266 & nn.2–3, 370 n.6; *Lathyrus*, finds in Wales and examines nectar holes, xvii, 329–30 & 330 n.2, 334, 348 & nn.2–4; lives with E.A. Darwin in London, 370 & n.6, 403 n.4, 423 & 424 n.3; plans to give up medicine and become CD's secretary, xv, 385 & 386 n.8, 389–90 & 390 n.1, 403 & n.2; prepares artificial gastric juice for CD's experiments, 429 n.3; reads A. Bain's *Review of 'Darwin on expression'*, 444 n.1; sets up worm garden with A. Ruck, xvii, 330, 336 nn.8 & 11; stays with Rucks at Pantludw, Wales, 423 & 424 n.1, 428 & n.5; studies medicine at St George's Hospital, 266, 336 n.9, 380 n.2, 384 & n.4, 389 & 390 n.2, 403 & n.4; trip to US, met J. Fiske, 472 & 473 n.1; trip to US, met H.A. Head, 94 & 95 n.7; trip to US, met T.W. Higginson, 145 & 146 n.6; trip to US, visited J.D. Hague in San Francisco, 91 & n.3, 158 & 159 n.4
- Darwin, George Howard, 2 & n.2, 13 n.7, 98 & n.2; attends séance, 517–18 & 518–19 nn.2–8; 'Beneficial restrictions to liberty of marriage', *Contemporary Review*, 314 & nn.2–3, 356 & 357 n.2; 'Commodities versus labour', *Contemporary Review*, 449 & n.3; corrects concentration of chemical solution used by CD in experiments, 281–2 & 282 n.1; CD advises to return home from Cannes for his health, 111 & 112 n.2, 157–8 & 158 nn.2–3; CD asks optimum angle for a leaf to let vertical rain

Clark, xxii, 427–8 & 428 n.2, 438 & n.4; health, consults P. Frank about stomach problems, 111 & 112 n.3; health, recuperates from illness in Cannes, 53 & n.1, 112 n.3, 111 & 112 n.2, 157–8 & 158 nn.2–3, 248 n.4; health, too poor for mathematics so occupies himself with small articles, xxii, 465 & 466 n.2; health, ill-health forces to give up the bar, 364 & n.5, 428 & n.3; law of distribution and natural selection, 404–5 & 405 n.2; A. Mostyn Owen has heard of success in Cambridge trips, 237 & n.7; Naples Zoological Station, CD plans appeal to scientific community, 503–4 & 504 nn.2–6; *Nature*, clarification of CD’s letter on rudimentary organs, 433 & n.2, 434 & n.2, 436–7 & 437 n.4, 437; *Nature*, note on humans’ tendency to walk in a circle to the left when lost, 205 & 206 n.4; returns to Trinity College, Cambridge, 414 & 415 n.12, 428 n.4, 433 & n.3, 434 & n.4, 437–8 & 438 n.2, 507 & n.2; asks J. Tyndall to call on CD, 164 & 165 n.2; trip to US, met J. Fiske, 472 & 473 n.1; trip to US, met H.A. Head, 94 & 95 n.7; trip to US, met T.W. Higginson, 145 & 146 n.6; trip to US, visited J.D. Hague in California, 91 & n.3, 158 & 159 n.4

Darwin, Henrietta Emma. *See* Litchfield, Henrietta Emma

Darwin, Horace, 424 n.1, 426 n.1, 524 n.1, 526 nn.1 & 4; difficulty in obtaining *Coral reefs* prompts CD to suggest reprint, 542–3 & 543 nn.3–5; G.H. Darwin finds tolerably well, 438 & n.3; joins G.H. Darwin in Cannes, 53 & n.1, 111 & 112 n.2, 248 n.4; nicknamed Jemmy, 337 & 338 n.6; nicknamed Jim, 1 & 2 n.1, 330 & n.5; sends good account of himself, 466 & n.6; takes a *Dionaea* to Cambridge for A.G. Dew-Smith to observe effect of changes of temperature, 456 & 456–7 nn.2–3; travels abroad for his health, xxii, 112 n.3

Darwin, Leonard: CD will ask to assist in mea-

suring angles, 451 & n.4; G.H. Darwin meets at Greenwich, 433 & n.4; joins expedition to observe transit of Venus, 414 & 415 n.12, 433 n.4; in Royal Engineers, 492 & 493 n.6; visits J.D. Hooker, 464 & 465 n.6

- Darwin, Robert Waring: believed in possibility of spontaneous recovery for cases like CD’s, 111 & 112 n.5; character and fortune, 235 & n.12; A. Mostyn-Owen hangs CD’s portrait alongside his, 236 & 237 n.2
- Darwin, Susannah: died when CD was eight, 234 & 235 n.2
- Darwin, William Erasmus: CD and E. Darwin visit, 313 & n.2, 315 & n.2, 320 & 321 n.3, 321, 328 & n.1, 340 & 341 n.1. 582 & 583 n.2.5; estimates that each of CD’s sons would have £30,000, 389; experiments with *Mimosa* for CD, 340 & 341 n.2, 349–50, 358; observed *Lathyrus* on Isle of Wight with CD, 335 & n.5, 337 & 338 n.2; visited Naples Zoological Station, 246 & 248 n.4
- Datura stramonium*, 454 & 455 n.4; alkaloid poisons, 147 & n.2
- Davidson, Thomas: CD thanks for catalogue of Cretaceous fossils and regrets he cannot visit Brighton, 164 & n.1
- Dawkins, William Boyd: CD testifies to fitness for Woodwardian chair of geology, 63–4 & 64 n.1, 125 n.2; tells H.H. Howorth that CD is an invalid, 552 & 553 n.5
- Dean & Son: *Dogs: their points, whims, instincts and peculiarities*, 70 & 71 n.8
- De la Rue, Warren: Liebig memorial appeal, 227 & n.4
- Delano, Columbus, 327 & 327–8 n.2
- Dell’Oro, Isidoro: CD thanks for article on silkworm cultivation, 199–200 & 200 nn.1–2
- Delpino, Federico: admires H. Müller’s *Befruchtung der Blumen* with reservations about methodology, 213 & n.3, 259 & 260 n.9, 264, 565–6 & 566 n.9; anemophilous plants, 278 & 279 n.3; G. Bentham criticises classification of Artemisiaceae, 258–9 & 260 n.8, 565 & 566 n.8; CD admires work on anemophily, 264 & n.8; CD seeks information on cultivation of *Lathyrus* in Italy, 198 & 199 n.3; Italian experience of intercrossing in *Lathyrus* and *Pisum sativum*, xvi, 258–9 & 259 nn.2–7, 264, 564–6 & 566 nn.2–7; leaves voyage of *Garibaldi* in Rio, 180–1 & 181 n.2, 198 & 199 n.1, 562 & n.2; sends CD pamphlets on Tettigometridae, 181 & n.3, 198 & 199 n.2, 562 & n.3
- Desborough, Edward Brandram: supports reading room at Down school, 525 & 526 n.5
- Desborough, Mary: supports reading room at Down school, 525 & 526 n.5

- Desmodium*: F. Darwin examines at Kew, 459, 462 & 463 nn.1–4, 464 & 465 n.6, 467 & nn.2–8, 468 & n.5; G. Rollisson supplies CD with plants, 455 & 456 n.2, 470 & 472 n.4; *D. gyrans* (*Codariocalyx motorius*), movement of leaflets, 385 & 386 n.7, 445 & 445 nn.8 & 10, 467 & n.3, 474 & 475 n.8, 479 & 481 n.6; *D. gyrans*, effect of water on leaves, 548 & 549 n.2; *D. gyroides*, leaflets, 467 & nn.5–6
- Deutsches Archiv für die Physiologie*: J.F. Meckel, editor, 58 & n.3
- Devonshire, duke of. *See* Cavendish, William, 7th duke of Devonshire
- Dew-Smith, Albert George: CD sends *Dionaea* to observe effect of changes of temperature, 456 & 456–7 nn.2–3; Naples Zoological Station's financial difficulties, 495 & 496 n.2, 505 & n.4, 531 & 532 n.9, 579 & n.6
- Dianthus*: fertilisation, 223
- Dacey, Albert Venn, 276 & 277 n.1; CD discusses reticence about religion with, 465 & 466 n.4; discusses J.S. Mill with R.B. Litchfield at Down, 461 & 462 n.4
- Dickens, Charles, 167 n.4; mastery of style achieved by many revisions, 215 & n.5
- Diez, Friedrich Christian: etymology of European words for toad, 2 & 6 n.6
- Digitalis*: fertilisation, 223
- Dilke, Charles Wentworth, 108 n.13
- Dinoceras*: whether a true ungulate, 225
- Dinocerata*, 220 & n.10
- Dionaea muscipula*: J.S. Burdon Sanderson discovers electrical currents in blade and footstalk, 327 n.7, 333–4 & 334 nn.4 & 7, 354, 369–70 & 370 nn.2 & 4, 379 & n.2, 424, 456 & 457 n.4; W.M. Canby's observations, 60–1 & 61 n.2, 77 & nn.1–3; W.M. Canby and A. Gray observe in Wilmington, 182–3 & 183 n.1; CD examines leaves sent by W.M. Canby, 208 & n.1; CD receives from Kew, 37 & 38 n.9, 270 & 271 n.2; CD regards as the most wonderful plant in the world, 77; CD studies physiological properties, 301–2 & 302 nn.2–6, 313 & 314 n.4, 485; CD's observations published in *Insectivorous plants*, 38 n.9; F. Darwin assists J.S. Burdon Sanderson with experiments, 380 & n.2, 381 & n.4; effect of changes of temperature, 456 & 456–7 nn.2–3; secreting glands also absorb, 471 & 472 n.9; size of insects captured, 182 & 183 n.2, 208 & nn.1–2; M. Treat hopes to examine in North Carolina, 304 & 305 n.8
- Diprotodon*, 293 & 294 n.7; G. Krefft seeks to reconstruct, 482 & 483 n.8
- Dipsacaceae: leaf arrangement, 410 & 415 n.5, 412
- Dipsacus*. *See* teasel
- Disraeli, Benjamin: lord rector of Glasgow University, 507 & n.1
- Dixon, Henry Hall, 533 & 534 n.5
- dodo (*Raphus cucullatus*): extinction, 88 & n.3
- Doedes, Nicolaas Dirk: CD explains grounds for believing in existence of God, xxii–xxiii, 142, 149 & 150 n.2, 159–60; CD sends photographs to, 134; sends CD photograph of himself and J.C. Costerus, *frontispiece*, 141; Utrecht students' admiration for CD, xxv, 129–30 & 130 n.3
- dogs: CD believes barking to be an acquired instinct, 84 & 85 n.3; grinning, 15, 255 & 257 n.5; hairless dogs of Nicaragua, 312 & 313 n.2; homing instinct, 83–4 & nn.2–3, 128; imitate action of swimming even when carried above water, 120 & 120–1 n.2; inherited antipathy to butchers, 70–1 & 71 nn.7–9, 72–3 & 73 n.1, 83 & 84 n.2; inherited instinct, 83–4 & 84 nn.2–3; instinctive muscular movements after defecation, 282–3 & 283 nn.2–5, 284 & nn.2–3; sense of smell much stronger than cats', 131–2; tail-wagging, 166 & 167 n.2; tucking in of tails, 12; turning in sleep, 8 & 11 n.8; whether guided by direction of light, 237–8 & 238 n.1
- Dohrn, Anton: *Anelasma* might be connecting link with Rhizocephala, 247–8 & 248–9 nn.10–16; continues research on origin of vertebrates, 55–6 & 56 nn.5–6; CD thanks for review of *Expression* in *Academy*, 241 & nn.2–3; W.E. Darwin visited Naples station, 246 & 248 n.4; engaged to M. von Baranowska, 505 & n.8, 531 & 532 n.13, 579 & n.10; espouses evolutionary account of physiological function, 241 n.3, 246 & 248 n.6; Naples Zoological Station, Cambridge scientists try to assist, 530–1 & 532 nn.7–9, 578–9 & 579 nn.4–6; Naples Zoological Station, CD plans appeal to scientific community, xv, xx, 503–4 & 504 nn.2–6, 504–5 & 505 nn.2–4; Naples Zoological Station, in need of funds, 495–6 & 496 nn.1 & 3, 499 & n.3; Naples Zoological Station, progress and donations to library, 55 & 56 nn.1–4, 56 & n.7; Naples Zoological Station, progress reported in *Nature*, 241 & n.4; Naples Zoological Station, support of Prussian government, 246 & 248 n.5; Naples Zoological Station, unable to accept offer of subscription but hopes to survive, xx, 530–1 & 532 n.5, 535 & n.2, 578–9 & 579 n.2; opposes C.F.W. Ludwig's views on morphology and evolution, 246 & 248 nn.6–7; reviews *Expression* in *Academy*, 246–7 & 248 n.2, 588 & 589 n.14; visited Down (1870), 56 n.8, 247 & 249 n.12
- Dohrn, Carl August: Naples Zoological Station, financial contributions to, 535 & n.2; Naples Zoological Station, would not approve of his son's accepting subscription, xx, 530 & 532 n.1,

*Dohrn, Carl August, cont.*

- 530, 578
- Donders, Frans Cornelis: hypermetropia as hereditary, 521 & 522 nn.2 & 6; quoted in *Expression*, 12 n.24
- Down House: A. Bonham-Carter visits, 34 n.4; C.L. and L. Brace visited (1872), 311 & 312 n.2; J.S. Burdon Sanderson visits, 263 & n.9, 290 n.4, 301 & 302 n.2, 385 & 386 n.5; M.D. Conway visits, 34 & n.3, 57 & 58 n.10, 582 & 583 n.4; A.V. Dicey visits, 461 & 462 n.4; A. Dohrn visited (1870), 56 n.8, 247 & 249 n.12; J. Downing visits, 466, 496 & 498 n.4, 458 n.5, 582 & 583 n.29; T.W. Higginson visited (1872), 145 & 146 nn.1 & 6; B.H.H. Hooker visits, 582 & 583 n.20; F.H. Hooker visits, 179 & 180 n.1, 187 & n.9; J.D. Hooker visits, 33 n.8, 179 & 180 n.1, 187 & n.9, 274 n.3, 311 n.3, 314 & 315 n.3, 328 & n.1, 332, 338 & n.3, 339 & n.1, 343 & n.2, 385 & 386 n.9, 399 & 400 n.4, 582 & 583 nn.20, 26 & 28; H.A. Huxley visits, 582 & 583 n.9; T.H. Huxley visits, 290 n.4, 290 & n.4, 468 & n.6, 486 & 487 n.1, 582 & 583 nn.6, 9, 22 & 30; J.B. and E.M. Innes visit, 582 & 583 n.18; H. Jackson visits, 13 & n.7; V.O. Kovalevsky visited (1872), 220 & n.7; H.E. Litchfield visits, 34 n.4, 461 & 462 n.7; R.B. Litchfield visits, 34 n.4, 461 & 462 n.7; J. Lubbock visits, 582 & 583 n.28; N. Moore visits, 98 & n.4; C.E. and S.R.S. Norton visit, 245 & n.7, 383 n.9; J. Norton visits, 34 & n.4, 57 & 58 n.10, 582 & 583 n.5; M.R. Pryor visits, 99 n.6; R. Strachey visits, 274 n.3, 314 & 315 n.3, 328 & n.1, 332, 338 & n.3, 339 & n.1, 343 & n.2, 386 n.9, 539 & n.1, 582 & 583 n.26; J. Tyndall visits, 582 & 583 n.28; F.E.E. Wedgwood visits, 34 n.4
- Down School Board: CD advocates use of school-room as winter reading room, xxiii, 544–5 & 545 n.1
- Down, J. Langdon: describes congenital idiot with pronounced Woolnerian tip, 543–4 & 544 nn.1–5, 545–6 & 546 nn.2–3; racial types associated with degeneration (Mongolism), 546 & n.3
- Downing, John: CD's books of use in breeding, 466; results of close and in breeding, 496–8 & 498–9 nn.2–3 & 5–12; visits Down, 457–8 & nn.2–5, 466, 496 & 498 n.4, 582 & 583 n.29
- Drosera*: absorption by glandular hairs, 57 & n.7; benzoic acid poisonous to, 424 & n.5; J.S. Burdon Sanderson investigates electrical phenomena in leaves, 326 & 327 n.7, 423–4 & 424 n.4, 426–7 & 427 n.2; classification, 305 n.5, 325 n.2; CD asks J.S. Burdon Sanderson's advice on experiments, 261–2 & 262 n.1, 262–3 & 263 nn.2–8, 267–8 & 268 n.3, 289 & 290 n.4, 325–6 & 326

n.6; CD asks J.D. Hooker to acknowledge his discovery of digestive system, 473 & 475 n.5; CD could spend his life researching, 315 & n.5; CD may have found nerves of, 19–20 & 20 n.5; CD resumes work on, 122 & n.3; CD studies physiological properties, 313 & 314 n.4; CD tests with litmus paper, 450 & n.3, 452–3 & 453 n.1, 455 & n.2, 485; CD's experiments carried out on *D. rotundifolia*, 396 n.2; CD's observations published in *Insectivorous plants*, 38 n.9; F. Darwin carries out experiments for CD, 330 & n.4, 335 & 336 n.9; digestive processes, 263 & n.8, 267, 289, 326, 378, 382, 384 & n.2, 385, 485 & 486 n.2; experiments with albumen, 289, 301 & 302 n.2, 529 & nn.2–4; experiments with alkalis, 366 & 367 n.1; experiments with alkaloids, 262 & 263 n.6; experiments with animal substances, 380 & 381 nn.3 & 5, 397 n.6, 380 & 381 n.6, 384 & n.2, 396 & 397 n.5, 398 & n.1, 422 & 423 n.4, 429 & n.2, 435 & n.3, 514 & n.3, 453 & nn.2–5, 529 & nn.3–4; experiments with atropine, 302 & n.4; experiments with belladonna, 262 & 263 n.3, 302 & n.4; experiments with bullock's blood, 463 & 464 n.3; experiments with cabbage leaves, 301, 429 & n.5; experiments with carbonate of ammonia, 26–7 & 27 n.2, 289 & n.3, 466 n.1, 485 & 486 n.3; experiments with carbonate of soda followed by hydrochloric acid, 354 & 355 n.3; experiments with chloride of gold, 396 & 397 n.7, 397; experiments with chlorophyll, 440 & 441 n.2; experiments with chondrin, 529 & nn.2–4; experiments with colchicine, curare and veratrine, 262–3 & 263 n.6; experiments with gelatine, 289, 301 & 302 n.2, 529 & nn.2–4; experiments with glycerine, 263 & n.7, 268; experiments with hydriodic acid, 395 & n.2; experiments with hydrochloric acid and albumen, 370; experiments with phosphate of ammonia, 302 & n.6, 379 & n.5; experiments with raw meat, 335 & 336 n.9, 379, 486; experiments with sodium and potassium, 262 & 263 n.2; experiments with sodium carbonate, 302 & n.5; experiments with strychnine, 262 & 263 n.5; experiments with syntonin, 435 & n.3; experiments with poisons, 267–8; E. Frankland tests chemical composition of digestive fluid, 294–5 & 295 n.1, 295 & n.2, 296 & n.2, 297 & n.2, 301, 439–40 & 440 n.2, 422 & 423 nn.1–2, 449–50 & 450 nn.1–2; J.D. Hooker comes to see CD's experiments, 274; T.H. Huxley visits Down to see CD's experiments, 270 & 271 n.7, 289 & 290 n.4; large insects captured by, 303–4 & 305 n.3, 325 & n.1; secreting glands also absorb, 471 & 472 n.9; transmission of motor impulse, 426–7 & 427 n.3; M. Treat's observations on, 19 & 20 n.2, 303–4 & 305 nn.1–7, 325 & n.1

- Drosophyllum lusitanicum*: CD hopes J.D. Hooker can carry out short experiment at Kew, 445 & 446 n.9, 469 & 470 n.5; CD plans new experiments and seeks to borrow plant from Kew, 471 & 472 n.8; CD will describe in forthcoming book, 325; glands capable of both secretion and absorption but differ from *Drosera* and *Dionaea*, 468 & n.2, 471 & 472 n.9; J.D. Hooker sends CD specimen from Dublin, 27 & n.3, 28, 32, 35–6, 37, 38 & n.2, 50 & n.1, 56 & 57 n.2; J.D. Hooker seeks another plant for CD, 459 & 460 n.3, 464 & n.2, 479; may be primordial form of *Dionaea* and *Drosera*, 56–7 & n.4
- Drysdale, Elizabeth, 260 & n.3
- Drysdale, John James: hypothesis of spontaneous generation, 406 n.4, 441 & 443 nn.2 & 4, 572 & 574 nn.2 & 4
- Du Bois-Reymond, Emil: measured electrical impulses in animal tissue, 379 & n.3
- Duchartre, Pierre Etienne Simon: effects of dew and fog on plants, 359 & 361 n.8; rejects idea that *Dionaea* digests animal substances, 548 & 549 n.4
- Duchenne, Guillaume Benjamin Amand: elevation of eyebrows, 112 & 113 n.2
- ducks: hybrids, 500 & 500–1 nn.3–4
- Dumesnil, Adèle, 119 n.3, 560 & n.3
- Dumesnil, Camille-Marie, 119 & n.3, 560 & n.3
- Dumesnil, Jeanne, 119 & n.3, 560 & n.3
- Dumesnil, Jules-Étienne, 119 & n.3, 560 & n.3
- Dumont, Léon A.: E. Haeckel's phylogenetic classificatory system, *Revue scientifique de la France et de l'étranger*, 87 & n.6, 559 & 560 n.6; reviews *Expression* in *Revue scientifique*, 588
- Dunbar-Brander, James Brander: dogs' instinctive muscular movements, 282–3 & 283 nn.2–3, 284 & n.3; hares' vocal sounds, 283 & n.6
- Duns, John: opposes Sabbatarianism, 211 n.4
- Dürer, Albrecht: grieve muscle illustrated in 'Descent from the Cross', 72 & n.1
- earthworms: CD asks G. Krefft to observe in Australia, 74 & 75 n.6, 76; CD observes castings on banked up plants, 335; G. King's observations from India and south of France, 76 & 77 nn.1–3; J. Scott's observations on worm casts in India, 74 & 75 n.6
- Eciton*, 312 & 313 n.4
- Edinburgh Review*, 197 n.2; hostile review of *Expression* [T.S. Baynes], xvii, 184 & n.4, 193 & 193–4 nn.1–3, 196–7 & 197 n.2, 197, 211 n.4, 242 & 243 nn.2–3, 246 & 248 n.3, 444 & n.6, 588
- Edward VII: (as Albert Edward, prince of Wales) recovery from typhoid, 476 n.5
- Edwards, Henry: CD thanks for account of honey-making Mexican ants, 294 & n.2
- Egerton, Philip de Malpas Grey-, 50 & n.2
- Eggers, G. Hermann: sends CD press account of orange-lemon cross, 133 & 133–4 n.2
- Ehrenberg, Christian Gottfried: CD sent samples of Atlantic red dust in 1844, 458 & 459 n.3, 575 & n.3; sends CD his 'Microgeological studies', 458–9 & 459 n.2, 551 & n.1, 575 & n.2
- elephants: CD calculates natural increase of population, 174 & 174–5 nn.2 & 4; shed tears when suffering, 339–40 & 340 n.1
- Eliot, George. *See* Evans, Marian
- Elliot, Hugh Frederic Hislop: dog imitates action of swimming even when carried above water, 120 & 120–1 n.2
- Emerson, Ralph Waldo, 372 & 373 n.8; CD did not meet, 245 & n.6; met T. Carlyle and A. Tennyson in London, 242–3 & 244 n.8; visited Edinburgh, 242 & 243 n.7
- Engels, Friedrich: Leipzig printers' strike, 229 n.4
- English Independent*: review of *Expression*, 587
- Entomological Society of London: H.W. Bates asks CD's question about sexual differences in butterflies' ocelli, 135 & 136 n.1
- Eristalis*: H. Müller proves pollen consumed by, 210 & n.2
- Eschscholzia*: cross- and self-fertilisation, 221 & 223 n.2, 472 n.14
- Eschscholzia*: *E. californica*, self-fertilisation, F. Hildebrand's results, 228 & 229 n.3, 229
- Ethnological Society: submerged in Anthropological Institute, 524 & nn.3–4
- Eucalyptus*: bloom of leaves and fruit, 470 & 471 n.3; CD plans to experiment on selected species, 493 & 493–4 nn.3 & 9, 520 & n.3; insect pollinators, 487 & 488 n.2; J.D. Hooker identifies species for CD, 479, 480–1 & 481 nn.2 & 13, 486; native species fertilised by insects, 482 & 483 nn.3–8; whether dichogamous, 360 & 361 n.13, 363, 488 n.2
- Euclid: early influence on CD, xix, 234 & 235 n.5
- Euphorbia helioscopia*: effects of formic acid on seed, 305 & 306 n.2
- Euphrasia*: H. Müller studies effects of, 275 & 276 n.4
- Evans, John: subscribes to assist T.H. Huxley, 189 n.4, 591
- Evans, Margaret: cook at Down House, 433 & 434 n.5
- Evans, Marian (George Eliot): CD asks if Litchfields may call, 144 & nn.2–3; CD and his family enjoy novels of George Eliot, 144 n.4; E. Darwin would like to call on, 144, 147; will be happy to see Litchfields, 146–7

Cambridge University Press

978-1-107-05214-7 - The Correspondence of Charles Darwin: Volume 21 1873

Editors Frederick Burkhardt, James A. Secord, Janet Browne, Samantha Evans, Shelley Innes, Francis Neary, Alison M. Pearn, Anne Secord and Paul White

- Evening Herald*: review of *Expression*, 588 & n.8  
*Examiner*: review of *Expression* [J.T. Rothrock], 587 & 588 n.6
- expression: Cannes boatman bares teeth in anger, 80–1 & 81 nn.8–10; grief muscle, 72 & n.1; Kafirs and Hottentots, 18–19 & 19 nn.3–9; Szekely, 22 & n.3
- Fairfax, John: owns Sydney newspapers, 317 & 320 n.2
- Faivre, Ernest: absorption of water by ascidia, 359–60 & 361 n.11
- Faraday, Michael: accepted civil list pension, 176 & 177 n.3
- Farr, John, xxiii.; admires CD and asks for his photograph, 281, 285–6; admires writings of A. and G. Combe, 286 & n.2
- Farrer, Katherine Euphemia (Effie): CD and E. Darwin visit, 313 & n.2, 315 & n.2, 315 & 316 n.5, 321 & n.4, 322 & n.3, 323 & n.5, 331 & 332 n.5, 582 & 583 n.25, 591 & n.1; E.A. Darwin visits, 403 & n.4; engagement and marriage to T.H. Farrer, 81 n.5, 200 & n.2, 200 & n.2
- Farrer, Thomas Henry: CD and E. Darwin visit, 313 & n.2, 315 & n.2, 315 & 316 n.5, 321 & n.4, 322 & n.3, 323 & n.5, 331 & 332 n.5, 582 & 583 n.25, 591 & n.1; CD recommends H. Müller's book on fertilisation of flowers by insects, 194 & n.1, 200 & n.1; CD refers to T. Meehan's article on *Pedicularis canadensis*, 526 & n.1; E.A. Darwin visits, 403 & n.4; effect of cultivation on vegetation, 323 & nn.3–4; marries K.E. Wedgwood, 81 n.5, 200 & n.2; morphology and fertilisation of *Coronilla*, xvii, 321 & n.2, 323, 323–4 & 324 nn.2–4, 331 & 332 nn.1–4, 335 & 336 n.7, 526 & n.1; subscribes to assist T.H. Huxley, 170 & n.2, 189 n.4, 200 & n.3; supports H. Spencer's plan to lessen T.H. Huxley's workload, 192 & n.4
- Faucett, Peter, 292 & 294 n.3
- Fawcett, Henry: *Economic position of the British labourer*, 80 & 81 n.7
- Felméri, Lajos: *Expression*, thanks for presentation and translates parts into Hungarian, 21–2 & 23 n.7; expressions of the Szekely, 22 & n.2
- Fenton, Francis Dart: report on aboriginal inhabitants of New Zealand, 552 & 553 n.7
- Ferrier, David, 550 & n.2; experiments showing effect on muscles of electrical currents on the brain, xix, 175 & 176 n.2, 177–8 & 178 nn.3–4; 'Localization of function in the brain', BAAS, Bradford meeting, 399 & 400 n.13
- Ffinden, Frances M., 517 & n.4
- Ffinden, George Sketchley: objects to use of school-room as winter reading room, xxiii, 517 & nn.1–3, 523–4 & 524 n.2, 525 & 526 n.4, 549 & nn.1–2
- Fighting warrior* (Louvre): expression of anger, 22 & 23 n.5
- Figuier, Louis: gooseflesh on recently dead corpses, 5 & 7 n.27
- Fiske, John: attacks L. Agassiz's philosophy in *Popular Science Monthly*, 473 & nn.5–6, 484 & 485 n.5; calls on CD in London, 484 & n.4, 582 & 583 n.34; completes *Outlines of cosmic philosophy* and appreciates CD's encouragement, 472–3 & 473 nn.1–2, 484 n.3; 'The progress from brute to man', 473 & n.5, 484 & 485 n.6
- Fittock, William Henry, 138 & 139 n.4
- FitzRoy, Robert: brought home Galápagos tortoise, 171 & 172 n.2; captain, HMS *Beagle*, 245 n.3
- flamingo: nursing behaviour, 230 & 231 n.3
- Flourens, Marie Jean Pierre: experiments on cerebral localisation in pigeons, 38 & 39 n.5
- Flower, William Henry: CD thanks for lecture on palaeontological evidence for modification of animal forms, 272–3 & 273 n.1; forced to retire through ill health, 486 & 487 nn.1–2; T.H. Huxley, subscribes to assist, 189 n.4, 488 & n.1, 591; T.H. Huxley would like to repay contribution to subscription, 486–7 & 487 n.3, 488 & n.1; Royal Institution lectures, cites V.O. Kovalevsky, 224–5 & 225 n.3
- Forbes, James David: dispute with J. Tyndall over glacier movement, 191 & 192 n.8, 382 n.4; T.H. Huxley lobbied against award of Copley Medal to, 191 & 192 nn.9–12, 195 & n.8; P.G. Tait alleges that J. Tyndall accused of plagiarism, 382 & n.4, 385 & 386 n.4, 400 n.6
- Fordman, Richard: CD unable to believe accounts of wolves nurturing children, 532 & n.2
- Formica*: *F. fusca*, 489 & 490 n.4; *F. pubescens*; relation to Tettigometridae, 181 n.3, 562 n.3
- Forster, Laura May, 62 & 63 n.4; Cannes boatman bares teeth in anger, xviii, 80–1; corresponds with H.E. Litchfield, 79–81 & 81 nn.1–14; recommends Mr Plathe as teacher for Working Men's College, 79–80 & 81 n.2
- Forster, William Howley, 80 & 81 n.6
- Fortnightly Review*: F. Galton, review of A. de Candolle's *Histoire des sciences*, 233 & n.2
- Foster, Michael: Fullerian Professor of physiology, Royal Institution, 192 n.2; T.H. Huxley, possibility of lessening workload, 192 & n.2, 194 & 195 n.3; Naples Zoological Station, financial difficulties, 495–6 & 496 n.2, 504 & n.7, 505 & n.4; Naples Zoological Station, tries to persuade Cambridge University to support, 531 & 532 n.9, 579 & n.6

Cambridge University Press

978-1-107-05214-7 - The Correspondence of Charles Darwin: Volume 21 1873

Editors Frederick Burkhardt, James A. Secord, Janet Browne, Samantha Evans, Shelley Innes, Francis Neary, Alison M. Pearn, Anne Secord and Paul White

Index

[More information](#)

- Fox, William Darwin: shares reminiscences of Cambridge with CD, 341–2 & 342 n.3, 364 & n.4; thanks CD for *Expression*, 341 & 342 n.2
- Franco-Prussian war: disrupted translation of *Origin*, 109 & 110–11 n.2; expression of African prisoners of war passing through Germany, 511 & 512 n.5; Prussian troops remain in France until payment of indemnity, 216 & 217 n.5
- Frank, Philip: G.H. Darwin consults about stomach problems, 111 & 112 n.3
- Frankland, Edward, 191 & 192 n.11; assists CD with experiments on *Drosera*, xvi, 294–5 & 295 n.1, 295 & n.2, 296 & n.2, 297 & n.2, 494 & 495 n.2; cited in *Insectivorous plants*, 447 n.2; CD attempts to identify acid secreted by *Drosera*, 395–6 & 396–7 nn.1–8, 397–8 & 398 nn.2–4, 398; CD calls on in London, 494–5 & 495 n.3; CD grateful for assistance, 449–50 & 450 nn.1–2; CD seeks help in testing carbonate of ammonia on *Drosera*, 289 & 289–90 nn.1–4; CD seeks small quantity of mucin, 396 & 397 n.6, 397; CD sends washings of *Drosera* leaves for testing, 422 & 423 nn.1–2, 446–7 & nn.1–3; sends CD distilled water, 418 & nn.1–2, 422, 439 n.2; sends CD litmus paper and advises on its use, 439–40 & 440 n.3, 447 & n.4, 450 & n.3, 452–3 & 453 n.1, 455 & n.2; sends J.S. Burdon Sanderson acids, 502–3 & 503 n.2; supports Liebig memorial appeal, 227 & n.4
- Fraser, Thomas Richard: physiological effects of calabar bean, 262 & 263 n.4
- Fraser's Magazine*: F. Galton, 'Hereditary improvement', 24 & 25 n.2, 27 & n.4; F. Max Müller, 'Lectures on Mr. Darwin's philosophy of language', 272 n.1
- Free Religious Association, 146 n.2
- Friedrich Karl, prince of Prussia, 161 & 163 n.2, 163 & n.4
- frogs: reflex action of leg in decapitated specimen, 38 & 39 n.4; temperature at which frogs are killed, 302, 326 & nn.4–6, 333
- Fry, Mariabell: grief muscle illustrated in Dürer's 'Descent from the Cross', 72 & n.1
- Fry, Robert, 127 & 128 n.2
- Fuligula cristata* (*Aythya fuligula*, tufted duck), 500 & n.3
- Fumaria officinalis*: effects of formic acid on seed, 305 & 306 n.2
- Gaika, Christian, 19 n.7
- Galápagos tortoise: brought home by *Beagle* expedition, 171 & 172 n.2
- Gallus bankiva*. See jungle fowl
- Galton, Douglas Strutt: detested at Office of Works, 333 & n.5
- Galton, Francis: attempts to prove pangenesis by transfusing rabbits, 25 & 26 n.10, 49 n.5; H.M. Butler reports on hereditary habit, 491 & 492 n.1; A. de Candolle disagrees with conclusions on hereditary genius, 40 & 41 nn.4–5, 556 & 557 nn.4–5; CD answers questionnaire on inheritance of intellectual ability, xv, xix–xx, 234–5 & 235 nn.1–12, 238; CD asks about establishing statistical mean, 234 & 235 n.10, 239; 'Hereditary improvement', CD thinks proposals impractical, xix, 24–5 & 25–6 nn.2–9, 27 & n.4; investigates mediums with W. Crookes, 73 & n.2; plans to send questionnaire on inheritance of intellectual ability to men of science, 232–3 & 233 nn.2–5; ridicules J. Goodman's views on nutritive powers of egg white, 438 & 439 n.7; sends W. Huggins information about dog enraged by a butcher, 72–3 & 73 n.1; visits CD, 582 & 583 n.12
- Gardeners' Chronicle*: A.W. Bennet, review of H. Müller's *Befruchtung der Blumen*, 209–10 & 210 nn.1–2; CD, 'Fertilisation of *Leschenaultia*', 223 n.5; M.T. Masters seeks to consult CD on changes, 419 & 420 n.1, 423 & n.2
- Gardener's Monthly* (Philadelphia): W.M. Canby, observations on *Dionaea*, 60 & 61 n.3
- Gardner, Eugene Terry: sends W.D. Whitney's account of Hayden expedition to Colorado, 327 & n.1
- Gardner, James Terry: chief topographer, Hayden Survey, 327 & 327–8 n.2
- Garrod, Alfred Baring: *Essentials of materia medica and therapeutics*, 148 & n.5
- Gasteria*: leaf arrangement, 412 & 415 n.8, 537–8 & 538 nn.1–3
- Gaudry, Albert: CD thanks for work on fossil vertebrates, 78 & n.1
- Gawler, John Cox: keeper of the crown jewels, 492 & 493 n.7; *Sikhim*, praise for J.D. Hooker's *Himalayan journals*, 492 & 493 n.5
- Gegenbaur, Carl: support for CD's theories, 89 & n.4, 96 & 97 n.12; taught R. Hennig at Jena, 235 & 236 n.2
- Geikie, Archibald: shareholder in Artizans, Labourers, & General Dwellings Co., 86 & n.6
- Gellius, Aulus: origin of kissing, 6 n.11
- Gentry, Thomas George: fertilisation of *Pedicularis canadensis*, 526 n.1
- Gény, Philippe: offers CD worm casts from Nice lycée botanic garden, 76 & 77 n.3
- Gerhardt, Charles, 435 & 435–6 n.4
- Gerstaecker, Adolph: sceptical of CD's description of *Scalpellum regium*, 390 & 394 n.3
- Giglioli, Enrico Hillyer: CD thanks for study of chimpanzee craniology, 64 & 65 n.2

- Gill, Theodore Nicholas: support for evolution, 377 & n.4
- Girou de Buzareingues, Charles, 41 & n.8, 557 & n.8
- Gladstone, William Ewart: address on abstract science in England, France and Germany, 29 & 30 n.13; collects Wedgwood china, 30 n.14; CD among 54 leading scientists opposing transfer of Kew herbarium to new National Museum, 42–4 & 44–5 nn.2–5; CD enjoys H. Spencer's article ridiculing, 475 & 476 n.5; *Iuventus mundi*, J.D. Hooker regards as puerile, 29 & 30 n.14; J.D. Hooker sends Candolle's book to disprove his disparagement of abstract science in England, 29 & 30 n.12; J.D. Hooker sends Wedgwood medalion, 36 & 37 n.9, 37 & n.2; national herbaria, memorial from leading scientists, 33 n.1; ordered A.S. Ayrton not to interfere with management of Kew, 29 & 30 n.6; resigns over third Irish bill, 121 n.4; set up committee to investigate governance of Kew, 30 n.10
- Globe & Traveller*: review of *Expression*, 587
- Glyceria fluitans*: fertilisation by moths, 231 & 232 n.1; H. Müller observes, 252 & n.9; visited by moths so may secrete nectar, 217 & 218 n.3
- Gomperz, Theodor: notes on *Expression*, 350–2 & 352 nn.1–7, 364
- Goodacre, Francis Burges: proposal for museum of domestic animals welcomed by CD, 65–6, 68–9 & 69 n.3
- Goodman, John: corpuscles produced by chilled albumen and water, 438 & 439 n.7
- Gordon Cumming, Roualeyn George: tears shed by suffering elephant, 340 & n.2
- Gover, William Sutton: stays at W.D. Fox's house on Isle of Wight, 342 & 342–3 nn.9–10
- Grammatophora (Ctenophorus)*: may be induced to hop, 201 & n.2
- Grant, Charles, 531 & 532 n.12, 579 & n.9
- Graphium sarpedon*. See *Papilio sarpedon*
- Gratiolet, Louis Pierre: cited in *Expression*, 58 & n.2
- Gray, Asa: American Association for the Advancement of Science, presidential address, 122 & n.6; *Botany for young people: how plants behave*, CD recommends to J.D. Hooker as model primer, 83 & n.4; CD continues experiments on *Drosera*, 122 & n.3; *Dionaea*, CD requests further information from W.M. Canby, 31 & 32 n.1, 60 & 61 n.2; *Dionaea*, observes in Wilmington, 182 & 183 n.1; encouraged CD to continue botanical experiments, 32; encourages M. Treat to continue and publish experiments, 304 & 305 n.7; gives up lecturing, 311 & 312 n.6; *How plants grow* and *How plants behave*, A.W. Bennett urges Macmillan to publish, 125 & n.2; Royal Society elects as foreign member, 273 & 274 n.6; sends CD squib ridiculing L. Agassiz, 89–90 & 91 nn.1–2, 121 & 122 n.2; support for CD's theories, 96; told M. Treat that CD had found nerves of insectivorous plants, 19–20 & 20 n.5; visited Down, 245 n.7
- Gray, Jane Loring: visited Down, 245 n.7
- Gray, John Edward: continues writing on huemul despite stroke, 64 & nn.2–4
- Gray, Maria Emma: CD sends regards to, 64 & n.5
- Greg, William Rathbone: S. Butler meets, 148 & 149 n.4; CD meets in London, 582 & 583 n.11; *Enigmas of life*, CD finds poetic but utopian, 25 & 26 n.11, 27 & n.5; *Enigmas of life*, J.D. Hooker finds weak and inconclusive, 28–9 & 30 n.3; J.D. Hooker would like to bring to Down House, 29 & 30 n.4, 32 & 33 n.8
- Grenfell, Harry Tremenhoe: flag-lieutenant, HMS *Repulse*, 244 & 245 n.1
- Grimm, Jakob Ludwig Carl, 272 & n.3
- guemul. See huemul
- Gull, William Withey: cited in *Expression*, 2d ed., 14 n.2
- Günther, Albert: asked CD about bringing home a Galápagos tortoise, 171 & 172 n.2; cited in *Expression*, 6 n.8; corrects description of sexual differences in *Megalophrys*, 252–3 & 253 n.1, 254; CD unable to see in London, 171 & 172 n.4, 253 & n.2; *Phrynosoma*, receives living specimen from A.R. Wallace, 253 & n.3, 254 & n.3; *Reptiles of British India* cited in *Expression*, 6 n.8
- Gurney, Edmund: attends séance with G.H. Darwin, 517–18 & 518 n.7
- Gymnorhina tibicen* (Australian magpie): as snake-killer, 9 & 12 n.19
- Haeckel, Elisabeth, 443 & 444 n.11, 574 & n.11
- Haeckel, Emma, 443 & 444 n.10, 574 & n.10
- Haeckel, Ernst: classification of protozoa contentious, 63 & n.3; CD admires work on calcareous sponges, 86 & 87 n.2, 559 & 560 n.2; CD asks views on rudimentary structures, 406 & n.3; CD asks views on spontaneous generation, 406 & n.4; CD sends Dallinger and Drysdale's 'Lesson in biogenesis', 441 & 443 n.2, 572 & 574 n.2; CD sends his letter to *Nature* on rudimentary structures, 441 & 443 n.2, 572 & 574 n.2; CD thanks for *Natürliche Schöpfungsgeschichte*, 4th ed., 406 & n.1; CD thanks for study of calcareous sponges, 50 & n.1; *Descent*, L. Masłowski hopes to translate into Polish, 87 & n.7, 214 n.2, 564 n.2; development of juvenile reflects adult ancestral forms, 103 n.3; L. Felméri studied with at Jena, 21 & 22 n.1; gastrula, 442 & 443 n.7, 572 & 574 n.7; *In-*

- sectivorous plants*, presentation, 406 & n.6; meets T.H. Huxley in Lucerne, 443 & n.9, 574 & n.9; Monera, discovery of, 441–2 & 443 n.5, 572 & 574 n.5; A. Moschkau admires, 495 & n.2, 528 & n.4, 575 & 576 n.2, 577 & n.4; *Natürliche Schöpfungsgeschichte*, English translation delayed, 406 & n.2; *Natürliche Schöpfungsgeschichte*, translated into Polish, 87 & n.7, 559 & 560 n.7; opposes views of J. Huber, 135 & n.4, 562 & n.4; organisms could revert to simpler forms if conditions of life were simplified, 441 & 443 n.3, 572 & 574 n.3; progress and purpose of zoology, *Revue scientifique de la France et de l'étranger*, 87 & n.5, 559 & 560 n.5; sends CD photograph of his children, 443 & 444 n.11, 574 & n.11; support for CD's theories, 89 & n.4, 96 & n.6; taught R. Hennig at Jena, 235 & 236 n.2; travels to Cairo and Smyrna, 87 & nn.3–4, 559 & 560 nn.3–4; tree of life, 441–2, 442, 572, 573
- Haeckel, Walter, 443 & 444 n.11, 574 & n.11
- The Hague, Royal Zoological–Botanical Garden, 4 & n.19
- Hague, James Duncan: ants demonstrate sympathy in distress, 91 & n.1, 156–7 & 157 nn.1–3, 268–9 & 269 n.2; CD publishes letters on ants' behaviour in *Nature*, xix, 155, 158 & 159 n.3, 186 & n.2, 269 n.3, 300 & 301 n.2, 313 n.3; CD sends note from J.T. Moggridge, 186 & n.2; G.H. and F. Darwin met in California, 158 & 159 n.4
- Haliburton, Sarah Harriet, 501 & 502 n.1
- Hall, M.: 'Source of solar heat', *Philosophical Magazine*, 552 & 553 n.4
- Hall, William Honnywill: queries reason for movement of eyebrows, 112–13 & 113 nn.1–2
- Hamilton, William Stirling, 242 & 243 n.3; J.H. Stirling vehemently criticises, 197 & 198 n.6
- hares: W. Ogle wonders whether they prefer to circle to the left, 205–6 & 206 n.5; vocal sounds, 283 & n.6
- Harless, Emil: study of plastic anatomy, 509 & 511 n.1
- Harte, William: cats and dogs are guided by direction of light, 237–8 & 238 n.1
- Harting, Pieter: birds *arrectores* are striped, 2 & 6 n.4
- Hartnack, Edmund: microscopes, 266 & n.3, 445 & nn.2–7, 448 & n.4
- Hartogh Heijs van Zouteveen, Hermanus: blushing, 5 & 7 nn.24–5; colour, perception of, 5 & 7 n.26; *Expression*, notes on, 2–5 & 6–7 nn.3–29; head-binding of children causes deformity, 4 & 6 n.20; impatience, expression of, 4; inherited hypermetropia, 521 & 522 n.1, 522 & n.3; sneering, expression of, 4–5 & 6–7 nn.21–3; supplication, examples of expression of, 3–4 & 6 nn.12–16; toads, word for does not express swelling in other European languages, 2–3 & 6 nn.5–7, 212 n.4, 563 n.4; translates *Expression* into Dutch, xxv, 2 & 6 n.2, 522 n.1; vomiting may have emotional causes, 4
- Hassall, Arthur Hill: *Microscopic anatomy*, 309 & 310 nn.5 & 7
- Haweis, John Oliver Willyams: instance of inherited expression, 316–17 & 317 n.2
- Haworthia*: arrangement of leaves, 411
- Hawthorne, Nathaniel, 416 & 417 n.5
- Hayden, Ferdinand Vandever: survey of Colorado, 327 & 327–8 n.2
- Haynes, Stanley Lewis: comments on *Expression*, xviii, 7–11 & 11–12 nn.3–29
- Head, Henry A.: converts to Spiritualism during harsh Wisconsin winter, 92–4 & 95 nn.1–6
- Hecker, Ewald: physiology of laughter, 3 & 6 n.10
- Heer, Oswald: C. Lyell visits in Zurich, 273 & 274 n.10
- Hegel, Georg Wilhelm Friedrich, 196 & 197 n.3, 243 & 244 n.9
- Helianthemum*: irritability of stamens, 445
- Helmholtz, Hermann von: law of conservation of force, 352 n.7
- Henderson, James Alexander: mayor of Belfast, proposes T. Andrew as president of BAAS, 399 & 400 n.8
- Friedrich Henne'sche Buchhandlung, Stuttgart: closes down, 251 & 252 n.7
- Hennig, Rudolf: seeks CD's photograph for popular history of progress of natural science, 235–6
- Henry, William Charles: Liebig memorial appeal, 227 & n.4
- Henslow, George: rapid deterioration in health, 170 & n.1; stays with J.D. Hooker while recuperating from illness, 382 & 383 n.5, 385 & 386 n.10
- Henslow, Georgina Brook, 382 & 383 n.5
- Herbert, William, 288
- Herpestes ichneumon* (ichneumon), 3 & 6 n.8
- Herrig, Hans: reviews *Expression* in *Magazin für die Literatur des Auslandes*, 588 & 589 n.13
- Hibbert, William Tetlow, 72 n.1
- Hickman, George W., 244 n.10
- Higgins, John, 235 n.12
- Higginson, Henry Lee, 146 n.4
- Higginson, Mary Elizabeth, 145–6 & 146 n.11
- Higginson, Thomas Wentworth: CD greatly appreciates his *Life with a black regiment*, 95 & n.2, 144–5 & 146 n.1; essays sent to CD by M. Conway, 95 & 96 n.4; notes on *Expression*, 145–6 & 146 nn.5 & 7–10; visited Down (1872), 95 & n.3, 145 & 146 nn.1 & 6
- Hildebrand, Friedrich: admires H. Müller's

*Hildebrand, Friedrich, cont.*

*Befruchtung der Blumen*, 213 & n.3; CD seeks information about fertilisation of *Primula* and *Corydalis*, 217 & n.1; CD thanks for book on distribution of plants, 506 & n.2; cited in *Cross and self-fertilisation*, 275 n.2; cultivated cereals, fertilisation of, 217 & n.2, 228 & 229 n.5; fertilisation of grasses, A.W. Bennett translates paper into English, 125 & n.4; publishes small work on propagation of plants, 228 & 229 n.4; results of experiments in self-fertilisation of plants, 228 & 229 nn.2–3

Hinton, Charles H.: observations on *Expression*, 254–7 & 257–8 nn.1–12; responses to terror demonstrated in San Francisco earthquakes, 255–6

*Hippocamelus bisulcus*. See huemul

Hirst, Thomas Archer: subscribes to assist T.H.

Huxley, 163 & n.2, 168 & n.6, 189 n.4, 591 & n.2  
hive-bees: drones demonstrate inherited instinct, 152 & 155 n.3

Hobbes, Thomas, 198 n.11

Hofmann, August Wilhelm von: assisted CD in testing carbonate of ammonia on *Drosera*, 289 & 290 n.3; gave CD samples of pure gelatin, 380 & 381 n.8, 514 & n.5, 529 & n.3; introduction to chemistry translated into Polish, 214 & n.4, 564 & n.4; professor at Berlin, 380 & 381 n.7; raises funds for memorial to J. von Liebig, 226–7 & 227 nn.3 & 5

Holbeach, Henry: reviews *Expression* in *St. Paul's Magazine*, 588 & 589 n.11

Holland, Henry, 533

Holloway, Thomas, 237 & n.6

Holmes, Oliver Wendell, 373 n.6

Homer: *Iliad*, description of rage, 12–13 & 13 n.4; *Odyssey*, kissing, 3 & 6 n.11

Hooker, Brian Harvey Hodgson, 273 & n.4; visits Down House, 582 & 583 n.20

Hooker, Charles Paget, 273 & n.4; writes note to CD, 378 & 379 n.7

Hooker, Frances Harriet: attends BAAS conference with J.D. Hooker, 382 & 383 n.6; forwards C.P. Hooker's note to CD, 378 & 379 n.7; month in Broadstairs, 273 & n.3; suggests T.H. Huxley's friends pay money into his bank account, 165 & n.3; visits Down, 179 & 180 n.1, 187 & n.9, 582 & 583 n.19

Hooker, Grace Ellen, 273 & n.3

Hooker, Harriet Anne, 82 & n.1

Hooker, Joseph Dalton: absorption of ammonia by plants may resemble effects on blood of animals poisoned by venom, 30 & 31 n.26, 33; absorption of water by leaves, 359–60 & 361 nn.8–11; ad-

mires G.J. Allman's work and proposes for Royal Medal, 273 & 274 n.7–8, 274 & n.2; asks CD who supplies his chemicals and distilled water, 439 & n.2; awarded LLD by Glasgow University, 507 & 508 n.3; A.S. Ayrton, dispute over governance of Royal Botanic Gardens, Kew, 27 & 27–8 nn.6–7, 29 & 30 n.5, 30 & 30–1 nn.10 & 16, 32 & 33 n.3; Ayrton dispute, support of leading scientists, 29 & 30 n.16; BAAS, Bradford meeting, 382 & 383 n.6, 399–400 & 400–1 nn.7–19, 419 & n.2; Belgian academy elects as associate member as expression of support in Ayrton dispute, 27 & 28 n.7, 29; botany primer for Macmillan, 82 & n.4, 83 & n.4; *Cephalotus*, ready to research for CD, 469 & 470 n.7, 473; classification of plants, 73 & 74 n.4; collects Wedgwood, 29 & 30 n.14; CD advises on experiments with *Nepenthes*, 485 & 486 n.2, 488 & n.1, 491 & n.2, 520 & n.5; CD asks about waxy matter or fine hairs protecting plants, 328, 332 & 333 nn.2–4; CD asks to find out temperature of rain in hot countries, 419 & n.6; CD consults on absorption by glandular hairs of plants, 26–7 & 27 n.2, 30 & 31 nn.22–6; CD plans subscription for T.H. Huxley, 161 & nn.1–2; CD seeks *Desmodium* from Kew, 455 & 456 n.2; CD seeks information from Kew about injury to plants from watering during sunshine, 338, 339; CD seeks loan of *Journal of Botany*, 83 & n.5; CD seeks plants and advice on cultivation, 457; CD seeks specimen of *Oxalis sensitiva*, 57 & n.5; CD tries his immersion lens, 473–4 & 475 n.7; CD vents anger at R. Owen's insinuations regarding Royal Society's officers, 547 & n.2; CD visits at Kew, 490–1, 492 & n.2, 493 & n.2; CD's experiments on *Drosera* take precedence over his own on *Nepenthes* and *Sarracenia*, 479 & 481 nn.7 & 9; F. Darwin visits at Kew, 445 & n.1, 448 & nn.2–3; death of M.E. Lyell, 186–7 & 187 nn.2–4; *Desmodium*, movements, 445, 479 & 481 n.6; *Dionaea*, sends CD specimens, 270 & 271 n.2; director, Royal Botanic Gardens, Kew, 339, 445 n.1, 448 n.3, 467 n.4; *Drosophyllum*, CD asks if he could conduct short experiment on, 445 & 446 n.9, 469 & 470 n.5; *Drosophyllum*, CD seeks plant of, 27 & n.3, 28, 56 & 57 n.2, 471 & 472 n.8; *Drosophyllum*, seeks from Dublin, 459 & 460 n.3, 464 & n.2, 479; *Eucalyptus*, dichogamy, 360 & 361 n.13; formic acid, effect on germination of seeds, 120 n.1; *Gasteria*, exhibits at Royal Society, 537 & n.1; *Genera plantarum* will be delayed by presidency of Royal Society, 36 & n.6; *Himalayan journals* praised by J.C. Gawler, 492 & 493 n.5; T.H. Huxley, accompanies to France and Germany, xxi, 270 & 271 n.1, 273 & n.2, 310 & 311 n.2,

- 314 & 315 n.1, 315 & n.4; T.H. Huxley, charmed by letter of thanks, 186 & 187 n.1, 195; T.H. Huxley, subscription to assist, xx, 189 n.4, 161 & n.1, 165, 167 & 168 n.2, 168, 170 & n.3, 171 & n.5, 582 & 583 n.16, 591 & n.3; *Hydnora americana*, paper for Linnean Society, 492 & n.3; identifies common plants for CD, 310 & 311 n.3, 359 & 360 nn.1-7, 378 & 379 n.1, 382 & n.2, 470 & 472 n.5; identifies plants for CD, 73 & 74 n.2, 310 & 311 n.3, 315, 359 & 360 nn.1-7, 378 & 379 n.1, 382 & n.2, 470 & 472 n.5, 479, 480-1 & 481 nn.2 & 12-13, 486; *Lathyrus nissolia*, sends CD seeds, 520 & 521 n.3; Linnaeus on sleeping plants, 360 & 361 n.12; lunches with CD in London, 165 n.6, 582 & 583 n.17; *Mimosa*, movement of leaves, 520; *Mimosa albida*, sends CD plant, 479 & 481 n.4, 507 & n.2, 519-20 & n.1; *Mimosa albida*, sensitivity to water, 360 & 361 nn.14-16, 378 & 379 n.3; *Mimosa albida*, sluggish reaction to being touched, 385 & n.3; *Mimosa marginata* (Lindl.) has priority over *M. prostrata*, 439 & n.1; J.T. Moggridge's study of ants, speculates on effect of formic acid on germination of seeds, 82 & nn.2-3, 347 n.1; national herbarium, dispute with British Museum over creation of, 29 & 30 n.8; *Nepenthes*, CD urges not to defer publication of experiments, 485 & 486 n.2; *Nepenthes*, experiments on, xvi, 382 & 383 n.8, 385 & 386 n.6, 459 & 459-60 nn.1-2, 464, 466 & n.1, 468 & nn.2-3, 469 & 470 nn.2-4, 473 & 475 nn.2-3, 479 & 481 n.7, 485 & 486 n.2, 488 & n.1, 491 & n.2, 492 & n.3, 520 & n.5; *Nepenthes*, experiments are solely for CD, 479 & 481 n.7; Royal Society, inaugural address, 521 & n.5, 530 & 532 n.2, 535 & n.4, 547; Royal Society, nominated for presidency, 29 & 30-1 nn.15-19, 32 & 33 n.2, 36 & n.4; Royal Society, president, 50 & n.3, 67 & n.3, 274 n.8, 521 n.5, 532 n.2, 535 n.1, 535 n.4; J. Russell, hopes to introduce CD to, 469 & 470 n.6; *Sarracenia*, ready to research for CD, 469 & 470 n.7; sends CD *Acacia* and *Eucalyptus* leaves, 469 & n.1, 470 & 471 n.2; sends CD *Acacia farnesiana*, 469, 471 & 472 n.7, 473 & 475 n.1, 479 & 481 n.3; sends CD *Drosophyllum*, 35-6, 50 & n.1, 56 & 57 n.2; sends CD plants, 547 & 548 n.7; sends CD plants of *Oxalis sensitiva*, 339 & n.2; sends CD seeds of *Lathyrus nissolia*, 488 & n.2; *Student's flora*, 73 & 74 n.3; suffers from eczema, 479; suffers from influenza, 82 & n.1; supports J. Tyndall against P.G. Tait, 382 & n.4; surprised and disappointed by J. Tyndall's letter to *Nature*, 399 & 400 n.6; values R. Strachey's praise for himself and CD, 36 & n.7, 37 & n.3; visits Down, 33 n.8, 179 & 180 n.1, 187 & n.9, 311 n.3, 378 & 379 n.5, 399 & 400 n.4, 418-19, 582 & 583 nn.20, 26 & 28; visits Down with R. Strachey, 273 & 274 n.11, 314 & 315 n.3, 315 & n.3, 328 & n.1, 332, 338 & n.3, 339 & n.1, 343 & n.2, 385 & 386 n.9; S.V. Wood Jr disputes view that domestic apples produce crabs, 387 & 389 n.6, 388, 401 & 402 n.3, 420 & 421-2 n.5, 471
- Hooker, Reginald Hawthorn, 273 & n.3  
 Hooker, William Henslow, 273 & n.4  
 Hooker, William Jackson: established Kew herbarium and Museums of Structural and Economic Botany, 44 & 44-5 n.4  
 Hookham, George: defends CD's views on origin of language against F. Max Müller's, 207 & n.3; fighting sheep strike with forelegs, 207 & n.4  
 Hopkin & Williams: charged so little CD is ashamed to ask them to supply him again, 366 & n.1; supply CD with distilled water, 398 & n.2  
 Horace, 342 n.5  
 Horner, Anne Susan: buried at Woking, 187 & n.6  
 Horner, Francis, 254 & n.2  
 horses: expression of emotion, 8, 10; homing instincts, 123-4 & 124 n.2; increasing fleetness, 85 & nn.5-6, 114 & 115 n.4  
 Hoskins, J. Thornton: director, Artizans, Labourers, & General Dwellings Co., 85  
 Houzeau de Lehaie, Auguste, 88 n.1  
 Houzeau, Jean-Charles: importance of preserving anthropoid quadrumans, 88; mental faculties of apes, 88 & n.2; thanks CD for present of *Expression*, 87-8 & 88 n.1  
 Howarth, Henry Hoyle: asks to quote CD in letter to *Nature* on distribution of volcanoes, 552-3 & 553 nn.1-4; barrenness of dying trees, 552  
 Huber, Johannes Nepomuk: critique of theory of natural selection, 135 & n.2, 561 & 562 n.2  
 huemul (guemul; now *Hippocamelus bisulcus*): J.E. Gray's paper on, 64 & nn.2-4  
 Huggins, William: L. Darwin meets at Kew, 464 & 465 n.6; F. Galton sends further information about dog enraged by a butcher, 72-3 & 73 n.1; inherited instinct in dogs, CD publishes letter in *Nature*, xix, 69-71 & 71 nn.2-9, 71 & n.3, 72 & 73 n.1, 83 & 84 nn.1-2  
 Hughes, Thomas McKenny: CD will be honoured to assist memorial to A. Sedgwick, 124; succeeds A. Sedgwick as Woodwardian Professor of geology, 64 n.1, 124 & 125 n.2  
 Humbert, Alois: sphinx moth attracted to floral wallpaper, 47-8 & 48 nn.3-4, 48-9 & 49 n.4, 557-8 & 558 nn.3-4  
 Humboldt, Karl Wilhelm von, 272 & n.3  
 Huxley, Henrietta Anne, 179 & n.3, 190 & 191 n.1; A. Dohrn sends regards to, 531 & 532 n.11, 579 & n.8; gratitude for friends' subscription, 185 &

*Huxley, Henrietta Anne, cont.*

n.3; visits Down, 582 &amp; 583 n.9

Huxley, Thomas Henry: Académie des sciences elects as correspondent, 282 n.2, 567 n.2; G.J. Allman proposed for Royal Medal of Royal Society, 273 & 274 n.8; 'Animals intermediate between birds and reptiles', 200 & 201 n.1; anticlerical outbursts, 29 & 30 n.11; caricature, 162; consults A. Clark, 158 & n.4, 161 & n.1, 171 & n.3, 194 & 195 n.3; criticised in *Edinburgh Review* article on *Expression* [T.S. Baynes], 444 n.6; *Critiques and addresses*, 191 & 192 n.6, 194 & 195 n.5; CD admires sharpness of mind, 270; CD meets in London, 499; *Descent*, note on structure of the brain in apes and humans, 535 & 535–6 n.5; *Drosera*, visits Down to see CD's experiments, 267 & 268 n.5, 270 & 271 n.7, 289 & 290 n.4; W.H. Flower, hopes to repay contribution to subscription, 486–7 & 487 nn.1–4, 488 & n.1; J.D. Forbes, lobbied against award of Copley Medal to, 191 & 192 nn.9–12, 195 & n.8; J.D. Forbes's attack on J. Tyndall, CD advises against answering, 191 & 192 n.8, 195 & n.8; M. Foster may be able to reduce workload, 192 & n.2, 194 & 195 n.3; friends subscribe to assist, xv, xx, 161 & nn.1–2, 163 & n.2, 164 & 165 nn.2–3, 165 & n.6, 166 & 167 n.3, 167 & nn.2–4, 167–8 & 168 nn.2–7, 169 & 169–70 nn.2–5, 170–1 & 171 nn.1–5, 176–7 & 177 n.2, 179 & nn.2–3, 182 & nn.2–3, 183 & n.2, 187–8 & 188 nn.2–4, 189 & nn.3–4, 190, 192 & n.1, 194 & 195 n.1, 400–401 n.17, 499 & n.4, 582 & 583 n.16; friends' subscription, CD informs of, 167, 171 & n.5, 176 & 177 n.2, 179 & n.3, 182 & n.3, 183 & n.2, 191, 200, 590; friends' subscription, CD sends names of subscribers, 194 & 195 n.1; friends' subscription, letter of thanks circulated, xx–xxi, 184–5, 186 & 187 n.1, 186 & 187 n.1, 187–8 & 188 n.2, 189 & n.3, 189 & n.2, 190, 190–1 & 192 n.3, 192 & n.1, 195 & nn.9–10, 199 & n.2, 200 & n.3; E. Haeckel meets in Lucerne, 443 & n.9, 574 & n.9; holiday in France and Germany with J.D. Hooker, xxi, 192 & n.2, 194, 270 & 271 n.1, 273 & n.2, 290, 311 n.2, 314 & 315 n.1, 315 & n.4, 399 & 400–401 n.17, 443 & n.9, 574 & n.9; G. Krefft sent skeleton of *Chlamydosaurus kingii*, 201 & 202 n.4, 290 & n.4; *Lessons in elementary physiology*, lymphatic capillaries, 229–30 & 230 nn.1–2; M.E. Lyell, fears for health of, 190 & 191 n.1; Naples Zoological Station, A. Dohrn unable to accept offer of subscription, 530–1 & 532 n.5, 535 & nn.2–3, 578–9 & 579 n.2; Naples Zoological Station, financial situation prevents from assisting, 495–6 & 496 n.2, 505 & n.5; Naples Zoological Station, proposes subscription from scientific

community, 499 & n.3, 503 & 504 n.3, 504–5 & 505 nn.2–4; *Nitella*, has not had time to investigate, 487 & n.5, 488; poor health and financial worries, 161 & n.1, 163 n.2; professor of natural history, Royal School of Mines, 191 & 192 n.5; Royal Society, arranges donation of *Philosophical Transactions* to Naples Zoological Station, 505 & n.6; Royal Society, hopes for J.D. Hooker's election as president, 67 & n.3; Royal Society, J.D. Hooker's inaugural address, 530 & 532 n.2; Royal Society, secretary, 191 & 192 n.5, 274 n.8, 532 n.3, 547 & n.3; sends CD M. Arnold's *Literature & dogma*, 66–7 & 67 n.2, 67; H. Spencer's plans to lessen workload, 192 & n.2; J.H. Stirling critical of, 196 & 197 n.4, 197 & 198 n.5; suffers from dyspepsia, 67; visits Down, 267 & 268 n.5, 270 & 271 n.7, 289 & 290 n.4, 290 & n.4, 468 & n.6, 486 & 487 n.1, 582 & 583 nn.22 & 30, 590–1 & 591 nn.1–5

*Hydnora americana*: J.D. Hooker's paper on, 492 & n.3

*Hyoscyamus niger*: alkaloid poisons, 147 & n.2

*Hypocoum grandiflorum*: self-fertilisation, F. Hildebrand's results, 228 & 229 n.2

*Ibla cumingi*: lives attached to *Pollicipes*, 392 & 394 n.8

ichneumon: destroys cobras, 6 n.8

*Ichthyornis*: O.C. Marsh discovers, 220 & n.9, 225

*Illustrated London News*: portrait of CD, 226 & n.3

*Index*: F.E. Abbott resigns as editor but is later reinstated, 145 & 146 n.3; CD subscribes to, 95 & 96 n.5; T.W. Higginson delighted CD continues to read, 145 & 146 n.2

Innes, Eliza Mary: visits Down House, 582 & 583 n.18

Innes, John Brodie: visits Down House, 582 & 583 n.18

*Ipomoea purpurea*: self-fertilisation impairs fertility, 471 & 472 n.14

Jackson, Henry: comments on *Expression*, 12–13 & 13 nn.2–7; G.H. Darwin's neighbour at Trinity College, Cambridge, 438 & 439 n.6

Jackson, John Hughlings, xix, 550 & n.2

Jenkin, Henry Charles Fleeming: CD thanks for his *Electricity and magnetism*, 195–6 & 196 n.2; wrote the wittiest review of *Origin*, 196 & n.3

Jenkins, John Edward: *Ginx's baby*, 121 n.5

Jenyns, George: anecdotes prompted by *Expression*, 179–80 & 180 n.1

Jenyns, Leonard. *See* Blomefield, Leonard

Johnson, Samuel, 36 n.7, 122 n.5

Johnston, Fowell Buxton: observations on *Descent*,

- Michelet, Jules: illness, 119 n.3, 560 n.2
- Mill, James: urged J.S. Mill never to express his religious convictions, 461 & 462 n.4
- Mill, John Stuart: CD envies J.J. Weir his acquaintance with, 227; death of, 228 n.5; expression when concentrating, 350 & 352 n.3; influence increased through silence on religious beliefs, xxii, 461 & 462 n.4, 465 & 466 n.4; principle of association, 351 & 352 n.5
- Miller, William Allen: death of (1870), 380 & 381 n.7
- Mimosa*: CD experiments with leaf movement, 335 & 336 n.10; W.E. Darwin continues CD's experiments on, 340 & 341 n.2, 349-50, 358-9 & 359 n.4; effect of water on leaves, 331 & 332 n.6; sleep movements, 37 & n.6; *M. albida*, 468 & n.4; *M. albida*, CD cossets, 520, 521; *M. albida*, CD receives from Kew, 384-5 & 385 n.3, 399 & n.5, 457, 479 & 481 n.4, 485, 490 & 491 n.2, 493 & 494 n.4, 507 & n.2, 548 n.7; *M. albida*, movement, 519-20 & nn.1-2, 520; *M. albida*, sensitivity to water, 360 & 361 nn.14-15, 378, 382 & n.2; *M. bubal*, CD seeks from Kew, 457; *M. marginata* (*M. schleidenii*), 439 & n.1; *M. pudica*, bloom, 470 & 472 n.6; *M. pudica*, movement of leaves, 520; *M. sensitiva*, CD recalls in Brazil, 378
- Mirabilis longiflora*, 359
- Mishnah Peah: ownership of grain in ant holes, 346 & 348 n.4, 355
- Mitchell, Silas Weir, 416 & 417 n.8
- Mivart, St George Jackson: criticised CD's views on rudimentary structures, 393 & 394 n.9; hostile review of *Descent* in *Quarterly Review*, 193 & 194 n.3, 195 & n.7; T.H. Huxley's riposte to, 191 & 192 n.7; opposed to CD's theories, 246 & 248 n.3
- Moggridge, John Traherne: ants may be deterred by a finger, xix, 300 & 301 n.3; believes instinct arises from inherited experience, disagreeing with A.R. Wallace, xix, 62 & nn.2-3; continues study of trapdoor spiders, 119 & 120 n.2, 291 & nn.3-5; CD and J.D. Hooker intrigued that seeds stored in ants' nests do not germinate, 82 & n.3, 82 & 83 n.2; CD experiments with effect of formic acid on germination of seeds, 119 & 120 n.1; CD sends observations on ants to J.D. Hague, 186 & n.2, 268 & 269 n.2; experiments with effects of formic acid on seeds, 299 & 300 n.3, 301 & n.1, 343-6 & 347-8 nn.1-3, 346, 347, 355 & nn.1-2, 305-6 & 306 nn.1-3, 489-90 & 490 nn.2-5; *Harvesting ants and trap-door spiders*, 57 & 58 n.9, 62 & n.1, 82 & nn.2-3, 186 n.2; observes Californian trapdoor spider, 291 & n.4; *Ophrys apifera*, self-fertilisation, 299-300 &

*Moggridge, John Traherne, cont.*

300 n.5; *Ophrys apifera* var. *trollii* found in Reigate, 300 & n.6; *Ophrys insectifera*, sends CD German translation of paper on, 290–1 & 291 n.1. 299 & 300 n.4; winters in Menton for his health, 291 n.3, 300 n.2

Molina, Juan Ignacio: described huemul, 64 & n.2

Monk, Thomas James, 500 & n.2

monkeys: attention-seeking behaviour, 74 & n.2

*Monomorium pharaonis*, 157 n.3

Moore, Norman: prescribes colchicum for A. Parslow's gout, 98 & n.4

Moore, Samuel William: acknowledged in *Insectivorous plants*, 441 n.3; admires CD's works, 434–5; sends CD chlorophyll and globulin, 440 & 441 nn.2–3; supplies CD with animal substances for experiments, 384 & n.2, 396 & 397 n.5, 398 & n.1, 422 & 423 n.4, 429 & nn.2–5, 435 & n.3, 514 & n.3, 453 & n.2, 529 & nn.3–4; thanks CD for copies of his books, 440 & 441 n.1

Moore, William James: experiments on tumbling pigeons, 137 & n.1, 153 & 155 n.7

Morgan, Lewis Henry, 448 n.4

Morley, John: *Life of Voltaire*, 461 & 462 n.8

*Morning Post*: review of *Expression*, 587 & 588 n.7

Morse, Edward Sylvester: CD praises essay on Brachiopoda, 383 & nn.1–4; CD recommends paper on Brachiopoda to E. Haeckel, 406 & n.5; support for evolution, 377 & n.4

Moschkau, Alfred: asks CD to review forthcoming papers, 495, 528 & n.3, 577 & n.3, 575–6; CD sends *Origin* and *Descent*, 528, 541–2 & 542 n.2, 577, 579–80 & 580 n.2; CD's health prevents him from corresponding, 545; Harz mountain canaries, 528 & 528–9 n.5, 577 & n.5; lectures on Darwinism, 542, 580; recommends E. Haeckel's *Natürliche Schöpfungsgeschichte* in local journal, 542 & n.3, 580 & n.3; talking starling, 545 & n.2

Mostyn-Owen, Arthur: CD accidentally shot in the eye, 226 & n.5, 236 & 237 nn.3–4; decrease of game due to trimming of hedges, 226; finds sketch of CD by F. Biddulph, 226 & n.2; recommends charcoal water for health, 236–7; will hang CD's portrait alongside R.W. Darwin's, 236 & 237 n.2

Mostyn-Owen, Charles, 226 n.1, 237 n.5

Mostyn-Owen, Francis, 226 n.1, 237 n.5

Mostyn-Owen, William, Sr, 237 n.5

*Motacilla* (wagtail), 265 & 266 n.2; hybrids, 500 & n.2

Moulinié, Jean Jacques: ill-health compelled to abandon translation of *Expression*, 212 n.2, 563 n.2; C-F Reinwald pays his mother a lump sum for copyrights, 110 & 111 n.5; terminal illness af-

fecting quality of translation of *Origin*, 109–10 & 110–11 n.2; translation of *Descent* not ideal, 216 & n.2

Mudd, William, 457 n.3

Müller, Charles J., 477

Müller, Fritz: admires his brother's work on fertilisation of flowers, 213 & n.3; classification of Rhizocephala, 247 & 248–9 nn.11 & 14; cross- and self-fertilisation, experiments, xvi, 221 & 223 n.2; *Facts and arguments for Darwin* finally in profit, 407 & n.2; *Insectivorous plants*, presentation, 407 & n.5; studies mimicry in butterflies and natural history of termites, 221–2 & 223 n.8; works on Brazilian honey bees, 352–3 & 353 n.2

Müller, Hermann: admires *Expression*, 220–1; *Befruchtung der Blumen durch Insekten*, CD admires, 97–8 & 98 n.1, 204 & 205 n.1, 239 & n.2, 251 & 252 n.1, 407 & n.3; *Befruchtung der Blumen*, G. Bentham praises, 271 n.6, 275 n.1; *Befruchtung der Blumen*, CD orders for Royal Society, 204 & 205 n.5; *Befruchtung der Blumen*, CD praises to A.W. Bennett, 203 & n.1, 209–10 & 210 n.1; *Befruchtung der Blumen*, CD recommends to T.H. Farrer, F. Delpino and W. Ogle, 194 & n.1, 200 & n.1, 198 & 199 n.5, 205 & n.1; *Befruchtung der Blumen* includes review of literature, 204 & 205 n.3, 205 & n.2; *Befruchtung der Blumen*, reception, 213, 352 & 353 n.1; *Befruchtung der Blumen*, review in *Academy* (A.W. Bennett), 209–10 & 210 n.1, 352 & 353 n.1; *Corydalis*, sends CD report of R. Caspary's findings on fertilisation of, 275 & n.2; cross- and self-fertilisation, sends CD F. Müller's results and his own findings, xvi, 221–2 & 223 nn.2–7, 275 & 276 n.4; cross- and self-fertilisation, CD reaches similar conclusions, 239 & 240 n.3; *Cypripedium*, mechanism of fertilisation, 371 & n.3; CD arranges for G. Bentham's Linnean Society address to be sent to, 270; F. Delpino criticises methodology, 259 & 260 n.9, 264, 565–6 & 566 nn.9–10; genealogy of bees, 222 & 223 n.8; humble-bees, unable to pursue research due to plague of fieldmice, 98 & n.3; looks forward to CD's work on fertilisation, 251 & 252 n.2; F. Müller works on Brazilian honey bees, 352–3 & 353 n.2; *Nature*, receives copies in exchange for promise of contributions, 251 & 252 n.8; plant fertilisation, experiments suggested by CD, 221 & 223 n.5; secretion of nectar by grasses, 231 & 232 n.2; sends CD *Ranunculus ficaria bulbifera* in seed, 213 & n.4; thanks CD for sending papers, 274–5 & 275 n.1; *Viola tricolor* var. *arvensis*, fertilisation, 221–2 & 223 n.3, 251 & 252 nn.3–4

Müller, Johannes Peter: experiments on artificial digestion, 380 & 381 n.10

Cambridge University Press

- Murchison, Roderick Impey, 191 & 192 n.10
- Murie, James: cited in *Descent*, 134 n.2; CD subscribes to fund for, 134 & n.2
- Murray, John: CD asks to refrain from premature announcement of book on evils of interbreeding, xvii, 202 & n.1, 202 & n.2, 210; CD pays for presentations, 401 & n.2, 402 & 403 n.2, 407 & 409 n.2; CD prepares two small books that will sell sparingly, 403 & n.5; CD's publisher, 28 & n.2, 214 n.6, 564 n.6; *Climbing plants*, 2d ed., 121 n.3; *Coral reefs*, CD will approach to reprint if Smith, Elder decline, 543 & n.6; *Descent*, remaining stock, 519 & n.3; *Expression*, confusion about Italian translation, 65 n.2, 559 n.2; *Expression*, CD would make heavy corrections to new edition, 402–3; *Expression*, pays CD £1050 for first 7000 copies, 68 & nn.2–3; *Expression*, reprint, 109 n.6; *Expression*, supplies heliotypes for foreign editions, 61 n.3; *Expression*, unable to begin new edition as stocks remain unsold, 401; *Orchids*, sales, 407–9 & 409 n.3; published F. Müller's *Facts and arguments for Darwin*, 407 n.2; publishes T. Belt's *Naturalist in Nicaragua*, 312 & 313 n.2; publishes W.E. Gladstone's address on abstract science in England, France and Germany, 30 n.13; stocks of *Origin*, *Variation*, *Descent* and *Expression*, 408 & 409 n.4; trade sale, 54 & n.2, 402–3 & 403 n.3, 408; A.R. Wallace assumes to have initiated invitation to revise *Descent*, 513 & n.5
- musk ox (*Ovibos moschatus*): stamping, 16 & 17 n.2
- Myers, Arthur Thomas: attends séance with G.H. Darwin, 517–18 & 518 n.3
- Myers, Frederic William Henry: attends séance with G.H. Darwin, 518 n.5
- Myosotis*: fertilisation of *M. versicolor* and *M. minimus*, 221 & 223 n.6
- Myrmecocystus mexicanus*: H. Edwards's account of, 294 & n.2
- Mythimna pudorina*: feeds on *Glyceria fluitans*, 217 & 218 n.3, 232 n.1
- Nägeli, Carl Wilhelm: believes in native tendency to progressive development, 96 & n.5
- Napoleon III: Cannes boatman regards as a traitor, 80–1 & 81 n.9
- Nash, Wallis: winter reading room at Down School,
- Nasse, Christian Friedrich: cited in *Expression* 2d ed., 58 n.3
- Nathusius, Hermann Engelhard von: rudimentary horns of castrated sheep, 534 & n.7
- National Reformer*: reviewer puzzled by *Fair haven* [S. Butler], 173 & 174 n.5
- National School, Down: use of schoolroom as winter reading room, 517 & nn.1–3, 523–4 & 524 n.2, 525–6 & 526 nn.1–5, 544–5 & 545 n.1, 549 & nn.1–2
- Natural History Museum: scientists' memorial advocates that Kew retain its herbarium alongside National Museum's, 42–4 & 44–5 nn.2–5
- Nature*: A.W. Bennett resigns as subeditor, 121 & n.2, 125; A.W. Bennett suggested naturalists study fertilisation of plants by insects, 204 & 205 n.2; A.W. Bennett, biological subeditor, 205 n.2, 223 n.4; A.W. Bennett, fertilisation of *Viola tricolor*, 210 & n.4, 221 & 223 n.4, 223 & n.10, 232 nn.1 & 4, 251 & 252 n.8; J.S. Burdon Sanderson, contraction in leaves of *Dionaea*, 327 n.7; J.S. Burdon Sanderson, experiments with spontaneous generation, 262 & n.2; CD, 'Perception in the lower animals', 502 n.4; CD, cirripede males and complementary males, 390–4 & 394 nn.2–10, 441 & 443 n.2, 572 & 574 n.2; CD, rudimentary structures, 393–4 & 394 n.9, 406 & n.3; CD advises F.B. Goodacre to write to proposing museum of domestic animals, 68 & 69 n.3; CD publishes J.D. Hague's letters on ants' perception, xix, 91 n.1, 155–7 & 157 nn.1–3, 158 & 159 n.3, 186 & n.2, 269 n.3, 300 & 301 n.2; CD publishes squib ridiculing L. Agassiz's views, 90 & 91 n.2, 121 & 122 n.2; CD sends to G.H. Darwin in Cannes, 112; CD sends W. Huggins's letter on inherited instinct in dogs, xix, 69–71 & 71 nn.2–9, 71 & n.3, 72 & 73 n.1; CD, origin of instincts, 151–5 & 155 nn.2–10; G.H. Darwin, clarification of CD's letter on gradual disappearance of useless organs, 433 & n.2, 434 & nn.2–3, 436–7 & 437 n.4, 437; G.H. Darwin, human tendency to walk in a circle to the left when lost, 205 & 206 n.4; A. Dohrn's zoological station at Naples, 241 n.4; T.H. Farrer, floral morphology of *Coronilla*, 332 nn.3–4; homing instincts of animals, CD enters correspondence on, 123–4 & 124 n.2, 127; J.D. Hooker's election to Belgian Academy of Science, 27 & 28 n.7; H.H. Howorth, letters on distribution of volcanoes, 552–3 & 553 nn.1–2; inherited instinct, debate on, 206 & 206–7 n.1; instinct and perception in animals, correspondence, 237 & 238 nn.1–2; J.N. Lockyer, editor, 18 & 19 n.2, 121 n.2, 205 n.2, 221 & 223 n.4, 251 & 252 n.8; J.C. Maxwell, 'Final state of a system of molecules in motion', 419 n.4, 465 & 466 n.3; H. Müller receives in exchange for promise of contributions, 251 & 252 n.8; Naples zoological station, 241 n.4; A. Newton, coloration of cuckoo eggs, 266 n.3; Royal Society, minutes relating to payment of secretaries, 547 n.3; P.L. Sclater, principles for national museum of natural

- Orpington station: nearest station to Down, 315 n.3, 458 & n.4, 471, 507; parcels for Down House delivered to, 33, 37 & 38 n.8, 38
- Osler, William: researches composition of the blood, 302 & 303 n.7, 303 & n.3
- Owen, Richard: addresses Royal Society on elections and payment of secretaries, 530 & 532 n.3, 547 & n.2; CD's hostility to, 32 & 33 n.3; CD longs to hear more about 'the fiend', 535 & n.4; hostility towards CD and J.D. Hooker, 36 & n.8; national herbarium, dispute with J.D. Hooker on creation of, 30 n.8
- Oxalis*: *O. rosea*, F. Hildebrand investigates fertilisation of, 229 n.6; *O. sensitiva* (*Biophytum umbraculum*), CD obtains seedlings from Kew and requests seed, 57 & n.5, 328 & n.3, 333 & n.7, 339 & n.2, 548 n.7
- Paget, James: cited in *Descent* on long eyebrow hairs being a family trait, 416 & 417 n.6; CD thinks children born circumcised may demonstrate inheritance, 58–9 & 59 nn.2–3; B.T. Lowne differs from views on excretion, 241 & 242 n.3; regards G. Henslow's case as hopeless, 170 & n.2; sends CD drawings of unusually hairy ear that may illustrate reversion, 46 & 47 n.1, 47, 49; sends CD passage from Chaucer, 14 & n.2; subscribes to assist T.H. Huxley, 189 n.4, 591 & n.4; welcomes *Expression*, 109 & n.3
- Paley, William: CD studied logic of at Cambridge, xix, 234 & 235 n.7
- Pall Mall Gazette*: review of *Expression*, 588
- Panagaeus crux-major*, 341 & 342 n.3
- pangenes hypothesis: CD continues to believe in, 241 & 242 n.2; CD's notes in copy of J. Paget's *Lectures*, 242 n.3; F. Galton attempt to prove by transfusing rabbits, 25 & 26 n.10; E.E. Klein's discovery about toad's ova has no bearing on, 2 & n.3; B.T. Lowne thinks extremely probable, 241 & 242 n.2; theory has been reviled but CD continues to believe that generation of cells determines inheritance, 49 & n.5
- Papilio sarpedon* (*Graphium sarpedon*): G. Kreffit sends CD photograph of, 201 & 202 n.5
- Parkes, Henry: G. Kreffit obtains CD's autograph for, 363 & n.6, 482 & 483 n.1; supports Australian Museum's explorations, 482
- Parslow, Arthur: N. Moore prescribes colchicum for treatment of gout, 98 & n.4
- Parslow, Joseph: CD's butler, 98 n.4
- Pascal, Blaise: mastery of style achieved by many revisions, 215 & n.4
- Passer montanus*, 343 n.10
- Payne, George: T.H. Farrer's gardener, CD consults on effect of water on leaves, 321 & n.3, 322, 324, 331 & 332 n.6, 338 & n.2
- Pearson, Charles, 526 n.4
- Pedicularis canadensis*: fertilisation, 526 & n.1
- Peel, Jonathan: comments on *Descent*, 533 & 534 nn.1–8; lonk sheep, females lose horns, 533 & 534 n.5, 540 & n.2
- Peel, Robert: died from perforated appendix, 533 & 534 n.2
- Pelargonium zonale*: CD doses with carbonate of ammonia, 26–7 & 27 n.2
- Pengelly, William: cleverness and homing instincts of dogs, 127–8, 131; CD recalls meeting in Torquay, 131 & n.2; CD sends five guineas for testimonial, 541 & n.1
- Perry, Charles, bishop of Melbourne: opposition to Darwinism, 291–2 & 294 n.2
- Petunia violacea* (*P. integrifolia*), 359 & 360 n.4
- Pflüger, Eduard Friedrich Wilhelm: experiments on reflexes of decapitated frogs, 38 & 39 n.4
- Phalanger*, 482 & 483 n.8
- Phaseolus*: *P. multiflorus* (*P. coccineus*), CD investigates cultivation in Italy, 198 & 199 n.4; *P. multiflorus*, J.D. Hooker identifies for CD, 359 & 360 n.2; *P. multiflorus*, intercrossing, 258 & 259 n.6, 565 & 566 n.6; *P. vulgaris*, 359 & 360 n.5
- Philosophical Club, Royal Society of London, 479 & 481 n.8
- Philosophical Transactions of the Royal Society of London*: T.H. Huxley arranges presentation to Naples

- Philosophical Transactions of the Royal Society of London*, cont.
- Zoological Station, 505 & n.6; V.O. Kovalevsky, 'Osteology of the Hyopotamidae', 219 & 220 n.5, 224 & 225 n.2
- Phoebus, Philipp: study of hay fever, 280 & n.3
- photography: K. von Baer sends CD his photograph and requests CD's *carte de visite*, 203 & n.2; T.L. Brunton studies photograph of Dresden painting, 527 & n.2; A.A.L.P. Cochrane will take photographic equipment on West Pacific cruise, 244; E.D. Cope, with fossil found in Wyoming, sent by T. Meehan, 101 & 103 n.1, 102, 130 & 131 n.2; J. Crichton-Browne photographs his wife demonstrating expressions, 175 & 176 n.1, 177; J. Crichton-Browne plans photographic study of general paralysis, 550; J. Crichton-Browne sends CD photographs of inmates of West Riding Asylum, 97 n.4, 99 & 101 n.5, 100, 109; CD found photographs incomparably better than drawing for exhibiting expression, 551; CD offers to send photograph for Hungarian translation of *Origin*, 250–1 & 251 n.3; CD sends G. Krefft's photographs of aboriginal skulls to G. Busk, 74 & 75 n.3; CD sends his photograph to J. Farr, 281, 285–6; CD sends photographs to T. Meehan and J. Rosengarten, 101; CD sends photographs to Utrecht students with thanks for their appreciation, 134; CD thanks unknown correspondent for charming photograph of children, 79; CD's portrait published in German translation of *Origin*, 203 n.3; N. Doedes and J.C. Costerus send CD their photograph, *frontispiece*, 141; J.L.H. Down sends CD photograph of ear of microcephalic idiot, 546 & n.2; *Expression*, photograph demonstrating grief, 19 n.5; E. Haeckel sends CD photograph of his children, 443 & 444 n.11, 574 & n.11; R. Hennig seeks CD's photograph for popular history of progress of natural science, 235–6; G. Krefft sends CD photograph of fossil human molar, 293 & 294 n.7; G. Krefft sends CD photograph of his son, 478 & 479 n.6; G. Krefft sends CD photographs of Queensland blacks and men of New Guinea, 201 & 202 n.7 & 9, 290 & n.2; F. von Luschan sends CD photographs of human fossils, 203–4 & 204 n.1; *Papilio sarpedon*, G. Krefft sends CD photograph of, 201 & 202 n.5; A. Reuter sends CD photograph of diseased roebuck, 161, 163 & nn.2–4, 178; Szekely of Transylvania, L. Felméri sends photographs of, 22 & 23 n.6; W.S. Wade sends CD photographs of inherited ankyloblepharon, 373–4 & 377 n.1, 374–6, 465 & n.2
- Phrynosoma*: A.R. Wallace brings living specimen from California to British Museum, 253 & n.3, 254 & n.3
- Physostigma venenosum* (calabar bean): physiological effects of, 262 & 263 n.4
- Pictet de la Rive, François Jules, 282 n.2, 567 n.2
- Pieris*: *P. rapae* and *P. napi* fertilise *Viola tricolor*, 251 & 252 n.4
- pigeons: tumbling, 137 & n.3, 153–4 & 155 nn.6 & 8
- pigs: draw back ears when fighting, 106 & 108 n.10, 113, 115–16 & 116 n.5; interbreeding of common and New Guinea species, 483
- Pisum sativum*: CD investigates cultivation in Italy, 198 & 199 n.4; intercrossing, 258 & 259 n.7, 565 & 566 n.7; often visited by bees, 264 & n.3
- Pit River Indians: expressions, 255 & 257 nn.6–8
- Plato: *Laws*, 372 & 373 n.8
- Playfair, Lyon: Liebig memorial appeal, 227 & n.4
- Poa*: *P. annua*, petal of *Glyceria fluitans* resembles, 252 & n.9; *P. annua*, secretion of nectar, 231–2 & 232 n.3; *P. aquatica* probably has nectar, 218 n.3
- Polygonaceae: leaf arrangement, 410 & 415 n.5, 411
- Polyommatus*: fertilises *Viola tricolor*, 251 & 252 n.4
- Pope, Alexander: *Essay on man*, 281 & n.1
- Popular Science Monthly*: J. Fiske, 'Agassiz and Darwinism', 473 & nn.5–6, 484 & 485 n.5
- Pouchet, Félix-Archimède, 282 n.2, 567 n.2
- Powell, Henry: supported reading room at Down school, 525 & 526 n.3
- Pozzi, Samuel Jean: word for toad does not express swelling in other European languages, 211 & 212 n.4, 218 & n.1
- Praxiteles, 416 & 417 n.5
- Primula*: cross- and self-fertilisation, 217 & n.1; *P. sinensis*, absorption by glandular hairs, 440 n.4
- Proceedings of the Academy of Natural Sciences of Philadelphia*: O.C. Marsh, fossil finds in America, 55 & n.2; T. Meehan, fertilisation of asparagus, 232 n.1
- Proceedings of the Royal Geographical Society*: R. Strachey, 'On the scope of scientific geography', 36 & n.7, 37 & n.3
- Proceedings of the Royal Society*: H. Airy, leaf arrangement (abstract), 51 n.2, 125–6 & 127 n.1, 415 n.11; J.S. Burdon Sanderson, experiments on electrical phenomena in leaves of *Dionaea*, 327 n.7; J.D. Macdonald, 'On the distribution of invertebrates in relation to the theory of evolution', 63 & nn.2–3
- Proceedings of the Zoological Society of London*: R. Meldola, variable protective colouring in insects, 322 n.1
- Promuba yuccasella* (*Tegeticula yuccasella*), 252 n.6
- Prunella modulara* (hedge sparrow), 265 & 266 n.2
- Prunus laurocerasus*: hive-bees visit undersides of young leaves, 316 & n.3

Editors Frederick Burkhardt, James A. Secord, Janet Browne, Samantha Evans, Shelley Innes, Francis Neary, Alison M. Pearn, Anne Secord and Paul White

Index

[More information](#)

- Pryor, Marlborough Robert: friend of F. Darwin, 98; visits Down, 99 n.6
- Pterostylis*: T.F. Cheeseman's paper on New Zealand species, 269–70 & 270 nn.1 & 3, 371 & nn.2 & 4; fertilisation, 269–70 & 270 nn.1 & 3
- puff adder (*Clotho arietans*, *Bitis arietans*), 212, 218 & n.2
- Pyronia tithonus*. See *Satyris tithonus*
- Quarterly Journal of Science*: A.R. Wallace, review of *Expression*, 38 & 39 n.2, 42 & n.1, 588
- Quarterly Review*: review of *Descent* [St G.J. Mivart], 193 & 194 n.3, 195 & n.7
- Quatrefages, Armand de: CD once again rejected by Académie des sciences, 282 & n.2, 567 & n.2, 285 & n.2
- Quetelet, Adolphe: distribution of variations about a mean, 235 n.10, 393 & 394 n.10, 405 n.2; laws of distribution, 436 & 437 n.4
- Quinn, Matthew, bishop of Bathurst: gives G. Krefft primitive weapons, 317–18 & 320 n.3
- Rallus aquaticus* (water rail), 117 & 118 n.7
- Ranunculus ficaria bulbifera*: H. Müller sends CD specimen in seed, 213 & n.4
- rattlesnakes: Californian backwoodsmen fashion device to replicate rattle, 254–5 & 257 n.2; learn to avoid traps, 416 & 417 n.8, 417
- Ray Society: A.W. Bennett approached to fund survey of literature on fertilisation of flowers, 210 & n.3; CD suggests asking members to contribute to save Naples Zoological Station, 503 & 504 n.5
- Rayner, Thomas: hydropathic establishment in Malvern, 215 & n.6
- Reade, Charles: *The cloister and the hearth*, 3 & 6 n.14
- Reade, William Winwood: *African sketch-book* enjoyed, 214 & 215 n.1, 362 & n.3; *African sketch-book* supports CD's view that sexual selection contributed to differences between human races, 269 & n.1; enjoyed G.H. Darwin's article on marriage, 356 & 357 n.2; leaves England for Egypt and the east, 269; masters of style made many revisions, 215 & nn.4–5; reports Ashanti war for *The Times*, 362 & 363 n.4; returns from Egypt because of eye disease, 356 & n.1; takes hydropathic cure in Malvern, 215 & n.6; visits CD in London, 136 & 137 nn.2–3
- Reeks, Henry: blushing, 104–5 & 107 n.4; children 'pounding', 104, 113, 115; comments on *Expression*, xviii, 104–7 & 107 nn.1–20, 113, 115; domestic pigs draw back ears when fighting, 106 & 108 n.10, 113; effect of colour on animals, 106; expedition to Newfoundland, 104–5 & 108 nn.5–7; scratching the head, 105–6 & 108 n.8
- Reeks, John, 106 & 108 n.11
- Reeks, Julia Ann, 106 & 108 n.12
- Reeks, William L.P., 104 & 107 n.3, 115 & 116 n.4
- Reichenbach, Heinrich Gustav: translates J.T. Moggridge's paper on *O. insectifera*, 291
- Rein, Johannes Justus, 584, 585
- reindeer: horns unaffected by castration, 534 & n.8; shedding of horns, 501 & 502 n.2
- Reinwald, Charles-Ferdinand: *Descent*, offers CD £40 for translation rights for 2d edition, 110; *Descent*, regrets translation was not more literary, 216 & n.2; *Expression*, translation by S.J. Pozzi progresses slowly, 110 & 111 n.8, 216 & 217 n.3; *Expression*, French edition, 211 & 212 n.3, 563 & n.3; *Journal of researches*, offers royalty for new edition of E. Barbier's translation, 216 & 217 n.6; *Orchids*, paid J. Murray for electrotypes, 409 & 410 n.8; plans new translation of *Origin* and new edition of *Descent*, 109–10 & 110–11 nn.2–8
- Rendu, Louis: may have been plagiarised by J.D. Forbes, 382 n.4
- Reuter, Adolph: sends CD photograph of diseased roebuck, 161, 163 & nn.2–4, 178
- Revalenta (health food), 2 & n.2
- Revue des deux mondes*, 89 & n.3; G. Lemattre, 'La transfusion du sang et la vie des élémens de l'organisme', 7;27; C. Robin, observations on recently dead bodies, 5 & 7 n.27
- Revue scientifique de la France et de l'étranger*: L.A. Dumont, E. Haeckel's phylogenetic classificatory system, 87 & n.6, 559 & 560 n.6; E. Haeckel, progress and purpose of zoology, 87 & n.5, 559 & 560 n.5; review of *Expression* (L.A. Dumont), 588
- Rhinanthus*: H. Müller studies, 275 & 276 n.4
- Rhingia rostrata*: fertilises *Viola tricolor*, 251 & 252 n.4
- Rhipidura*: exhibition of feathers, 9 & 12 n.17
- Rhizocephala: A. Dohrn researches, 56
- Ribera, Jusepe de: depicts expressive squint, 527 & n.2
- Riley, Charles Valentine: discovers moth fertilising a yucca, 251 & 252 n.6; reported coniferous pollen in St Louis, 278 & 279 n.9; support for CD's theories, 89 & n.4
- Robin, Charles: observations on recently dead bodies, 5 & n.27
- Robinia*: *R. pseudacacia*, effect of water on leaves, 548 & 549 n.3
- Robinson, William: editor, *Garden* magazine, 250 & n.1
- Rollisson, George and William: CD orders plants from, 486 & n.6; supply CD with *Desmodium* plants, 455 & 456 nn.2–3, 470 & 472 n.4

- Romanes, George John: instinct in alligators, 207 n.3
- Rosenbusch, Harry: microscopical physiography of minerals, book sent to CD by E. Koch, 548 & n.2
- Rosengarten, Joseph George: CD sends his photograph, 101 & 103 n.1
- Rostratula benghalensis*. See *Rhynchaea capensis*
- Rous, Henry John, 114 & 115 n.4
- Rousseau, Jean Jacques: bold in print, timid in society, 40, 556; mastery of style achieved by many revisions, 215 & n.5
- Royal Academy of Arts: Old Masters exhibition, 1873, 72 & n.1
- Royal Botanic Garden, Calcutta: G. King, superintendent, 77 n.1
- Royal Botanic Gardens, Kew: herbarium, scientists' memorial strongly advocates its retention, 42–4 & 44–5 nn.2–5; J.D. Hooker, director, 339, 445 n.1, 448 n.3, 467 n.4; Museums of Structural and Economic Botany, 44 & 45 n.5; difficulty of exhibiting cultivated varieties, 68
- Royal Commission on Scientific Instruction and the Advancement of Science, 499 & n.2
- Royal Hungarian Natural Science Association: commissions translations of *Origin* and *Descent*, 240 & n.2
- Royal Institution of Great Britain: M. Foster, Fullarian Professor of physiology, 192 n.2
- Royal School of Mines: T.H. Huxley professor of natural history, 191 & 192 n.5
- Royal Society of London: G.B. Airy president, 20 & 21 n.1; H. Airy's paper rejected for publication in *Transactions*, abstract published in *Proceedings*, 410 & 415 nn.2 & 11; G.J. Allman proposed for Royal Medal, 273 & 274 n.8, 274 & n.2; W. Cavendish nominated against J.D. Hooker for election as president, 29 & 30–1 nn.15–19, 32 & 33 n.3; CD communicates H. Airy's paper on leaf arrangement, 20 & 21 n.1; CD communicates H. Airy's paper on leaf arrangement, 51 & n.1; CD fellow of, 379 & 380 n.7; CD notes that in the past it would not have accepted J.D. Macdonald's paper on distribution of invertebrates, 63 & n.2; CD orders H. Müller's book for, 204 & 205 n.5; CD suggests asking members to contribute to save Naples Zoological Station, 503 & 504 n.5; F. Galton sends questionnaire to members of council, 233; A. Gray elected foreign member, 273 & 274 n.6; J.D. Hooker elected president, 29 & 30–1 nn.15–19, 32 & 33 n.3, 50 & n.3, 57 & 58 n.12, 67 & n.3, 274 n.8, 521 n.5, 532 n.2; J.D. Hooker exhibits *Gasteria* at soirée, 537 & n.1; J.D. Hooker, inaugural address, 521 & n.5, 530 & 532 n.2, 535 & n.4, 547; T.H. Huxley, secretary, 191 & 192 n.5, 195 & n.8, 274 n.8, 532 n.2; T.H. Huxley lobbied against award of Copley Medal to J.D. Forbes, 191 & 192 nn.9–12; influx of papers on evolution, 136; R. Owen addresses on elections and payment of secretaries, 547 & nn.2–4; payment of secretaries proposed by Isaac Newton, 547 & n.4; Philosophical Club, 479 & 481 n.8; G.G. Stokes, secretary, 51 & n.1, 415 n.10
- Royal United Services Museum: model of Battle of Waterloo, 171 & 172 n.3
- Royer, Clémence Auguste: translation of *Origin*, 3d ed., 109 & 111 n.3
- Ruck, Amy, 349; CD describes as having soul of a true naturalist, 335 & 336 n.8; CD sends regards to, 338 & n.7; E.A. Darwin suggests Francis wakes her by playing his flute, 423; engaged to F. Darwin, xvii, 172 & 173 n.2, 389 & 390 n.1, 403 & n.3, 428 n.5; finds *Lathyrus pratensis*, 348–9 & 349 n.5; observes wormcastings for CD, 330 & n.5, 336 n.8; sets up worm garden with F. Darwin, xvii, 330; with F. Darwin, searches for *Lathyrus maritimus*, 329 & 330 n.2
- Ruck, Lawrence, 424 n.2
- Ruck, Mary Anne, 329 & 330 n.2, 349 & n.8, 424 n.2; CD sends regards to, 338 & n.7
- Ruck, Richard Matthews, 349 & n.8; F. Darwin visits at Chatham, 384 & n.3
- Russell, Arthur: sends CD parcel of fish, 295–6 & n.1; varieties of carp in Germany, 224 & nn.2–3
- Russell, Fanny, 469 & 470 n.6
- Russell, Hastings, duke of Bedford, 224 n.4
- Russell, John, 1st Earl Russell: J.D. Hooker would like CD to meet, 469 & 470 n.6, 473 & 475 n.6
- Rüttimeyer, Ludwig: encourages V.O. Kovalevsky to classify extinct Ungulata, 219 & 220 n.2
- Rye, Edward Caldwell: distribution of sexes in *Malthodes*, 357 & 357–8 nn.1–4
- Rhynchaea capensis* (*Rostratula benghalensis*): illustrated in *Descent*, 117 & 118 n.8
- rytina (*Rytina stelleri*, now *Hydrodamalis gigas*): extinction, 88 & n.3
- Sabine, Edward: invited W. Cavendish to stand as president of Royal Society, 29 & 31 n.19
- Sacculina*: morphology, 248 & 249 n.15
- Sachs, Julius: admires H. Müller's *Befruchtung der Blumen*, 213 & n.3; *Lehrbuch der Botanik*, CD admires, 32 & 33 n.7, 37 & n.5; *Lehrbuch der Botanik*, CD offers to lend to H. Airy, 51 & 52 n.4; *Lehrbuch der Botanik*, W.T. Thiselton-Dyer and A.W. Bennett translate, 32 & 33 n.6, 36 & n.2, 125 & n.3; supports CD's theories, 89 & n.4
- Sagitta*, 219 & 220 n.6; difficulty in classifying, 225 &

Darwin's 'Commodities versus labour' discussed, 449 & n.3; F.J. Wedgwood reviews [S. Butler], *Fair haven*, 518 & 519 n.9
- Spencer, Herbert: cited in *Expression*, 193 & 194 n.3, 195 & n.6; concerned at hostile review of *Expression* in *Edinburgh Review*, 184 & n.4; criticised in *Edinburgh Review* article on *Expression* [T.S. Baynes], 195 & n.6, 444 n.6; CD enjoys attack on W.E. Gladstone in *Contemporary Review*, 475 & 476 nn.5–6; CD supports his view on angle of flowerheads, 475 & 476 n.2; CD thanks for *Descriptive sociology*, 339 & n.2; CD wonders if he accepts his view on inherited secondary sexual characteristics, 475–6 & 476 n.7; J. Fiske seeks to popularise ideas of and meets in London, 472 & 473 n.3; T.H. Huxley, hopes M. Foster can relieve of some responsibilities, 192 & n.2; T.H. Huxley, subscription to assist, xx, 167 & n.3, 167, 168, 189 n.4, 192 & n.1, 582 & 583 n.16, 591; introduced J.G. Rosengarten to Darwin family, 103 n.1; J.H. Stirling critical of, 196 & 197 n.4; *Study of sociology*, CD and A.R. Wallace admire, 475 & 476 n.4, 513 & n.6, 515 & 516 n.5; theory of correlation of forces, 8 & 12 n.13
- Spergula arvensis*: effects of formic acid on seed, 305 & 306 n.2
- Sphinx ligustri*: feeding preferences, 7
- Spiller, George: microscopes, 448 & 449 n.5
- Spinoza, Baruch: quoted by A. Dohrn in review of *Expression*, 246–7 & 248 n.8
- spitz dog, 212, 218
- Spix, Johann Baptist von: (with K. von Martius), blushing in Brazilian natives, cited in *Expression*, 104 & 107 n.4, 105
- Spottiswoode, Eliza Taylor, 169 & n.2
- Spottiswoode, William: G.B. Airy supports candidature for presidency of Royal Society, 50 & n.3; CD calls on in London, 582 & 583 n.15; T.H. Huxley, subscription to assist, xx, 161 & n.2, 163 & 162–3 nn.2–3, 167 & n.2, 167–8 & 168 nn.2–7, 168 & 169 n.2, 169 & nn.2–3, 189 n.4, 591; proposes J. Tyndall for presidency of BAAS, 399 & 400 n.7
- Sprengel, Christian Konrad: failed to appreciate importance of transport of pollen, 204 & 205 n.4; secretion of nectar by grasses, 231 & 232 n.2
- Spyers, Thomas, 273 & n.4
- Standard*: review of *Expression*, 587 & 588 n.3
- Stanley, Edward George Geoffrey Smith, 14th earl of Derby, 243 & 244 n.10
- Stanley, Edward Smith, 13th earl of Derby, 244 n.10
- Stanley, Mary Catherine, countess of Derby: sends CD fish from A. Russell, 295–6 & n.1
- Steele, Lawrence Litchfield: G.H. Darwin meets, 428 & n.6
- Steenstrup, Japetus, 282 n.2, 567 n.2
- Stenhouse, John: Liebig memorial appeal, 227 & n.4
- Stephen, Leslie: favourably impressed by *Fair haven*, 173; knows S. Butler is the author of *Fair haven*, 148, 173 & 174 n.4; lunches with CD in London, 148, 582 & 583 n.10
- Steudel, Ernst Gottlieb: *Desmodium*, 468 n.5; *Nomenclator botanicus*, 73 & 74 n.2, 462 & 463 nn.3–4
- Stirling, James Hutchison: convinced Hegelian, 196 & 197 n.3; critical of T.H. Huxley and W. Hamilton, 197 & 198 nn.5 & 6; CD wrongly suspects of writing hostile review of *Expression*, 193 & 194 n.2, 195 & n.6, 196 & 197 n.2, 242 & 243 n.2, 245 & n.2; unimpressed by G. Cupples's poems, 198 n.10
- Stoddard, Charles Warren, 257 & 258 n.11
- Stokes, George Gabriel: secretary, Royal Society of London, 51 & n.1, 415 n.10; sends H. Airy criti-

- cisms of his paper, 414 & 415 n.10
- Strachey, Edward: meets G.H. Darwin in Cannes, 112 & n.6
- Strachey, Henry, 354 n.1
- Strachey, Johanna Catherine: rain damage to grapes in South Africa, 353–4 & 354 n.1
- Strachey, Richard, 400; cutting bees of Himalayas, 539 & nn.2–3, 540 & 541 n.2; encourages G.H. Darwin's work on portable globe, 354 & n.3, 355–6; hopes Geographical Society will finance trials on G.H. Darwin's portable globe, 539 & 540 n.5, 540 & 541 n.4; lodges with J.D. Hooker at BAAS Bradford meeting, 399 & 400 n.16; 'On the scope of scientific geography' praises achievements of CD and J.D. Hooker, 36 & n.7, 37 & n.3; rain damage to grapes in South Africa and India, 353–4 & 354 nn.1–2; snails descend Simla oak by threads, 539 & n.4; visits Down with J.D. Hooker, 273 & 274 n.11, 274 & n.3, 314 & 315 n.3, 315 & n.3, 328 & n.1, 332, 338 & n.3, 339 & n.1, 343 & n.2, 539 & n.1, 582 & 583 n.26
- Strauss, David Friedrich: resurrection of Jesus a group hallucination, 149 n.5
- Strix flammea*. See barn owl
- Sullivan, Bartholomew James: fighting stallions in Falklands, 118 n.10
- Sus scrofa*, 483 & n.12
- Swallow, George Clinton: disputes CD's account of evolution of moral nature of man, 372 & 373 n.4, 377
- Swammerdam, Jan, 115 & 116 n.2
- Swanwick, Eustace Maclean: inherited instinct in a cat, 71 & n.2
- Swift, Jonathan, 197 & 198 nn.8 & 11
- Swinhoe, Robert: cited in *Expression*, 139 n.6; expressions of Chinese, 138–9 & 139 nn.1–10; tickling of the eyes in China, xviii, 138; Woolnerian tip rare in China, 138 & 139 n.8
- Symonds, William Samuel, 187 & n.6
- Synnot, Henrietta Louise, 79 & 81 nn.1, 4 & 14
- Szekely (Szekler): L. Felméri observes expressions, 22 & nn.2–3
- Tabernaemontana echinata* (*T. siphilitica*): cross- and self-fertilisation, 221 & 223 n.2, 222
- Tait, Peter Guthrie: letter to *Nature* alleges that J. Tyndall accused J.D. Forbes of plagiarism, 382 & n.4, 385 & 386 n.4, 400 n.6
- teasel (*Dipsacus sylvestris*, *D. fullonum sylvestris*): leaf arrangement, 126 & 127 n.3
- Tegetmeier, William Bernhard: the most nutritive materials fail to support life when given alone, 429 n.2
- Telephorus* (*Cantharus*), 357 & n.2
- Tennent, James Emerson: cited in *Expression* on elephant weeping, 340 & n.1
- Tennyson, Alfred, 372 & 373 n.8
- Tetigometra virescens*: relation to *Formica pubescens*, 181 n.3, 562 n.3
- Thackeray, William Makepeace: mastery of style achieved without many revisions, 215 & n.5; visits CD in London, 582 & 583 n.10
- Thecidium* (*Lacazella*), 219 & 220 n.6
- Thiselton-Dyer, William Turner: absorption by glandular hairs of plants, 29 & 31 n.22, 33, 36 & n.3, 37; *Angalis arvensis*, whether closing of flowers is analogous to *Cassia*, 536 & n.5; W. Caruthers offends, 29 & 30 n.9; cited on *Lobelia* in *Cross and self fertilisation*, 360 n.6; CD seeks views on absorption by glandular hairs, 57 & n.7; CD thanks for notes on *Desmodium* and *Robinia*, 548 & 549 nn.2–4; edits Hooker's *Flora of British India*, 360 n.6, 383 n.8; *Eucalyptus*, whether dichogamous, 360 & 361 n.13; identifies common plants for CD, 378 & 379 n.1; identifies species of *Cassia* for CD, 534 & 535 n.1, 536 & nn.1–3; lodges with J.D. Hooker at BAAS Bradford meeting, 399 & 400 n.16; *Mimosa albida*, experiments with effects of water on, 382 & n.2; *Nepenthes*, experiments on with J.D. Hooker, 382, 466 & n.1, 469 & 470 nn.2–4, 521 & n.4; *Nepenthes*, sends CD data on, 460 & n.2; works with A.W. Bennett on translating J. Sachs's *Lehrbuch der Botanik*, 30 & 31 n.22, 33 & n.6, 36 & n.2, 37 & n.4
- Thomson, Charles Wylie: J.V. Carus deputises for, 209 & n.5; *Depths of the sea*, C. Lyell lends to S.V. Wood, 386 & 389 nn.2 & 4; *Scalpellum regium*, rudimentary males, 390 & 394 n.2
- Thornbery, Gregory Beddome: swinging of arms during walking, 142–3 & 143 n.1
- Thornton, Marianne, 81 n.4
- Thunnus thymus*: Aristotle observed swimming habits in Black Sea, 205 & 206 n.4
- Thylacoleo*, 293 & 294 n.7
- The Times*: BAAS, Bradford meeting, 400 n.10, 419 nn. 4–5; J.S. Burdon Sanderson, address on physiology to Congress of British Medical Association, 333 & 334 n.2; Darwins go back to taking, 582 & 583 n.23; W.W. Reade reports on Ashanti war, 362 & 363 n.4; review of *Expression*, 587
- Tisley and Spiller (Samuel Charles Tisley and George Spiller): microscopes, 448 & 449 n.5
- toads: European words for, 2–3 & 6 nn.5–7, 212 n.4, 563 n.4s; E.E. Klein's discovery about ova has no bearing on pangenesis, 2 & n.3
- Toise, chief of the T'Slambie, 18
- Tollemache, John: J.D. Hooker visits, 50 & n.2, 57
