## Subject index

- $\alpha$ -effect, 189
  - experimental detection, 204
  - generation of poloidal field, 258
    - dipole and sextupole ingredients, 259
  - in weak diffusion limit, 206
  - relation with helicity
    - under first-order smoothing, 202
- $\alpha\omega$ -dynamo, 231, 301
  - free modes of, 244, 261
  - with stasis, 260
- $\alpha^2$ -dynamo, 231
  - free modes of, 233
    - with anisotropic  $\alpha$ , 236
  - in a spherical geometry, 238
  - with antisymmetric  $\alpha$ , 241
- $\beta$ -effect
  - in weak diffusion limit, 208
  - under first-order smoothing, 205
- B**-lines, 21
- ABC-flow, 237
- accelerated ohmic decay, 12
- accretion discs, 409
- Alfvén's theorem, 59
- Alfvén scaling, 412
- Alfvén waves, 316
- alpha effect, 191
- Ampère's law, 36
- analogy with scalar transport, 64
- analogy with vorticity, 15, 62
- anelastic models, 400
- angular momentum operator, 30
- anisotropy, 231
- archaeomagnetism, 113
- astrophysical dynamos
  - direct numerical simulation (DNS), 400
- astrophysical magnetic fields, 121
