## Contents

<i>Preface</i>	<i>page xi</i>
<b>Introduction and Summary</b>	<b>1</b>
<b>1 Operator Algebras and Topologies</b>	<b>8</b>
1.1 Complex Hilbert Spaces	8
1.2 Bounded Linear Operators on $\mathbb{X}$	13
1.3 Spectral Theorem	25
1.4 Operator Topologies	30
1.5 Operator Algebras	32
1.6 Representations of Operator Algebras	36
1.7 Conclusion and Historical Notes	49
<b>2 Quantum Probability</b>	<b>50</b>
2.1 Bounded Linear Functionals	52
2.2 Quantum States	63
2.3 Quantum Observables	67
2.4 Quantum Probability Spaces	69
2.5 Quantum Measurements	74
2.6 Quantum Conditional Expectations	78
2.7 Conclusion and Historical Notes	80
<b>3 Quantum Stochastic Calculus</b>	<b>81</b>
3.1 Symmetric Fock and Guichardet Spaces	81
3.2 Quantum Itô Integrals	89
3.3 Quantum Noises	98
3.4 Quantum Stochastic Integrals	109
3.5 Quantum Stochastic Calculus	115
3.6 Conclusion and Historical Notes	118
<b>4 Quantum Stochastic Differential Equations</b>	<b>119</b>
4.1 QSDE of Hudson-Parthasarathy Type	119
4.2 Conventions and Preliminaries	121
4.3 Stochastic Itô Formulae	125
4.4 Strong and Mild Solutions	128

4.5	Existence and Uniqueness	129
4.6	An Example by Fagnola and Wills [FW00]	135
4.7	Unitary, Isometry, and Cocycle Properties	137
4.8	Approximating Solutions	143
4.9	A Solvable QSDE	150
4.10	Lyapunov Stability of QSDE	152
4.11	Conclusion and Historical Notes	159
<b>5</b>	<b>Quantum Markov Semigroups</b>	<b>160</b>
5.1	Semigroups of Bounded Linear Operators on Banach Spaces	161
5.2	Group of Unitary Operators	167
5.3	Linear Maps on $\mathcal{A}$	173
5.4	Complete Positivity	175
5.5	Quantum Dynamical Semigroups	188
5.6	Lindblad Master Equation	198
5.7	Conclusion and Historical Notes	200
<b>6</b>	<b>Minimal QDS</b>	<b>201</b>
6.1	Construction of Minimal Quantum Dynamical Semigroups (QDSs)	201
6.2	The Resolvent of the Minimal Semigroup	213
6.3	Markovian $\{\mathfrak{T}_t^{(min)}, t \geq 0\}$	216
6.4	Conclusion and Historical Notes	223
<b>7</b>	<b>Quantum Markov Processes</b>	<b>224</b>
7.1	Quantum Markov Processes	225
7.2	Quantum Markov Cocycles	229
7.3	Weak Quantum Markov Flows (WQMF)	231
7.4	Construction of WQMF	234
7.5	Central Weak Markov Flows	251
7.6	Additional Results for $\{k_t, t \geq 0\}$	256
7.7	Conclusion and Historical Notes	261
<b>8</b>	<b>Strong Quantum Markov Processes</b>	<b>262</b>
8.1	Quantum Stopping Times (QSTs)	263
8.2	Stopped Processes in Fock Spaces	271
8.3	Strong Quantum Markov Processes	286
8.4	Generalized Strong Quantum Markovian Properties	294
8.5	Martingale Problems	301
8.6	Lyapunov Stability	307
8.7	Conclusion and Historical Notes	312
<b>9</b>	<b>Invariant Normal States</b>	<b>313</b>
9.1	Prohorov Theorems	313
9.2	Invariances	317
9.3	Existence of Invariant States	318

<i>Contents</i>		ix
9.4	Uniqueness of the Invariant State	325
9.5	$\mathcal{F}(\mathfrak{X})$ , $\mathcal{M}(\mathfrak{X})$ , and $\mathcal{N}(\mathfrak{X})$	329
9.6	Conclusion and Historical Notes	333
<b>10</b>	<b>Recurrence and Transience</b>	334
10.1	Subharmonic Projections	335
10.2	Reduced QMS	343
10.3	Potentials	345
10.4	Recurrence and Transience	357
10.5	Conclusion and Historical Notes	371
<b>11</b>	<b>Ergodic Theory</b>	372
11.1	Ergodicity	372
11.2	Lower Bounds and Mean Lower Bounds	388
11.3	Conclusion and Historical Notes	396
	<i>Bibliography</i>	397
	<i>Index</i>	407
