978-1-107-06991-6 - Learning as a Generative Activity: Eight Learning
Strategies that Promote Understanding

Logan Fiorella and Richard E. Mayer

Index

[More information](#)

SUBJECT INDEX

- Academic learning, imagining in, 87–92
- Active learning situations, 4
- Analysis, 11
- Annotating, 199
- Application, 11
- Appropriate measures in research, 14
- Assessment of learning, 3–4
- Associative learning, 3, 5–6

- Behavioral activity, 3
- Betty’s Brain, 161

- Children, self-explaining and, 140–1
- Cognitive processes
 - drawing and, 76
 - enacting and, 171
 - in generative learning, 5–8
 - imagining and, 84
 - integrating (*See* Integrating)
 - mapping and, 47
 - organizing (*See* Organizing)
 - selecting (*See* Selecting)
 - self-explaining and, 129
 - self-testing and, 102
 - summarizing and, 25
 - teaching and, 156
- Computer-based learning
 - self-explaining in, 137–40
 - teaching in, 161–2
- Concept mapping
 - defined, 46–7
 - evidence for, 48–54
 - examples of, 40–43
 - research summary, 49–51
- Concrete manipulatives
 - in math education, 179–84
 - overview, 169–70
 - in science education, 179–84
 - text comprehension and, 177–9
- Constructive learning environments, 128–9
- Content of imagining, 83
- Creation, 11

- Decorative function of drawing, 66
- Distributed practice method, 198–9
- Drawing, 62–76
 - applications of, 63–4, 75–6
 - boundary conditions for, 63–4, 75
 - cognitive processes and, 76
 - control groups and, 68–74
 - decorative function, 66
 - defined, 63–67
 - effect sizes, 63–4
 - empirical rationale, 63–4
 - evidence for, 68–74
 - examples of, 63–5
 - explanative function, 66
 - fostering of learning by, 67–8
 - functions of, 66
 - guided drawing, 66
 - imagining compared, 84–5
 - integrating and, 76
 - learner-generated drawing, 66
 - organizational function, 66
 - organizing and, 76
 - overview, 62–4, 76
 - partial drawing, 67
 - representational function, 66
 - research summary, 69–70
 - selecting and, 76
 - supported drawing, 67

- Drawing (*cont.*)
 theoretical rationale, 63–4
 training programs for, 75–6
 unsupported drawing, 66
- Dual coding theory, 190
- Elaborative interrogation, 128, 199
- Elaborative verbal rehearsal, 199
- Embodied theories of cognition, 170–1
- Enacting, 167–87
 applications of, 168, 185–6
 boundary conditions for, 168, 184–5
 cognitive processes and, 171
 concrete manipulatives and, 169–70, 177–84
 (See also Concrete manipulatives)
 control groups and, 171–5, 179–84
 defined, 168–70
 dual coding theory and, 190
 effect sizes, 168, 172–4
 embodied theories of cognition
 and, 170–1
 empirical rationale, 168
 evidence for, 171–84
 examples of, 168–9
 fostering learning by, 170–1
 gesturing, 175–7
 integrating and, 171
 in math education, 179–84
 multimedia learning and, 171
 organizing and, 171
 overview, 167–8, 186–7
 physical versus virtual manipulatives,
 184
 research summary, 172–4
 in science education, 179–84
 selecting and, 171
 text comprehension, object manipulation
 and, 177–9
 theoretical rationale, 168
- Enactive mode, 170
- Evaluation, 11
- Evidence-based approach, ix
- Experimental control in research, 14
- Explanative function of drawing, 66
- Formats of imagining, 83
- Generative learning, 1–17
 assessment of learning, 3–4
 associative learning compared, 3, 5–6
 behavioral activity compared, 3
 cognitive processes, role of, 5–8
 future trends, 16–17
 historical background, 15–16
 integrating in, 5–8, 13–14
 knowledge representations, role of, 8–9
 learning outcomes, 11–12
 learning strategies in, 14–15, 194
 (See also Learning strategies)
 memory stores, role of, 8
 metacognition, role of, 9–10
